Using the Calendar

The information in this Calendar is arranged in the sequence most appropriate for use by a prospective or current student. The first sections describe procedures and regulations that apply University-wide. These are Sessional Dates, Application and Admission Procedures, Academic Regulations, Senate Policy Statements, and Financial Information.

The next sections start with a summary of the various degree programmes offered by each Faculty, followed alphabetically by the sections the Arts and Science Programme and six Faculties: Business, Engineering, Health Sciences, Humanities, Science and Social Sciences. Each section describes specific Faculty regulations and the undergraduate degree programmes by department. The programme descriptions specify which courses and what academic standing is required in order to satisfy the University's requirements for awarding a Bachelor's degree.

After consulting the programmes, you will note that some courses are 'Required' and some are 'Electives'. To determine the prerequisite requirements you must meet in order to register for a specific course, you should then look at the section Course Listings. The course listing is presented alphabetically by subject and department.

At the back of the Calendar there are two sections of information about the University services, the libraries, residences, research laboratories, computing facilities, and student activities and organizations.

The next section Undergraduate Academic Awards, lists all the awards and scholarships offered to undergraduate students by McMaster University. The regulations governing these awards are also described. Bursaries and loan funding is presented next under Supplementary Student Financial Aid.

To locate information about a specific subject, you should consult the Index at the back of the Calendar.
McMaster University

During 1987, McMaster University proudly celebrated one hundred years of active life in post secondary education, during which it grew to be one of the leading universities in Canada.

Named after Senator William McMaster, who bequeathed funds to endow a 'Christian school of learning', McMaster University grew out of educational work initiated by Baptists in central Canada as early as the 1830's. After its initial years in Toronto from 1887 to 1930, the University was moved to Hamilton and became non-denominational in 1957, although the historic Baptist connection continues through the separately incorporated McMaster Divinity College. Almost 12,000 full-time students attend McMaster University, 1,400 of whom are pursuing advanced degrees offered through the School of Graduate Studies. In addition, about 3,000 part-time students are registered in the Winter Session from September to April, and 2,500 in the Summer Session from May to August. The University also provides courses in centres located outside Hamilton, for which full credit is granted.

McMaster University is a medium-sized, full-service university offering educational programmes through six Faculties. The extensive activity in research supported by over $40 million in grants and contracts means that there are first-class libraries and sophisticated facilities. Undergraduate teaching is conducted through the Faculties of Business, Engineering, Health Sciences, Humanities, Science, and Social Sciences, and the distinctive Arts and Science programme. The Schools of Physical Education and Athletics, and Social Work are part of the Faculty of Social Sciences.

The Faculty of Humanities offers programmes in Art, Art History, Classics (Greek, Latin and Classical Studies), Comparative Literature, Drama, English, French, History, Humanities, Modern Languages (German, Hispanic Studies, Italian, Russian), Modern Languages and Linguistics, Music, and Philosophy leading to B.A. degrees, as well as a Bachelor of Music degree. Students pursuing Honours degree programmes in Comparative Literature, French, German, Hispanic Studies, Italian or Linguistics may complete and receive credit for the third level of the programme in study at a university in a country whose language is being studied.

The Faculty of Social Sciences offers B.A. programmes in Anthropology, Economics, Geography, Gerontology, Labour Studies, Political Science, Psychology, Religious Studies and Sociology. The School of Social Work offers the combined B.A./B.S.W. degree, and the School of Physical Education and Athletics the B.P.E. degree.

Bachelor of Science programmes are available in the Faculty of Science at the B.Sc., B.Sc. Honours, and B.Sc. Major levels. Programmes are offered in Biochemistry, Biology, Chemistry, Computer Science, Geography, Geology, Health and Radiation Physics, Mathematics, Materials Science, Molecular Biology and Biotechnology, Physics, Psychology, and Statistics.

The Faculty of Health Sciences has gained an international reputation for its innovative educational programming, and offers through the School of Medicine the M.D. Programme, and through the School of Nursing the B.Sc.N. degree programme. The Bachelor of Health Sciences degree may be earned in Occupational Therapy or Physiotherapy.

The Faculty of Business offers the Honours B.Com., Honours B.Com. & Arts, and B.Com. degrees, which include work in the following areas: accounting, business policy, finance, management science and information systems, marketing and international business, and human resources and labour relations.

The Faculty of Engineering offers the Bachelor of Engineering programme in Ceramic Engineering, Chemical Engineering, Civil Engineering and Computer Systems, Civil Engineering and Engineering Mechanics, Computer Engineering, Electrical Engineering, Engineering Physics, Manufacturing Engineering, Mechanical Engineering and Metallurgical Engineering.

Students may register in the Faculty of Engineering to take the five-level Engineering and Management programme which is offered jointly by the Faculties of Business and Engineering.

Most of the 1000 members of the University faculty hold doctoral degrees in the areas of their specialization. Faculty members are expected to teach both undergraduate and graduate courses and may be involved in the academic counselling of students.

The diverse academic programmes of the University are supported by some fine, and even unique, facilities. The University Library is a member of the Association of Research Libraries and contains nearly 1.5 million volumes, and has subscriptions to over 14,000 periodical titles. The Library has an extensive special collections section which includes the Berend Russell Archives, 18th Century materials and major Canadian collections. Facilities for programmes in the Humanities include modern language laboratories, music rehearsal rooms, art studios, an art gallery and seminar rooms. The work of the Faculties of Science and Engineering is supported by sophisticated facilities which include a Nuclear Reactor and Van De Graaff Accelerator. Computing facilities include mainframes, terminal clusters, and microcomputers, and support academic and non-academic applications. The Faculty of Engineering has made special arrangements for students to lease-purchase microcomputers.

The recreation and intramural programmes offer more than 30 different sports in which over 5,000 students participate. The Intercollegiate Athletic Programme provides 17 sports for men and 15 for women. The athletic facilities include a 50-metre pool, a newly surfaced 400 metre all-weather track as well as fully equipped laboratories for exercise, physiology and biomechanics.

The University is located on an attractive campus beside the Royal Botanical Gardens at the western end of Lake Ontario. The campus is reserved for pedestrian traffic. Residential accommodation on the campus is available for about 2,400 students and includes men's and women's residences as well as co-educational facilities.

Access to downtown Hamilton and the activities that a major city has to offer is easy. As part of the extensive downtown redevelopment, new facilities, which support the cultural life of the city, have been constructed in recent years. These include an Art Gallery, a Convention Centre, Hamilton Place, an auditorium which seats over 2,400 persons and includes a studio theatre, and most recently a major arena, the Cbens Coliseum. The public library includes teaching facilities, and a Downtown Information Centre opened jointly by McMaster University and Mohawk College.
Sessional Dates

For the purpose of teaching the academic year is divided into sessions as shown on the chart below.

The Winter Session, from September to April, is the session in which most undergraduate students register and classes are offered in both the day and the evening.

The February to July (Evening) Session offers courses at various times during the six-month period.

Summer (Day) Session starts at the beginning of July and ends in mid-August.

All Application Deadlines appear below the chart, as well as the dates for the McMaster Test of Writing Competence.

Application Procedures

PROGRAMMES ENTERED IN LEVEL I
McMaster University has the following Level I programmes: Arts and Science, Business, Engineering, Humanities, Music, Nursing, Physical Education, Natural Sciences and Social Sciences.

DEADLINES
A complete application comprises: an application form; all relevant transcripts; and any other documentation stipulated in the Admission Requirements section and the specific Faculty sections of this Calendar, or in letters from the appropriate Faculty or the Registrar’s Office.

Most of the programmes have limited admission and may be full before the deadlines given below. The University reserves the right, therefore, not to accept applications submitted after a programme is full and you are advised to submit your application well in advance of the deadlines given on page 4, Sessional Dates.

ENQUIRIES
The Directory for Correspondence and Enquiries on page 2 of this Calendar, provides a list of University offices and Administrative staff members to whom you may direct specific queries.

FORMER MCMASTER STUDENTS
If you have previously registered at McMaster, but did not attend last year, you should communicate with the Associate Dean (Studies) of the appropriate Faculty. If you are intending to return to the Faculty of Business or Science, this communication is a requirement. You may be required to write a letter in order to seek readmission, unless five years have passed since your last registration.

If five years have passed since you last registered at McMaster, you will be required to follow the current regulations and curriculum. You must obtain and complete an application form from the Admissions Office (Gilmour Hall, Room 113B, telephone (416) 525-9140 extension 4796). Your application will be considered by the appropriate Faculty committee.

APPLICANTS WITH DISABILITIES
The University encourages disabled persons to apply for admission to its programmes. All students are expected to satisfy the normal requirements for courses and programmes (including final examinations), although the Associate Deans (Studies) may authorize special arrangements to assist students to complete assignments, tests and examinations. Some programmes may include requirements which cannot be met by some people. Nevertheless in selected programmes an adapted course of study may be prescribed by the Associate Dean (Studies) on behalf of the Faculty following discussion with the student. Although there are many obstacles to overcome, experience has shown that students with various disabilities have been able to complete a variety of programmes at McMaster.

Applicants with disabilities are encouraged to contact the Co-ordinator for the Disabled, (Office of the Registrar, Gilmour Hall Room 113B, telephone (416) 525-9140 extension 4339) who will discuss their programmes of study and other aspects of university life, and will identify the faculty advisers to whom they should speak. Information on sources of financial assistance is also available.

A student of McMaster who incurs a permanent or temporary disability while enrolled at McMaster should consult the Associate Dean (Studies) of his or her Faculty to consider whether or not special arrangements can be made to enable that student to continue the course of studies in which he or she is enrolled.

ACADEMIC COUNSELLING FOR THOSE OFFERED ADMISSION
If you are offered admission to Level I, you will be asked to confirm that you have accepted the offer of admission and will attend the University. When we receive your acceptance of our offer, we shall send you a Registration Kit with information about the University, academic counselling and registration procedures.

Each Faculty also makes arrangements for students to visit the University and meet with a Faculty advisor to set up their programmes. Though attendance at the summer counselling and registration sessions is not compulsory, you are strongly advised to do so. If you cannot attend one of these sessions, counselling will be provided at the time of September registration.

If you are offered admission above Level I, you may contact the Office of the Associate Dean (Studies) of the Faculty offering the programme, or the Office of the Director of the programme, for academic counselling as soon as you are admitted.

Post-Degree applicants must obtain the appropriate application from the Graduate Studies Office, Gilmour Hall, Room 110.

PROCEDURE E:
This procedure applies to applicants who wish to register as Listeners. Listeners may attend classes, but do not write assignments or examinations. A Listener does not receive a grade for the course.

In order to register as a Listener, write, visit or telephone the Centre for Continuing Education, Commons Building, Room 116, (416) 525-9140, extension 4757.

PROGRAMMES ENTERED ABOVE LEVEL I

**Medicine** and **Nursing** (for holders of the Diploma R.N.): If you wish to apply to any of these programmes, refer to the Faculty of Health Sciences section of this Calendar. You should obtain the appropriate application form and make any enquiries at the Health Sciences Registry, McMaster University Medical Centre, Room 1B7, or telephone (416) 525-9140, extension 2114.

Medicine commences after three years of undergraduate study.

**Occupational Therapy and Physiotherapy**: Entry is at Level IV for those who have completed a diploma programme at Mohawk College, or its equivalent. You should obtain an application form from the Admissions Office, Gilmour Hall, Room 120, or telephone. (The numbers are given in on page 6.)

**Social Work**: The level of entry for Social Work is Level II. Admission to the Combined B.A. and Social Work Programme is by selection of the applicants who have completed, or are completing, 30 units of work including Psychology 1A06 and Sociology 1A06 and normally with a University Average of at least 6.0.

Students, enrolled at McMaster, who are interested should apply directly to the School of Social Work prior to March 1.

Students wishing to apply for transfer from another university are required to complete a Two-Tier Application procedure. This is explained in the section Faculty of Social Sciences, School of Social Work in this calendar. Application must be made in sufficient time to guarantee further consideration beyond the March 1 deadline.
Admission Requirements

The University reserves the right to change any information contained in this section at any time without notice.

The University Senate has limited enrolment in most programmes so that admission is by selection. This means, therefore, that possession of the minimum admission requirements does not guarantee admission.

Admission from Ontario Secondary Schools

We know that experimental programmes are offered in some Ontario secondary schools and welcome applicants from these programmes. If you are such an applicant and do not meet exactly the subject requirements outlined below, you should write to the Associate Registrar (Liaison and Admissions) who will ensure that your application is carefully considered.

At the time of writing, Grade 13 courses are being phased out being replaced by Ontario Academic Courses (OACs). During the transition period we shall treat the two sets of courses as equivalent. The requirements below are written in terms of OACs for which Grade 13 courses may generally be substituted.

EARLY ADMISSION FROM ONTARIO SECONDARY SCHOOLS

Early admission is granted annually in June on a date agreed upon by all Ontario universities. Early Admission is based on interim marks supplied by secondary schools in April and may be granted to an applicant who expects to acquire final standing later in the year.

If you are granted Early Admission, you must subsequently complete successfully six Ontario Academic Courses (OACs), or six Grade 13 subjects, including all required subjects. During the period OACs are being introduced, appropriate combinations of OAC credits and Grade 13 subjects, to total six, will be acceptable. In addition, you will be expected to meet the minimum average required for your programme. The University reserves the right to withdraw offers of admission to those applicants who do not meet the minimum average prescribed for the programme using the final marks. Final marks are reported to the University for students registered in OACs, but applicants may submit such marks directly to the Associate Registrar (Liaison and Admissions).

If you have final standing in each of the OACs required to enter the McMaster University programme you have chosen, you may be granted Final Admission.

ADMISSION FROM ONTARIO SECONDARY SCHOOLS

To be considered for admission you must satisfy not only the general requirements of the University, but also the subject requirements for the specific programme you wish to enter.

For an applicant from an Ontario secondary school there are three requirements:

1. the Ontario Secondary School Diploma or the Secondary School Honour Graduation Diploma with acceptable standing; and
2. a ‘weighted average’ in the OACs completed which is above the minimum specified by each programme; and
3. satisfactory completion of the subject requirements for the appropriate programme.

The ‘weighted average’ is computed as in the example below. (Credit values are assigned by the Ministry of Education; we have used fractional credits to demonstrate what a ‘weighted average’ is.)

Grade 13 or OAC Music is acceptable as a credit and the mark obtained is included in the average for admission. Alternatively, the applicant may submit certificates from a recognized conservatory of music in Grade 4 theory, or in Grade 9 practical and Grade 3 theory. Marks supplied by any acceptable Conservatory of Music may be used to determine the average for admission.

Subject Requirements for Specific Level I Programmes

In view of the changes that are occurring in Ontario secondary school curricula, we shall in the interim accept Ontario Academic Courses (OACs) and Grade 13 courses equally. We shall treat graduates of four and five year programs under the new curriculum equally.

ARTS AND SCIENCE I (Special programme)

Enrolment in the Arts and Science Programme is limited and admission is by selection. Candidates may be interviewed. Students applying from Ontario secondary schools must have:

1. One OAC English.
2. OAC Calculus.
3. Completion of additional OACs to total six credits with a weighted average of at least 75.0%. At least three of the additional OACs must be selected from among English, french, other languages, Algebra and Geometry, Finite Mathematics, Biology, Chemistry, Physics, Geography, History, and Music.

In recent years, all students offered admission to the Arts and Science Programme had a Grade 13 admission average of 80% or higher. Candidates without these qualifications who nevertheless provide evidence of unusual promise will also be considered.

Students from colleges, other universities, and other provinces are invited to apply. Each case will be considered on its individual merit.

Students Presenting Grade 13 Courses

Grade 13 courses in Algebra and in Relations and Functions will be accepted in Group 1 above.

BUSINESS I

Enrolment in Business I is limited and admission is by selection. The specific percentage required for admission varies from year to year. The following are the minimum requirements for consideration:

1. One of OAC Calculus, OAC Finite Mathematics or OAC Algebra and Geometry, Calculus or OAC Finite Mathematics is preferred.
2. One OAC English.
3. At least three additional OACs selected from among English, french, other languages, Calculus, Algebra and Geometry, Biology, Chemistry, Physics, Geography, History, Music, Accounting and Economics.
4. Additional OACs to total six credits with a minimum overall average of 70.0%.

Although the stated minimum is 70.0%, in recent years an average in the mid-70's has been required for an offer of Early Admission in June.

Students Presenting Grade 13 Courses

Grade 13 courses in Algebra and in Relations and Functions may be used in Groups 1 and 3 above, but only one of the OAC Algebra and Geometry and Grade 13 Algebra may be used.

ENGINEERING I

Enrolment in Engineering I is limited and admission is by selection. The following are the minimum requirements.

Six OACs with an average of at least 75.0% must be presented, and these must include English, Calculus, Algebra and Geometry, Chemistry, and Physics with an average of at least 75.0% in these five subjects.

As a general policy, applicants from Ontario Colleges of Applied Arts and Technology who have achieved a first-class honours standing in the
last two years of a three-year technology programme will be considered for admission to the second level of a relevant Engineering programme.

**Students Presenting Grade 13 Courses**
1. An overall weighted average of at least 75.0% in the six credits offered including
2. A weighted average of at least 75.0% in the following five Grade 13 credits: Calculus, Algebra, Functions and Relations, Physics, and Chemistry.

Applicants presenting a mixture of Grade 13 subjects and OACs, may substitute Grade 13 courses in Calculus, Chemistry, and Physics for the OACs. An applicant presenting the OAC in Algebra and Geometry must also present English; a student presenting Grade 13 would have to present Algebra, and Relations and Functions. Other mixtures of Grade 13/OAC credits which satisfy the minimum requirements will also be considered on an individual basis.

**HUMANITIES I**
Admission to Humanities I is by selection and a minimum overall average of 70.0% on six OACs is required. Required:
1. One of: OAC English I, French 1 or II, or German I with a grade of at least 65.0%, and
2. 5 additional OACs.

The Faculty of Humanities strongly recommends that students select at least one OAC from Humanities subjects (Art, Drama, English, French, French, other languages, History and Music) in addition to Requirement 1. above.

Candidates without these qualifications who nevertheless provide evidence of equivalent promise will be considered.

For students entering McMaster in 1990, no more than two OACs in any one subject will be accepted.

Art IF06: If you intend to take Art IF06, you must present a portfolio, by the end of April, and be interviewed by the Department of Art and Art History. The portfolio should contain a variety of original works in different media including works derived from both first hand observation and the imagination. During the interview students may be asked to do some drawing as an additional means of demonstrating their skills and interests. Late applications may be considered if places are available in the class.

**MUSIC I**
The academic requirements are the same as for Humanities I. In addition, applicants to Music I or to the B.A. in Music must successfully complete a music audition/examination consisting of:
1. demonstration of technique (approximately Grade 9 level of the Royal Conservatory of Music, Toronto);
2. performance (approximately 20 minutes duration) of two or three varied pieces of the candidate's choice (approximately Grade 9 level), including at least one from the 20th century;
3. ear test appropriate to the Grade 9 performance level;
4. written examination on rudiments of theory (Grade 2 level);
5. interview.

Those applying for Music I must make arrangements with the Department of Music for the audition.

**NATURAL SCIENCES I**
Admission to Natural Sciences I is by selection, and the specific percentage required for admission varies from year to year. Students with a weighted OAC average of 75.0% or better have a good chance of success in science programmes and will be given priority. The following are the minimum requirements for consideration, in 1988 and 1989.

1. OAC Calculus.
2. One of OAC Physics, OAC Algebra and Geometry.
3. One of OAC Biology, OAC Chemistry, OAC Algebra and Geometry.
4. A weighted average acceptable to the Faculty in Calculus and the two additional credits specified above. (In the last five years, an average of at least 70.0% has been required.)
5. Additional OACs to total six credits.

The Faculty of Science strongly recommends that students present at least one of OAC Biology, OAC Chemistry, or OAC Physics when meeting the above requirements.

Additional Mathematics: OAC Algebra and Geometry is also desirable.

Although an OAC English is not required for admission, a very large proportion of students entering Natural Sciences I have taken it. We strongly urge all prospective students to take OAC English I.

**NURSING I**
Admission is by selection. Possession of the minimum requirements does not guarantee admission. Normally there are ten times as many applicants as there are places in the programmes. Only those applicants who offer high academic standing are selected. Required:
1. Year 4 Mathematics (Advanced level).
2. OAC Chemistry and OAC English.
3. OAC in one of Mathematics, Biology, Physics.
4. Additional OACs (within two years prior to application) to total six credits. At least two of the additional OACs must be selected from one of the following: Economics, Physics, Mathematics, Biology, Physics, Geography, History and Music.

Health requirements for admission: Before registration, students must file information pertaining to their state of health and immunization with the University. Detailed instructions will be provided upon acceptance into the programme.

Deadlines: OAC/Grade 13 applications must be postmarked no later than May 1 in the year in which study is to commence. Non-OAC/Grade 13 applications (as described in the Section Faculty of Health Sciences, School of Nursing) must be postmarked no later than February 15 in the year in which study is to commence.

**PHYSICAL EDUCATION I**
Admission to this programme is by selection; the minimum requirements will not guarantee admission. A minimum average of 70.0% (to be computed on the basis of the six highest marks achieved in OACs) will probably be required. Required:
1. One OAC English.
2. One of: OAC Algebra and Geometry, OAC Calculus, OAC Finite Mathematics.
3. Additional OACs to total six credits.

It is strongly recommended that one of Biology, Chemistry, or Physics be included by potential applicants in their OACs.

Candidates without these qualifications who nevertheless provide evidence of equivalent promise will be considered.

**SOCIAL SCIENCES I**
Admission to Social Sciences I is by selection and a minimum average of 70.0% (to be computed on the basis of the six highest marks achieved in OACs) will probably be required. Required:
1. One OAC English.
2. One of: OAC Algebra and Geometry, OAC Calculus, OAC Finite Mathematics.
3. Additional OACs to total six credits.

Candidates without these qualifications who nevertheless provide evidence of equivalent promise will be considered.

**Nursing**
Admission is by selection. Possession of the minimum requirements does not guarantee admission. Normally there are ten times as many applicants as there are places in the programme. Only those applicants who offer high academic standing are selected. Required:
1. Year 4 Mathematics (Advanced level).
2. OAC Chemistry and OAC English.
3. OAC in one of Mathematics, Biology, Physics.
4. Additional OACs (within two years prior to application) to total six credits. At least two of the additional OACs must be selected from one of the following: Economics, Physics, Mathematics, Biology, Physics, Geography, History and Music.

Health requirements for admission: Before registration, students must file information pertaining to their state of health and immunization with the University. Detailed instructions will be provided upon acceptance into the programme.

Deadlines: OAC/Grade 13 applications must be postmarked no later than May 1 in the year in which study is to commence. Non-OAC/Grade 13 applications (as described in the Section Faculty of Health Sciences, School of Nursing) must be postmarked no later than February 15 in the year in which study is to commence.

Students presenting Grade 13 Courses
Grade 13 courses in Algebra and in Relations and Functions may be used in Groups 3 and 4 above.

**PHYSICAL EDUCATION I**

Students presenting Grade 13 Courses
Grade 13 courses in Algebra and in Relations and Functions may be used in Group 2 above.

**School of Social Work**
Admission to the School of Social Work in Level II requires successful completion of any Level I programme, including Psychology 1A06 and Sociology 1A06. Cereal includes an average of at least 6.0 at the end of Level I, and personal suitability. Applicants currently enrolled at McMaster University must make application prior to March 1 directly to the School of Social Work.
ADMISSION REQUIREMENTS

Applicants transferring from another university should consult Two-tier Applications in the section Faculty of Social Sciences, School of Social Work.

PROGRAMME TRANSFER AFTER ADMISSION

If you have been admitted to one programme and subsequently wish to transfer to another, you may be able to do so, provided you have met the subject requirements for the second programme and a place is available. If you wish to make such a transfer, consult the Admissions Office.

Admission With Other Qualifications

A. ADMISSION FROM ONTARIO COLLEGES OF APPLIED ARTS AND TECHNOLOGY

Applicants from Colleges of Applied Arts and Technology who have completed at least one year of work, are invited to apply for admission. Each case will be considered individually on its merits and the programme desired. Advanced credit will normally be given to well-qualified students who have completed at least two years of work.

In the granting of credit attention will be given to:
1. the applicant's performance in the college programme;
2. the duration of the previous programme;
3. the programmes taken at the college and the programme to which entry is sought;
4. the applicant's secondary school record.

Normally the credit will be at least one Level for a well-qualified graduate of a three-year programme, and at least 12 units for an applicant who has completed two years and performed well, provided the college work is appropriate for the university programme to which entry is sought.

Credit beyond this may be given on an individual basis where the college and university programmes are in similar areas, and where the applicant's academic record and background warrant special consideration.

B. ADMISSION FROM RYERSON POLYTECHNICAL INSTITUTE

In determining admissibility and the possibility of advance credit, due consideration is given to the admission requirements of the Ryerson programme, its length of study and nature (i.e. certificate, diploma or degree), standing in the programme and studies desired at university level. Students with high standing after one or two years of study are invited to apply.

Every application is dealt with individually so that appropriate academic credit may be granted where warranted.

C. ADMISSION FROM REDEEMER COLLEGE

For admission to McMaster University a student must present, with an appropriate average, six Year 1 courses from Redeemer College which are appropriate for the McMaster programme. Redeemer College courses in the 110-119 series are treated as equivalent to OACs for purposes of admission. Students who wish advanced credit for work completed at Redeemer College must write an examination set by McMaster for each course in which credit is sought.

D. ADMISSION FROM OTHER CANADIAN PROVINCES

We welcome applications from students from other Canadian provinces. They must meet the following minimum requirements and present subjects appropriate for the programmes as described above under Subject Requirements for Specific Level 1 Programmes. For clarification, applicants are invited to contact the offices of Student Liaison.

E. ADMISSION FROM OTHER COUNTRIES

We have, for convenience, indicated our admission requirements for applicants from selected countries.

Students from other countries should send official matriculation certificates in advance of the session. The equivalent of first-class standing may be required for some limited enrolment programmes. Clear photocopies of certificates in a language other than English should be accompanied by notarized English translations. Clear photocopies of English language certificates must be notarized. Each applicant is considered on an individual basis. Applicants are strongly advised not to come to the University until they have been informed of their acceptance.

Applicants whose native language is not English and who have not resided in an English-speaking country for four years will be required to obtain standing satisfactory to the University in the Michigan English Language Assessment Battery (MELAB). The MELAB authorization form will be sent upon receipt of a formal application for admission. If the Test of English as a Foreign Language (TOEFL) has already been written, its results may be submitted in place of the MELAB results.

Applicants from Great Britain and the West Indies require:
1. five G.C.E. subjects at least two of which must be at the Advanced Level;
2. Advanced Level subjects appropriate for the programme desired, (refer above to Subject Requirements for Specific Level 1 Programmes);
3. an average of at least 'C' in the two Advanced Level subjects for non-limited enrolment programmes.

Applicants from Hong Kong require:
1. five subjects in the G.C.E. or University of Hong Kong Matriculation, at least two of which must be at the Advanced Level;
2. Advanced Level subjects appropriate for the programme desired, (refer above to Subject Requirements for Specific Level 1 Programmes);
3. an average of at least 'C' in the two Advanced Level subjects for non-limited enrolment programmes.

