THE UNIVERSITY

Named after Senator William McMaster, who bequeathed funds to endow a Christian school of learning, the University grew out of educational work initiated by Baptists in central Canada as early as the 1830s. After its initial years in Toronto, from 1857 to 1930, the University was moved to Hamilton. It became non-denominational in 1957, although the historic Baptist connection continues through the separate McMaster Divinity College.

More than 19,000 full-time students attend McMaster University, 2,000 of whom are pursuing advanced degrees offered through the School of Graduate Studies. In addition, over 3,400 part-time students are registered in the Fall/Winter session, from September to April, and 4,800 in the Spring/Summer session, from May to August. The University also provides courses in centres located outside Hamilton, for which full credit is granted.

Most of the 1000 members of the University faculty hold doctoral degrees in their areas of specialization. Faculty members are expected to teach both graduate and undergraduate courses and may be involved in the academic counselling of students.

The University's diverse academic programs are supported by some fine, and even unique, facilities. The University Library is a member of the Association of Research Libraries and contains 1.9 million volumes and has 7,782 current print journal titles and 7,274 current electronic journal titles. The Library has an extensive special collections section which includes the Bertrand Russell Archives, 18th Century materials and major Canadian collections. Facilities for programs in the Humanities include modern language laboratories, music rehearsal rooms, art studios, a museum of art and seminar rooms. The work of the Faculties of Science and Engineering is supported by sophisticated facilities, which include a nuclear reactor. There are six undergraduate general purpose computing labs on campus which operate using MS Windows 2000 based PCs and a variety of Windows based software. As well there are numerous departmental computing clusters which operate a mixture of Windows, Linux or Solaris environments. Students in residence have convenient access to the McMaster network and the internet from their rooms. The recreation, fitness and intramural programs offer more than 30 different sports in 22 sports and 6,000 students participate. The Interuniversity Athletic Program features 41 varsity sport opportunities—21 for men and 20 for women. The department also offers a full range of instructional and outdoor education programs throughout the calendar year. The athletic facilities include a 50-metre swimming pool, an eight-lane, 400-metre, all-weather track, four hard surface all-weather tennis courts, and a state-of-the-art fitness and conditioning facility known as the Pulse.

McMaster's campus, which is restricted to pedestrian traffic, is adjacent to the Royal Botanical Gardens at the western end of Lake Ontario. On-campus co-educational and single-sex residences are available for approximately 3,400 students.

The University is minutes from downtown Hamilton, and the activities that a major city has to offer. Students can get there by car or by taking one of the buses from the region's public transit system, which make frequent stops on campus.

* Not acceptable for the six-unit complementary studies elective required in Engineering I.

** Note: Engineering I students interested in entering the Engineering and Management program must take ECON 1003 as one of their complementary studies electives.

+ These courses may not be taken for credit by students in Science I.
# COURSE AVAILABILITY

The following are lists of upper-level courses available to students subject to enrolment limitations and the prerequisites as specified for each. (Engineering students should refer to the website at http://www.eng.mcmaster.ca/administration/electives.htm) A brief description of each course can be found under the appropriate Department within the Course Listings section in this Calendar.

* This degree program is also available through a combination of evening and summer study. The rate of completion however, will vary from program to program.
* A five-year co-op option is available.
* An Honours (Specialist Option) is available for this program.
* A Co-op option is available.

* The University also offers Thematic Areas of Study and a large number of Minor programs. Suggested lists of courses, which constitute non-degree Thematic Areas, have been assembled in the section Interdisciplinary Minors and Thematic Areas. Also in that section are two Interdisciplinary Minors. Other Minors are found in the program sections of most departments.
Glossary

Academic Probation, which may be assigned to students whose CA is at least 3.0 but less than 3.5, will allow a student to continue at the University for one reviewing period.

Advanced Standing/Credit may be granted to an applicant who has completed work at another university or college who has completed a Certificate/Diploma program at McMaster, subject to the applicant having met the minimum requirements prescribed by the University.

Antirequisite is a course which cannot be taken for credit before, after, or at the same time as the course with which it is listed.