Applicants from the United States of America should be students with high standing from Grade 12 of an accredited high school in the U.S. Normally high standing will have been demonstrated by 'A' standing, or scores of 600 or better in CEEB achievement examinations, or appropriate scores in the CLEP examinations. Students who do not meet these requirements may qualify for admission by completing one year of college-level work with standing acceptable to the University.

F. SPECIAL STUDENTS (MATURE STUDENTS)

Applicants who have attended university are not admissible as special students.

Full-time Study: If you do not meet the normal admission requirements described above in Admission from Ontario Secondary Schools, you may be admitted on university probation to full-time study provided you satisfy all of the following three conditions:
1. you are at least 21 years old or will be in the calendar year in which you propose to start; and
2. you have not attended secondary school on a full-time basis for at least two years; and
3. you obtain a satisfactory standing on a scholastic aptitude test (held in May, June, August and January) and are considered qualified by the appropriate Faculty Admissions Committee.

The writing of the test will be waived for those who have satisfactorily completed a certificate programme or professional designation at McMaster University or the equivalent (see K. Graduates of McMaster Certificate Programmes below). Information concerning the deadline for final application and other details may be obtained from the Associate Registrar (Liaison and Admissions).
A student who has been admitted in this manner may, nevertheless, choose to study on a part-time basis; he or she would be on university probation and follow the normal academic regulations.

Part-time Study: If you do not meet the normal admission requirements described above in Admission from Ontario Secondary Schools, you may be considered for admission as a part-time student on university probation, provided you are at least 21 years old (or will be in the calendar year in which you propose to start university study) and you have not attended secondary school on a full-time basis for at least two years. Admission is not automatic, but is at the discretion of the Faculty to which you are seeking admission.

If you are admitted, you may register as a Special Student to take one course at a time. Normally, these first courses will be Level I courses.

After you have taken 12 to 14 units, your performance will be reviewed.

1. If you have a weighted average of at least 4.0 and a grade of at least D-- in each course, you may transfer to the Level I programme of the Faculty in which you are registered.

2. If you have a weighted average of less than 2.5, you may not continue without permission of your Faculty.

3. If you meet neither of the above conditions, you may take further courses as a Special Student and your record will be reviewed after you have taken at least 24 units in total.

At the second review:

1. If you have a weighted average in all the work taken of at least 4.0, you may transfer to the Level I programme of the Faculty in which you are registered.

2. If your weighted average is less than 4.0, you will be required to withdraw.

After you have met the above conditions to clear probation, you may continue your studies on either a full-time or part-time basis.

G. STUDENTS TRANSFERRING FROM OTHER UNIVERSITIES

If you wish to transfer to McMaster University, you will normally obtain credit only for courses in which you have achieved at least a 'C' (third-class standing) average. Assessment of courses for transfer credit is subject to the guidelines of the individual Faculties.

A student transferring to McMaster University must satisfy the Residence Requirements set out in Academic Regulations. The University will not accord to students transferring to McMaster privileges which would not be granted by their own universities. Grades obtained in courses taken at another university will not be included in the various McMaster averages, and, therefore, cannot be used to raise standing.

For students transferring from a non-Canadian university, if your native language is not English and you have not resided in an English-speaking country for four years, you must obtain standing satisfactory to the University in the Michigan English Language Assessment Battery (MELAB). The MELAB authorization form will be sent upon receipt of a formal application for admission. If the Test of English as a Foreign Language (TOEFL) has already been written, its results may be submitted in place of the MELAB results.

H. GRADUATES APPLYING FOR A SECOND BACHELOR'S DEGREE

Admission is by selection.

If you have a first degree you may apply to take a second degree in the same discipline or in another discipline. The requirements are set out in the Academic Regulations. Application forms are obtainable from the Associate Registrar (Liaison and Admissions).

If you wish to enter a Second Bachelor's Degree in a subject area from the Faculty of Science, you should note the additional regulations for such a programme in the section Faculty of Science, Second Bachelor's Degree Programmes.

Graduates of other universities must supply an official up-to-date transcript with the completed application.

I. CONTINUING AND POST-DEGREE STUDENTS:

(Graduates not proceeding to a second degree or an advanced degree)

A Continuing Student is a university graduate who is not proceeding to an advanced degree, but wishes to take one or more undergraduate courses.

Continuing students who wish to take courses other than Commerce and Engineering need only to apply formally through Admissions in the first instance. In subsequent sessions they need only to submit a Registration form.

Continuing students who wish to take Commerce or Engineering courses must re-apply for each session on an application form obtainable from the Associate Registrar (Liaison and Admissions).

Applicants will be expected to have at least a 'C' (third-class standing) average, with no failures, in the work of their final year (or the equivalent, in the case of a degree taken in part-time studies), and academic records which are satisfactory to the Department and the Associate Dean (Studies) of the appropriate Faculty.

Acceptance as a Continuing Student carries no implications with respect to acceptance in the School of Graduate Studies. Students who plan to proceed to a graduate degree should apply directly to the Dean of Graduate Studies.

A Post-Degree Student is a university graduate or a person with professional qualifications who is not proceeding to an advanced degree but wishes to take one or more graduate courses.

Such students must apply to the appropriate departments and have their admissions and registrations approved by the School of Graduate Studies for each session in which they wish to take courses. These students will be registered and pay fees as undergraduates.

Acceptance as a Post-Degree Student carries no implications with respect to admission to advanced degrees, and even if such admission is granted subsequently, credit towards the advanced degree will not normally be granted for the work previously taken.

J. OCCASIONAL STUDENTS:

(Non-graduates attending undergraduate classes for other than degree credit)

Occasional students are those who:

1. do not hold a University degree; and

2. wish to take undergraduate courses; and

3. are or will be at least 21 in the calendar year in which they plan to take university courses.

An Occasional Student may take up to 12 units of work in courses at the discretion of the Dean of Studies and instructor(s) concerned in the period September 1 to August 31.

The status of an Occasional Student is reviewed after the completion of five courses, and a decision may be made at that time by the student as to whether he or she wishes to enter a degree programme or to continue as an Occasional student.

K. GRADUATES OF McMASTER CERTIFICATE PROGRAMMES

Students who have completed certificate programmes may be granted advanced credit up to maxima specified by Undergraduate Council. Such credit will normally be applied against elective courses and Faculties will take into account the subject matter of both the certificate and degree programmes.

L. ENRICHMENT PROGRAMME

High school students with first-class standing may be allowed to enrol in courses which do not duplicate the material available to them in their own high schools. Degree credit for successfully completed courses will not be granted until after students have been admitted to and have registered at McMaster University.

Applicants must provide letters of recommendation from their Principal as well as one other teacher who knows their abilities, aptitudes and interests.

Interested students are invited to contact the Office of Admissions for information regarding available courses and application procedures.

M. STUDENTS STUDYING IN CANADA ON STUDENT AUTHORIZATION (VISA)

In limited enrolment programmes up to 5% of places available in Level I may be filled by Visa students.

ADMISSION REQUIREMENTS
ADMISSION REQUIREMENTS

N. ADVANCED CREDIT
As noted in sections (A), (B), (C), and (G) above, advanced credit may be granted to applicants who have completed work at another university or college, subject to the applicant having met the minimum requirements prescribed. Advanced credit serves to shorten the degree programme.

In special situations, where a student has acquired the knowledge at another kind of institution or in a different manner such that the qualifications are difficult to assess, the University may require an examination of the student. In such a case, the Associate Dean (Studies) of the Faculty will request the appropriate academic department to assess the feasibility of such an examination. When such an examination is deemed feasible, the department involved will be responsible for deciding the appropriate method of evaluation and for administering the examination, which may consist of a variety of possible modes of evaluation, both written and oral. The examinations must be arranged by the last date for registration in the student’s initial term at the University and may not be repeated. Any credit granted as the result of such an examination will be shown on the transcript in the normal manner used for advanced credit.
Academic Regulations

The regulations which follow are the general regulations of the University. You should read both these general regulations and the Faculty regulations which may be more stringent and appear in the Faculty sections of this Calendar.

Since the Academic Regulations are continually reviewed, we reserve the right to change the regulations in this section of the Calendar. This University also reserves the right to cancel the academic privileges of a student at any time should the student's scholastic record or conduct warrant so doing.

Honours and three-level degree programmes are offered in the Faculties of Humanities, Science, and Social Sciences and in the Arts and Science Programme. Major programmes are offered in the Faculties of Science and Social Sciences. The general regulations governing these programmes appear in this section of the Calendar. The regulations governing programmes in Business, Engineering, Engineering and Management, Medicine, Nursing, Occupational Therapy and Physiotherapy, Social Work, and Physical Education appear in the appropriate Faculty sections. In the event there is a conflict between the programme regulations for these eight programmes and the general regulations in this chapter, the programme regulations take precedence.

The following regulations cover the ordinary cases. Faculties are authorized to use discretion in special situations by taking into account past practice, the spirit of the regulations, and circumstances which, in the opinion of the Faculty, are deserving of unusual treatment. Students who have irregular cases should consult the appropriate Associate Dean (Studies).

General Regulations

RESIDENCE REQUIREMENTS

While most students will complete all their undergraduate work at McMaster University, the minimum requirements set out below apply to students who take part of their work at other institutions.

In order to obtain a four- or five-level (Honours, Major, etc.) first undergraduate degree, you must complete at least two of the levels (approximately 60 units of work) beyond Level I, including the final level, at McMaster.

In order to obtain a three-level, first undergraduate degree, you may satisfy the residence requirements either:
1. by completing the final level and at least one other level (a minimum of approximately 60 units of work) at McMaster University, or
2. by completing the final level (approximately 30 units of work) at McMaster University, including at least 18 units of Area courses.

The work used to satisfy the residence requirements must be completed at McMaster University; work taken at another university on a Letter of Permission will not count toward the minimum residence requirements. The appropriate Dean of Studies may relax these requirements in special cases, and may take into account high academic standing and place of residence, among other considerations.

All the work for a second bachelor's degree must be completed at McMaster University.

REGISTRATION

The purpose of registration is to record officially your selection of programme and courses. This is done before or at the beginning of each session, and information on how to register will be sent to eligible students. Counselling is available to assist you in course selection and in some programmes is compulsory.

Selection of Courses: Before you select the courses you wish to take, please read the requirements for your programme in the appropriate Faculty sections of this Calendar. First select the courses required for your programme and then electives; ensure that you have completed the courses which are listed as prerequisites and have completed or chosen courses that are listed as corequisites. If you fail to meet the programme requirements, you will not be eligible to graduate, and, if you have not passed the prerequisite courses, you will not be able to take the course selected.

Approval of Programmes: You are responsible for the completeness and accuracy of your registration. If you try to register in a programme or courses for which you are not qualified, your registration may not be accepted and you may not receive credit in selected courses. Your programme and course selection must be approved by the Associate Dean (Studies) of your Faculty. Similarly, you must obtain approval from the Associate Dean (Studies) for any change, including the dropping of courses. You should note that in order to qualify for most scholarships, you must register for the full load prescribed for your programme and level.

Extra Work: If you wish to take more than the normal number of units prescribed for a Level, you may do so only with the permission of the Associate Dean (Studies) of your Faculty. Normally, a University Average of at least 7.0 in the immediately preceding review period will be required if extra work is to be permitted. Additional academic fees will be assessed where the extra work is approved to clear an academic deficiency.

Sequence of Courses: Courses must be taken in the sequence specified in the programmes of the University which are set out by Faculty. For programmes described by Level, this means that, when registering in a Level, you must have completed the preceding Level, or be registered in any remaining courses for that Level. At the discretion of your Faculty, substitutions may be approved, especially for part-time students, when a required Area course is not available.

Repetition of Courses: To repeat a course for which credit has been obtained, you need approval of your Associate Dean (Studies). There is no limit on the number of repetitions of a failed course. The grades for all attempts appear on the transcript and enter into the computation of the various averages; however, only one successful attempt will enter into the computation of credit earned towards your degree.

Limit on Level I Courses: After you have completed Level I, you may obtain credit in no more than 12 additional units of courses beginning with the digit 1 in a three-level degree programme, and no more than 18 additional units of courses beginning with the digit 1 in a four-level degree programme, except where special permission has been obtained from the Associate Dean (Studies). This means that in most Faculties credit may be obtained in no more than 42 units of Level I courses in a three-level programme, and in no more than 48 units in a four-level programme.

Letters of Permission: If you wish to attend another university to take courses which will carry credit towards a McMaster degree, you must obtain permission before you take the course. To do this you must seek a Letter of Permission from your Associate Dean (Studies) and pay the appropriate fee. If your Associate Dean (Studies) grants you this privilege, you should take note of any conditions that might apply, including the requirement of a grade of at least C — for transfer credit. Courses taken at another university cannot be used to satisfy the minimum residence requirements, and probably will delay graduation if permission has been granted to take the last courses for the degree at another institution.

You should note that the grades obtained in courses taken at another university will not be included in the various McMaster averages, and, therefore, cannot be used to raise standing.

Auditing Courses: A student who does not wish to have credit for a course may, with the approval of the Chairman of the Department and the Associate Dean, audit the course. The student must satisfy the prerequisite for the course, but will not complete assignments nor write the final examinations.

Cancellation of a Course: If you cancel a course during the change of registration period, it will not show on your record. After that the course will show on your record. The grade will be recorded as CAN (cancelled) if the course is cancelled up to and including the last date for withdrawing from the course shown in the Sessional Dates.
ACADEMIC REGULATIONS

After the last date for withdrawing you will remain registered in the course whether or not you attend, you will receive no refund of fees, and you will be assigned a grade based on the work submitted.

The various dates appear in the Sessional Dates at the beginning of this Calendar and are rigidly adhered to.

Withdrawal from the University: If you wish to withdraw from the University, you must consult the appropriate Associate Dean (Studies). Your identity card must be surrendered to the Associate Dean (Studies). Fees are not refunded unless this procedure is followed.

Your record in the courses being taken will be handled as outlined in the section above Cancellation of a Course.

Readmission: If you are seeking readmission to the University following withdrawal or poor academic performance, you must do so in writing. You should pay attention to any special requirements of the Faculty you wish to re-enter, including the deadline for applications. These requirements are specified in the Faculty sections of the Calendar.

In considering applications for readmission, the University may take into account both the secondary and post-secondary educational achievement of the applicant, and may require oral or written tests of the applicant, or other evidence which in the judgement of the appropriate Faculty is relevant. The Faculty may specify conditions which must be met in granting readmission.

Transfer of Credit between Faculties: Transfer of credit between Faculties is handled by the Associate Deans (Studies). Full credit may not be given at the time of transfer between Faculties and additional courses may need to be taken.

MCMaster Test of Writing Competence

This regulation is currently under review.

All students entering baccalaureate degree programmes must write a test of writing competence which is held in August, September, December, and April. New students who present an interim or final mark of at least 80.0% in an Ontario Grade 13 or OAC English course, and students entering the Occupational Therapy and Physiotherapy programmes, are exempt.

Those who fail or do not take the test will have the following notation on their records and transcripts: This student has not passed the McMaster Test of Writing Competence. This will be removed after the test is passed.

Those who do not attempt the test will not be allowed to register in or after the September following their initial registrations.

The Faculties of Engineering, Humanities, and Social Sciences have additional requirements which are noted in their Faculty sections of this Calendar.

EXAMINATIONS

The section Sessional Dates should be consulted for the dates of the final examinations in all terms and sessions. Mid-term tests for full-year Winter Session Level I courses are held in December.

Mid-term tests in December for Level I courses and final examinations for two and three-unit courses normally are of two hours duration. Final examinations for courses of four or more units normally are of three hours duration.

No examinations or tests may be held in the final week of the terms of the Winter Session except for those specifically approved by the Undergraduate Council. The specific dates appear in the Sessional Dates.

Tests and examinations organized by the Office of the Registrar may be scheduled in the morning, afternoon, or evening, Monday through Saturday. You should arrange to be available throughout the examination periods since, until the final examination timetable is published, you cannot know when during the examination period your examination may be scheduled. Cases in which examinations can be rescheduled are described at the end of this section.

If you miss an examination for medical reasons you must submit a medical certificate from Student Health Services or from a doctor to the Office of the Registrar. The certificate must define both the disability and the period of absence, and must be submitted by the end of the examination period.

If you miss an examination for any reason other than illness, you must report immediately to the Examination Section of the Office of the Registrar.

Deferred Examinations: A deferred examination privilege may be granted by your Faculty Reviewing Committee if you fail to write a final examination for a verifiable medical or compassionate reason, provided that you have submitted the certificate by the end of the examination period. Deferred examinations are conducted in the examination period which follows the period for which the privilege is granted (e.g. in April for an examination missed in December). Specific dates and deadlines appear in the Sessional Dates.

A decision to grant a deferred examination privilege will be reported on your grade report. You must confirm your intent to write a deferred examination by submitting an application to the Office of the Registrar. Specific deadline dates appear in the Sessional Dates.

Examination Regulations: These regulations apply to all examinations conducted by the Office of the Registrar. Variations may occur for instructor-conducted examinations. Students who do not observe these regulations will be required to withdraw from examinations. Special circumstances must be reported immediately to the Examination Section of the Office of the Registrar.

McMaster student photo identification cards are required at all examinations. Students who seat themselves at an examination without photo I.D. cards will be required to withdraw from the examination. Students who arrive without photo I.D. cards will be required (before being seated) to obtain a substitute card and pay the appropriate fee; no extension of the examination will be permitted to compensate for any delay encountered.

It is the responsibility of students to be present on the day and hour when an examination is scheduled. If you fail to appear at the scheduled time, you will be considered to have defaulted the examination.

Punctuality is essential and no extra time will be allowed to those arriving late. No candidate will be admitted to an examination room more than 30 minutes after the start of any session.

The University makes every effort to ensure that examinations are complete when students receive them. However, it is the student's responsibility to ensure that the examination is complete, and to draw attention to any discrepancies in the paper.

No candidate may leave the room to withdraw from an examination during the first 45 minutes of any session. Candidates must leave the room immediately after handing in their examination materials.

A student who becomes ill during an examination may be excused by a Presider but must file a doctor's certificate with the Office of the Registrar.

No conversation or any form of communication between candidates is permitted in the examination room. No books, papers or instruments may be taken into any examination room unless specifically prescribed on the examination paper. No examination books or supplies are to be removed from the examination room. Smoking is not permitted in any examination room. Handbags must be left beneath the chairs, not on the desks. The University can assume no responsibility for lost articles.

Rescheduling Examinations: Special examination arrangements will be made if you have a conflict with religious obligations. Your request with appropriate documentation from a minister or equivalent must be submitted to the Examinations Section of the Office of the Registrar at least ten working days before the scheduled examination date.

If you are a part-time student and your employer requires you to be away from the Hamilton area when you are to write an examination, you may seek special arrangements for writing your examination. Your application must be supported by a letter of explanation from an executive of your company.

Examinations are not rescheduled for purposes of travel.

Other regulations related to the conduct of, and special arrangements for, examinations appear on the examination timetable and the examination booklets.

GRADING SYSTEM

The grade for a course is normally determined by combining the grades obtained on classwork, assignments, tests, and examinations. The method for determining the final grade is to be given in the course out-
line. Unless otherwise specified in a course outline, course results determined on a percentage scale will be converted to an official letter grade as indicated in the equivalent percentage scale which follows. The results of all courses attempted will appear on your transcript as letter grades.

Since September 1982, the grading scale has been as follows:

Before submitting a failing grade, the instructor reassesses whatever examples of the student’s work are available.

For the purpose of satisfying prerequisite requirements, a grade of at least D+ is required unless otherwise stated.

You retain credit for all courses with grades of D- or better, except in those programmes for which a higher grade is specified in the programme regulations.

Weighted averages are calculated using the grade points and units for a course as shown in the example below:

**Terminology**

This glossary of terminology is arranged in alphabetical sequence.

**Area Courses** (‘A’ courses) are those courses in which the grades are used in computing the Cumulative Area Average (CAA) and the Graduation Average (GA). These courses are listed in the programme requirements.

**Course Numbers** (e.g. AA03) can be deciphered as follows: the initial digit indicates the Level of the course; the letter(s) in the middle identifies the specific courses within the Level; and the final digit defines the number of units of credit associated with the course.

**Cumulative Area Average** (CAA) is computed as shown in the example below, using the best 80% of the grades obtained in the Area courses prescribed for the programme beyond Level I, provided that at least 12 units of Area courses have been attempted since the CAA was computed.

For students re-admitted to the University after obtaining a University Average of less than 2.0, the CAA will be computed from the time of re-admission.

In Combined Honours programmes consisting of two separate components, two Cumulative Area Averages will be computed on the best 80% of the grades in each component; in other Combined Honours programmes a single average will be computed.

The grades in the following example are ranked in descending sequence. Since the student has taken 27 units, the average will be computed on the basis of the best 21.6 units (80% of 27 = 21.6). Thus, only 0.6 units of the course in which the student obtained the D+ have been included.

**Elective Courses** (‘E’ courses) are those courses which are not required courses, and which a student has free choice in selecting. These courses form part of the total number of units required for the degree programme.

**Extra Courses** are those courses taken by a student which are over and above the total number of units required for the degree programme. The grades obtained in such courses will not be included in the computation of the various averages.

**Graduation Average** is used to determine the standing of a student at the time of graduation. In the case of the three-level degree programmes it is computed on at least 24 units of Area courses, and in the case of Honours and Major programmes on at least 36 units of Area courses. For Combined Honours programmes created from two distinct components, two Graduation Averages will be computed using at least 24 units in each component; in other Combined Honours programmes a single average will be computed.

For three-level programmes the computation will be based on Level II and III Area courses (i.e. courses with a first digit of 2 or 3) and for Major and Honours programmes on Level III and IV Area courses (i.e. courses with a first digit of 3 or 4). Where a student has taken more than the minimum number of Area courses specified for the programme, the Graduation Average will be computed on the best 80% of the appropriate Area courses, or the minimum, whichever number of units is greater.

In the example below of a three-level degree programme the total number of appropriate Area course units with a course number beginning with 2 or 3 actually taken was 42 and the required number was 24, so that the average will be computed on the basis of the best 33.6 units (80% of 42 = 33.6). If the student had taken 24.30 units of appropriate Area courses, the Graduation Average would be calculated on 24 units.

GA = 298.2 / 33.6 = 8.9

Graduation Standing is assigned on the basis of the Graduation Average calculated as above. First-class standing is given to those with averages of 9.5 or higher, second-class for averages of 7.0 to 9.4, and third-class for averages of 4.0 to 6.9.

**Level** is used in two ways:

1. to describe how far through a programme a student has progressed.

   A student entering the University with the normal admission requirements will register in Level I and normally take 30 units of courses beginning with the digit 1; upon completion of Level I the student will progress to Level II, etc. The number of units required to complete a level is specified for each programme in the Faculty section of the calendar.

2. to indicate at what stage in a programme a student normally takes a given course.

   Level I courses (beginning with the digit 1) normally are taken by students registered in Level I, Level II courses by students registered in Level II, etc. The level designation is only a guideline, however, in that the academic regulations and curriculum requirements may provide for deviations from this guideline.

**Programme Probation** may be assigned to students who do not meet the normal promotion requirements on the Cumulative Area Average for
ACADEMIC STANDING

Required Courses ("R" courses) are those courses which are specifically designated for inclusion in a programme.

Reviewing Period is the time between two reviews for a student. Students records are reviewed in May, July, and August each year for those who

1. have attempted at least 18 units of work since the last review, or
2. may be eligible to graduate at the next Convocation, or
3. were admitted under the part-time mature student provision and have attempted the first 12 units of work which constitute their probationary period.

Units define the amount of credit associated with a course and are used in the computation of averages. A unit is roughly equivalent to one lecture-hour per week for one term or two hours of laboratories or seminars per week for one term. Most courses are of 3 or 6 units credit. Normally 30 or more units or work are specified for a Level; approximately 90 units or more constitute the work for a three-level degree and 120 units or more for a four-level degree.

University Average is computed on the grades obtained in all courses since the last review of student standing.

University Probation may be assigned to students who fail to obtain a University Average of 2.5 which is required for continuance at the University, but do obtain a University Average of at least 2.0. A student may be on University Probation only once, except with the special permission of the Faculty in which he or she is registered.

Programme Requirements and Academic Standing

Students entering McMaster University register in one of the following Level I programmes: Arts and Science I, Business I, Engineering I, Humanities I, Music I, Natural Science I, Nursing I, Physical Education I, or Social Sciences I. The admission requirements for specific programmes beyond Level I (e.g. Honours History) appear in the appropriate Faculty sections of the Calendar and prescribe the required standard of performance in appropriate Level I courses.

ACADEMIC STANDING

Academic standing is reviewed in May, July, and August each year for students who

1. have completed at least 18 units of work since the last review, or
2. may be eligible to graduate at the next Convocation, or
3. were admitted under the part-time mature student provision and have attempted the first 12 units of work which constitute their probationary period.

In the review of academic standing, three sets of decisions are made:

1. whether a student may continue at the University for which the University Average, calculated on at least 18 units, is used;
2. whether a student may continue in a programme for which the Cumulative Area Average, calculated on at least 12 units of area work, is used; and
3. whether a student may graduate and the classification of the degree, for which the Graduation Average is used.

Requirements for Level I

If you enter the University without advanced standing being granted, you must attempt a full load of Level I work before proceeding to the work of higher Levels. Admission to the programmes beyond Level I is based on the performance in Level I, and you must meet the normal requirements prescribed in the following section, Minimum Requirements for Continuance at the University, in order to continue at the University.

If you meet the requirements for continuance at the University after completing the Level I work, but fail to meet the admission requirements of any programme, you may continue at the University for one additional reviewing period. You will be registered as Irregular on Programme Probation.

If you again fail to qualify for admission to a programme, you may not continue without special permission.

If you are repeating Level I voluntarily, your registration status will be Clear Admission.

In the case of part-time students, the Associate Dean (Studies) has the discretion to permit students to take some of the work in the higher Levels prior to having attempted the full load of Level I. Decisions will be made on an individual basis according to the special circumstances that apply in the particular case.

Minimum Requirements for Continuance at the University

You may continue at the University if you obtain a University Average of at least 2.5, subject to meeting any special requirements of your programme. If you fail to meet the requirement of a 2.5 average, you may continue on Programme Probation for one reviewing period, provided that you have a University Average of at least 2.0. You may be on University Probation only once.

If your University Average is less than 2.0 you may not continue without permission and must seek re-admission. The decision will be made by the appropriate Faculty Reviewing Committee, and, if you are permitted to continue, you will be placed on probation for one reviewing period.

If you fail to obtain a University Average of 2.5 on a second occasion, you will be required to withdraw from the University for a period of at least 12 months. If these are special circumstances which apply, the Faculty Reviewing Committee may waive the requirement of withdrawal for 12 months.

In the event that you are eligible to continue at the University, but are ineligible to continue in any programme because the programme requirements have not been met, you require the permission of your Faculty to reregister. If permitted to reregister, you will be on programme probation and may register as irregular for one reviewing period, during which you may take up to 18 units of Area work that would qualify you to re-enter a programme. Other courses taken may be used as electives. This privilege will be granted only once.

Programme Requirements for B.A. and B.Sc. Programmes

The programme requirements are in addition to the minimum requirements prescribed above for continuance at the University.

Honours Programmes: If you obtain a Cumulative Area Average of at least 7.0 you may continue in an Honours programme. If you fail to obtain a Cumulative Area Average of 7.0 but have an average of at least 6.5, you may continue on Programme Probation for one reviewing period. You may be on Programme Probation only once. If you fail to obtain a Cumulative Area Average of 6.5, you may not continue in the programme, and must seek entry to another programme.

Graduation Standing in Honours degree programmes is awarded in three classes: first-class, second-class, and third-class. For first-class standing a minimum Graduation Average of 9.5 is required, for second-class standing 7.0 and for third-class standing 4.0.

A student who at the time of graduation fails to meet the requirements for an Honours degree may seek to transfer to another programme.

Combined Honours Programmes: All Combined Honours programmes offered by the Faculty of Science will be treated in the same manner as single Honours programmes above, thus, a single CAA and GA will be computed.

In the case of Combined Honours programmes in other Faculties two separate Cumulative Area Averages will be computed using the Area courses for each of the two components, except where the Calendar specifies that a single average will be computed. Where two Cumulative Area Averages are computed, you must meet the specified minimum averages for each of the two components of the combined Honours Programme.

Similarly, two separate Graduation Averages will be computed, and Graduation Standing will be determined by taking the mean of the two Graduation Averages, except for those programmes where a single CAA is computed, in which case one Graduation Average will be computed.

A student who at the time of graduation fails to meet the requirements for a combined Honours degree may seek to transfer to another programme.

Major Programmes: Major programmes are available through the Faculties of Science and Social Sciences.
Effective for students admitted to a Major programme after August 1987: If you obtain a Cumulative Area Average of at least 5.0, you may continue in a Major programme. If you fail to obtain a Cumulative Area Average of 4.0 but have an average of at least 3.5, you may continue on Programme Probation for one reviewing period. If you fail to obtain a Cumulative Area Average of 3.5 you may not continue in the programme and must seek entry to another programme.

Effective for students admitted to a Major programme before September 1987: If you obtain a Cumulative Area Average of at least 4.0, you may continue in a Major programme. If you fail to obtain a Cumulative Area Average of 4.0 but have an average of at least 3.5, you may continue on Programme Probation for one reviewing period. You may be on Programme Probation only once. If you fail to obtain a Cumulative Area Average of 4.5 you may not continue in the programme and must seek entry to another programme.

Graduation Standing in Major degree programmes is awarded in three classes: first-class, second-class, and third-class. For first-class standing you must have a minimum Graduation Average of 9.5. For second-class standing you must have an average of at least 7.0; and for third-class standing 4.0. If you fail to obtain an average of 4.0 but have an average of at least 3.5, you may continue on Programme Probation for one reviewing period. You may be on Programme Probation only once. If your Cumulative Area Average is less than 3.5, you may not proceed in the programme and must transfer to another programme.

Graduation Standing in these programmes is awarded in three classes: first-class, second-class, and third-class. For first-class standing you must have a minimum Graduation Average of 9.5. For second-class standing you must have an average of at least 7.0; and for third-class standing 4.0. If you fail to obtain an average of 4.0 but have an average of at least 3.5, you may continue on Programme Probation for one reviewing period. You may be on Programme Probation only once. If your Cumulative Area Average is less than 3.5, you may not proceed in the programme and must transfer to another programme.

TRANSFER BETWEEN PROGRAMMES
If you are registered in Level III of an Honours or Major programme and wish to transfer to a three-level degree programme in order to be eligible for graduation at the next Convocation you must apply to the appropriate Associate Dean (Studies) by March 1 for Spring Convocation and by September 1 for Autumn Convocation. If permission is granted, you must go to the Office of the Registrar and complete a graduation information card.

If you wish to transfer from one programme to another, you must have a Cumulative Area Average with standing appropriate for the programme you wish to enter. The Faculty must specify whether you need to take additional course work to obtain a specialist background equivalent to that of students already in the programme. You should discuss the practicability of transfer with the appropriate Associate Dean (Studies).

SECOND BACHELOR'S DEGREE PROGRAMMES
For admission to a second undergraduate degree programme you must hold a first undergraduate degree. The minimum admission requirements and programme of study for the second degree depend on both second and first degrees and whether they are in the same subject.

Credit for courses taken towards the first degree may be applied to the second degree, except in the case of some professional programmes (e.g. Bachelor of Education and Bachelor of Library Science). Some additional regulations are applied by the Faculty of Science involving cognate disciplines e.g. Mathematics and Statistics. These are described in the section Faculty of Science in this Calendar.

Extra courses taken while you are registered in a first degree programme may, with the approval of the Faculty, be applied to the second degree programme.

All the additional work to obtain the second degree must be taken at McMaster University. Decisions on admissions and the courses required to complete the second degree will be made by the appropriate Faculty.

Credit from the first two degrees cannot be applied to a third undergraduate degree. To obtain a third undergraduate degree it would be necessary to take the complete programme, i.e. approximately 90 units for a three-level degree and approximately 120 for a four-level degree.

Students who do not qualify for a Second Degree programme on the basis of the relevant course work completed during their first degree studies may, with the permission of the department and appropriate Associate Dean (Studies), be allowed to qualify on the basis of further work undertaken as Continuing students considered in conjunction with their previous performance in the area courses.

Students who are allowed to qualify for admission on the basis of further work taken as Continuing students at McMaster University may, with the permission of the Department and the appropriate Associate Dean (Studies), have this course work applied toward the fulfillment of the requirements for the second degree. Facilities wishing this provision to apply only to second degree programmes in another subject may make that restriction in the Faculty regulations. (The Faculty of Science has so indicated.)

A student in a Second Degree programme must meet the minimum requirements prescribed in earlier sections for the University Average, the Cumulative Area Average, and the Graduation Average, with the exception that, where the number of Area courses prescribed is less than the minimum normally prescribed for inclusion in the Graduation Average, all Area courses taken in the second degree programme will be included in the computation of the Graduation Average. If less than 12 units are required to compute the Graduation Average, no Graduation Standing (first class, etc.) will be given.

Major Degree Following a Three-Level Degree in Same Subject: For entry into a Major Degree programme in the Faculty of Science, a Graduation Average of at least 4.0 in the first degree programme is required for those entering a major programme before September 1987; thereafter an average of at least 5.0 will be required.

If admitted, you must take at least 30 units of work as specified by the department(s); normally this will include the Level IV specialist courses and courses from Levels II and III to provide specialist background equivalent to that of students already in the programme.

Honours Degree Following Major or a Three-Level Degree in the Same Subject: For entry, a Graduation Average of at least 7.0 in the first degree programme is required.

If admitted, you must take at least 30 units of work specified by the department(s); normally this will include the Level IV specialist courses and courses from Levels II and III to provide specialist background equivalent to that of students already in the programme.

Second Degree in Another Subject: For admission to the second degree you must meet the admission requirements for the programme you wish to enter (e.g. an average in specified courses of at least 7.0 for entry to an Honours programme and of at least 4.0 for entry to other programmes of the Faculties of Humanities, Science, and Social Sciences). The average used for admission would normally be based on Area courses for, or courses related to, the programme you wish to enter.

If the second degree is a Bachelor of Arts or Bachelor of Science degree, you must complete at least 30 units of work specified by the department offering the programme. If the second degree is a Major or Honours degree, the minimum is 60 units.

DEANS' HONOUR LIST
Each year outstanding students are recognized by their being named to the Deans' Honour List for which a minimum average of 9.5 is required. In the case of full-time students, they must have completed in a Winter Session at least 30 units (36 in the case of Engineering). The Deans have the power to exercise discretion where the full load for a particular level of a programme is less than 30 (36 in Engineering e.g. Civil Engineering and Engineering Mechanics, Level IV, 34 to 36 units). In the case of a full-time student the minimum average of 9.5 must have been obtained on the University Average. For those who have studied part-time on a continuous basis, the assessment will be made at the reviewing periods where 30, 60, and 90 units have been completed, and at graduation.

(Continued)

Graduation
When you register for the session in which you expect to complete the graduation requirements, you must file a graduation information card. If
ACADEMIC REGULATIONS

you fail to do so at the time of registration you must do so in the Office of the Registrar before February 15 for Spring Convocation and before September 8 for Autumn Convocation.

Graduates must take the degree at the Convocation immediately following the completion of the appropriate degree work.

A Programme Standing will be determined for students who have fulfilled the graduation requirements in May of each year. The Programme Standing will be determined on the basis of the Graduation Average and will appear on the transcript. The notation will show your rank in the graduating class for the programme and the number of students graduating from that programme in May.

Senate Policy Statements

The University has defined its expectations of students in both the academic and non-academic life of the University community, and developed procedures to ensure that all members of the community receive equitable treatment. Each year at registration, you will receive the document Senate Policy Statements which contains the following:

Statement on Academic Ethics
The University’s Statement on Human Rights
Policy Statement on Applicants and Students with Disabilities
Code of Conduct
Student Appeal Procedures
Policy on Undergraduate Student Access to Final Examinations
General Regulations for McMaster University Library

The following provides a brief summary of the major policies contained in the Senate Policy Statements. Complete versions of the policies may be obtained from the Senate Secretariat, Room 104, Gilmour Hall.

ACADEMIC ETHICS
The Senate Statement on Academic Ethics explains the expectations the University has of its scholars. Some Departments and instructors have also developed more specific rules and regulations designed to maintain scholarly integrity. It is the responsibility of each instructor to make students aware of these expectations.

It is the responsibility of each student to adhere to the Senate Statement on Academic Ethics (and to any additional rules and regulations developed by Departments and Instructors), not only in coursework, tests and examinations, but also in other scholarly activities such as laboratory research, and the use of computing and library resources.

Breaches of academic ethics fall into two general categories:

a. a disregard for the norms of scholarly integrity, without necessarily intending to deceive; and

b. academic dishonesty, which is an intentional disregard for the norms of scholarly integrity.

Minor breaches of academic ethics that fall into category (a) are normally drawn to students’ attention by instructors and may result in penalties such as a reduced mark or a zero for the piece of work.

Academic dishonesty is not qualitatively different from other types of dishonesty. It consists of misrepresentation by deception or by other fraudulent means.

The Senate Resolutions on Academic Dishonesty define academic dishonesty and specify the procedures to be followed in the event that a student is charged with academic dishonesty. Penalties include expulsion from the University. A copy of the Senate Resolutions may be obtained from the Senate Secretariat, Gilmour Hall, Room 104.

APPEAL PROCEDURES
The University has a responsibility to provide fair and equitable procedures for the lodging and hearing of student complaints arising from University regulations, policies and actions that affect them directly. The procedures described in the Student Appeal Procedures are intended to provide a mechanism to remedy injustices and may culminate in a hearing before the Senate Board for Student Appeals.

Students are strongly encouraged, however, to pursue any complaint or grievance through informal channels, before following the formal procedures. Experience has shown that many complaints can be resolved satisfactorily through informal communication.

Students should seek remedies for their grievances as promptly as possible, and must do so within six months of the end of the academic year in which the grievance has occurred. The end of the academic year is August 31.

Decisions on admission or re-admission to an undergraduate degree programme cannot be appealed, except under the conditions described in the next paragraph. Applicants may, however, ask for a review of a decision on admission or re-admission or on the granting of transfer credits. To initiate such a review, the applicant must write to the Registrar within one week of receiving the original decision and state the grounds for seeking the review.

Applicants who have been refused re-admission to an undergraduate degree programme may appeal the decision, using the procedures described in the Student Appeal Procedures, if the following two conditions have been met:

i. the applicant withdrew from the University voluntarily; and

ii. the applicant alleges error or injustice on grounds other than academic judgement.

CODE OF CONDUCT
McMaster University is a community dedicated to furthering learning, intellectual inquiry, and personal and professional development. Membership in the community implies acceptance of the principle of mutual respect for the rights of others and a readiness to support actively an environment conducive to intellectual growth, both for individuals and for the whole University.

The Code of Conduct contains regulations which outline the limits of conduct considered to be consonant with the goals and the well-being of the University community, and define the procedures to be followed in cases of violation of the accepted standards.

STATEMENT ON HUMAN RIGHTS
McMaster University wishes to ensure the full and fair implementation of the principles of the Ontario Human Rights Code which states:

Every person has a right to equal treatment with respect to services, goods and facilities, without discrimination because of race, ancestry, place of origin, colour, ethnic origin, citizenship, creed, sex, sexual orientation, age, marital status, family status or handicap.

The University Senate has approved Procedures on Human Rights which outline the procedure to be followed in the event that a student has a complaint regarding an alleged violation of human rights.

STUDENT RECORDS
The University has developed operating procedures which are designed to protect the confidentiality of undergraduate student records. The following have been defined as public information: student name, student number, student grade, sex, degree earned and when, undergraduate awards earned and when, and, whether a student is full-time or part-time. Additional information may be used by the various offices and officials of the University where a need to know has been established.

Information about applicants for admission who do not gain admission will be kept for a limited period only. For those admitted to the Nursing and M.D. Programmes a separate admission file is maintained.

While a student may have access to his or her file, documents recoulted from a third party in confidence are not normally placed in the student’s file, but, in those cases where they have been, they will not be disclosed.

The operating procedures also define the circumstances under which information may be disclosed to: judicial and law enforcement agencies, the Ontario Universities Application Centre, Statistics Canada, agencies charged with the recovery of funds provided under OSAP or CSL, and secondary schools.

Transcripts are issued only with the consent of the student. Addresses will not be released except under provisions noted above.
Financial Information

Upon receiving official acceptance from the Registrar's Office and upon completion of registration, a student is responsible for the full payment of all fees as defined in this Calendar.

Payment of academic fees does not mean acceptance to the University or approval of a student's registration. Academic requirements have to be fulfilled before registration is completed.

New students may not forward academic fees to the Business Office until they have received their Letters of Acceptance.

Students should not send residence fees unless notification of acceptance has been received.

Students are responsible for the fees for each academic session and no fee credits can be transferred from one academic session to another. It is the policy of the University not to accept registrations until all previous accounts are paid in full. Any payments received are therefore first applied to previous debts and any balances to the most recent debts.

The University reserves the right to amend the fees at any time.

Undergraduate Fees

Fees are composed of an academic fee and supplementary fees. Academic fees are calculated on a per unit basis up to the maximum stated under Tuition Fee in the fee schedules, below. Full supplementary fees are payable by full-time students, i.e. those taking 24 units or more.

Fees for full-time students cover the student's portion of the tuition cost, registration, library, diplomas, campus health services, student organizations, and athletics (except for the facilities fee), and are payable by all students.

Fees do not cover the Ontario Health Insurance Plan, which is the personal responsibility of the student.

No caution deposits are required, but students will be assessed for any unavoidable breakage.

The University reserves the right to assess other supplementary fees or charges in some courses or programmes to recover in part or in full the cost of providing course materials, and accommodation and transportation for field trips, and the costs of breakages.

Fees charged by the University are approved annually by the Board of Governors for the academic year commencing September 1. Fees shown below are for 1988/89. The current fee schedule, including the refund schedule, for any given academic year will be sent to each student during the summer preceding September registration.

Payment of Fees

Full-time tuition and residence/food plan fees are payable in full during the registration period in August/September. Prepayment of fees will significantly simplify the registration process (see below Prepayment of Fees). Students unable to make full payment at the time of registration may be registered by paying the minimum first payment which is equal to approximately 70% of the total fee at the time of registration, and the balance no later than January 15. Interest is added monthly to the unpaid balance.

Part-time fees must accompany registration.

Cheques must be made payable to McMaster University. Any cheque not accepted and returned by the bank will be subject to an additional administrative charge of $20.00.

Failure to comply with payment dates will result in the University adding interest at the rate of 1.5% per month on overdue fees.

In addition, refusal to pay fees, or any part of the fees, may result in the student being refused admission to the University or being requested to withdraw with all privileges suspended. Fees to the date of withdrawal will be assessed.

No student may be eligible for any examination results, transcripts, or the payment of awards of any kind, until fees and any other accounts owed to the University are paid, or until acceptable arrangements are made.

PREPAYMENT OF FEES

All tuition, supplementary, residence and food plan fees and any debts from prior sessions should be received in the Business Office prior to registration.

For your payment to appear on University records by the time you register, pre-payment must be received at the University by:
August 1 for Level I students who will be registering in early August;
August 15 for Upper Level students who will be registering in early September.

Students must complete the fee prepayment form and send it together with a cheque, which may be post-dated to September 1, to the Business Office. The student identification number should be written on the back of your cheque. By following this procedure you will significantly reduce the time needed to complete Registration.

Students who are expecting to receive financial assistance under the Ontario Student Assistance Programme or are to be recipients of scholarships, bursaries or other awards, may arrange fee deferments on the day of registration, provided they can show satisfactory evidence that such awards have been granted. All fees are payable upon receipt of financial assistance.

Any known differences between the amount of the award, and minimum first payment must be paid by September 1.

Students being sponsored by outside organizations, e.g. Vocational Rehabilitation Services, R.C.M.P., Canadian Armed Forces, etc., are required to bring copies of fee authorizations at the time of registration.

Students who are unable to pay their fees at the time of registration should contact the Business Office Room 208 Gilmour Hall prior to registration.

REFUNDS

Students who are forced by illness or other personal reasons to withdraw from courses are entitled to a partial refund of their fees. A refund schedule is included with the fee schedules which are sent in the summer preceding September registration. Refunds are determined by the date on which notices of withdrawal in writing are received at the office of the Dean of the appropriate Faculty. All refunds of tuition are reduced by an administrative charge of $50.00 for full-time students and $10.00 per 6 units or part for part-time students.

Miscellaneous Fees

The following fees were in effect for the 1988-89 academic year, and are over and above assessed academic fees, supplementary fees, and residence fees and food plan fees.

EXPENSES
To some extent, expenses are controlled by the student (e.g., clothing, living expenses and amusement). The essential costs for a typical student in Level I not living at home will be approximately $4,500 depending upon the amount the student chooses to pay for room and board.

Costs Other Than Fees For Students in Clinical Courses: Students must buy uniforms, shoes, stockings and uniform accessories, for clinical practice. Uniforms and accessories are ordered under the direction of the School of Nursing and the approximate cost is $100. White shoes and hose are also necessary.

Registration Examinations: Graduates of the B.Sc.N. programme can expect to pay fees ($176.00 in 1986) to write the comprehensive registration examinations administered by the College of Nurses of Ontario.

Insurance of Personal Property on University Premises: The University cannot assume any responsibility for the personal property of any employees, faculty members, or students, nor does the University carry any insurance that would cover their personal property.

In most cases, personal fire insurance policies provide an automatic 10% extension covering property away from home. It is suggested that insurance policies be inspected to be certain that this is the case.

Death and Dismemberment Insurance: The University considers that the purchase of insurance coverage for death and dismemberment is the individual responsibility of its students. It must be remembered that the greater part of a student’s day is usually devoted to activities not related to a University course. There are various insurance plans available and although the University does not specifically endorse any one of these plans, it has no objection to the explanatory brochures and literature being posted on bulletin boards or distributed in appropriate places. Students involved in laboratory or field work are particularly encouraged to investigate such coverage.

Student Financial Aid

Financial aid to help students meet the costs of post-secondary education is available from the federal and provincial governments through the Ontario Student Assistance Programme (OSAP) which consists of five plans.

- Ontario Study Grant Plan
- Canada Student Loans Plan
- Ontario Student Loans Plan
- Ontario Special Bursary Plan
- Ontario Work-Study Plan

To be eligible for assistance under each of these plans, a student must be a Canadian citizen or permanent resident of Canada and fulfill certain requirements for residency in Ontario. The amount of financial aid awarded is determined by a need-testing procedure.

It is strongly recommended that students apply by June 30th to ensure that their applications are processed by September. It currently takes 8-10 weeks to process a normal OSAP application.

All of the government programs described in this text are modified and restructured annually to reflect the changing needs of students from the Province of Ontario. It is therefore recommended that you discuss your specific financial requirements with a counselor in the Student Financial Aid Office as early as possible.

ONTARIO STUDY GRANT PLAN

A plan which primarily helps students from less affluent families complete undergraduate work and not incur significant debt. Grants under this plan are not contingent upon a student taking a government loan and are limited to a student’s first eight academic terms of post-secondary study. After that, generally at professional or graduate levels of study, students are expected to assume more responsibility for educational costs or to turn for assistance to student loans plans outlined below.

- Grants are available to both full-time and part-time students, who are resident in Ontario, and enrolled at recognized post-secondary institutions anywhere in Canada.

ONTARIO STUDENT LOANS PLAN

A federal government plan, administered by the provincial government, which provides loans to needy students for completion of any level of study. Maximum assistance under this plan is about 60% of standard costs at an Ontario institution.

- Loans are available to full-time students enrolled at recognized post-secondary institutions anywhere in the world.

ONTARIO STUDENT LOANS PLAN

A plan which provides loans to full-time students whose financial needs are not fully covered by the Canada Student Loans Plan. This plan also helps part-time students enrolled in programmes not eligible for the Canada Student Loans Plan.

- Loans are available to students enrolled at recognized post-secondary institutions in Ontario only.

ONTARIO SPECIAL BURSARY PLAN

A plan which helps exceptionally needy students (usually single parents) who are unable to attend school full-time but need post-secondary training to improve their job prospects. A student participating in this plan will not receive assistance through the Ontario Study Grant Plan.

Bursaries are available to such part-time students enrolled at recognized post-secondary institutions in Ontario only.

ONTARIO WORK-STUDY PLAN

A recent addition to the OSAP package which is intended to complement the original four plans. It offers part-time jobs to needy students during the school year to help meet exceptional costs, often unexpected, not recognized under OSAP. It also helps students who lack the resources expected under OSAP criteria or, whose assessed need under OSAP is not met because of grant/loan maximums or, who do not wish to borrow further due to high debt load. To be eligible, students must have applied for and received some OSAP funding in the current year.

Costs of this plan are shared equally by the provincial government and a local sponsoring agency which must be a non-profit organization, such as the university.

Provision exists for a university graduate to take a second bachelor's degree. This programme is normally shortened. An application for admission is necessary for entry to a second degree programme, and it should be submitted by the application deadlines. (See Application Procedures and Academic Regulations, Second Bachelor's Degree Programme.)

**Combined Programmes**

There is the opportunity to combine two subjects of study within one Faculty, or between two Faculties. Further information can be obtained by referring to the Faculty Sections of this Calendar, or contacting the appropriate Associate Dean (Studies).

**Courses Instructed in French**

In order to facilitate the intellectual development of students in the French language, the University will attempt to offer one or two courses annually where French is the language of instruction. These courses are open to all students providing they have the necessary prerequisite, and a suitable working knowledge in the French language.

**ELECTIVE COURSES AVAILABLE TO LEVEL 1 STUDENTS**

The following is a list of courses available as Electives to Level 1 students, provided that the student has met any prerequisites, and subject to enrolment limitations. Normally, a student may select up to 6 units in any particular subject (excluding Mathematics, of which up to 12 units may be taken). A brief description of each course can be found under the appropriate Department, within the section Courses Listed in this Calendar:

Academic Regulations

The Arts and Science Programme has been designed for students who wish to use their university years to further their intellectual growth through a study of the methods of inquiry, and significant achievements in both arts and sciences. The Programme also allows for substantial specialization in a discipline or problem area through the use of electives. A.N. Whitehead expressed the philosophy of the Arts and Science Programme when he wrote:

"What education has to impart is an intimate sense for the power of ideas, for the beauty of ideas, and for the structure of ideas, together with a particular body of knowledge which has peculiar reference to the life of the being possessing it."

(The Aims of Education and Other Essays, 1929).

The core curriculum consists of courses offered by the Council of Instructors of the Arts and Science Programme, together with other courses offered by Departments. The core curriculum is designed to meet three major objectives:

1. to increase understanding of biological and physical sciences, behavioural sciences, technology, and the arts;
2. to develop skill in the use of the written and spoken word, and in quantitative reasoning; and
3. to foster the art of practical inquiry into problems of public concern.

Meeting the last of these objectives is the aim of inquiry seminars which begin in Level I and continue in upper levels. To investigate with skill and insight a serious public issue, such as world population growth in relation to food supply, requires an understanding of the methods and findings of many disciplines; it calls on a liberal education. Moreover, acquiring skill in such investigations requires practice in formulating issues, searching out evidence, and bringing the insights of academic disciplines to bear on the interpretation of evidence. Developing the art of practical inquiry is an important goal of the Arts and Science Programme.

The Programme offers preparation for advanced study in many professional schools including those of law, medicine, health administration, business, and journalism.

Students in this Programme who wish to prepare for graduate study in an academic discipline should consult with the appropriate department concerning requirements. In general, preparation for graduate study may be accomplished by combining the honours core Arts and Science curriculum with a concentration of electives in the intended area of graduate study.

Combined honours programmes which are available in many subjects (see specific programme descriptions below), combine the core curriculum of the Arts and Science Programme with a prescribed set of courses in a subject. Completion of a combined honours programme can be expected to satisfy course requirements for admission to graduate study in the particular subject. Students are advised, however, to contact the Department in which they are contemplating graduate study to obtain information on admission requirements.

Students who plan to seek employment directly upon graduation may wish to consider concentrating their electives in such work-related subjects as economics, psychology, computer science, business or applied mathematics.

Academic Regulations

The Arts and Science Programme is governed by the General Academic Regulations of the University, (see the Academic Regulations section of this calendar) and the regulations described below.

The Programme begins in Level I and leads to the degree, Bachelor of Arts and Science (B. Arts Sc.) on completion of Level III or B. Arts Sc. (Honours) on completion of Level IV. The four-level Programme provides an increased opportunity for specialization through electives and through an individual study or thesis course. Continuation in the Programme requires honours-level performance, and the requirements for Level III are the same whether or not Level IV is undertaken.

Registration in Level I of the Arts and Science Programme is limited to approximately sixty students.

Inquiry Seminar Requirements

Inquiry seminars are comprised of Arts and Science 1C06 and a variety of topics offered as Arts and Science 3C06. Arts and Science 1C06 must be completed in Level I.

Students intending to complete the B. Arts Sc.(Honours) degree are required to complete 12 units of upper-level inquiry seminars as either two topics of Arts and Science 3C06, or one topic of Arts and Science 3C06 and an additional 6 units in a course or courses approved by the Director that study another age or culture.

Students intending to complete the B. Arts Sc. degree are required to complete 6 units of an upper-level inquiry seminar as one topic of Arts and Science 3C06. An additional 6 units (one topic) of inquiry seminar may be taken as an elective.

Combined Honours

Students in the Arts and Science Programme may undertake combined honours programmes in many disciplines within the Faculties of Social Sciences, Humanities or Science. The combined programmes with Physics and with Biology are five-level programmes. Combined programmes that are already established are described below. Students are encouraged to consult the Director of the Arts and Science Programme for consideration of other possible combinations.

Registration: Registration in each level of any combined honours programme requires the written approval of the Director of the Arts and Science Programme and the appropriate Departmental Counsellor.

Individual Study/Thesis: Students in the B. Arts Sc.(Honours) Programme are required to complete either Individual Study or Thesis (Arts and Science 4A06, or 4C06). This requirement can be, and in some cases must be, met by a Department course in the combined discipline.

Level I Standing

Level I standing is computed as a weighted average of the best 80% of the 30 units of Level I work. Continuation beyond Level I requires a weighted average of at least 7.0. In the case of some combined honours programmes, the weighted average must include specified courses. These courses are indicated in the programme descriptions below.

Continuation Beyond Level II

For students in the B. Arts Sc.(Honours) and B. Arts Sc. Programmes, continuation beyond Level II requires a Cumulative Area Average (CAA) of at least 7.0.

For students in a combined programme of Arts and Science and Another Subject, continuation beyond Level II requires an overall CAA of at least 7.0 in all courses taken in Levels II, III and IV, and a CAA of at least 7.0 in the work taken in the combined discipline.