Bursaries are granted based upon demonstrated financial need, a minimum expectation of academic accomplishment and, in some cases, other forms of earned merit. They may vary in monetary value, based upon the level of financial need demonstrated.

Continuing Student is a university graduate who is not proceeding to an advanced degree, but wishes to take one or more undergraduate courses.

Corequisite is a course which must be taken together with another course.

Course Numbers (e.g. 1A03) can be interpreted as follows: the initial digit indicates the Level of the course; the letter(s) in the middle identifies the specific courses within the Level; and the final digit(s) defines the number of units of credit associated with the course.

Cross-listed Course is a course which is listed under two or more subjects.

Cumulative Average (CA) is a weighted average based on the grades obtained in all courses taken.

Degree is conferred when a student completes a program of study (e.g. Bachelor of Arts, Bachelor of Kinesiology, Master of Science, Doctor of Philosophy).

Department is a subdivision of a Faculty, responsible for a particular subject or group of subjects (e.g. Department of Chemistry, Department of Modern Languages and Linguistics).

Elective Courses are those courses taken by a student which are not specifically designated in a student’s program, but which form part of the total number of units required to complete the program.

Extra Courses are those courses designated as “Extra”, which are not included as units toward completion of a student’s program. The grades obtained in such courses will not be included in the Cumulative Average. However, they will be included in the computation of the Sessional Average in the grading of a student’s performance.

Faculty is a major administrative and teaching unit of the University responsible for programs and courses relating to common fields of study or academic disciplines (e.g. Faculty of Humanities, Faculty of Engineering).

Full Load is the number of units specified in the Calendar for an individual level of a program (e.g. Commerce, Level II: 30 units). If the Calendar does not specify the program requirements by individual levels, divide the total units for all levels by the number of levels, discarding the remainder.

Full-load Average (FA) is based on the successful completion of a full load of course units (see Full Load definition), and includes only courses taken in the Fall/Winter session. Overload units (those above Full Load) and Extra Courses taken during the Fall/Winter session are included in the FA.

Full-time Student, for academic purposes is an undergraduate student who is registered in at least 24 units in the Fall/Winter session, including Extra Courses. Full-time status for students in the Faculty of Science Co-op programs is granted to those students registered in at least 12 units in Term 1 or Term 2 of the Fall/Winter session.

Letter of Permission is a formal document which allows a McMaster student to take one or more courses at another university for credit towards a McMaster degree.

Level is used to describe a student’s progression through a program.

Loans are monetary advances granted to students currently registered, based upon a demonstrated means and promise of repayment.

Mature Student is at least 21 years old prior to his or her first day of classes; has not attended secondary school for at least two years; and has not previously attended university.

Minor is an option available to students enrolled in four- or five- level programs. A Minor consists of at least 24 units — of which normally no more than six units may be from Level I — that meet the requirements set out in the program description of that Minor.

Part-time Student is an undergraduate student who is registered in fewer than 24 units in the Fall/Winter session, including Extra Courses.

Post-Degree Student is a university graduate or a person with professional qualifications who is not proceeding to an advanced degree, but wishes to take one or more graduate courses.

Prerequisite is a requirement to be fulfilled before registration in a course is permitted. This is usually the successful completion of another course.

Program is a specific combination of courses that fulfill the requirements for a degree.

Program Probation which may be assigned to students whose CA falls within the probationary band below the minimum CA required to remain in the program in good standing, will allow a student to continue in his/her program for at least one reviewing period. (See the General Academic Regulations section in this Calendar.)

Readmission See Readmission in the Admission Requirements section in this Calendar.

Registration is the process whereby a student enrolls in a program of study and/or courses and pays, or makes acceptable arrangements to pay, all fees.

Reinstatement See Reinstatement in the Admission Requirements section in this Calendar.

Required Courses are those courses which are specifically designated for inclusion in a program.

Requisite is an academic requirement that must be met to register in a course. A course requisite may comprise Prerequisites, Corequisites and Antirequisites.

Result of Session is the statement of the academic standing of a student at the end of a reviewing period. May continue in program, May not continue and Clear to graduate are three examples.