Area Courses

All courses completed by students who are in Level II, III, IV or V are Area courses unless designated as extra at the time of registration, or otherwise stated in the Programme descriptions below.

Programme Probation

A student whose Cumulative Area Average is less than 7.0 but no lower than 6.5, and who has not been placed on probation before, may be granted Programme Probation at the discretion of the Director. A student whose Cumulative Area Average is less than 6.5 will not be granted Programme Probation.

Graduation Average

The Graduation Average for all Arts and Science programmes will include Arts and Science 2A06 and 2D06. For combined programmes, a single Graduation Average will be computed.

Faculty of Business

G.W. Torrance/B.A.Sc., M.B.A., Ph.D., P.Eng., Dean of Business
N.C. Agarwal/B.A., M.A., Ph.D., Associate Dean of Business (Academic)
M.W.L. Chan/B.Sc., M.A., Ph.D., Associate Dean of Business (External Relations)
C. Bertzien-Bilkvist/B.A., M.A., Undergraduate Student Advisor
B. Pegg, Programme Assistant

The Faculty of Business offers three programmes, each of which spans four levels of study. The Honours Commerce programme, which leads to the Honours Bachelor of Commerce (Honours B.Com.) degree, provides substantial concentration in business subjects beyond the essential core of studies. The Honours Commerce and Economics programme, which is offered in conjunction with the Department of Economics, leads to the Honours Bachelor of Commerce and Arts (Honours B.Com. & Arts) degree. This programme combines extensive amounts of work in both Commerce and Economics. The Commerce programme, which leads to the Bachelor of Commerce (B.Com.) degree, contains the essential grounding in business subjects and promotes the broadening of horizons through studies in Social Sciences, Humanities and Science. These three programmes are referred to collectively as the Commerce programmes.

In addition, the Faculty of Business participates in a five-level programme for the Bachelor of Engineering and Management (B.Eng.Mgt.) degree. This programme provides full course of study in Engineering and includes a complete core of business subjects. Details concerning the B.Eng.Mgt. programme and its academic regulations are given in the Faculty of Engineering section of this Calendar.

Also, the Faculty of Business participates in the Committee of Instruction and offers courses for the B.A. programme in Labour Studies which is described in the Faculty of Social Sciences section of this Calendar.

The Commerce Programmes

In Level I, a student who wishes to pursue any of the Commerce programmes establishes a foundation in computer science, economics, mathematics and psychology or sociology, and takes additional elective work. While this course of study is prescribed in Business I, a student who establishes a similar background in the Level I programme of another Faculty may also be considered for admission to Level II (Commerce II). Such a student should see the Undergraduate Student Advisor of the Faculty of Business.

A student must gain admission to Commerce II in order to proceed towards the Honours B.Com., Honours B.Com. & Arts, or B.Com. degrees. In Level II a wide range of business subjects (accounting, finance, marketing, organizational behaviour, and statistical analysis for business) are introduced and further coursework in economics is required. Elective work is taken from non-Commerce courses.

The Commerce programmes diverge at Level III. While the same core of required Commerce courses is completed in Levels III and IV, the mix of work taken over these Levels differs. In Levels III and IV of the Honours Commerce programme, about three-quarters of the work is in Commerce courses, with the remainder of the load coming from electives outside the Faculty. The Honours Commerce and Economics programme contains approximately equal amounts of work in Commerce and Economics, and about three-quarters of the work is in Commerce courses, with the remainder of the load coming from electives outside these disciplines. In Levels III and IV of the Commerce programme, about one-half of the course work is in each of Commerce subjects and non-Commerce electives.

PART-TIME STUDIES

The Commerce programmes may be taken through part-time studies. A part-time student is permitted to take a maximum of 18 units in any Winter Session (September to April) and a maximum of 12 units in any Summer term (May to August). It should be noted that only a few Level IV Commerce courses are offered in evenings or in summer sessions.

CONTINUING STUDENTS

Graduates of McMaster's three Commerce programmes or one of the Engineering and Management programmes may take as part-time students, Level III and IV Commerce courses (not previously taken) with permission of the Associate Dean (Academic). Such permission will be given only if normal prerequisites are satisfied and if space permits after meeting the requirements of in-course students. (see Admission Requirements I. Continuing and Post-Degree Students).

With this exception, Commerce courses are not open to Continuing Students. Such students are eligible for courses designated Business.

SECOND UNDERGRADUATE DEGREE

A student with an undergraduate degree will not be admitted or readmitted to any of the Commerce programmes. Such a student may wish to apply for admission to the M.B.A. programme.

CREDIT TOWARDS THE M.B.A. AND PROFESSIONAL DESIGNATIONS

If appropriate academic standing has been attained in undergraduate courses, credit may be given toward the Master of Business Administration degree. Normally, this will reduce the M.B.A. programme to one additional academic year beyond the Honours B.Com., Honours B.Com. & Arts, B.Com. and B.Eng.Mgt. degrees.

Credit toward a variety of professional designations can be obtained within the Commerce programmes and the Engineering and Management programme. The professional accounting designations C.A., C.M.A. and C.G.A. are awarded by the Institute of Certified Accountants of Ontario, the Society of Management Accountants of Ontario and the Certified General Accountants Association of Ontario, respectively, while the designation C.P.M. is awarded by the Ontario Personnel Association.

In the Honours Commerce programme, all the educational requirements and exemptions for the three professional accounting designations, that can be fulfilled during University study, may be accounting designations, that can be fulfilled during University study, may be obtained by selecting appropriate elective courses and taking the allowed extra courses (see Extra Courses below). For example, 39 of the 45 credits of designated course work for academic prequalification for the C.A. designation can be completed within the Honours Commerce programme; the remaining 6 units of credit may be taken at McMaster as Extra (see Extra Courses below) courses while studying in the Honours Commerce programme or upon its completion. The requirements for the designation C.P.M. can be substantially fulfilled in the Honours Commerce programme.

In the other programmes, the possibility of obtaining credit towards professional designations is more limited. For example, 30 credits towards the C.A. designation may be obtained in the Commerce programme; further units of credit may be taken as Extra courses (see Extra Courses below). Further units of credit may also be taken after graduation (see Continuing Students above).

* NOTE: Currently the Institute of Certified Accountants of Ontario is reviewing the educational requirements for the C.A. designation. As a result of this review, changes to the number of credits required are likely to be forthcoming.

Information concerning credit towards these professional designations can be obtained from the Office of the Undergraduate Student Advisor of the Faculty of Business.
Academic Regulations

A student enrolled in any of the Commerce programmes, in addition to meeting the General Academic Regulations of the University, shall be subject to the following Faculty Regulations:

CUMULATIVE COMMERCE AVERAGE
The Cumulative Average for the Commerce programmes is termed the Cumulative Commerce Average (CCA) and is the weighted average of grades in all courses, including non-Commerce courses, attempted subsequent to admission to Commerce Level II or admission to the Commerce programme, excepting those courses designated at registration as Extra.

CONTINUATION IN PROGRAMME
Continuation in Levels III and IV: The Cumulative Commerce Average begins with grades attained in Level II.

A student who maintains a Cumulative Commerce Average of at least 7.0, with no more than 6 units of F grades, may continue in the Honours Commerce programme. A student who maintains a CCA of at least 7.0, with no more than 6 units of F grades, and maintains a minimum of at least 7.0 cumulative weighted grade-point average in all Economics courses taken beyond Economics 1A06, may continue in the Honours Commerce and Economics programme. A student who maintains a CCA of at least 4.0, with no more than 6 units of F grades, may continue in the Commerce programme.

A student whose Cumulative Commerce Average is less than 4.0 or who has more than 6 units of F grades in the CCA may not continue in any of the Commerce programmes.

There is no probationary status in any of the Commerce programmes.

CHANGE OF PROGRAMME
A student may transfer between Commerce programmes prior to entering Level IV, provided that, after consultation with the Undergraduate Student Advisor of the Faculty of Business, it has been determined that the academic requirements of the new programme have been met, and an acceptable revised programme of work can be established. This revised programme of work must be approved by the Associate Dean (Academic). Approval will not be granted for a transfer from Level III Commerce into a Level IV Honours Commerce programme.

Transfer from the Honours Commerce and Economics programme into Economics programmes should be discussed with the Department of Economics.

Students in good standing in the Engineering and Management programme may transfer to a Commerce programme with the permission of the Associate Dean (Academic). The conditions for eligibility for entrance to the Commerce programmes are the same as for students registered in the Faculty of Business.

WORK LOAD
A full-time student must complete a 30-unit load in each Winter Session. Advance credit and credit earned during Summer Sessions may be used to reduce this load requirement. Such reductions will be applied as late as possible in a student’s programme. In any Winter Session, a student may not register for more than 30 units (including Extra courses) without the approval of the Associate Dean (Academic). Such approval will not be given to a student with a Cumulative Commerce Average below 9.0.

REPEATED COURSES
Any failed course (F grade) must be repeated if it is an explicitly required course for the programme, or must be repeated or replaced if it is not explicitly required. The grades for both the failed course and its repetition or replacement, as appropriate, will be included in the calculation of a student’s CCA. Voluntary repetitions of non-Commerce courses in which passing grades have been previously attained are designated as Extra courses. (See Extra Courses below)

EXTRA COURSES
Courses in addition to those which constitute the student’s programme must be designated Extra at registration and the grades obtained in such courses affect neither eligibility for continuation in the programme nor graduation standing. In addition, the units are not included in those required for graduation. The designation Extra can be neither added nor removed retroactively. Extra courses may be taken only upon successful completion of Level III of any of the Commerce programmes. No Extra courses may be scheduled in a manner which would delay completion of a student’s programme. Commerce courses previously taken cannot be repeated as Extras.

LEVEL OF REGISTRATION
A student is required to register in the lowest Level for which more than 6 units of work is incomplete. Work of the next higher Level may be undertaken only when necessary to fill a programme load.

RE-ADMISSION
A student in Level II, III or IV of a Commerce programme who becomes ineligible to continue in the Faculty may apply for re-admission to the Commerce programme in a subsequent calendar year.

Re-admission is not guaranteed.

Application for re-admission must be made in writing to the Associate Dean (Academic) by April 30 of the year for which re-admission is desired. This application should explain why the student would expect to succeed in the programme if re-admitted.

A student who is re-admitted after having become ineligible to continue in a Commerce programme must repeat all the courses of the Level at which he became ineligible to continue unless specific course exemptions are granted. The earliest possible session for re-admission is the session starting in September of the year following the year in which the student became ineligible to continue. The computation of a student’s CCA begins anew at such re-admission.

PREREQUISITES FOR COMMERCE COURSES
Prerequisites for Commerce courses are specified in the course listing. A grade of at least D must be attained to satisfy any course prerequisite.

COURSE CHANGES
It is the responsibility of the student to ensure that the programme of work undertaken meets the requirements for the degree. All course changes must be made through the Office of the Undergraduate Student Advisor and will be subject to the deadline dates established by the University (see Sessional Dates section of this Calendar).

GRADUATION
The Graduation Average (GA) is the weighted average of all grades in courses taken for Levels III and IV of the programme, excluding Extra courses. A minimum GA of 4.0 is required for graduation from any of the Commerce programmes.

First-class standing requires at least a 9.5 GA.

Second-class standing requires at least a 7.0 GA.

Third-class standing is specified for students with a GA of less than 7.0.

FORMER COMMERCE STUDENTS
If you were previously registered in a Commerce programme and in good standing but did not attend last year, you must write to the Associate Dean (Academic) to seek readmission. The letter should explain your activities (academic and otherwise) since you were last registered. If five years have passed since you were last registered at McMaster, please see Application Procedures-Former McMaster Students section of the calendar.

Graduates of McMaster’s Commerce or Commerce and Economics programmes should refer to the Faculty of Business-Continuing Students section of the calendar.

INQUIRIES RE: ACADEMIC REGULATIONS
A student seeking relief from the Faculty of Business regulations must apply in writing, with appropriate documentation attached. Guidelines for such requests may be obtained from the Office of the Undergraduate Student Advisor (Kenneth Taylor Hall, Room 118).

A.C. Heidebrecht, B.Sc., M.S., Ph.D., P.Eng., Dean of Engineering
M.A. Dekainish, B.Sc., M.A.Sc., Ph.D., P.Eng., Associate Dean of Engineering (Academic Programmes)
B.L. Allen, B.Sc., Ph.D., P.Eng., Associate Dean of Engineering (External Relations)
P.E. Wood, B.A.Sc., Ph.D., Director of Engineering I
J. Zywina, Undergraduate Student Advisor

An engineer, as originally defined, meant an ingenious person. The engineer today is concerned with the creation of devices, systems, and structures for human use. In this role of creator and innovator, the engineer finds resourcefulness and capacity for invention at the heart of the practice of engineering. Modern society is challenged to advance from heedless exploitation of our world to an era of exercising responsible control of the environment, and the useful management of both the products and wastes of our industries. Engineering education at McMaster provides a host of choices which lead to this creative and fulfilling role in society.

Four-year programmes are offered leading to the Bachelor of Engineering Degree in the following fields of specialization:

- Ceramic Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Engineering Physics
- Manufacturing Engineering
- Materials Engineering
- Mechanical Engineering
- Metallurgical Engineering

A five-year programme, also leading to the Bachelor of Engineering Degree, is offered in:

Civil Engineering and Computer Systems

In addition, and in conjunction with the Faculty of Business, five-year programmes leading to the Bachelor of Engineering and Management degree are offered in:

- Ceramic Engineering and Management
- Chemical Engineering and Management
- Civil Engineering and Management
- Computer Engineering and Management
- Electrical Engineering and Management
- Engineering Physics and Management
- Materials Engineering and Management
- Mechanical Engineering and Management
- Metallurgical Engineering and Management

* The offering of these programmes is contingent upon approval by the Ontario Council on University Affairs.

McMaster baccalaureate degree programmes in Engineering are accredited by the Canadian Engineering Accreditation Board of the Canadian Council of Professional Engineers (CEAB), except the new programmes in Civil Engineering & Computer Systems and in Materials Engineering which will be examined at the next accreditation. Provincial Engineering Associations accept the accreditation as a major requirement for admission to the qualification Professional Engineer.

At McMaster, engineering students take a common Level I programme comprising Mathematics, Physics, Chemistry, Engineering Design, Computation and a complementary studies elective. The specialized programmes are entered at Level II. Students interested in one of the Engineering and Management programmes must take Economics 1A06 as their elective in Level I.

Programmes offered by the Faculty of Engineering include three types of elective courses, which are governed by regulations, as follows:

**Complementary Studies Electives** are broadening courses which are not in subjects that are cognate with Engineering programmes (with the exception of Economics 1A06 for Engineering and Management programmes).

A total of 21 units of complementary studies electives is required in all B.Eng. programmes. Of these, 6 units must be selected from courses that are designated as being above Level I.

The Associate Dean of Engineering (Academic Programmes) must authorize each student's complementary studies elective courses from an approved list, published each spring and available from his office.

**Technical Electives** are Engineering or Applied Science courses in subjects relevant to the particular Engineering programme.

**Commerce Electives** are required in Level V of Engineering and Management programmes. With appropriate selection of these electives, students may obtain exemption from certain course requirements on submission of a form to the Associate Dean of Engineering (Academic Programmes) in Engineering programmes. Students who achieve a University Average of 4.0 or greater, but have not satisfactorily completed all Engineering I work may be admitted to a Level II programme, but may be precluded from taking Level II courses for which the missing work is prerequisite.

**Cumulative Engineering Average**

The Cumulative Area Average for Engineering programmes is termed the Cumulative Engineering Average (CEA), and is the weighted average of all courses attempted and repeated subsequent to admission to the first Engineering programme, at Level II or above, with the exception that the CEA begins anew at readmission after being ineligible to continue in a programme. Those courses required in Engineering I or designated as Extra are excluded from the CEA.

**Continuation in Programme**

A student who obtains a Cumulative Engineering Average of at least 4.0, with no F grades, may continue in an Engineering programme. A student whose Cumulative Engineering Average is at least 3.5, but less than 4.0, or is at least 4.0 and includes any F grade in the work of the most recent Reviewing period, and who has not previously been placed on probation, may, at the discretion of the Faculty and subject to the availability of space, continue on Programme Probation.

A student whose Cumulative Engineering Average is less than 4.0 and who has not been granted probation, or whose Cumulative Engineering Average is less than 3.5, is ineligible to continue in Engineering.

**The McMaster Test of Writing Competence**

Students admitted to Engineering I on or after September 1986, must have passed the McMaster Test of Writing Competence before they will be permitted to register in any programme in the Faculty of Engineering other than Engineering I. Students accepted into an Engineering pro-
gramme above Level I, who were not registered at McMaster University in the Session immediately previous, must pass the Test within one year of that acceptance in order to be eligible to continue in that programme.

SEQUENCE OF COURSES
Courses must be taken in the sequence specified in the Calendar for the Programme. Students must register for all outstanding work of one Level before attempting work for a higher Level.

REPEATED COURSES
All failed courses (grade ‘F’) must be repeated if they are required courses for the Engineering programme or may be replaced if they are not courses explicitly required. Courses may be repeated only following failure (F) or inability to achieve prerequisite standing for a required course or approved technical elective course.

EXTRA COURSES
Courses in addition to those which constitute the degree programme in which the student is registered may be designated Extra at registration; and the grades obtained in such courses will neither be included in the Cumulative Engineering Average nor the units in those required for graduation. The designation Extra cannot be removed retroactively.

LEVEL OF REGISTRATION
A student is required to register in the lowest Level for which more than six units of work is incomplete. Work of a higher Level may be undertaken only with the permission of the Associate Dean of Engineering (Academic Programmes).

WINTER SESSION WORK LOAD
The Faculty of Engineering has set a minimum Winter Session work load of 34 units for Engineering I students. The work load for other students must be approved by the appropriate Department Chairman and the Associate Dean of Engineering (Academic Programmes). In order to qualify for most scholarships, students should register in the full load of work prescribed by programme and level.

READMISSION TO ENGINEERING
A student who is ineligible to continue may apply for readmission to Engineering after not less than one year of practical work experience. Application for readmission must be made to the Associate Dean of Engineering (Academic Programmes) in March of the year for which readmission is desired. The decision is based on experience in the summer before entering Level IV. Readmission is not guaranteed. A student who is readmitted after being ineligible to continue at a given Level must repeat all the courses of that Level, unless specific course exemptions are granted explicitly in the letter of readmission. The computation of the Cumulative Engineering Average begins anew at such readmission.

PROGRAMME CHANGES
It is the responsibility of the student to ensure that the programme of work undertaken meets the degree requirements for that programme. All programme changes must be made through the office of the Associate Dean of Engineering (Academic Programmes) and will be subject to the deadline dates established by the University (see Sessional Dates section of this Calendar).

GRADUATION
A minimum Graduation Average of 4.0 is required for Graduation from all B.Eng. and B.Eng.Mgt. programmes.

Honours standing at graduation will be granted to a student whose Graduation Average (GA), based on all Level II, IV, and V courses (i.e., those labelled 3--, 4-- or 5--) and not designated Extra, is at least 10.0. This same Graduation Average will be used to determine a Programme Standing for all students fulfilling the graduation requirements in May of each year.

The concept of Health Sciences Education is based on the view that health is a broad subject encompassing not only the problems of ill-health but also the impact of biology, environment and the way of life on health. Each of the health professionals has specific educational requirements, but by training together in shared facilities there exists an opportunity to establish effective interprofessional working relationships.

The programmes in the Faculty attempt to meet these goals through a variety of teaching/learning approaches. Emphasis is placed on problem-based, small-group learning experiences. Other approaches to learning, including interdisciplinary educational experiences, are used where appropriate.

In July 1974, the School of Nursing and the School of Medicine were brought together to form the Faculty of Health Sciences. The Faculty offers the following undergraduate degree programmes: Doctor of Medicine, Bachelor of Science in Nursing, Bachelor of Health Science (Occupational Therapy or Physiotherapy).

In addition to its undergraduate programmes the Faculty of Health Sciences also has the responsibility for the Postgraduate (Internship and Residency) Education programmes, and through the School of Graduate Studies, offers M.Sc. and Ph.D. programmes in: Growth and Development, Blood and Cardiovascular systems, Neuroscience, an M.Sc. programme in Design Measurement and Evaluation, and an interprofessional M.H.Sc. programme for experienced health professionals who wish advanced preparation as clinicians, educators, and programme developers.

Interprofessional programmes, postprofessional in nature and leading to an academic diploma are offered through the Continuing Health Sciences Education programme. These include: Behavioural Sciences, Occupational Health and Safety.

The Faculty of Health Sciences collaborates with the Division of Health Sciences at Mohawk College in educational programmes for other health professions based at the College.

Research programmes encompassing the broad spectrum of health have been established including basic and applied research and various aspects of health care delivery. The graduate programmes in medical science are related to the various areas of health research.

The Health Sciences Centre at McMaster provides educational and research facilities for medicine, nursing and other health professions. It includes a teaching hospital (The McMaster University Medical Centre, a division of the Chedoke-McMaster Hospitals) with extensive ambulatory clinics for primary and specialized aspects of patient care. The building has been designed to bring into close proximity the programmes for the various health professions and to integrate the facilities for education, research and patient care in the Faculty of Health Sciences.

In addition to the Health Sciences Centre, education, research and clinical programmes are based at the Hamilton General Hospital, the Henderson General Hospital, the Hamilton Psychiatric Hospital, St. Joseph's Hospital and the Chedoke division of the Chedoke-McMaster Hospitals. Extensive use is made of community hospitals. A satellite programme has been developed with institutions in North-western Ontario.

In accordance with the plan to co-ordinate the development of specialized health services among the Hamilton and District hospitals, the Postgraduate Education programmes in medicine have been developed on a regional basis.

Admission and Registration

Application to any programme in the Faculty of Health Sciences implies acceptance on the part of the applicant of the admission policies and procedures, and the methods by which applicants are chosen for the Health Sciences programmes.

Registration in any programme in the Faculty of Health Sciences implies acceptance on the part of the student of the objectives of that programme and the methods by which progress toward the achievement of those objectives is evaluated.

The following describes the regulations governing admission and registration in the Health Sciences programmes, and should be considered in conjunction with specific admission requirements described on the following pages for the School of Medicine (M.D.), the School of Nursing (B.Sc.N.) and the Occupational Therapy and Physiotherapy programme (B.H.Sc.).

The following application deadlines are strictly adhered to. Deadline dates are for consideration of admission to a programme in the following September.

The University reserves the right to change the admission requirements at any time without notice.

As places in the degree programmes of the Faculty of Health Sciences are limited, admission is by selection of applicants, and possession of published minimum requirements does not guarantee admission. The University, therefore, reserves the right to grant admission to a limited number of students, and to refuse re-admission to any student whose academic performance or general conduct has been unsatisfactory, or who has withdrawn from the programme for a period in excess of one academic year.

An evaluation of Unsatisfactory in the School of Medicine, signifies that the student has failed to meet these objectives and the University may, at its option, because of the Unsatisfactory evaluation, require the student to withdraw from the School at any time.

The University reserves the right to require the withdrawal of a student should his or her conduct so warrant.

Falsification of Admission Information

An applicant supplying documentation or evidence which, at the time, or subsequently, is found to be falsified will be withdrawn from consideration. Any student admitted to the programme having submitted false evidence will be asked to withdraw.

Health Regulations for Admission

Before registration, students must file with the University evidence of a recent health examination and chest X-ray. More detailed medical information will be required upon acceptance into the programme.

Clinical Course Requirements

Where, in the opinion of the faculty, the performance of the student in clinical practice may jeopardize or endanger the welfare of the patient or the patient's family, the student may be removed from clinical expe-
rience any time during the academic year, until continuation in the course is reviewed.

Information and Counselling
A member of faculty is selected for each student in the September of entry to a degree programme and provides each student with advice on evaluations, electives and other educational needs throughout the programme. In the M.D. programme, the advisor is also responsible for the selection of all evaluations and completion of the final transcript. Changes in advisors are entertained as each student becomes acquainted with faculty not only the teaching hospital and extensive ambulatory care and research facilities at the McMaster University Medical Centre division of the Chedoke-McMaster Hospitals, but also the clinical teaching units at each of the major Hamilton hospitals and community health care centres.

The undergraduate medical programme for the M.D. degree was initiated in 1969, graduating its first students in May of 1972. At present, 100 students are admitted to the programme each year. The academic programme operates on an eleven-months-a-year basis and students qualify for the M.D. degree at the end of the third academic year. The curriculum has been designed to involve medical students with a broad range of human health problems throughout their education and to prepare them for effective working relationships with patients, colleagues, and society.

Postgraduate training programmes have been established in: Anesthesia, Community Medicine, Emergency Medicine, Family Medicine, Internal Medicine, Laboratory Medicine, Obstetrics and Gynecology, Pediatrics, Psychiatry, Radiology, and Surgery.

More details on these postgraduate programmes are available from the Assistant Registrar (Health Sciences).

A Northern Ontario medical programme has been developed in cooperation with the Thunder Bay Medical Society and physicians in towns in Northwestern Ontario. Clinical training opportunities exist in community hospitals adjacent to Hamilton. Excellent clinical experience in these settings is part of both the undergraduate and postgraduate medical programmes.

Graduate programmes leading to the M.Sc. and Ph.D. degrees are offered in Biochemistry and in Medical Sciences. Graduate studies are based on the health research programmes in the school, with special emphasis on: Blood and Cardiovascular Disorders, Growth and Development, Neurosciences and Design, Measurement and Evaluation. An M.H.Sc. (Health Care Practice) programme is interprofessional in nature and is for experienced health professionals who wish advanced preparation as clinicians.

THE MEDICAL PROGRAMME
The three-year programme in Medicine uses an approach to learning that should apply throughout the physician's career. The components have been organized in a relevant and logical manner with early exposure to patients. Flexibility is ensured to allow for the variety of student backgrounds and career goals.

General Objectives
The aim of the undergraduate medical programme is to provide students with a general professional education as physicians. The programme enables students to build on previous education and experience, using available learning resources and opportunities. The competencies achieved by graduates will qualify them to proceed to further postgraduate training. While most graduates will be involved directly with the care of individual patients, it is expected that some will choose careers concerned with the health of populations and the development of new knowledge.

The overriding objective to be achieved is the demonstrated ability to identify, analyze and manage clinical problems in order to provide effective, efficient, and humane patient care.

Enabling objectives consisting of knowledge, skills and personal qualities to be achieved are the following.

Knowledge: To acquire and put into practice concepts and information required to understand and manage health care problems. The study of human structure, function and behaviour will be guided by an analysis of the determinants of health and illness. A spectrum of factors will be considered in both the external and internal environments of individuals, when deciding on preventive, therapeutic, rehabilitative and supportive management.

Skills: To acquire and use the following skills:
1. Critical Appraisal Skills: The application of certain rules of evidence to clinical, investigational and published data, in order to determine their validity and applicability.
2. Clinical Skills: The ability to acquire, interpret, synthesize and record clinical information in managing the health problems of patients, considering their physical, social and emotional function. Included is the use of the clinical reasoning process.
3. Self-Directed Learning Skills: The ability to identify areas of deficiency in one's own performance, find appropriate educational resources, evaluate personal learning progress, and use new knowledge and skills in the care of patients.

Personal Qualities: To recognize, develop and maintain the personal qualities required for a career as a health professional. Acquiring the authority to intervene in the lives of patients carries with it the obligation to act responsibly.

Research Methods:
1. toward oneself: to recognize and acknowledge personal assets, emotional reactions, and limitations in one's own knowledge, skills and attitudes, and to build on one's assets to overcome areas of limitation;
2. toward patients and their families: to be able, under appropriate supervision, to take responsibility for the assessment and care of patients and their families;
3. toward colleagues: to contribute to productive communication and cooperation among colleagues engaged in learning, research, or health care;
4. toward the community: to contribute to the maintenance and improvement of the health of the general population.

Learning Methods
To achieve the objectives of the undergraduate medical programme, students are introduced to patients with health problems within the first level of the curriculum. In this way, students understand the relevance of what they are learning, maintain a high degree of motivation and begin to understand the importance of responsible professional attitudes.

The students are presented with a series of major biomedical problems requiring for their solution the understanding of underlying physical and biological and behavioural principles, the appropriate collection of data and the critical appraisal of evidence. In each problem area, the student may select the most appropriate problems to ensure the understanding and application of fundamental concepts. This flexibility provides an opportunity for early consideration of individual interests and goals. The faculty function as learning resource personnel or guides to learning in the particular parts of the programme. Learning by a process of inquiry is stressed. Small group learning resources are utilized in the fashion most appropriate to achieve the programme's goals.

The class is divided into small groups, each with a tutor. In the tutorial session students present and discuss what they have learned and in proposing ways to overcome the latter.

Students admitted to the undergraduate medical programme have the responsibility and privilege of taking an active role in the planning and evaluation of the education programme. Through representation on many policy-making and implementation committees, students can influence decisions regarding philosophy, faculty recruitment, and curriculum design. It is expected that all students will participate in the con-
Continuing reappraisal and improvement of the programme. Such participation is a hallmark of the School.

Student Evaluation Methods
The evaluation format has been designed to complement learning in the undergraduate medical programme. Evaluation methods have been developed to measure how well the student achieves the stated educational objectives in the various units of the programme. Continual evaluation of the student occurs within the tutorial setting with input from students, their peers, and the tutor. Two problem-solving exercises are required in each unit. At the completion of the unit, the tutor is responsible for the final summary statement of student learning progress. The tutor prepares a written summary of observation of the student's performance in the tutorials and associated activities. A copy of the evaluation summary is given to the student and to the student advisor while the original is kept in the student's evaluation file.

The Curriculum Plan
The curriculum of the undergraduate medical programme comprises 6 units, an Elective Programme and Revision Time. The Curriculum Plan showing the relative proportion of time accorded to these units is illustrated below.

| Unit 6 includes 16 weeks of elective time, plus 4 weeks of Christmas time.

There is less of a division between the preclinical parts and the clinical parts of the M.D. Programme than in more traditional schools. Patient contact and clinical skills development start in Unit 1 and increase throughout the programme. The scientific background for understanding patients' problems, while more intensively studied in earlier units, should continue as it is relevant to the care of any patient in any clinical situation.

Programme Outline for Unit 1: The goal of Unit 1 is to provide an introduction to the undergraduate medical programme, emphasizing a global view of the determinants of health and illness. Factors from both the external and the internal environment will be considered as they determine the clinical presentation in an individual. Concepts and information from three knowledge perspectives will be studied: the population perspective, the behavioural perspective, and the biological perspective. Students will begin to acquire basic skills of critical appraisal, clinical skills and in particular learning skills. During this unit, students will become familiar with the health care system in the Hamilton region and the opportunities for learning which it offers. This unit is the foundation for all the following units and not a specific preliminary to Unit 2.

Programme Outline for Units 2-4: These units are concerned with the systematic study of human structure, function and behaviour and is organized around systems of the body, as follows:

- **Unit 2**: Cardiovascular, Respiratory and Renal Systems
- **Unit 3**: Hematologic, Gastroenterologic and Endocrine Systems
- **Unit 4**: Neurologic, Locomotor and Behavioural Systems

There is an emphasis on critical appraisal of evidence; on clinical skills and learning skills.

Programme Outline for Unit 5: This unit is organized on the overall theme of The Life Cycle. Health care problems from the community are studied. Major themes include reproductive health, child and adolescent health, occupational and environmental health and geriatric health. Students have an opportunity to consolidate their clinical, learning and critical appraisal skills in anticipation of the clerkship. There will be opportunities to make field trips to a variety of health care settings and agencies.

Programme Outline for Unit 6: The Clerkship: In this component of the programme, students participate in the direct care of patients, and the management of health and illness. All prior objectives apply, but the clerkship is devoted to actual patients. Students become self-sufficient in contemporary medicine, but are able to sense when today's medicine becomes out-of-date by adopting good habits of learning and assessment.

The Clerkship Programme consists of rotations in Medicine and Surgery, Family Medicine, Psychiatry, Pediatrics, and Obstetrics and Gynecology, and in elective time of which one-half must be spent in clinical medicine. The compulsory components of the clerkship are carried out in teaching practices and in the teaching hospitals in the Hamilton region, including McMaster and Chedoke Divisions of Chedoke-McMaster Hospitals, Hamilton General Hospital, Henderson General Hospital and St. Joseph's Hospital. The elective experience can be spent in various activities utilizing local, regional or distant resources.

Electives: Electives are an integral part of the Curriculum Plan. They may be considered the epitome of self-directed learning since students must define their goals for electives which are appropriate for their own learning objectives. The responsibility for planning electives rests with each student in collaboration with the student advisor.

The two types of electives in the undergraduate medical programme are:

1. **Block Electives**: These are sections of the curriculum for full-time elective activities. Block Electives occur after Unit 3 (6 weeks), after Unit 4 (6 weeks), and during the Clerkship (16 weeks).
2. **Horizontal Electives**: These are undertaken concurrently with other parts of the curriculum. Horizontal electives are entirely voluntary and are not required for completion of the programme. It is particularly important that the student's advisor be involved in all decisions concerning horizontal electives.

3. **Enrichment Electives**: These are arrangements and in place for students from each class to devote longer periods of time (from 6 to 12 months) to the pursuit of special academic experiences. The intent is to encourage students to explore possible careers in special "frontier" areas of medicine and health care. Examples include: research training and experience; community health projects; international health opportunities. These experiences are often undertaken following Unit 5 or during the first half of Unit 6. Some experiences may provide partial funding (e.g. by student research fellowships).

Regulations for Licence to Practise
A degree in medicine does not in itself confer the right to practise medicine in any part of Canada. To acquire this right, university graduates in medicine must hold a certificate of the College of Physicians and Surgeons of the province in which they elect to engage in practice. Students in Ontario medical schools are not required to register as students with the College of Physicians and Surgeons of Ontario. Students intending to practise outside Ontario are urged to consult the licensing body of that province regarding registration.

The College of Physicians and Surgeons of Ontario does not conduct a licensing examination. It, however, issues enabling certificates that allow the final year student in an Ontario medical school the right to take the Medical Council of Canada examinations. After having passed this examination the graduate must provide evidence of having completed one year of acceptable postgraduate experience in a hospital approved by the College of Physicians and Surgeons of Ontario before being licenced to practise in this province.

Canadian Intern Matching Service
The Matching Service is a clearing-house designed to help final year Canadian medical students obtain the first post-M.D. year programme of their choice, and to help programme directors obtain the students of their choice. It provides an orderly method for students to decide where to train and for programme directors to decide which applicants they wish to enrol. For both students and directors, it removes the factors that generate unfair pressures and premature decisions.
Further information is available from the Office of the Assistant Registrar (Health Sciences).

ADMISSION POLICY FOR THE MEDICAL PROGRAMME

Since the admission policy is reviewed annually, the admission requirements may change. The following are the requirements for admission in September 1990.

Because of the nature of the selection procedures, the School of Medicine enforces deadlines strictly and requires that all required documentation be provided by the specified deadline. Applicants must follow the instructions precisely.

Selection Procedure

To meet the current and anticipated health needs of both individuals and the community, a student in the programme requires the ability to examine biological, behavioural and population perspectives on health problems and to develop personal characteristics and attitudes required for a medical career. The candidate is selected with these criteria in mind. Faculty, current students and members of the community are normally involved in the review of applications.

Application to the medical programme implies acceptance by the candidate of the admission policies and procedures, and the methods by which candidates are chosen for the programme. If you fail to comply with the instructions or to meet the deadlines your application will be cancelled.

Applications must be submitted by November 1, 1989. Approximately 400 applicants will be invited for interviews in Hamilton in March or April on the basis of their academic records and an assessment of their autobiographical letters. From this group a class of 100 is selected.

Application Procedure

All application materials are to be submitted directly to the Ontario Medical School Application Service (OMSAS).

By November 1, 1989, applicants must submit:

1. a completed application and the application fee;
2. the Autobiographic Sketch on page 4 of the application form; and
3. a 4-page autobiographical letter as described in the application package.

Applicants must ensure that the following documents are received at OMSAS by December 29, 1989:

1. transcripts from all post-secondary institutions attended;
2. the letters of reference.

Applications for which information is not received by the deadlines will not be considered.

Academic Eligibility

By September 1, 1990 applicants must have completed a minimum of 3 years' work in an accredited university with at least a second-class 'B' average overall. Two of the three years must be above level one. A 'year' is the full block of work specified for a year or level of the programme in the appropriate university calendar. If requested, applicants must provide evidence that the requirements above have been met.

The OMSAS cumulative converted average will be calculated for work completed prior to November 1st. A 'B' average is an OMSAS cumulative converted average of at least 2.50. Higher weighting may be given to more recent work.

An applicant who has completed a diploma at a CEGEP must have completed by September 1, 1990 at least 2 additional years at an accredited university, one of which must be a full programme of courses above level one.

Graduate work may be taken into account to establish eligibility.

Other candidates who have completed the requirements for a baccalaureate degree with at least a second class 'B' average overall before November 1, 1989 will be considered.

Academic Assessment

Course grades will be used to calculate two averages:

1. a simple average in which the work of different years is treated equally.
2. a weighted average in which the last recorded academic year is given a weight of three, the next to last recorded academic year is given a weight of two, and all other years are given a weight of one.

The higher of the two averages is used. (Please note that the OMSAS Verification Report will provide only the simple average).

Applicants must report on the OMSAS Academic Record Form all grades received in post-secondary courses in which they have ever registered. If the university programme required work terms, applicants should ensure that the employers' evaluation of the work terms is included in the application. Failure to report any courses, programmes or grades will result in cancellation of the application.

An applicant presenting academic work which cannot be converted to the OMSAS values by using the OMSAS Conversion Table will be assigned the median grade point average of the eligible applicant pool.

Completed graduate work offered by an applicant will be assigned the median grade point average of the eligible applicant pool.

Applicant's Letter and Autobiographic Sketch

The Applicant's Letter and the Autobiographic Sketch (page 4 of the application form) will be assessed by a team normally composed of a faculty member, a student and a member of the community. The assessment is based on personal characteristics which the Undergraduate Medical Programme Admission Committee believes are important for the practice of medicine and for a student to be successful at McMaster.

The score resulting from this assessment of personal qualities is weighted equally with the grade point average in the decision of who will be invited to an interview.

Geographical Consideration

The bona fide place of residence will be used in the following order of priority to select applicants for interview:

1. Hamilton Health Region and Northwestern Ontario (defined as west of Wawa to the Manitoba boundary);
2. the rest of Ontario;
3. the rest of Canada; and
4. other countries.

To qualify for 1 or 2 above, an applicant must be a Canadian citizen or permanent resident by November 1, 1989 and have resided for at least 3 years in the area since the age of 14. Attendance at a university in the area for at least 3 years by the date of possible entry to the programme satisfies the second requirement.

Any other applicant who is a Canadian citizen or permanent resident qualifies for 3.

All other applicants qualify for 4. While all applicants in category 4 are considered, they may be selected for interview only if they are judged on each criterion to be clearly superior to other applicants.

The geographical status is determined from the Autobiographic Sketch. Applicants must, therefore, note their assessment of the geographical status clearly at the top of the Autobiographic Sketch form. Applicants may be asked to provide evidence of geographical status.

Interviews

Approximately 400 applicants will be invited to Hamilton for interviews. The selection of these applicants is based on academic achievement, personal qualities as judged by reading the Applicant's Letter and Autobiographic Sketch, and on geographical consideration.

Because the interviews involve many other people, applicants must attend on the date and time specified. Applicants are responsible for their own travel expenses. All interviews will be held on two weekends in late March or early April.

Selection

All the information presented will be reviewed and used for the final selection. Successful applicants will be notified the last working day in May, 1990.

Special Applicants

This category is designed to provide opportunities only to those who have not attended a post-secondary institution as a full-time student, or have completed less than 10 full courses as a part-time student.

To be considered under this category, applicants must:

1. have completed at least 4 full degree credit courses with the equivalent of an overall grade point average of 'B';
FACULTY OF HEALTH SCIENCES

2. have been employed or active in the community for at least 7 years since leaving high school;
3. be residents of Ontario;
4. have made an exceptional contribution to society. In this, the candidate must have shown creativity, initiative and leadership.

Applicants who believe they are eligible for this category, must contact the Assistant Registrar (Health Sciences) before making a formal application so they can be advised on whether they may qualify for this category. Special Applicants are subject to the same application deadlines as regular applicants.

Advanced Standing
Applications for Advanced Standing will be considered only under exceptional circumstances. Admission with Advanced Standing is conditional upon the availability of resources and will not affect the number of students admitted by the regular route.

Applicants for Advanced Standing must provide evidence to show that their undergraduate medical education has been or will be either terminated or delayed for at least two years by circumstances beyond their control. Those who already possess an M.D. degree will not be considered for Advanced Standing.

In addition, applicants must have:
1. successfully completed three years of university education at the time of application;
2. must have been given refugee status by the Canadian Immigration authorities, if not Canadian citizens or landed immigrants to Canada.

Those who believe that they are eligible for this category must contact, in writing, the Chairman of the Admissions Committee of the Undergraduate Medical Programme or the Assistant Registrar (Health Sciences), before making formal application. Unless the applicants for advanced standing can demonstrate the need for urgency in the handling of their application, they are subject to the same formal application deadlines as regular applicants.

Financial Information

Financial difficulties are among the most frequent problems experienced by students in undergraduate medical schools. At McMaster, these are intensified by the lack of opportunity for summer employment as well as by the relative scarcity of financial assistance funds available to the medical school.

In this situation, it is incumbent on students admitted to the M.D. programme to clarify immediately their personal financial situation and to secure or identify sufficient support to meet their financial obligations over the subsequent three years. The School of Medicine cannot assume this responsibility.

In 1988-89, the academic fees (tuition and student supplementary fees) for a student in the McMaster Undergraduate Medical Programme were:

- Canadian Citizens and Landed Immigrants
  - Year I and II: $2935.
- Visa Students
  - Year I and II: $11749.
  - Year III: $7895.

In addition, the cost of books and diagnostic equipment for a Year I student was approximately $1500. Students are also responsible for their transportation costs related to clinical study.

Financial assistance is available from the federal and provincial governments through the Ontario Student Assistance Program (OSAP). To be eligible a student must be a Canadian Citizen or permanent resident of Canada and fulfill certain requirements for residency in Ontario. In addition, the following sources of funding are available to undergraduate medical students.

Abbott Memorial Scholarship Loan Fund
This fund was established by the Federation of Medical Women of Canada. Small loans are available to any female medical student or first-year intern. In special cases, a loan up to $1,000 may be made to a student for recognized postgraduate training. Loans are payable within five years of date of issue, after which time interest will be charged at a rate of 5% compounded annually. Information regarding these loans may be obtained from the Secretary, Federation of Medical Women of Canada, Box 8244, Ottawa, Ontario K1G 3H7.

Medical Officer Training Plan
The Department of National Defence administers a programme for medical students known as the Canadian Forces Medical Officer Training Plan. Under this plan, students may be subsidized (tuition plus pay) throughout their undergraduate medical studies and internships. To qualify for enrolment, a student must be acceptable without condition in a course in medicine in a Canadian university or in an accredited internship.

Further information on this programme and on the career opportunities in medicine in the Canadian Armed Forces may be obtained from local Canadian Forces Recruiting Centres. In Hamilton the Recruiting Centre is at 150 Main Street West, Telephone (416) 523-2751.

Final Year Clerkship Stipend
The Ontario Hospital Services Commission will make a grant of approximately $4,000 to each student, payable in 24 monthly instalments, for educational development within a teaching hospital for the equivalent of 40 weeks in the final year.

In relation to the Ontario Student Assistance Program, the O.H.S.C. grant will be taken into account in assessing the amounts of the awards for those students who are eligible.

Other Funds
The School of Medicine administers a small loan and bursaries programme to assist some medical students who may be in need. Unfortunately, these funds are limited and cannot be relied upon to meet a major portion of any student's financial obligations. The source of these funds includes: The Ontario Medical Association Bursaries and Loan Fund; The William Andrew Vanderburgh Sr. Memorial Fund; and the Ripley Estate Bursary and Loan Fund.

For further information, contact Dr. R.G. Butler, c/o the Student Affairs Office, at ext. 2271.

Academic Awards
The School of Medicine has in the past indicated its preparedness to recognize students who distinguish themselves and the University by virtue of their scholarship and their contribution to the university community. At the same time, the School has indicated that the terms of reference for such awards should neither compromise the spirit of co-operative scholarship which characterizes its M.D. programme nor replace its priority of concern for financial assistance awards.

A small, but growing number of estates and agencies have donated funds to the University and the School of Medicine for purposes of recognizing scholastic merit among medical students. In order to meet the requirements of these awards within the spirit of co-operative scholarship, these funds are administered by the School's Student Financial Aid Committee to support individual students in their pursuit of specific elective projects or activities.

Students are required to submit an application through the Student Affairs Office, outlining the nature of their work and the need for funds. For further information, contact Dr. R.G. Butler, at ext. 2271.

The School of Nursing

In 1942, McMaster University began its first programme in Nursing, which was operated co-operatively by the University and Hamilton General Hospital. Since the establishment of McMaster University's School of Nursing in 1946, students have received a Bachelor of Science in Nursing degree upon graduation. The programme has functioned completely under the supervision of the University, while enjoying the full co-operation of community hospitals and agencies in the operation of its clinical courses. In July, 1974, the Schools of Nursing and Medicine became the Faculty of Health Sciences.

In 1982, the Post Diploma Stream of the B.S.C.N. Programme was introduced. There has been a high demand for admission to this Stream. In response, a Collaborative Category has been added to the existing Open Category. This second Collaborative Category provides expanded opportunities for Diploma Registered Nurses. The Collaborative Category has been designed with the active support and involvement of health institutions in the Hamilton-Wentworth Region. A description of the Open and Collaborative Categories is provided below in the section D. Diploma Registered Nurses (B) Stream.

Applicants often wish to discuss the implications of embarking upon a degree programme in nursing. During the school year Health Sciences Information Sessions are presented. Information about these sessions may be obtained from the Student Liaison Office (Gilmore Hall, Room 102, Ext. 4787). Any applicant wishing to discuss aspects of the admis-
sion process to the B.Sc.N. programme should write to the Assistant Registrar (Health Sciences) for information or make an appointment for an interview (Health Sciences Centre, Room 157, Ext. 2215). In addition, applicants may wish to discuss their career goals in nursing with a faculty member of the School of Nursing. Appointments can be arranged through the Assistant Registrar's office.

Applicants who are accepted into the programme are invited each June to attend counselling sessions before making their decision to accept or decline the offer. This is done in order that they may assess for themselves their suitability for the McMaster Nursing programme. Details of these counselling sessions are forwarded with the letters of acceptance.

**THE B.Sc.N. PROGRAMME**

The School of Nursing is committed to education, research, and service. As students progress in the B.Sc.N. programme, they will find an ever increasing emphasis on interpersonal skills, independent learning, and leadership qualities. Although these skills and attitudes may not be assessed prior to admission, applicants should evaluate their own potential for developing abilities to interact with others and to assume leadership roles.

Learning takes place in an environment conducive to openness and sharing among faculty and students. Emphasis on small group tutorials and self-directed learning promotes the development of self-evaluation skills and problem-solving abilities. Extensive audio-visual, laboratory, and library resources support a belief in the importance of independent study. Experience in controlled settings, such as the use of simulated patients and clinical settings, focus on nursing problems and processes which students examine critically and to which they apply concepts from nursing and related disciplines.

Evaluation by self, peers and faculty is part of an on-going process of assessment of the achievement of clinical, course, and programme objectives.

**Objectives of the B.Sc.N. Programme**

The aim of the B.Sc.N. programme is to provide students with a broad university education as nurses which will enable them to function as beginning practitioners in primary, secondary and tertiary health care settings. The programme will enable graduates to respond to the existing and changing nursing and health needs of society.

The central competence to be achieved is the ability to use systematically biologic and psychosocial knowledge in the understanding and nursing management of patients' health and health care problems.

In order to achieve this goal, the following will be demonstrated.

**Knowledge:**

1. identify the important influences on the health status of individuals and groups;
2. identify and implement practices which promote improved health;
3. identify and define health/illness problems at the individual, family and community level;
4. understand the underlying biophysical and psychosocial mechanisms which influence health/illness problems;
5. define the physical, emotional and/or social aspects of health problems and provide nursing care of patients and/or families;
6. understand major influences on the health care system, most specifically on the provision of nursing services throughout that system.

**Skills:**

1. critically appraise information from a variety of sources: health care research, humanities, behavioural and biological sciences; and integrate this information and evidence with the theories and practice of nursing;
2. provide nursing care in a variety of health care settings;
3. continue to recognize personal learning needs, select appropriate learning resources and evaluate personal progress.

**Personal Qualities:**

1. maintain and further develop such personal characteristics as:
   a. awareness of personal assets, potential and limitations;
   b. awareness of own and others contribution to patient care;
   c. responsibility for effecting change;
   d. ability to relate to and show concern for other individuals;
   e. demonstration of ethical behaviour and professional accountability in health care practice;
2. function as a contributing member of multidisciplinary groups in the identification, resolution and management of health problems.

**ADMISSION REQUIREMENTS**

**ADMISSION POLICY AND PROCEDURE**

As places in the B.Sc.N. programme are limited admission is by selection of applicants, and possession of published minimum requirements does not guarantee admission.

There are two streams of study for the completion of the B.Sc.N degree. The Basic (A) Stream requires four years of study, and is available to applicants directly from Ontario secondary schools (or with equivalent qualifications); applicants with other qualifications including mature students and university/college students; and, applicants currently enrolled in a Nursing degree programme. Diploma Registered Nurses in Ontario, enter the Diploma R.N. (B) Stream. There are two categories in the Diploma R.N. (B) Stream: the Open Category; and, the Collaborative Category.

The requirements and application deadlines vary depending on the applicant's background. Please note carefully the sections that follow as to procedures and requirements.

**Applicants from Ontario Secondary Schools:** The major portion of places for Level I are held by Grade 13/OAC or equivalent students. The selection method is by academic qualifications. Either interim or final grades provide the academic base calculated the first part of June.

**Applicants with Other Qualifications:** The selection method is based on academic qualifications, a personal qualities' score and interview score.

A complete application includes the applicant's response to a questionnaire. The response is assessed by teams of assessors normally representing the faculty and student or alumni constituencies. A portion of applicants with the highest questionnaire response scores are invited to an interview in May. Applicants are responsible for their own travel expenses. Failure to attend the interview will result in cancellation of the application. The scores awarded by the assessors for both the questionnaire response and interview are final.

All applicants will be informed of the admission decision in mid-June. Where courses were in progress at the time of application, the offer of admission may be conditional upon final achievement in these courses. Failure to meet the condition will result in withdrawal of the offer of admission.

**Application Procedure:** Applications for all studies beginning in September must be postmarked no later than midnight of the previous May 1 for Grade 13/OAC applicants and February 15 for applicants with other qualifications.

Applicants currently in Grade 13/OAC apply through the Ontario Universities' Application Centre. Application forms are available in secondary school guidance offices.

Applicants with other qualifications should write to the Assistant Registrar (Health Sciences) for an application form.

All application forms must be completed and forwarded to the Ontario Universities' Application Centre. Transcripts from the secondary schools and any post-secondary educational courses either completed or in progress must be included with the application by the deadline date.

Students enrolled in other programmes at McMaster University wishing to be considered for transfer to the B.Sc.N. programme should apply through the Office of the Assistant Registrar (Health Sciences) by February 15th.

was developed in conjunction with specific health care institutions in
Hamilton-Wentworth. Further information about this Collaborative
Category is available from the Assistant Registrar (Health Sciences),
or the School of Nursing.

Candidates wishing to apply to this Collaborative Category should
normally satisfy all those conditions noted above in the Open Cat-

egory. In addition they must provide a supporting letter from their
Director of Nursing. Students applying to the Collaborative Category
may also apply to the Open Category.

ACADEMIC REGULATIONS

In addition to meeting the General Academic Regulations of the
University, students enrolled in the B.Sc.N. programme shall be
subject to the following programme regulations.

Registration in the B.Sc.N. Programme implies acceptance on the part
of the student of the objectives of that Programme and the methods by
which progress toward the achievement of those objectives is evaluated.

Since the academic regulations are continually reviewed, we reserve
the right to change the regulations in this section of the Calendar.

The University also reserves the right to cancel the academic privileges of
a student at any time should the student’s scholastic record or conduct
warrant so doing. Where, in the opinion of faculty, the performance of
the student in clinical nursing practice may jeopardize or endanger the
welfare of the patient, or the patient’s family, the student may be
removed from clinical experience any time during the academic year
until continuation in the course is reviewed. The clinical activities asso-
ciated with any clinical course must be successfully achieved for attain-
ment of a passing grade in the course.

Part-Time Students

Students will be permitted to enter, proceed through and graduate from
the B.Sc.N. programme (A) or (B) stream, on a part-time basis. Uni-
versity and programme regulations governing the full-time undergraduate
students will govern the part-time student.

As enrolment is limited, places reserved for part-time students at each
Level will be restricted. Normally, Nursing courses are available only
during the day. Electives may be taken either in the day or evening. Inde-
pendent study packages are also being developed.

Guidelines have been established for part-time study. Applicants are
advised to seek counselling from the School of Nursing before engaging
in part-time study.
Level I Nursing
A student in Level I must:
1. achieve a University Average (UA) of at least 2.5; and
2. achieve an average of at least 4.0 in the Nursing and required Health Science courses; and
3. achieve a grade of at least C in the Nursing and required Health Science courses with the exception that a grade of D-, D, or D+ is permissible in one Health Science course.

A student who fails to meet these requirements may not continue in the programme but may seek readmission by writing to the B.Sc.N. Programme Chairman.

Area Courses:
The Area courses consist of all the Nursing and Health Science courses above Level I.

The following courses are designated clinical courses:

Basic (A) Stream: Nursing 2L06, 2H04, 3X07, 3Y07, 4J07, 4K07.

Diploma Registered Nurses (B) Stream: Nursing 3L05, 3M05, 3N08, 4S06, 4T06.

A grade of at least C- is required in all Area courses with the exception that a grade of D-, D, or D+ is permissible in a non-clinical Area course only once beyond Level I. In order to meet these requirements an Area course may be repeated only once. If a student fails to meet the minimum grade requirements after repeating the course, he or she may not continue in the Nursing programme.

A course for which credit has been granted may be repeated only when approval is granted by the B.Sc.N. Programme Chairman.

Cumulative Area Average (CAA)
The Cumulative Area Average (CAA) for the B.Sc.N. programme is the weighted average of all the Nursing and required Health Science courses attempted and repeated beyond Level I, and is used to determine whether a student may continue in the programme, may continue on Programme Probation, or may not continue in the programme.