Review is an assessment of a student’s performance to determine eligibility to continue in a program or to graduate.

Reviewing Period is the time between two reviews for a student. Reviews will take place in May and August, provided the student has attempted 18 units of work since the last review or is a potential graduand.

Session is a period of study within the academic year. For example, the Fall/Winter session runs from September to April.

Sessional Average (SA) is a weighted average based on the grades attained in a session. Overload courses and Extra courses are included in the Sessional Average.

Term is a period of study within a session. The Fall/Winter session, for example, contains three terms, Term 1 runs from September to December; Term 2 runs from January to April; Term 3 runs from September to April.

Transcript is an official document summarizing the entire academic record of a student at a particular educational institution.

Tuition is fees paid in consideration for enrolment in a program of study and selected courses.

Undergraduate Student is a student enrolled in a program of study leading to a bachelor’s degree or to the degree Doctor of Medicine.

Units define the number of credits associated with a course. A unit is roughly equivalent to one lecture-hour per week for one term or two hours of laboratories or seminars per week for one term. Three-unit courses are usually one term in length. Six-unit courses are usually two terms, or one session.

Weighted Average is calculated by multiplying the grade points achieved in each course by the number of units in each course, totalling these results, and then dividing this result by the total number of course units. (See example under Grading System in the General Academic Regulations section in this Calendar.)

Withdrawal is the formal process of discontinuing studies in a particular course or program.
ADMISSION REQUIREMENTS

ENGLISH LANGUAGE PROFICIENCY

Each student granted admission to McMaster must be proficient in the use of the English language. Students will be expected to speak and write clearly and correctly in English.

If your first language is not English, you must have achieved a score of at least 237 on the computerized test (or 580 on the written test) on TOEFL, or the equivalent on other recognized tests.

You may be exempted from this requirement if you meet one of the following requirements:

1. Attended, in full-time academic studies, an accredited Secondary School (High School) or Post-Secondary College in an English-speaking country for at least three years, OR
2. Attended, in full-time academic studies, an accredited English medium Secondary School (High School) or Post-Secondary College in an English-speaking country for at least three years, OR
3. Attended, in full-time academic studies, an accredited English medium University for at least one year, OR
4. Resided in an English speaking country for at least four years immediately prior to application to McMaster.

It is your responsibility to make all arrangements regarding the writing of the TOEFL test or other recognized tests and to have the official score report forwarded to the Office of the Registrar in a timely manner.

ADMISSION FROM ONTARIO SECONDARY SCHOOLS

General Requirements
(For All Level I Programs)

To be considered for admission, you must satisfy the general requirements of the university and the specific subject requirements for the program to which you applied.

If you are an applicant from an Ontario secondary school you must meet the following three requirements:

1. An OSSD with acceptable standing; AND
2. An overall average in completed Grade 12 U and M courses which meets or exceeds the minimum set by the specific program to which you applied; AND
3. Satisfactory completion of 6 Grade 12 U and M courses including the subject requirements for your chosen program. Music External (Conservatory) 4M or OAC Music is acceptable as a credit and the mark obtained can be included in the calculation of your admission average. Alternatively, marks supplied by an acceptable conservatory of music may be used to determine your average for admission. You may submit certificates from a recognized conservatory of music in Grade 9 practical and Grade 3 theory.

Planning For Admission and Ontario Secondary School Reform

With the implementation of secondary school reform and the phasing out of OAC courses, it has been necessary for the university to re-define its admission requirements relative to the Grade 12 U and M courses. We are aware that some secondary school students, during the stages of the transition, may present courses from both the the new (OSS) and former (OSIS) diploma programs. McMaster is committed to ensuring that all applicants shall be considered fairly. Therefore, in the sections below you will find statements and guidelines regarding admission requirements for both new OSS and the former OSIS programs.

Supplementary Application Forms and Personal History

Certain Level I programs such as Arts & Science, Bacher of Health Sciences, and Midwifery have mandatory supplementary application forms which must be completed by specific deadline dates. See Deadlines in the Application Procedures section of the Calendar for specific deadline dates.