Continuation in the Programme
To continue in the B.Sc.N. programme a student must obtain a University Average (UA) of at least 2.5, a Cumulative Area Average of at least 4.0, and meet the minimum requirements of the Programme. A student whose CAA is at least 3.5 may, at the discretion of the Faculty, proceed in the programme and will be placed on Programme Probation. A student may be placed on Programme Probation only once during the whole programme.

Failure
A student whose Cumulative Area Average is less than 3.5, or whose CAA is less than 4.0, and who has not been granted Programme Probation, may not continue in the programme. A student who fails to obtain a Cumulative Area Average of 4.0 at the completion of the period on Programme Probation, may not continue in the B.Sc.N. programme. A student may normally repeat a Level of work only once.

Extra Courses
Courses in addition to those which constitute the B.Sc.N. programme may be designated Extra at registration. The grades obtained in such courses will not be included in the CAA nor will the units be included in those required for graduation. The designation Extra cannot be added or removed retroactively.

Level of Registration
Level describes where a student is placed in the programme. A student is required to register in that Level for which more than 6 units of work is incomplete. Work of a higher Level may be undertaken, if prerequisites are met, with the permission of the Programme Chairman.

Selection of Electives
After a student has completed Level I he or she may take no more than 18 units of courses beginning with the digit 1.

Graduation Average (GA)
The Graduation Average (GA) for the B.Sc.N. programme is based on the best 36 units or best 80% of all Level III and Level IV Area courses, whichever is greater. The GA is used to determine whether a student may graduate from the programme.

CURRICULUM FOR THE B.Sc.N. PROGRAMME

Basic (A) Stream
The Faculty has planned the curriculum so that the study of nursing, the physiological, psychological and social sciences, and the humanities are interrelated and span the entire programme. In Level I, the amount of nursing experience is relatively small, the major proportion of study is in the behavioural and natural sciences. The nursing component increases progressively through Levels II, III, and IV, as the study of natural sciences is completed. Normally, because of timetable constraints, courses must be taken in the Level indicated in the curriculum.

Six units in Sociology or Anthropology are required by the end of Level II. In at least one of Levels I, II, III, or IV, six units of elective are to be chosen from the Humanities, and six additional units from one of Psychology, Sociology, or Anthropology are to be chosen at or above Level II.

Level I: 32 units
R Health Sciences 1A06, 1B07; Nursing 1F07; Psychology 1A06.

Diploma R.N. (B) Stream
The programme of study for Diploma Registered Nurses is integrated with existing course offerings. The practice of nursing in diverse clinical settings will occur in all academic terms. The curriculum is designed to build on the existing knowledge and skills of the students, to prevent duplication of learning experiences and to prepare the students to function in the expanded role in community and institutional settings.

The curriculum is planned for two full calendar years if taken on a full-time basis. If taken on a part-time basis, students are normally allowed six years in the Open Category to complete the programme requirements. Students in the Collaborative Category must elect to take their programme in either four years or five years and indicate their preferred choice at the time of acceptance into the programme.

Each level of the programme will consist of eight months of academic study with concurrent clinical practice. Level III is followed by 6 to 8 weeks of concentrated clinical practice in one setting. The concentrated experience is designed to provide the student with the opportunity to develop areas of specific interest and to demonstrate decision-making capacity in those areas such as primary care, oncology, gerontology, etc.

Electives: Thirty (30) units of electives are to be selected from disciplines of the student's choice, of which a minimum of 12 units are to be chosen from courses designated as Level III or above.

FACULTY OF HEALTH SCIENCES

Occupational Therapy and Physiotherapy Programme

The Bachelor of Health Science Programme is available to diploma graduates of the Mohawk College programmes in Occupational Therapy or Physiotherapy and diploma graduates in Occupational Therapy and/or Physiotherapy from other institutions. Through an emphasis on the synthesis of the theoretical and clinical components of practice, the programme provides an opportunity for increased academic and scholarly preparation. In this way, the student will acquire an improved understanding of the health care problems of clients.

Further professional development is offered through the various Master and Doctoral programmes in the Faculty of Health Sciences.

In anticipation of the implementation of the new programmes described below, the current Bachelor of Health Science Programme is under review. It is expected that the last intake into the B.H.Sc. Programme from the Mohawk College programmes in Occupational Therapy or Physiotherapy will be in September 1991, and that the last entry into the Pre-Programme Phase (for applicants from other institutions) will be in September 1989.

McMaster University, in co-operation with Lakehead University, is planning new programmes in Occupational Therapy and Physiotherapy. These 2-year programmes will be available to candidates who hold a baccalaureate degree, with an overall standing of at least a B. Since enrolments in the programmes will be limited, admission will be by selection. Possession of the minimum qualifications will not guarantee admission. These programmes have been approved in principle by the Ontario Council on University Affairs. Implementation is contingent upon funding being provided by the Ministry of Colleges and Universities. The programmes are expected to commence in the Fall of 1990.

These will be 23-month programmes spread over 2 calendar years. The curriculum is focused on the problem-based small-group tutorial methods pioneered in the McMaster undergraduate medical programme and other undergraduate programmes in the Faculty of Health Sciences such as the Mohawk/McMaster diploma programmes in Occupational Therapy and Physiotherapy. It is anticipated that students will have an option to participate in a 14-week block of northern studies based at Lakehead University.

OBJECTIVES OF THE B.H.Sc. PROGRAMME

The Programme is designed to further the development of an occupational therapist or physiotherapist who will be able to:

1. Understand the physical, biological and behavioural mechanisms of health problems including aspects such as molecular, individual, family and community.
2. Understand the political, economical, sociocultural and epidemiological factors which influence health policies and the systems and models of health care delivery.
3. Examine in depth, issues related to the responsibilities of the professions of Occupational Therapy and Physiotherapy in the delivery of health services.
4. Analyze and critique the scientific bases of the professions of Occupational Therapy and Physiotherapy, and critically evaluate emerging data related to these professions.
5. Plan and complete an investigation into a specific area of clinical practice. Principles of scientific inquiry and clinical reasoning will be emphasized.
7. Develop scholarly writing skills.

Admissions Committee.

All applicants will be informed of the admission decision by June 1.

ACADEMIC REGULATIONS

The University reserves the right to cancel the academic privileges of any student at any time that the student's scholastic record or conduct warrant doing so. Where, in the opinion of the faculty, the performance of the student in a clinical setting may jeopardize or endanger the welfare or safety of the patient or the patient's family, the student may be removed from the clinical setting at any time during the academic year, until continuation in the course is reviewed.

Requirements and Curriculum
The B.H.Sc. Pre-programme Phase requirements and curriculum are as follows:

Pre-programme Phase Requirements
The Pre-programme Phase is for applicants with diplomas in occupational therapy or physiotherapy programmes from other institutions. It consists of a minimum of 31 units of study completed entirely at McMaster University. Additional course work to a maximum of 43 units may be required at the discretion of the Admissions Committee.

The Pre-programme Phase may be completed either full-time or part-time. Under normal circumstances, the Pre-programme Phase should be completed in one year as a full-time student, or three years as a part-time student.

The student must attain a University Average of at least 4.0, and a minimum grade of C- in each course taken in the Pre-programme Phase. A student whose University Average is less than 4.0, or who has more than 6 units of study below C- may not continue in the preprogramme.

Requirements and Curriculum
The B.H.Sc. Programme consists of 19 units of study completed entirely at McMaster University, to include four Level IV required courses, and one or more undergraduate elective courses designated as Level III or Level IV.

All courses required for the 19 units of credit in the programme are Area courses.

The student must attain a Cumulative Area Average (C.A.A.) of at least 4.0. A minimum C- is required in each course in the programme.

A student who fails to obtain a C.A.A. of at least 4.0, or who obtains more than 4 units of F grades in the C.A.A., may not continue in the programme.

Course Load
The Programme is available in a modified full-load or part-time format. Full-load students will normally complete a minimum of 10 units of course work between September and December. The remaining course work may be completed in subsequent terms. Full-load students are advised not to carry a course load of greater than 16 units in one term. Written permission from the Student Studies Chairman is required to take a course load greater than 16 units in one term.

Students may choose to complete the programme on a part-time basis. Elective courses will be selected from courses available during the day or evening throughout the year. Required courses usually are available in Term I of the Winter Session (September to December) during the day. Under normal circumstances, part-time students are expected to complete the programme within three years. Permission of the Student Studies Chairman is required to alter this time limit.

Students who have completed electives on a part-time basis may transfer to full-load status to complete the required courses during Term I of the Winter Session. Requests for transfers must be received by April 1 of the year in which the student seeks to register.

Enrolment in a Course
To obtain credit for which credit has been obtained, approval of the Student Studies Chairman is required. Any course in which less than C- standing is achieved may be repeated only once. The grades of all attempts appear on the transcript and enter into the computation of the Cumulative Area Average.

Sequence of Courses
For students who request to study Health Sciences 4C03/4D03, priority will be given as follows:

a. B.H.Sc. students who have completed Health Sciences 4A03 and/or Health Sciences 4B04.

b. B.H.Sc. students

c. Other students

Enrolment in these courses is limited and where numbers warrant, a special allocation process will be implemented. Students who are not placed in their first choice will be offered a place in those courses that are not full.
The same clinical study area must be selected for Health Sciences 4C03 and Health Sciences 4D03. Permission of the instructor is required to register in Health Sciences 4D03 in a different term from Health Sciences 4C03.

Cancellation of a Required Course: The B.H.Sc. Programme offers all required courses within one academic year. Wherever possible, the Programme offers all the listed areas of clinical study (Health Sciences 4C03/4D03). If there is insufficient enrolment in any of the required courses (minimum of 5) the Programme reserves the right to withdraw the course, and re-schedule or replace the course within that academic year.

B.H.Sc. Programme Level IV: 19 units
R Health Sciences 4A03, 4B04, 4C03, 4D03.
E 6 units of Level III or IV courses chosen from Faculties within McMaster University. The student must meet the prerequisite requirements for the elective courses.
The humanities tell us how men and women of our own and other civilizations have grappled with life's enduring, fundamental questions: What is justice? What should be loved? What deserves to be defended? What is courage? What is noble? What is base? Why do civilizations flourish? Why do they decline?...

Mankind's answers to compelling questions are available to us through the written and spoken word — books, manuscripts, letters, plays, and oral traditions — and also in non-literary forms, which John Ruskin called the book of art. Within them are expressions of human greatness and of pathos and tragedy. In order to tap the consciousness and memory of civilization, one must confront these texts and works of art. William J. Bennett

The humanistic disciplines — philosophy, languages and literature, history, music, art and drama — are those fields of critical enquiry which help us to know ourselves through an understanding of humanity's creative and intellectual traditions, its moral and aesthetic values and its spiritual and material aspirations, and through the realization of human memory. The task of the humanistic scholar is to cultivate an appreciation for traditional learning, and to generate new ideas about the nature of human conditions; to discover, through historical perspective, the processes which link past and present; and to bring to bear on the problems of an age of rapid and often unsettling transformation perceptions informed by values which make us more, rather than less, human and civilized.

The attainment of precise knowledge and fresh insights through lectures, class discussions, reflection, analysis and writing is the essence of study in the Faculty of Humanities' eight academic departments and two interdisciplinary programmes. These are:

- Department of Art & Art History
- Department of Classics (Greek, Latin, Classical Civilization)
- Department of English
- Department of French
- Department of History
- Department of Modern Languages (German, Hispanic Studies, Italian, Russian)
- Department of Music
- Department of Philosophy
- Drama Programmes
- Humanities Interdisciplinary B.A. Programme
- Honours Comparative Literature
- Honours Modern Languages and Linguistics.

B. DEGREE PROGRAMMES

Upon successful completion of Humanities I, a student may be admitted to a programme of study leading toward a Bachelor of Arts degree. (Completion of Music I may lead to a Bachelor of Music or Bachelor of Arts degree.) There are four ways to complete a Bachelor's degree in the Faculty of Humanities.

1. Single honours programme: three years of study, beyond Level I, concentrated in the work of a single discipline (e.g. History). After three years of Music study beyond Music I, students receive a B.Mus. degree.
2. Combined honours programme: three years of study, beyond Level I, concentrated in the work of two disciplines (e.g. French and German, English and Philosophy). In fact, a student can combine study in any two Humanities disciplines, or one Humanities discipline and a subject from another Faculty where appropriate (e.g. History and Political Science, Philosophy and Biology).
3. B.A. Programme: two years of study, beyond Level I, concentrated in the work of a single discipline.
4. Humanities Interdisciplinary B.A. programme: two years of work, beyond Humanities I, in one of six thematic modules of study representing the interplay of the insights from several related disciplines. These modules are: Ancient Studies, Canadian Studies, Comparative Literature, Contemporary Studies, Creative Arts, and Linguistics.

The content and the requirements of single honours, combined honours and other B.A. programmes are found further on in this Calendar under the title Programmes for the B.A., B.A. (Honours) and B.Mus. Degrees.

There are a number of Humanities courses which may be taken as electives without prerequisites. Individual course descriptions, by Department, are given under the section entitled Courses by Department.

Not only are students from other Faculties able to take individual courses which have an open prerequisite, but they are also able to transfer into any of the degree programmes offered by the Faculty of Humanities. For the majority of programmes in the Faculty, admission may be gained after the successful completion of any Level I programme at the university, providing this includes the necessary programme requirements as outlined in the admission statement for each Humanities programme as described under Programmes for the B.A., B.A. (Honours) and B.Mus. Degrees.

Second Language Proficiency

Students embarking on Humanities programmes should be aware that most graduate schools require, for admission, proficiency in at least one, and frequently two, languages other than English. In this Faculty, proficiency in at least one language other than English is regarded as an essential tool for students interested in English Literature, Comparative Literature, or Drama. Generally, proficiency in more than one language is a hallmark of most highly-qualified Humanities graduates seeking the widest range of post-graduation academic and employment opportunities.

Part-Time Study

Students wishing to enter any programme offered by the Faculty of Humanities and pursue a programme on a part-time basis should consult the appropriate Departmental Counsellor(s) before making their plans.

It is anticipated that at least the following Honours programmes in the Humanities will be available to those part-time students who are unable to take any of their work in the regular Winter Day Session:

Art History; Drama; English; History; Philosophy.

For part-time students who are unable to attend the regular Winter Day Session, the following B.A. programmes are available:

Humanities Interdisciplinary B.A.; Art History; Classical Studies; Drama; English; French; History; Philosophy.

Academic Regulations

Students enrolled in Humanities programmes, in addition to meeting the General Academic Regulations of the University, shall be subject to the following Faculty Regulations and Policies.

McMaster Test of Writing Competence

Students are urged to take the McMaster Test of Writing Competence at the time of their first registration. They are expected to pass the test before proceeding beyond the first 30 units of work. Those who have failed to do so at this point will be required to consult the Associate Dean (Studies), in person, for appropriate counselling regarding remedial work. Students who have completed 60 units but have not passed the test will not be allowed to register in the Faculty of Humanities until such time as they successfully complete this test.

Registration and Course Changes

It is the responsibility of the student to ensure that the programme of work undertaken meets the requirements for the degree. In the Faculty of Humanities, students are required to preregister in March for the following Winter Session. When registering or making changes to course selection, students must seek the written approval of the appropriate Departmental Counsellor and the Dean of Studies. Dates for final registration and course changes appear in the Sessional Dates at the beginning of this Calendar and are rigidly adhered to.

Cross-listed Courses

Any student for whom a cross-listed course is an Area course under one of its listings must register for it under that listing. For example, Art History 2B03 is cross-listed as Classical Civilization 2B03; so students in an Art History programme wishing to register for this course must register for it under the label Art History 2B03. Such courses will then be used in calculating the student's Cumulative Average and possibly the Graduation Average.

Deadlines

The Faculty of Humanities will not consider applications for admission after the dates stated in this Calendar. Registrations after the stated deadlines will not be accepted unless documentation is provided showing good cause and including permission of instructors to enter classes late. Dropping and adding of courses will be permitted only within the periods stated in this Calendar.

Withdrawal

Students who wish to withdraw from the University are required to advise the Dean of Studies Office in writing. Students must surrender
FACULTY OF HUMANITIES

their identity cards to the Dean of Studies to ensure the processing of any fee refunds. Students who fail to withdraw formally from any course(s) by the stated deadlines will remain registered whether or not they attend classes and will be assigned a grade.

Readmission
A student who May Not Continue Without Permission may apply for readmission. Applications for readmission in September must be made in writing, to the Associate Dean of Humanities (Studies). Deadlines for readmission applications are the same as application deadlines for admission to the University. See Sessional Dates.

Applications should explain the reasons for the student's inadequate performance and should include relevant documentary evidence, for example a letter from a physician outlining any medical condition that might have affected the student's academic performance or final grades. Readmission cases will be carefully screened and the evidence considered will include the student's academic performance before and after admission to McMaster, as well as the nature of the reasons cited in the application letter and the accompanying documentation.

Readmission is not guaranteed.
Students will not be considered for readmission to Humanities I from other Faculties unless their pre-University work meets the current admission requirements of the Faculty of Humanities.

The computation of Cumulative Area Averages begins anew at readmission.

Academic Regulations Pertaining to the Department of Music
The Cumulative Area Average for the Honours Music programme and for the music portion of the Combined Honours programmes is termed the Cumulative Music Average and is the weighted average of grades in all Area courses attempted. To continue in an Honours Music programme, a student must maintain a CMA of at least 7.0.

The Graduation Average will be computed on a minimum of 41 units of Area courses for the B.Mus. degrees in Education and in History and Theory, and on a minimum of 40 units of Area courses for the B.Mus. degrees in Education and Performance and in History/Theory and Performance.

Normally, students with an undergraduate degree in Music will not be admitted to a B.Mus. degree programme as a second undergraduate degree.

Third Year Study Elsewhere
Students enrolled in Honours Programmes, single or combined, involving Comparative Literature, French, German, Hispanic Studies, Italian or Linguistics may apply to take part in McMaster University's Third Year Study Elsewhere programme at an appropriate university in France, Germany, Italy, Spain or the province of Quebec. Students may choose to spend one or two terms in this programme. The programmes at the host universities are specially designed to suit students at the Third Year Level, and consist principally of advanced and intensive language studies, with a high cultural and literary content.

To be eligible to take part in this programme, students are expected to complete Level II with a weighted average of at least 8.0 in their Language component. No fees are payable to McMaster University for the Third Year Study Elsewhere Programme, but students must pay all travel, study and living expenses. For students who may be in need of financial assistance, O.S.A.P. (The Ontario Student Aid Programme) grants and O.S.A.P. loans are available for this programme. Furthermore, McMaster University offers some bursaries to those in need of help with travel expenses to Europe.

Students must maintain links through correspondence with their departmental advisors at McMaster University while they are engaged in study elsewhere, and all credit for work completed is confirmed after departments have reviewed the student's academic achievement following their return and entry into their final year of study. The maximum credit available in this way is fifteen units per term or thirty units for a full year of study, equivalent to Level III. In certain cases, students may be recommended for the Deans' Honour List on the basis of work undertaken in the programme.

Note: Students who are enrolled in a Combined Honours Programme involving a language and a non-language component (such as History or Political Science) can usually be granted permission to take part in Third Year Study Elsewhere for at least one term by special arrangement, provided they make early application.

Summer Immersion Programmes in French
The government-sponsored summer language bursary programme offers university students the opportunity to take French courses at a large number of accredited institutions. Students who wish to attend another university in order to participate in a language immersion programme must make a petition in writing to the Dean of Studies after being placed in the appropriate level of study. Detailed course descriptions must be submitted so that an assessment may be made and Letters of Permission may be issued on the students' behalf. Students not registered in a programme in French may take up to 12 units of credit in this manner. Students registered in a programme in French may take a maximum of six units of credit as elective work only.

The Faculty of Science provides studies through the following departments:

- Biochemistry
- Biology
- Chemistry
- Computer Science and Systems
- Geography
- Geology
- Mathematics and Statistics
- Materials Science and Engineering
- Physics
- Psychology

All departments offer four-level Honours B.Sc. programmes which prepare students for graduate studies, Ontario Teacher's Certificate, and industry. A number of departments offer combined Honours degrees. An Honours Degree in Molecular Biology and Biotechnology is organized by a committee of instruction involving the faculties of Health Sciences and Science.

Three-level B.Sc. programmes, which provide a science education, are less extensive and less demanding than the Honours programmes, are also offered by all departments except Biochemistry, and Materials Science and Engineering. A three-level B.Sc. in Science programme is also available.

Some departments offer Major programmes as well (which are indicated in the list above by a star). Major programmes require four levels and offer in-depth studies suitable for students who will be seeking employment immediately upon graduation. Some of the Major programmes can also lead to an Ontario Teacher's Certificate. Major programmes are also distinguished from Honours programmes by being less specialized and somewhat less demanding.

Academic Regulations

The programmes of the Faculty are set out by Level, and the Academic Regulations of the University specify that courses must be taken in the sequence specified in the programmes. This means that students in the Faculty of Science must have completed courses in the remaining courses for one Level before they may register in courses for the next Level.

For all Honours and Major programmes in the Faculty of Science which combine the work of two disciplines, a single Cumulative Average and a single Graduation Average will be computed.

Students enrolled in a programme in the Faculty of Science, in addition to meeting the General Academic Regulations, shall be subject to the following Faculty of Science Regulations:

COURSE SELECTION
It is the responsibility of the student to ensure that the selection of courses meets the degree requirements for the programme in which the student is registered and that the stated prerequisite courses were completed with a mark of at least D-.

PROGRAMME AND COURSE CHANGES
All programme and course changes must be made through the Office of the Deans of Science (Studies) and are subject to the deadline dates established by the University. (See Sessional Dates section of this Calendar.)

Beyond the September deadline date, first-term courses may be cancelled up to the October deadline date but may not be replaced by second-term courses; beyond the January deadline date, second-term courses may not be replaced. Students who cancel a full-year course by the January deadline date may add a second-term course provided that their second-term work load is not thereby increased.

Up to the end of Level III, students may be permitted to transfer between B.Sc. and Major, and Major and Honours, programmes, on the recommendation of the Department concerned and with the approval of an Associate Dean (Studies).

EXTRA COURSES
Extra courses are courses taken in addition to those required for the degree programme in which the student is registered. Permission to take Extra courses must be obtained from the Office of the Deans of Science (Studies) and such courses must be designated Extra at the time of registration. The grades obtained in Extra courses will be included in neither the Cumulative Average nor the number of units required for graduation.

MAJOR PROGRAMMES
The following describes the change in regulations for Major programmes in the Faculty of Science. (Students in Honours, Combined Honours, and B.Sc. programmes should note the appropriate University-wide regulations in the section Academic Regulations.)

Admission: Students seeking admission after August 1987, will require a weighted average of 5.0 in Level I courses, or a grade of at least C in a specified course. The relevant courses are specified, under Admission, in each programme description.

Continuation in a Major Programme:
For students admitted to a Major programme after August 1987: If you obtain a Cumulative Area Average of 5.0, you may continue in a Major programme. If you fail to obtain a Cumulative Area Average of 5.0, but have an average of at least 4.5, you may continue on Programme Probation for one reviewing period. You may be on Programme Probation only once. If you fail to obtain a Cumulative Area Average of 4.5 you may not continue in the programme and must seek entry to another programme.

For students admitted to a Major programme before September 1987: If you obtain a Cumulative Area Average of 4.0, you may continue in a Major programme. If you fail to obtain a Cumulative Area Average of 4.0, but have an average of at least 3.5, you may continue on Programme Probation for one reviewing period. You may be on Programme Probation only once. If you fail to obtain a Cumulative Area Average of 3.5 you may not continue in the programme and must seek entry to another programme.

Graduation: Graduation standing in Major degree programmes is awarded in three classes. For first-class standing, a minimum Graduation Average of 9.5 is required; for second-class standing 7.0; and for third-class standing 5.0 for those who enter a Major programme after August 1987, and 4.0 for those who were admitted to a Major programme before September 1987.

RE-ADMISSION TO THE FACULTY OF SCIENCE
A student who is ineligible to continue in the Faculty of Science may apply for re-admission. Application for re-admission must be made in writing by June 15 to the Chairman of the Committee on Re-admissions, Office of the Deans of Science (Studies), and should include an explanation of the student's previous academic performance and reasons why the student would expect to succeed in the programme if re-admitted. If the student has been Required to Withdraw for one calendar year, a letter of reference from an employer may be required.

Re-admission is not guaranteed.

LIMITED ENROLMENT
Because of resource limitations, the University reserves the right to limit enrolment in any programme or course to the number which can be effectively taught. In the Faculty of Science, enrolment will be by selec-
tion, based on academic achievement. Students should consult with the Departments concerned if there are any questions about entry to limited enrollment programmes.

**Limited Enrolment in Computer Science:** Enrolment is limited to students in Level II of a programme in which a final year Computer Science project course is required i.e. all Computer Science and combined Computer Science programmes.

Selection will take place normally at the end of Level I, when students apply to register in Computer Science 2MC3. The selection will be based on the student’s University Average. Once admitted to one of these programmes, students will be allowed to complete the desired degree programme, subject to maintaining the required standing.

Students completing McMaster Level I programmes will be given preference over students seeking admission from other programmes or other universities.

All Computer Science courses except for the final year project courses are open to any student who has the prerequisite specified.

**SECOND BACHELOR’S DEGREE PROGRAMMES**

In addition to the regulations stated in the section Academic Regulations, Second Bachelor’s Degree Programmes in this Calendar, the following Faculty regulations will apply, effective September 1987.

Students will be admitted to Second Degree studies only if the second degree studies involve a significant component of work in the Area courses of a programme. Accordingly, permission will not be granted to take Second Degrees in the following courses or subject combinations:

1. in a subject which was a single component of a first combined Honours or Major degree. (e.g. Computer Science following Computer Science and Mathematics)
2. in a combined Honours or Major degree to a holder of another degree in a component subject of that degree. (e.g. Computer Science and Mathematics following Computer Science)
3. in an Honours degree to a holder of a Major degree in the same subject.
4. in B.Sc. Science to a holder of another B.Sc. degree (either three- or four-year) in a programme given by a department.
5. in three-year departmental B.Sc. programmes requiring courses which constitute a significant component of an initial B.Sc. Science degree.
6. in the B.Sc. degree to a holder of the B.A. degree in the same subject.

**Level I Programme**

**NATURAL SCIENCES I: 30 UNITS**

Mathematics 1A06 or 1C06

One of two of a) or b):

a. Chemistry 1A06
b. Physics 1A06 or 1B06 or 1C06

Additional selections from c) to j) to make a total of 30 units:

c. Biology 1A06
d. Computer Science 1MA3, or 1ZA3, or 1MA3 and 1MB3
e. Geography 1A06
f. Geology 1A03 and/or 1C03
g. Materials Science 1A03, or 1A03 and 1B03
h. Mathematics 1B03
i. Psychology 1A06
j. 3 or 6 units of Level I Humanities and/or Social Sciences.

With the exception of Mathematics, no more than one full-year course may be taken from any subject.

With the permission of the Associate Dean (Studies), well-prepared students may be permitted to elect up to six additional units.

The choice in the programme that a first level student may elect is considerable and should be made carefully with the Level II admission requirements of a specific programme in mind. A suitable choice of Level I options will allow successful students to enter Level II of any one of several programmes.

Students in the Faculty of Science registering in Mathematics 1B03 must register in Mathematics 1A06 rather than Mathematics 1C06.