Optional supplementary application forms are mailed directly to applicants in April if they do not receive an offer of admission. Forms must be completed by a deadline which is specified on the form. Normally, these forms are reviewed by Faculty admission committees to aid in making decisions regarding applicants who are approximately 3% below the cutoffs in May.

In some cases, letters of recommendation, personal history or other additional information may be requested by the university to aid in the admission process.

Early Admission from Ontario Secondary Schools

Early conditional admission is granted annually beginning in mid-April to qualified applicants, depending on your academic standing at that time. Early conditional admission is based on:

1. six appropriate midterm/interim Grade 12 U and M grades, OR
2. at least three final Grade 12 U and M grades combined with Grade 11 U and M grades PLUS enrolment in the additional three Grade 12 U and M courses.

If you do not receive an offer of admission in April, you will automatically be reassessed for admission after additional Grade 12 U and M (or OAC) grades are received from your secondary school in May.

Admission offers made in May will be based on updated Grade 12 U and M grades and information you may have provided on a supplementary application form which will be mailed directly to you in April.

If you are granted a conditional offer of admission, you must meet the general requirements of the university. See General Requirements (For All Level I Programs) above.

The University reserves the right to withdraw a conditional offer of admission due to any of the following:

1. If you do not meet the minimum final average prescribed for your chosen program; OR
2. If you do not receive an OSSD; OR
3. If you do not complete six Grade 12 U and M courses including all required subjects; OR
4. If you do not respond to the OUAC within the response period indicated on your offer letter.

Minimum Final Average

If you are a secondary school applicant who receives a conditional offer of admission based on interim grades, you will be required to achieve an overall average (on six (6) final grades including all required courses for your desired program) as indicated on your offer of conditional admission.

If your final average falls below this level (or its equivalent), your offer of admission will be rescinded and your registration will be cancelled.

The required minimum final average will vary from year to year and by program. This average will be stated clearly on the offer of conditional admission.

Final Admission from Ontario Secondary Schools

If you fulfill the requirements for your OSSD, including the subject requirements for your chosen program by the end of February, you may be granted an offer of Final Admission prior to April.

If you do not receive a conditional offer of admission by June 4, you may still be considered for final admission, once final marks are received, depending on availability of space in your chosen program.
Deferral of Admission for Ontario Secondary School Students

Students who receive both an offer of scholarship and an offer of admission may apply to defer their entry for one year. Otherwise, McMaster does not normally grant a deferral of an admission offer unless special circumstances exist. Each case is evaluated on its own merits. If a deferral is granted, it is conditional upon the student not attending a secondary or post-secondary institution during the deferral period.

All requests for deferral of both admission and scholarship should be made in writing to the Office of the Registrar and the Office of Student Financial Aid & Scholarships at McMaster by September 1, 2004 outlining the reasons for the request.

Normally, decisions regarding deferral requests are not made until early August, after the receipt of all final grades.

Program Transfer After Admission

If you are admitted to one program and subsequently wish to transfer to another, you may be able to do so, provided space is available and you have met the average and subject requirements for the second program. Contact the Office of the Registrar to request a program transfer.

SUBJECT REQUIREMENTS FOR SPECIFIC LEVEL I PROGRAMS

ART 1F06: Entrance to any Honours Art Program requires the permission of the School of the Arts as these programs and courses have limited enrolments. Students who wish to enroll in ART 1F06 must first complete a portfolio interview. Portfolio interviews occur between January and April each year for entrance in September of the same calendar year. Only those students who call the office of the School of the Arts before March 1 to book appointments for portfolio interviews will be guaranteed consideration for entrance into ART 1F06. (Late applicants will only be interviewed if space availability permits.) The portfolio should contain a variety of original work in different media including work derived from both first-hand observation and the imagination. Aptitude in art and academic ability are both considered in the selection process. In exceptional circumstances where distance does not allow for an interview, portfolios may be submitted in the form of colour slides or photographs. Late applications will be considered subject to space availability and merit after the first allocations have been confirmed in June. Acceptance into ART 1F06 is contingent upon receiving School of Arts verification and a letter of admission from the University guaranteeing a space in the program provided the student meets the minimum academic requirements as outlined under School of the Arts programs in the Faculty of Humanities section of the Calendar. Applicants for this course should use the MHA OUAC Code to ensure proper consideration of your application.

C. General Policy on the Transfer of Course Credits

To facilitate program completion by undergraduate students seeking to transfer course credit from an accredited university to McMaster, the University has implemented the following principles:

1. Acceptance of transfer credits from accredited universities shall be based on the recognition that, while learning experiences may differ in a variety of ways, their substance may be essentially equivalent in terms of their content and rigour. Insofar as possible, acceptance of transfer credit shall allow for the maximum recognition of previous learning experience in university-level courses;

2. Subject to degree, grade and program requirements, any course offered for credit by an accredited university shall be accepted for credit by McMaster when there is an essential equivalency in course content. However, no course for which a grade of less than C- (60%) has been achieved will be considered.

D. Advanced Credit

As noted in sections (E), (F), (H), (M), (N) and (O) below, advanced credit may be granted if you have completed work at another university or college, and you have met the minimum requirements prescribed. Advanced credit may shorten your degree program at McMaster.

E. Credit in Courses by Special Assessment (Challenge Examinations)

If you have acquired knowledge at different type of institution or in a manner that makes assessment of your qualifications difficult, you may be permitted to seek degree credit through special assessment (Challenge for Credit).

Challenge for credit is not intended to give credit for skills or knowledge gained through high school, college or previous university instruction. The special assessment may include one or more of the following: written examinations, papers, essays, submissions of a substantial body of work, or portfolios, or laboratory tests. Credit can be granted only for those courses listed in the current McMaster calendar. Not all courses in all disciplines are available for challenge. Faculties and departments are free to determine which, if any, of their courses are open for special assessment. Challenges are assessed on a pass/fail basis. The passing grade for a challenge appears on the transcript as COM (Complete) and is not used in computing averages or evaluating honours or scholarship standing, but is counted as a course attempt. Unsuccessful attempts will be noted on the transcript. Special Assessment is not available for a course taken previously and a course may be attempted only once by special assessment.

Once you have registered for a course by such means (known as challenge exams) the registration may not be cancelled and you may not withdraw from the course.

Waivers of prerequisites only (ie. no degree credit) will be at the discretion of the department.

F. Transfers from Other Universities

When you transfer to McMaster University, you will normally receive credit for courses in which you have obtained at least a C (third-class honours) standing. Assessment of courses for transfer credit is subject to the guidelines of the individual faculties.

As a transfer student, you must also satisfy the Residence Requirements set out in the General Academic Regulations section of this Calendar. The University will not accord to you privileges which would not be granted by your own university.

Grades obtained in courses taken at another university will not be included in McMaster's Cumulative Average, and, therefore, cannot be used to raise your standing.

If you have been required to withdraw from another university and have fulfilled your period of suspension, you may apply for admission. However, you must present a letter of explanation and clarification concerning your past academic performance. You may also be asked to provide academic documentation for proof of further academic achievement which is both current and relevant.

Applicants presenting a strong academic record may be considered for an early conditional offer of admission.

G. Deferral of Admission

Students who receive an offer of admission and whose country of residence is Canada may apply to defer their entry to McMaster for one year. Each case is evaluated on its own merits. If a deferral is granted in the current McMaster calendar, but all courses in all disciplines are available for challenge. Faculties and departments are free to determine which, if any, of their courses are open for special assessment. Challenges are assessed on a pass/fail basis. The passing grade for a challenge appears on the transcript as COM (Complete) and is not used in computing averages or evaluating honours or scholarship standing, but is counted as a course attempt. Unsuccessful attempts will be noted on the transcript. Special Assessment is not available for a course taken previously and a course may be attempted only once by special assessment.