Students who have completed Mathematics 1C06 and later complete Mathematics 1B03 are eligible to take upper level Mathematics courses.

Students who complete Natural Sciences I with high standing but who lack a Level I course required for entry into the desired Level II programme may be permitted entry to that programme after consultation with an Associate Dean (Studies) and the appropriate Departmental Chairman.

Faculty of Social Sciences

P.J. George/M.A., Ph.D., Dean of Social Sciences
W.K. Whillier/B.A., Ph.D., Associate Dean (Studies)
E. Frank/M.A., Academic Assistant to the Dean
A. Treadwell/B.S.W., M.A., Student Advisor
J. Weston/B.A., Student Advisor
E. Moore/Programmes Co-ordinator

The Faculty of Social Sciences includes the following departments or programmes:
- Anthropology
- Economics
- Gerontology
- Labour Studies
- Political Education
- Physical Education
- Religious Studies
- Social Work
- Sociology
- Geography
- Psychology

These departments have programmes in the Faculty of Social Sciences as well as in the Faculty of Science.

The Faculty offers Bachelor of Arts, Honours Bachelor of Arts and Professional programmes. It also offers a B.A. Major programme in Psychology. The Honours programmes provide a richer concentration in the particular field, as well as an extended time of study, and are normally a requirement for those who contemplate proceeding to graduate studies. In many cases, students may combine work in two departments and be graduated with a Combined Honours Degree in the two subjects. The Gerontology degree is offered only in combination with another subject, except when it is taken as a second degree. The Faculty of Social Sciences is participating fully in helping interested students combine concentration in a social science area with concentration in Arts and Science, or any discipline in the Faculty of Humanities.

The two schools, Social Work and Physical Education, offer programmes of study which lead to the B.A./B.S.W. degrees in the one case, and the B.P.E. degree in the other. The B.S.W. degree may be attained separately by those who have already received one undergraduate degree.

Students are strongly advised to take advantage of the extensive advisory services provided by the Faculty. New students in particular should plan a programme of study that will allow them a number of options for Level II.

Academic Regulations

Students enrolled in a programme in the Faculty of Social Sciences, in addition to meeting the Academic Regulations of the University, shall be subject to the following regulations of the Faculty of Social Sciences.

MCMaster TEST OF WRITING COMPETENCE

A student admitted to McMaster University in 1986 or later who has completed 60 units of any programme, must also have passed the McMaster Test of Writing Competence, before continuing in any Social Sciences Programme. The intent of this regulation is to ensure that students pass the Test before registering in Level III of, or graduating from, any Social Sciences programme, and the regulation will be applied in accordance with this intent.

HUMANITIES REQUIREMENTS

Students registered in programmes in the Faculty of Social Sciences, except for those registered in the Bachelor of Physical Education programme and the B.A./B.S.W. programme, are required to complete 6 units of courses chosen from the Faculty of Humanities before graduation, preferably before Level II.

Students registered in B.A. programmes in Economics and Psychology will fulfill this requirement by completing the English requirement for their programme. Students in the B.A. Psychology programme should note the additional Science or Humanities requirements for that programme.

DEADLINES

The Faculty of Social Sciences will not consider applications for admission, admission to a second degree or continuing studies, registration, or dropping and adding of courses after the deadlines stated in this Calendar under Application Procedures and Sessional Dates unless written documentation is provided showing good cause, as determined by the Faculty Admissions, Study and Reviewing Committee.

COURSE SELECTION AND CHANGES

A student must ensure that the selection of courses meets the degree requirements for the programme in which the student is registered, that any prerequisites have been met, and that the appropriate written permission has been obtained, otherwise re-admission will not be automatic or guaranteed. All registrations, programme changes and course changes must be approved by the Associate Dean (Studies) and are subject to the deadline dates established by the University as published in this Calendar under Sessional Dates.

Qualified students are permitted to transfer between B.A. and Honours programmes with the approval of the Associate Dean (Studies). Transfers are subject to the deadline dates established by the University.

COURSES IN PHYSICAL EDUCATION AND SOCIAL WORK AVAILABLE FOR UNDERGRADUATE CREDIT

Several courses offered by the School of Physical Education and the School of Social Work may be taken by students in B.A. programmes as electives for undergraduate credit. Enrollment in these courses requires written permission of the instructor. These courses are:
- Physical Education: 3J03, 3P03, 3Q03, 3S03, 4E03, 4G03, 4J03, 4L03, 4M03, 4Q03
- Social Work: 3C03, 3G03, 3H03, 3J03, 4J03, 4M03

RE-ADMISSION

A student who is ineligible to continue at the University may apply for re-admission to the Faculty of Social Sciences. Application for re-admission must be made in writing to the Associate Dean (Studies) before the application deadline for the session in which the student seeks to be re-admitted. The letter of application should include an explanation of the student's academic performance and reasons why the student would expect to succeed if re-admitted. Further guidelines for the letter of application may be obtained from the Office of the Associate Dean (Studies).

In considering a student's request for re-admission, the Faculty's Admissions, Study and Reviewing Committee will use several criteria, including the student's academic record before and after admission to McMaster, the letter of application and the student's ability in English.

Students are advised that re-admission is a privilege given only to those who are able to show good reasons for an expectation of improved academic performance. In the case of students who have been Required to Withdraw, re-admission will not be considered for a session beginning within 12 months of this requirement except in extraordinary circumstances. If a student is applying for re-admission after the 12-month withdrawal period, a letter of reference from an employer may be required.

RE-admission is not automatic or guaranteed.

PROGRAMMES

Combined Honours Programmes: Subject to possible timetable restrictions, and provided that the student meets the requirements for entry into each of the relevant Honours Programmes, a student may combine work in any two departments, and be graduated with a Combined Honours degree in the two subjects.

All Combined Honours programmes must be approved by both Departments concerned as well as by the Associate Dean(s)(Studies).
These programmes will normally include approximately 36 units of work beyond Level I in each Department (normally 12 units of work per Level in each).

Honours Programmes: For requirements of Honours programmes see the University's statement on Academic Regulations in this Calendar.

Major Programme: For requirements of the Major programme see the University's statement on Academic Regulations in this Calendar.

Bachelor of Arts Programmes: For requirements of Bachelor of Arts programmes see the University's Statement on Academic Regulations in this Calendar.

The only 3-Level Combined Bachelor's Degree programme is in Gerontology and Another Subject. The other subject may be from the Faculty of Social Sciences or the Faculty of Humanities. This programme may also be combined with the B.S.W. as a 4-Level programme.

PART-TIME STUDIES
Subject to limitations of course offerings, a student may pursue on a part-time basis any programme in the Faculty of Social Sciences, except for the B.P.E. programme. Normally, students will arrange their programme of studies in consultation with a Student Advisor in the Office of the Associate Dean (Studies) and with the Undergraduate Advisor of the appropriate Department.

School of Physical Education and Athletics

Programme for the B.P.E. Degree
The School of Physical Education and Athletics offers a four-year programme leading to the degree of Bachelor of Physical Education (B.P.E.). The programme differs somewhat from the majority of Physical Education programmes in the province in that students begin to take courses leading to the degree in Level I. As a result, the programme is divided into two distinct parts.

During Levels I and II students take a core of thirty-six units of required theoretical courses in which they are introduced to the various theoretical sub-disciplines of Physical Education, and a core of five units of required practicum courses.

During Levels III and IV students are free to select from a variety of Physical Education electives in both the theoretical and practical areas. These courses, supplemented by the arts and science electives selected by the student, may be grouped in various ways with career and/or graduate study goals in mind.

Academic Regulations
Students enrolled in Physical Education, in addition to meeting the General Academic Regulations of the University, shall be subject to a number of School regulations.

Continuation in Programme
Students in Physical Education I must:
1. obtain a university average (UA) of at least 4.0 (weighted average of grades in all courses taken).
2. obtain a cumulative Area Average (CAA) of at least 4.0 calculated as a weighted average of grades in all Physical Education courses taken.
3. obtain a grade of at least D— in each Area course.

Beyond Level I a student must achieve a minimum grade of D— in each Area course taken and a CAA of at least 4.0 at each review in order to continue in the programme.

Failure to Meet the Above Requirements Leads to One of Two Conditions:
1. May Not Continue in the Programme: Re-Admission
   A student who is ineligible to continue in the B.P.E. programme may apply for re-admission after not less than one year. Application for re-admission must be made in writing to the Undergraduate Chairman in March of the year re-admission is desired. Students normally will not be considered for readmission unless they have achieved a B— (3.0) average in at least 24 units of university course work.

   Re-admission Is Not Guaranteed.

2. May Continue on Probation: Repeated Courses
   Students who have failed (F grade) any Area course, but who have achieved a CAA of 4.0 at the review period may be permitted to continue on probation subject to the approval of the School of Physical Education Admissions and Review Committee. In such cases the student must repeat any failed Required Area course or replace any failed Elective Area course. To lift the probationary status a minimum grade of C— must be obtained in any repeated course.

Work Load
All B.P.E. students must complete a Winter Session work load of 31 units in Levels I and II and 34 units in each of Levels III and IV. Advanced credit and credit earned during Summer Sessions may be used to reduce this load requirement. Such reductions will be applied as late as possible in
a student's programme. In any Winter Session, a student may not register for any more than the required number of units without the approval of the Undergraduate Chairperson. While no unit credit is given, students are also required to pass the McMaster Basic Swimming Test, normally during Level I, but no later than the end of Level II.

Graduation
The minimum requirement for graduation from the B.P.E. programme is a CGA of 4.0 in at least 60 units of Area courses taken in Levels II, III, and IV. A student may be awarded First, Second, or Third Class standing on the basis of the Graduation Average (GA).

Students require 133 units to graduate. These units are composed of 54 units of electives, 66 units of Physical Education theory, and 13 units of Physical Education practicum.

Area Courses
All Level I, II, III and IV Physical Education courses and Biology 1J03. Normally, the requirements for each Level must be completed satisfactorily before a student is allowed to proceed to the next Level of the Physical Education programme.

Level I: 31 units
R Physical Education 1A06, 1B03, 1E03, 1F03; Practicum: 1 unit, plus the McMaster Basic Swimming Test; Biology 1J03.
E 12 units, excluding Physical Education courses.

Level II: 34 units
R Physical Education 2A03, 2B03, 2C06, 2D03, 2F03; Practicum: 4 units, plus the McMaster Basic Swimming Test, if not passed in Level I.

Level III: 34 units
R 15 units from Level III or IV Physical Education courses; Practicum: 4 units.
E 15 units, excluding Physical Education courses.

Level IV: 34 units
R 15 units from Level III or IV Physical Education courses. Practicum: 4 units.
E 15 units, excluding Physical Education courses.

B.P.E. AS A SECOND DEGREE
Individuals already holding an undergraduate degree may be admitted to the Physical Education programme. Applications should be made to the Undergraduate Physical Education programme prior to May 15 for the Fall term.

Enrolment is limited and applicants must normally provide evidence of at least second class standing (B – ) in their previous university work to be eligible. Only full-time students will be considered.

Students are required to take 79 units of Physical Education courses which consist of 66 units of Physical Education theory and 13 units of Physical Education practicum, plus satisfactory completion of the McMaster Basic Swimming Test. Level I and II theory and practicum courses must be taken in sequence and be completed before Level III and IV courses are undertaken.

School of Social Work

COMBINED B.ARTS SC./B.S.W.

Students interested in this combined programme should consult both the Director of the Arts and Science Programme and the Director of the School of Social Work prior to enrolment in Level I.

(See Arts & Science Programme.)
FACULTY OF SOCIAL SCIENCES

COMBINED B.A./B.S.W.

Admission:
Completion of any Level I programme, including Psychology 1A06 and Sociology 1A06, normally with a University Average of at least 6.0 and evidence of personal suitability, which may be evaluated by one or a combination of written statements, tests, or interviews.

An applicant must complete Level I by April of the year in which application is made.

In choosing Level I courses, the student should take care to include those courses that will allow entry to the B.A. programme. Students should consult the relevant sections of the Calendar and/or the Associate Dean of the Faculty.

Enrolment in the Combined B.A./B.S.W. programme is limited. Students who intend to apply for the combined B.A. and B.S.W. programme must consult the School of Social Work prior to application.

All applications for admission to the School of Social Work are considered annually and must be made directly to the School well before March 1 for the Fall term.

Applicants transferring from other universities (see Two-tier Applications below) must also apply through the Ontario Universities' Application Centre (OUAC) for full-time study, or through the Associate Registrar (Liason and Admissions) for part-time study, and are required to meet the introductory Psychology and Sociology prerequisites.

Students admitted to the Combined Programme who have completed B.A. work beyond Level I normally will require three years after admission to complete the programme.

Two-tier Applications
If you are transferring from a university other than McMaster, or a college, you must complete two application forms as follows:

1. General Application (early January):
If you wish to study full-time, obtain a 105 application form from the Admissions Office of any Ontario university. Complete the form showing both your interest in the B.A./B.S.W. programme and the subject you wish to take for the BA component. The form should be returned to OUAC, at the appropriate fee.
If you wish to study part-time, fill out a McMaster Application form which can be obtained directly from McMaster, at Gilmour Hall, Room 120.

In order to allow adequate time for the processing of the General Application, applicants are advised to submit their applications in early January.

2. Supplementary Application (March 1):
After the General Application has been received at McMaster, the School of Social Work will mail you a Supplementary Application form, which must be completed and returned directly to the School of Social Work by March 1. (To avoid delay, you are advised to request this form personally through direct contact with the School of Social Work.) This form is used to decide when applicants are able to write an admissions test, which is scheduled for two dates in March of each year, both on site and at alternative testing centres outside Hamilton.

Adequate time is needed to make these arrangements and to complete the admissions process. Therefore, it is impossible to consider applicants whose Supplementary Application arrives after the March 1 deadline.

Part-time Degree Studies

The University offers a broad range of educational opportunities for students who wish to take degree studies on a part-time basis. In addition to the day-time offerings in the Winter and Summer sessions, a wide selection of evening classes is available throughout the year.

Each student taking degree courses will associate with one of the undergraduate faculties (Business, Humanities, Science or Social Sciences). By so doing, students will have the opportunity to consult with the academic counsellors of their Faculty, and with the departments concerned with the interests in which they wish to develop further study. If their interests change, it is often possible to transfer to another department or Faculty.

The courses which part-time students take in the early stages of their education will form the basis for choosing their programme of study. The Level 1 courses will give them the information they need for this purpose, as well as provide the prerequisites for more advanced courses and admission to programmes of study. The programmes of study which are available entirely through evening and summer courses are indicated on the chart Degrees by Programme, in the Degrees and Programmes section of this Calendar.

There are specific regulations that part-time students should be aware of. They are described below. Students should also familiarize themselves with the requirements and information found in this Calendar in the following sections: Admissions, Academic Regulations and Sessional Dates as well as the programme descriptions found in the specific Faculty sections.

ADMISSION
Before you can register for any course or programme, you must apply for admission to the University. Applicants who satisfy the normal admission requirements of the University may choose to register for part-time study. Those who do not satisfy these requirements may be admitted as Special Students and thus have the opportunity to obtain the courses they need to help them prepare for more advanced study. Special Students, with the approval of the appropriate Associate Dean (Studies), may take only 6 units of work per session until 12 units are completed.

Students who do not wish to enter a degree programme, but would like to take a course for credit, may be admitted as Occasional Students under the same conditions as apply to Special Students. Such students may subsequently transfer to a degree programme. If the courses already completed were relevant to the programme, they could be counted towards the degree requirements.

Many part-time students enter degree study from other forms of post-secondary education. Students who wish to inquire regarding credit recognition for work taken in non-degree programmes (e.g. diploma, certificate, Distance Adult Education) should contact the appropriate Faculty Office. Please refer to the section Admissions Requirements for details about the various avenues for admission to study at McMaster.

AVAILABILITY OF COURSES
Although both daytime and evening courses are open to all students, part-time students often have other responsibilities which restrict them to the courses offered in the evenings, winter and summer. We have, therefore, listed the 1989/90 Winter Evening courses which the University intends to offer on the main campus as well as an indication of projected course offerings for the February to July Evening and Summer Day Sessions for 1990. This schedule is part of a longer plan which has been designed to make available the required courses for a number of the various faculties. They are described below. Students who wish to take degree study from other forms of post-secondary education should contact the appropriate Faculty Office.

Please refer to the session Admissions Requirements for details about the various avenues for admission to study at McMaster.

CO-ORDINATOR OF PART-TIME DEGREE STUDIES
The Co-ordinator of Part-time Degree Studies, Mr. Gordon Raymond or his Assistant, Ms. Tina Horton, may be telephoned at 525-9140, extension 4325 or 4324 respectively, Gilmour Hall Room 103, for counselling and to discuss preparation and plans for degree study. His office is open in the day, and in the evening by appointment. More detailed information concerning programmes and courses is provided by the Academic Counsellors within each Faculty as follows:

Business: extension 4432
Humanities: extension 4376
Science: extension 2612
Social Sciences: extension 4604

Information about application procedures and admission regulations is available through the Admissions Office (525-9140, ext. 4796, Gilmour Hall, Room 120).

Information about non-degree courses and programmes, including courses for pre-university upgrading is available through the Centre for Continuing Education (525-9140, ext. 4321).

OFF-CAMPUS CENTRES
In addition to the courses scheduled for the main campus, the University offers evening courses throughout the year in Brantford, Burlington, Oakville and Stoney Creek. These courses are not included in this listing.

In co-operation with the Mohawk College of Applied Arts and Technology, the University operates an Education Information Centre in downtown Hamilton and supports the Brantford Information Centre, which is directed by the Council for Continuing Education for Brantford and Brant County. These centres exist to provide information and assistance in career planning for persons of all ages and maintain comprehensive collections of Calendars and brochures concerning educational opportunities across Canada. The staff of these centres are also familiar with McMaster’s programmes and can either assist you directly or help you to make contact with the appropriate persons at McMaster.

The Centre in Brantford is in the Hamilton Central Library just off Jackson Square, telephone (416)525-9140, extension 2020.

LINGUISTICS

LINGUISTICS is the study of language as a system of human communication. As a discipline it combines the methods of traditional scholarship and philosophy with those of observational and experimental science in order to investigate the nature, structure and development of language everywhere in the world and of language as a uniquely human faculty.

Students may complete a degree in Linguistics in one of three ways:

a. A new Honours B.A. programme in Modern Languages and Linguistics is available. Details of this programme may be found in the section Faculty of Humanities, Department of Modern Languages in this Calendar. Information and counselling may be obtained from Dr. C. Thomas, the Co-ordinator of the Honours Modern Languages and Linguistics programme, in the Department of Modern Languages (Togo Salomon Hall, Room 622).

b. A thematic study of Linguistics is available through the Humanities Interdisciplinary B.A. programme. Details of this programme may be found in the section Faculty of Humanities, Humanities Interdisciplinary B.A. in this Calendar. Information and counselling may be obtained at the Office of the Associate Dean (Studies), Faculty of Humanities (Chester New Hall, Room 112).

c. Intensive study in Linguistics as a sub-discipline (30 units) may also be obtained through a concentration in Anthropology. The emphasis is on theoretical linguistics, covering all main branches of the field, along with intensive exposure to a broad range of languages, both Indo-European and non-Indo-European. The resulting B.A. will prepare the student for graduate work either in pure theoretical linguistics or in language-oriented anthropological linguistics.

Note: Those students interested in pursuing graduate work in Linguistics would do well to take a substantial amount of language study as follows: 12 or more units of a modern European language; 6 additional units of a classical Indo-European language (Latin, Greek, or Sanskrit); and at least 3 units of a non-Indo-European language (Chinese, Japanese, Hebrew, Circassian, Uyghur or Abaza). Such a language background will allow them to meet the language requirement of many graduate programmes in linguistics. (See Related Language Courses and Related Courses with Linguistics Content at the end of the course descriptions in this section.)

THE INSTRUCTIONAL DEVELOPMENT CENTRE

A.C. Blizzard, B.Sc., M.Sc., Ph.D./Director
D.E. Roy, B.A., M.A./Educational Consultant
D.J. MacLellan, B.S.W., M.S.W./Educational Consultant
S. Riselay, Secretary

The Instructional Development Centre (IDC) is a resource centre for people who teach at McMaster: individual faculty members and teaching assistants (tutors, demonstrators, markers) as well as departments and other groups.

The Centre works closely with the University Committee on Teaching and Learning. This group, which includes a representative of the M.S.U. Teaching Awards Committee, two graduate students and faculty members from all six Faculties, provides policy guidance for the Centre, makes recommendations to the University on issues affecting teaching and learning conditions and provides grants for teaching and learning development projects. The Centre's activities include:

Teaching and Learning Grants: The IDC consults with applicants on their proposals and assists them with projects. It also provides administrative services for the Grants program.

Programmes for Teaching Assistants: The Centre plans and organizes TA-Day, a campus-wide orientation programme for teaching assistants. It also offers a series of short courses on teaching for senior Ph.D. students.

Workshops, Seminars and Conferences: A wide variety of events is offered, conducted by McMaster faculty, visiting resource people and IDC staff. Generally, the topics are ones requested by instructors or departments or are reports by people who have completed Teaching and Learning Grant projects. Subjects typically include research on learning and teaching methods, lecturing, small group discussion, simulations and the use of microcomputers in education.

Consultation: A major part of the Centre's work is discussing current courses with instructors. The instructor or department provides the expertise in the course content. The Centre provides information on ways for instructors to evaluate and refine courses. It also arranges contacts with other experienced people and assistance in trying new approaches.

The Centre has a long history of collaboration with student efforts to support excellence in teaching. For example, the IDC provided consultation on improvements to the MSU Teaching Awards program and the MSU Handbook The Disabled Student as well as on grants the MSU has received for its own teaching and learning projects.

Resources: The IDC has a library of books on university teaching and learning, example audio-visual materials and microcomputer programmes. It also has video-teaching equipment (for use in workshops and for taped classes at the request of instructors) and some microcomputer equipment for familiarization seminars and for faculty to use in evaluating educational software.

Research Facilities

ONTARIO CENTRES OF EXCELLENCE

In June 1987, seven Centres of Excellence were designated by the Ontario provincial government. Each Centre acts as a network to promote a cooperative research environment between the Ontario university community and the business/labour community. McMaster is participating in three of these Centres, based on existing research strengths.

Centre for Materials Research

The research programme of this Centre will focus on biomaterials, microstructures, polymers and composites, optoelectronics, and the microscopic study of the interface between materials surfaces.

Manufacturing Research Corporation of Ontario

The MRCO will provide a basic research centre for the development of pre-competitive generic manufacturing technology, with special emphasis on Computer Integrated Manufacturing.

Telecommunications Research Institute of Ontario

In response to the growth in demand for transmission of voice, data and pictorial information, the work of this Centre will concentrate on multi-service digital networks, radar systems, mobile and satellite systems, photonic networks and systems, and electromagnetic compatibility.

THE ACCOUNTING RESEARCH AND EDUCATION CENTRE

Haim Falk, B.Ac., M.B.A., Ph.D., C.P.A./Director

The Accounting Research and Education Centre was established in May 1985 and is jointly funded by the Certified General Accountants Association of Ontario and McMaster University.

It is located in Kenneth Taylor Hall, Room 109 and directed by Dr. Haim Falk, the holder of the Distinguished Professorial Chair in Accounting. The routine operation of the Centre is governed by its Operating Committee which consists of the Dean of the Faculty of Business, the Chairman of the Accounting Area, and the Director.

The Centre is extensively engaged in activities which are aimed to enhance quality research in the field of accounting. It provides direct and indirect research support to members of the Faculty of Business. The Centre sponsors scholarly seminars for members of the Faculty of Business, as well as a public annual Distinguished Speaker Series, to which noted academics, and renowned professionals are invited to give public lectures.

The Centre actively supports seminars and research conferences such as the annual conference of Contemporary Accounting Research, the scholarly journal of the Canadian Academic Accounting Association. The Journal's editor is a member of the Accounting Area in the Faculty of Business. As a service to the professional accounting community, the Centre provides summaries of published articles to members of the Certified General Accountants Association of Ontario.

McMaster University and the Accounting Research and Education Centre are deeply committed to increasing the excellence of accounting research and education.

CENTRE FOR ELECTROPHOTONIC MATERIALS AND DEVICES

Dr. D.A. Thompson, B.Sc., Ph.D./Director

The Centre for Electrophotonic Materials and Devices (CEMD) has been established in order to enhance research into new semiconductor device structures and device structures associated with optical data transmission and processing. Materials research problems associated with all technologies required to develop suitable integrated optics systems are being studied. Devices, both high speed electronic and optoelectronic are being designed and characterized. The objectives are to attain improved performance of communications systems as a result of integrating semiconductors and novel sources, detector and waveguides on the same substrate along with active electronic components. This so-called third phase of semiconductor development requires specialized equipment, trained manpower and an understanding of the basic sciences governing the performance of the elements involved. Within the CEMD we have in place, or are acquiring, most of the state-of-the-art equipment necessary for such research. A central focus for our programme will be a unique Molecular Beam Epitaxy (MBE) system involving in-situ ion beam modification and on-line ion beam analysis. The MBE system itself is designed for the (GaIn)(AsP) group of materials and growth will utilize a hybrid system involving effusion cells as sources for Ga and In and gas cracking cells for the As and P. Ion beam processing during growth will allow us to study nucleation kinetics, improve stoichiometry and dope with AsV dopant ions. Many other facilities are available and worth is being carried out on ion implantation, ohmic and Schottky contacts, optical waveguides, device failure processes and laser processing.

Current CEMD manpower includes seven faculty and seven research professionals and technicians. This is expected to increase by at least three faculty and by two researchers and three technicians in the next two years.

CENTRE FOR FLEXIBLE MANUFACTURING RESEARCH AND DEVELOPMENT

Dr. Hoda A. ElMaraghy, B.Eng., M.Eng., Ph.D., P.Eng./Director

Flexible automation is a key factor in improving manufacturing productivity, competitiveness and product quality and reducing production cost. It increases the flexibility and ability of companies to respond to changing market demands and product design. The Centre for Flexible Manufacturing Research and Development was established at McMaster University in recognition of the strategic importance of flexible automation to the Canadian discrete parts manufacturing sector. A contribution of $500,000 was granted in August 1984 by the Canadian Federal Government, as part of the Centres of Specialization Fund, to launch the project.

The activities of the Centre are multi-disciplinary which combine mechanical and electrical engineering, computing, and management expertise. The mandate of the Centre is to conduct basic and applied research in flexible manufacturing, develop human resources through graduate and undergraduate education and cooperate with industry for effective technology transfer.

The Centre contains a flexible assembly cell with two robots, computer controlled material handling, computer vision system, force and tactile sensors, laser inspection system and various computing facilities. Researchers in the Centre are involved in various industry and government supported research projects for design and simulation of flexible manufacturing systems, product design for ease of assembly, computer vision applications, sensory based robotic assembly, expert systems and artificial intelligence, modelling, control and off-line programming of robots, production scheduling, automated inspection and design automation. The Centre employs four full-time researchers and a half-time secretary. Ten Masters and Doctoral students, on average, pursue their studies in the Centre, and research funding in 1988/89 exceeded $600,000. The Director, Professor ElMaraghy, is a principal investigator in the Manufacturing Research Corporation of Ontario (MRCO) a Centre for Research Excellence.