H. Graduates Applying for a Second Bachelor's Degree

Admission is by selection. If you have a first degree, you may apply to take an Honours second degree in the same subject area or a second degree in another discipline. Please note two exceptions: B.Com. and B.Com. (Honours) cannot be done as second degree programs. Applicants who already hold a B.Eng. Degree may not apply to any B.Eng. discipline as a second degree. The requirements are set out in the General Academic Regulations section of this Calendar.

If you wish to enter a Second Bachelor's Degree in a subject area from the Faculty of Science, please note the additional regulations for such a program in the Faculty of Science section, Second Bachelor's Degree Programs. If you are a McMaster graduate or potential graduate, you may be able to use the McMaster University Returning Student application. (See Application Procedures section of this Calendar.)

I. Continuing Students

To be eligible to take courses as a Continuing Student you will be expected to have at least a C (third-class standing) average, with no failures, in your final year's work (or the equivalent, in the case of a degree taken in part-time studies), and academic records which are satisfactory to the Department and the Office of the Associate Dean (Studies) of the appropriate Faculty.

If you are a graduate of a McMaster degree program and wish to become a continuing student, you do not need to apply through Admissions, but need to submit a Registration form.

As a continuing student with a non-McMaster degree, you need only apply formally through Admissions in the first instance. In subsequent sessions, you will only be required to register. Acceptance as a Continuing Student carries no implications with respect to acceptance in the School of Graduate Studies. If you plan to proceed to a graduate degree you should apply directly to the specific department of your program of interest.
J. Post-Degree Students

If you are a university graduate or a person with professional qualifications who wishes to take one or more graduate courses but not proceed to an advanced degree, you may apply to McMaster as a post-degree student. To enrol as a post-degree student, you must apply to the appropriate departments and have your admission and registration approved by the School of Graduate Studies for each session in which you wish to take courses. You will register and pay fees as a graduate student.

Acceptance as a post-degree student carries no implications with respect to admission to advanced degrees, and even if such admission is granted subsequently, credit toward the advanced degree will not normally be granted for the work previously taken.

K. Readmission

If you are a former McMaster student who voluntarily withdrew from an undergraduate program more than five years ago and you wish to return to your studies, you must apply for Readmission through the Office of the Registrar. Students from the School of Nursing must apply for Readmission regardless of time elapsed following voluntary withdrawal.

If you were registered within the last five years and you left the university in good academic standing, it is not necessary for you to apply for Readmission. Normally, you will be permitted to register in your previous program or another program for which you qualify.

L. Reinstatement

See the General Academic Regulations section in this Calendar.

For more information concerning the amount of advanced credit granted, please refer to the Certificate and Diploma Programs section of this Calendar.

P. Mature Students (Part-time Admission)

If you do not qualify for consideration under one of the above categories, McMaster will assess your eligibility as a mature student. You may be considered for limited admission to part-time study provided all of the following conditions are satisfied:
1. You are at least 21 years old, or will be, prior to the first day of classes for the session to which you apply.
2. You have not attended secondary school for at least two years.
3. You have never attended university.
Admission Requirements

The Faculty of Engineering, the Arts and Science Programme and the Kinesiology program do not admit under the category of mature students. The Faculty of Science requires satisfactory standing in the Grade 12 U or OAC Mathematics and Science requirements, as described in the Admission from Ontario Secondary Schools in this section. The Faculty of Business requires Grade 12 Advanced Mathematics or its equivalent.

If admitted, you may register as a mature student to take Level I courses, one course at a time. If after the first six units, you have achieved a grade of B- or better, you may petition your Faculty to be allowed to take two courses at a time.

After taking at least 12 units, your performance will be reviewed as follows:

i) If you have a Cumulative Average (CA) of at least 3.5 with no failures, you will be allowed to register for full-time study.

ii) If you have a CA of at least 3.0 with no more than six units of failure, you will be allowed to register in another six units of study and will be reviewed again after completion of these six units (see Second Review below).

iii) If you have failed more than six units, you may not continue at the University.

iv) If your CA is less than 3.0, you may not continue at the University.

Second Review:

a) If you have a CA of at least 3.5, you will be allowed to register for full-time study.

b) If you have a CA of less than 3.5, you