CENTRE FOR HEALTH ECONOMICS AND POLICY ANALYSIS

Dr. G.L. Stoddart/Coordinator

Professor J. Lomas/Associate Coordinator

CHEPA is a multidisciplinary Centre, located in the Faculty of Health Sciences, created to stimulate and conduct research in health economics

The Centre's research, education and service activities bring together on a project basis faculty and staff from several departments and faculties on campus including Clinical Epidemiology and Biostatistics, Economics, Political Science, Geography and Business. Specific research objectives of the Centre include the development and application of methods to evaluate the costs, risks, benefits and utility of specific health services; the design and evaluation of different systems of organization and financing for the delivery of health and health care services; and the study of the behaviours of consumers, providers and other decision-makers in the health and health care systems. The Centre organizes and sponsors a variety of academic activities including research seminars, policy seminars, continuing education workshops, a health policy commentary series and an annual health policy conference.

COMMUNICATIONS RESEARCH LABORATORY
The Communications Research Laboratory (CRL) operates in the Faculty of Engineering. It has a membership of 14 faculty, 17 full-time research staff, 3 technical staff, 6 managerial/administrative/clerical staff and a graduate student population of over 45 students.

The research programme of the CRL is devoted to signal processing, technologies and devices applied in the areas of microwaves, antennas, optics, high-speed networks, radar, sonar, digital radio, monolithic microwave integrated circuits, very large scale integration and expert systems. The CRL has pioneered many new theoretical concepts and systems designs with practical applications. Indeed, the CRL has established itself as one of the leading centres of research in signal processing and digital communications for which it is recognized both nationally and internationally. In late 1987, CRL became a founding member of the Telecommunications Research Institute of Ontario (TRIO), a provincial Centre of Excellence.

The CRL has established invaluable links with many government research laboratories and companies. It derives its funding from research grants awarded by the Natural Sciences and Engineering Research Council, and contracts with government, TRIO and industries. CRL's total revenue is in excess of 2.5 million dollars per annum. The CRL building was recently expanded to 20,000 square feet.

In the formation of its research programmes and activities, the CRL is assisted by an Advisory Committee with membership drawn from government agencies and the electronics and telecommunications industry of Canada.

GERONTOLOGICAL STUDIES

There are four components of Geronotological Studies at McMaster: the Office for Gerontological Studies; the Educational Centre for Aging and Health; the R. Samuel McLaughlin Centre for Gerontological Health Research; and the Honours B.A. and B.A. programmes in Gerontology and Another Subject.

Office of Gerontological Studies
Dr. Ellen B. Ryan, B.A., M.A., Ph.D./Director
Professor Karl Kinanen, Dipl.S.W., B.A., M.S.W./Associate Director
This office co-ordinates multi-disciplinary and multi-faculty initiatives in education and research in gerontology. The scope of the office encompasses both the University and the community, with the office acting as a forum for the exchange of information about all gerontological activities at McMaster and also about various aspects of aging.

The office's activities are supported by University funding, while specific projects are funded by public agencies and private foundations. The Honours B.A. and B.A. programmes in Gerontology and Another Subject are administered by this office. The B.A. programmes are described in this Calendar in the section Faculty of Social Sciences, Gerontological Studies. Students may contact the Office for information on education and research in gerontology, and health and social services available for an aging population.

Educational Centre for Aging and Health
Dr. A. (Sandy) Macpherson, M.D., M.Sc./Director
The mission of the Centre is twofold: to increase the proportion of skilled health professionals who are committed to providing excellent care for aging individuals; and to develop effective collaborative educational approaches and models concerning aging and health. This is being accomplished by strengthening the gerontological input in educational programmes, especially continuing education of practicing health professionals. Aside from continuing education, other educational programmes include: Undergraduate Programmes for Professionals, namely the M.D., B.Sc.N., B.H.Sc. (O.T./P.T.) and B.S.W. (Social Work) programmes; Post-graduate (Residency) Education; Graduate Education (M.Sc., M.H.Sc., and Ph.D.); B.A. Programme in Gerontology (Faculty of Social Sciences); and the M.B.A. programme - Health Services Management Stream (Faculty of Business).

Students interested in further information should consult directly with the specific programme office of interest.

R. Samuel McLaughlin Centre for Gerontological Health Research
Larry W. Chambers, Ph.D./Director
The objectives of the R. Samuel McLaughlin Centre for Gerontological Health Research are as follows:

1. support research training of persons with expertise in caring for seniors and to recruit research faculty for the Faculty of Health Sciences;
2. initiate research activities aimed at improving health care for the elderly in Canada that include promotion of health and preventive care;
3. sponsor educational conferences with guest speakers which will integrate non-proprietary and proprietary health care providers and government health care perspectives. (University faculty, health care managers, service providers and government officials are invited to participate in such workshops);
4. publish periodical reports on the Centre's activities, and distribute these to supporters of the Centre, health care agencies, and government divisions which have a gerontological health care interest;
5. disseminate new knowledge about gerontological health care through publications, professional conferences, workshops and other forms of continuing education.

The R. Samuel McLaughlin Centre for Gerontological Health Research consists of an Executive Committee that oversees the activities of the Centre, a Fellowship Committee that selects research fellows, and a Faculty Recruitment Committee that makes recommendations for new faculty researchers to the Faculty of Health Sciences. Faculty members on these committees are from those Departments in the Faculty of Health Sciences which have begun to develop a resource pool of researchers in gerontology.

McMASTER INSTITUTE FOR ENERGY STUDIES
Dr. M.L. Kliman/Director
The Institute was established in 1980 by a group of engineers, scientists and social scientists at McMaster who recognized the inter-disciplinary nature of the problems involved in producing and using energy. Its purpose is to coordinate, promote and support energy research and energy education. The MIES office collects and disseminates information on economic, political, scientific and technological developments relating to energy; provides aid in the organization and finance of research projects; organizes seminars and conferences; and publishes the Energy Studies Review three times yearly.

McMASTER INSTITUTE FOR MATERIALS RESEARCH
A.J. Berinsky, M.Sc., Ph.D./Director

**McMASTER TANDEM ACCELERATOR LABORATORY**

Dr. J.C. Waddington B.Sc.(Eng.), Ph.D./Director

The McMaster Accelerator Laboratory is a large facility used for research in experimental nuclear physics, materials research, molecular spec­troscopy, accelerator mass spectrometry and nuclear medicine. There are two principal accelerators: an 11 million volt tandem Van de Graaff accelerator and a smaller single-ended 3 million Van de Graaff.

In the tandem accelerator, singly charged negative ions are accelerated to the positive terminal of the machine. There they are stripped in flight of two or more electrons and are then repelled from the same terminal. In this manner, energetic beams can be produced of most materials with atomic number less than 20. These beams are directed to one or many experimental target locations. The facilities consist of areas for radio­isotope production for nuclear medicine, a hydrogen-profiling location, a large heavy-particle spectrograph, a rare-isotope detection apparatus, several general purpose chambers, a cryogenic target for molecular spectroscopy studies, a gamma-ray spectrometer and a molecular beam epitaxy unit.

Since the sophisticated measurements call for the extensive use of remote automatic data acquisition as well as off-line analysis, the laboratory has several computers (the largest being a VAX 11/750). Although the facility is used primarily by research scientists and graduate students, several undergraduate students assist with some of the experiments.

**PROGRAMME FOR QUANTITATIVE STUDIES IN ECONOMICS AND POPULATION**

Mr. Frank T. Denton, B.A., M.A., F.R.S.C./Director

The Programme for Quantitative Studies in Economics and Population is an interdisciplinary programme based in the Faculty of Social Sciences. Its purpose is to encourage and facilitate faculty research in economics and other areas of the social sciences, with special emphasis on the analysis of population and the relationships between population change and changes in the economy and the society. The Programme’s Research Associates number about forty faculty members from various departments of the University and interdisciplinary cooperation is encouraged. The Programme issues a series of reports known as QSEP Research Reports and authored by individual Research Associates; these reports, or abstracts of them, are distributed widely, both in North America and in other parts of the world. The Programme is also responsible for a continuing series of seminars with invited speakers from other universities or non-university research centres, as well as from within McMaster. The Programme has been in existence since 1981.
Dean of Student Affairs
R. Heinzl/Dean

The Dean of Student Affairs heads a variety of specialized student service offices. These offices include the Student Counselling Service, International Students’ Advisor, Student Health Service, Student Financial Aid and Scholarships, Conference Services and Residence Services.

The Dean is happy to meet with individuals and representatives of student organizations with problems, concerns, questions or suggestions on any matter relating to student life and services on campus. The Dean’s Office is located in Hamilton Hall, Room 312, telephone extension 4649.

RESIDENCES
Mr. Ron Coyne/Director of Residence
Susan Marks/Admissions Co-ordinator

The University owns and operates nine on-campus residences accommodating a total of 2386 students. The eight traditional-style residences consist of three women’s residences (762), two men’s residences (341) and three co-educational residences (780). These residences are for single undergraduate students and are provided with staple articles of furniture including desks, chairs, beds, mattresses, pillows and bedding. Students provide their own towels and are responsible for the cleanliness of their individual rooms although a linen change is made weekly.

Sixty per cent of the traditional spaces are reserved for freshmen students and admission is based on academic standing. All students in these eight residences are required to take the minimum food plan which provides for lunch and dinner (Monday to Friday) for the full academic year (Christmas holidays excluded). Optional 14 and 19 meal plans have been added to the existing residence food plan. These plans include full weekend meal service.

In addition, an apartment-style residence (Bates Residence) accommodates five hundred (500) men and women students. The apartments are unfurnished (except for a stove, refrigerator, carpeting and drapes) and are set aside for upperclass students including a limited number of graduate and transfer students and special cases. The food plan is optional.

The University does not provide any on-campus facilities for married students at present. Students in this category may wish to use the services of the Off-Campus Housing Office, located in Room 118, Wentworth House.

The responsibility for the overall administration of the University Residence System lies with the Director of Residence. The Director determines policy and develops programmes. For each residence, the Director appoints a Hallmaster from the University community to serve as a mentor and leadership figure within the Residence. The Director of Residence works with the residence students’ government and Hallmasters to fashion a mature residence community in which self-discipline is maximized and the need for University-imposed sanctions is minimal. The Hallmasters work with the student government and students on collective projects and individual personal concerns. The office of the Director of Residence is located in the Commons Building, Room 101A, telephone ext. 4223.

The Residence Admissions Co-ordinator is responsible for admission systems, withdrawals and waiting lists. The Co-ordinator reports to the Director of Residences. Enquiries for residence information should be directed to the Admissions Co-ordinator, Residence Services Office in the Commons Building, Room 101, telephone ext. 4223.

Students applying to McMaster will receive a letter of instruction concerning application for residence. Letters of Acceptance from the Registrar’s Office will be accompanied by forms concerning residence application. Offers of acceptance into residence will be confirmed upon receipt of a deposit, which will be applied to the student’s residence fees. If a residence space is available and assigned, but such a space is not required, then students must cancel, in writing, the assigned space within the deadline dates. Failure to do so will result in forfeiture of part or all of the deposit.

Students interested in residing on campus any time between May 3 and August 28 should apply directly to the Conference Office, Commons Building, Room 115. Applications and advance reservations are available from March 1 each year.

OFF-CAMPUS HOUSING

The Off-Campus Housing office is a free listing service provided by the University. This office maintains updated lists of available accommodations in Hamilton and the surrounding area. Also, it provides area maps, transit maps, free telephones for local calling and personal assistance to help in the housing search. The Off-Campus Housing office is operated on a year-round basis and is located in Room 118, Wentworth House.

This office operates in conjunction with the Student Tenant Association and together they make an attempt to handle all possible problems and needs that a student tenant may encounter.

The Off-Campus Housing office is a unique part of the Residence Services office and can be contacted at extension 4086.

STUDENT COUNSELLING SERVICE
Dr. W. Wilkinson/Director
D. Nilsak/Counselling Psychologist/Counsellor
D. Lawson/Career Counsellor
Dr. D. Palmer/Academic Skills Counsellor
V. Field/Career Counsellor

The Student Counselling Service is a resource provided by the University to promote the personal, academic and career development of McMaster students.

The staff offers many counselling, assessment and information services and programmes designed to help students deal with personal problems, clarify and achieve education and career goals, and gain the most from their university experience.

Personal problems which students discuss with counsellors often concern family and peer relationships, or feelings such as anxiety, apathy or depression, which can interfere with their academic and personal effectiveness.

Many students seek help in defining their interests and abilities in order to make important decisions about academic programmes and career plans. Others ask for help in writing resumes and in preparing to look for employment. Some experience difficulties with their studies, or wish to maximize their efficiency in studying. Still others want to improve their interpersonal and communication skills.

In addition to personal counselling services, the staff regularly presents comprehensive group programmes in such areas as educational and career planning, communication and assertiveness skills, stress management and speaking in public. Seminars and workshops on such topics as preparing for university, effective study methods, and various aspects of career development and the employment search process are always well-attended.

The Counselling Service maintains a library of career and educational information for reference use by all members of the University community and the general public.

The department also acts as an administrative centre for such frequently required academic tests as the Graduate Record Examinations, the Law School Admission Test, the Medical College Admission Test, and the Miller Analogies Test.

All discussions between students and counsellors are voluntary, private and confidential. Whenever required, students are given assistance in locating other specialized helping sources both on and off campus. Students who wish to talk with a counsellor are invited to visit the office in Hamilton Hall, Room 302, or telephone extension 4711.

Catholic and Protestant chaplains on campus provide a wide range of student services in worship, discussion groups, pastoral counselling and social action. At least one of the chaplains is available during the day in the office, and students can always call the chaplain’s residence for appointments at other times. The chaplains support many student activities as well as caring for personal and religious needs. Their office is in Wentworth House, Room 108; telephone extension 4207.

Chapel Services:

There is a chapel service at 10:30 a.m. in the University Chapel, on Mondays, Tuesdays, Wednesdays and Fridays during the Winter Session. These services are conducted by members of the student body, by members of the faculty or by the chaplains. There is also a weekly communion in the Chapel on Thursdays at 12:30 p.m. followed by a lunch at 1:00 p.m. The Chapel is open for private devotions each weekday from 8:15 a.m. to approximately 10 p.m. After 5 p.m. it may be necessary to enter the chapel through the Divinity College building.

STUDENT PLACEMENT SERVICE

The Student Placement Office (Canada Employment Centre) operates on a year-round basis to facilitate hiring of graduates, undergraduates, and recent alumni of all disciplines into permanent, temporary and part-time employment. Located in Hamilton Hall, Room 409, office hours are 8:30 a.m. to 4:30 p.m., Monday to Friday, telephone 525-9140, extension 4253.

Major national employers conduct on-campus interviews from October to March for career and summer employment. In co-ordinating this recruitment program, the Student Placement Office posts announcements on its own and departmental bulletin boards; provides the standardized University and College Placement Association application forms, and forwards them for pre-screening; maintains related job and employer reference material; schedules employment interviews.

Students should register at the Placement Office in September to prepare for this program.

A direct referral service to more immediate part-time and career jobs also operates throughout the calendar year. Bulletin boards should be checked regularly.

In addition, Student Placement maintains a library of reference material on a large number of potential private and public sector employers.

Staff are available to meet students on an individual basis to offer job referral assistance and to discuss career-related concerns such as resume development, preparing for interviews and conducting an effective job search.

FOOD SERVICES

The University operates a number of eating places on campus serving a variety of food items. Dining rooms for the use of students registered in meal plans are located in the Refectory and in the Commons Building. McMaster students, staff and faculty may purchase a variety of plans from the Food Services Department in the Commons Building. Coffee shops are strategically located on the campus, in A.N. Bourne Building, Togo Salmon Hall, Kenneth Taylor Hall, and the Rethskeller. Check with the Food Services Department for hours of operation. Food service is also available in a student-operated facility in Wentworth House, and in the cafeteria in McMaster University Medical Centre. Supplementing these facilities are vending machines at many locations on the campus.

PARKING

Campus parking facilities are limited and the availability of space cannot be guaranteed. Travel to and from the University on foot, by public transportation and in car pools is encouraged.

Parking regulations are in effect at all times and University parking permits are required for all private motor vehicles. These permits are valid only when purchased at an entrance kiosk (daily permit), or from the Parking Office in the E.T. Clarke Centre upon presentation of a current University identification card, vehicle registration and payment of the prevailing parking fee.

Special arrangements can be made for disabled parking privileges.

Drivers operating motor vehicles on campus are responsible for becoming familiar with the McMaster University Traffic & Parking Regulations. Violations are subject to fines and/or tow-away. Disregard of violation charges may result in suspension of parking privileges, tow-away at owner’s expense, sanction of transcripts and/or prosecution under the general law, the Trespass to Property Act and the City of Hamilton Private Parking Bylaw No. 75-155.

BOOKSTORE

The University Bookstore, owned and operated by the University, is located in the lower level of Gilmour Hall. A Microcomputer Centre is located within the Bookstore. McMaster University Alumni Association

Two of the principal purposes of the McMaster University Alumni Association are to serve its members and seek ways for its members to serve their University. Founded in 1895, just eight years after McMaster was incorporated, the association now includes more than 58,000 alumni.

The affairs of the Association are managed by the Alumni Council, which is made up of elected officers, counsellors who serve as portfolio managers, and the alumni representatives to the McMaster Board of Governors and Senate. The Council meets quarterly with its Executive responsible for carrying out alumni business between Council meetings.

The direct involvement of alumni is commonly through the various alumni branches.Traditionally, the branches have been geographic, serving all alumni living in a particular area; however, academic branches whose members share a common discipline, such as nursing, social work and commerce, are becoming increasingly popular.

The link between the Alumni Association and the University is through the office of the Director of Alumni Advancement, located on the first floor of Chester New Hall. This office maintains mailing addresses for all graduates and former students. The office also provides the Association, its branches and committees with support services as well as assisting with Association functions.

Together, the Association and the Office of Alumni Advancement attempt to be responsive to the diverse interests of alumni. Events such as Grads’ Day and Homecoming and services such as continuing education courses and group life insurance are but a few of the many ways the Association serves its alumni.

A very important aspect of the Association’s mission is to benefit McMaster. Alumni assist with the recruiting of promising high school students, support University fundraising campaigns, elect able representatives to the McMaster Board of Governors and Senate, and promote McMaster in any way possible.

In summary, the McMaster Alumni Association provides the graduates of this fine University with a means of maintaining a life-long link with the University.

Athletics

Professor W.H. Fowler/Director

The School of Physical Education and Athletics offers a variety of programmes so that all students have the opportunity to keep fit, compete in active pursuits at their own level, and enjoy sports of their choosing.

For those who wish to relax and enjoy their leisure time, a wide recreational programme is offered, including everything from sauna baths and swimming to squash and weight training. Most of the traditional club activities are offered and instruction is provided to assist beginners with the skills involved.

For those with a more competitive outlook, a highly developed and very popular intramural programme is in full swing from early fall until late spring.

For those students who possess still higher skills, the intercollegiate programme provides an exciting challenge to both men and women.

The fine performances of student athletes and the social involvement of the skills involved.

McMaster Association of Part-time Students (MAPS)

MAPS exists to look after the special interests of part-time degree or certificate students, who have a different educational experience than full-time students. University fees for these students include an assessment to support the Association.

The Association’s lounge and office are open all year from 10:00 a.m. to 9:00 p.m. Monday to Thursday, 10:00 a.m. to 2:00 p.m. Friday, when classes are in session. MAPS Executive Director, Ms. Judy Worsley, is available to help students. If you have a question pertaining to university procedure or a problem of any kind, Judy or the MAPS staff, can either supply the answer or put you in touch with someone who can.

The part-time student newsletter, LINK, is published on a regular basis, and will be sent to your professor or class representative for distribution to you. If you do not receive a copy, call or drop by the office.

MAPS provides the opportunities and methods for part-time students to communicate their needs and ideas to university officials, by ensuring representation on university governing-bodies and committees, and by the Association’s direct contact with university administrators on matters such as course availability, evening services and tuition fees.

COPUS, the Canadian Organization of Part-time University Students, works at the provincial and national levels to improve programme availability, financial aid, transferability of credits and equality under the tax laws for part-time students. MAPS is a member of this group of universities.

If you are a part-time student, MAPS is for you. It is a way to bridge the gap between you and the University, by helping you feel a part of McMaster’s student body. We urge you to participate as often as possible in the academic and social events which will be available to you at McMaster.

The MAPS lounge and office are located in Kenneth Taylor Hall, Room 102, telephone 525-9140, ext. 2021.

Student Government and Activities

The McMaster Students Union’s purpose is to represent the concerns and service the needs of over 9,800 full-time students. Every undergraduate student who is registered in 18 units or more, is a member of the McMaster Students Union (MSU), and as such is entitled to all its benefits and services.

The MSU is governed by the Student Representative Assembly (SRA), a council of up to 35 of its full-time members. All but two are elected in March by their fellow students in various faculties; each has a pro-portionate number of seats relating directly to the size of the faculty. The President and Treasurer are the remaining two members of the SRA. The President is elected in February by the entire student body and the Treasurer is elected by the SRA from the general student body. Students who have questions about student government, or wish to bring a matter before the SRA, should contact their representative, the President, or the Vice-President.

The duties of the SRA are to set policy for the MSU; to approve annual budgets; and to make decisions on capital purchases.

Under the direction of the SRA, committees have been established in the areas of academics, teaching awards, student services, finances, external affairs, special events and alcohol awareness. The committees are composed of assembly members and interested MSU members at-large.

Graduate student involvement is encouraged at the committee level. Vacancies are announced in the student newspaper, The Silhouette.

The McMaster Students Union Inc. operates a variety of services for students including a grocery store, Day Care Centre, Games Room, two full-time pubs, Emergency First Responses Team, Student Tenant Association and Sexual Education Centre. The MSU staffs an Ombudsman Office to help students with problems either internal or external to the University. The Programming Department organizes Orientation, Homecoming, Winter Carnival and major concerts. The Silhouette and the campus radio station CFMU, 93.3, are both owned and operated by the McMaster Students Union Inc. The MSU funds over 80 clubs and societies which encompass a kaleidoscope of areas/topics including academic, political, religious, cultural and general interest.

Information about the MSU and its services can be found in the student handbook (the Mac Almanac), the MSU Info Office (room 226, Hamilton Hall) and at the MSU General Offices (room 217, Hamilton Hall, 525-9140, ext. 2003).

Full-time undergraduates are urged to visit Hamilton Hall and to participate in the many student organizations and services.

(Through their membership in the MSU, full-time undergraduate students are also affiliated with the Canadian Federation of Students, and the Ontario Federation of Students (CFS/OFS). For information about both of these organizations, contact the MSU)
Undergraduate Academic Awards

The University Senate, acting on behalf of generous benefactors and donors to the University, bestows academic awards on entering, in-course and graduating students in order to encourage and recognize high levels of scholarship. In recognizing such scholastic achievement, the University requires all recipients of academic awards to fulfill a set of general conditions, in addition to meeting the particular conditions attached to individual academic awards. These general conditions are outlined below and at the beginning of each section which describes the various types of award. The general conditions have been established in order to ensure both equity in competition and an adequate overall academic standing. Any interpretation of the conditions attaching to academic awards is solely the prerogative of the Undergraduate Council.

TERMINOLOGY

(A complete explanation of the terminology used to describe Academic Awards is provided in the sections of the Calendar described below.)

The Winter Session is the period from September to April as defined in the Sessional Dates on pages 4 and 5.

Baccalaureate degrees are those listed under Degrees and Programmes, the abbreviations of which start with the letter 'B'.

Continuing, Occasional, and Post-degree Students are defined under Admission Requirements and are students not registered in degree programmes.

University Average (UA), Cumulative Area Average (CAA), Graduation Average (GA), Level, and Reviewing Period are defined under Academic Regulations.

The Sessional Average is the weighted average of the grades in all courses (excluding any designated 'Extra') taken during the Winter Session immediately prior to the May review.

A full load is the number of units specified in the Calendar for an individual level of a programme (e.g., Honours Biology and Psychology, Level II: 33 units) or, if the Calendar does not specify the programme work by individual levels, the average number of units per level.

1. General Conditions Relating to All Academic Award Recipients

1.1 The University Academic Awards listed below are provided exclusively for students entering, registered in, or graduating from their first baccalaureate degree programme at McMaster University. Students registered in a second undergraduate degree programme, Continuing Students, Occasional Students, and Post-degree Students are not eligible for these awards.

1.2 A student may be named the winner of an unlimited number of University Academic Awards but may retain the monetary benefits of:

a. travel scholarships and awards such as books and medals; and

b. awards continued from a previous year (including entrance scholarships), except as provided by the particular terms of an award; and

c. either one award greater than or equal to the value of a Senate Scholarship and one award of less than the value of a Senate Scholarship, or two awards of less than the value of a Senate Scholarship.

When a student is named the winner of an award but may not retain the monetary benefits because of the conditions listed above, the next student eligible to receive both the award and its monetary benefits will be named the winner of the award.

1.3 All awards for which a student is named the winner and receives the monetary benefits will be shown on the student's official record; all awards for which a student is named the winner but does not retain the monetary benefits will be shown on the student's official record horamis causa.

1.4 The monetary benefits of travel scholarships, awards won by part-time students and graduating students, and awards such as books and medals will be disbursed directly to the student.

1.5 The monetary benefits of other awards will be disbursed only if the recipient is then registered as a full-time student in a baccalaureate degree programme at McMaster University in the next Winter Session after the award was earned and then will be allocated in the following manner:

a. first the monetary benefits will be credited to the student's academic fees account up to the value of the academic fees prescribed for a full-load of work specified in the Calendar for the level and programme in which the student is registered;

b. then amounts in excess of the above will be disbursed directly to the student in November.

1.6 Awards credited to the student's fees account are not refundable in cash under any circumstances.

1.7 Awards credited to the student's academic fees account may be used only to defray academic fees for baccalaureate degree courses taken during the Winter Session in which the account is credited with the awards. Students wishing to defer the benefits of an award to a later session should apply to the Academic Awards Officer. Approval of applications is not automatic, and deferrals are not normally granted for more than one calendar year.

1.8 Students holding four-year full-fees scholarships who choose to accelerate their programme and to complete their degree earlier than normal by completing Summer Session courses and who wish to employ the benefits of their award to defray the academic fees for such courses should apply to the Academic Awards Officer. Approval of applications is not automatic.

1.9 The University reserves the right not to grant an award in the absence of a suitable candidate, and to limit the number of awards when there are too few suitable candidates. The University also reserves the right to withdraw, or amend the terms of, any award.

2. Academic Awards for Entering Students

2.1 These awards are provided exclusively for students qualifying for admission to Level I of a baccalaureate degree programme.
ACADEMIC AWARDS

2.2 In order to be considered for an entrance scholarship, students must obtain at least a first-class average in the secondary school credits required for University admission. All students who meet this requirement and who apply for early admission to the University within not more than two years of completion of their secondary school studies will automatically be considered as applicants for entrance scholarships, unless a separate application is explicitly required by the particular terms of the award.

2.3 In addition to meeting the General Conditions listed in Section 1, entrance scholarship recipients will begin their studies in the next Winter Session. Students wishing to defer the benefits of an award to a later session should apply to the Academic Awards Officer. Approval of applications is not automatic, and deferments are not normally granted for more than one calendar year.

2.4 Unless otherwise specified, recipients may retain an entrance scholarship which provides for awards beyond Level I while registered in a baccalaureate degree programme and until graduation or for four years (five years if registered in a five-level programme), whichever is less. In order to retain such scholarships, students must complete during each successive Winter Session at the University a full load corresponding at least to:
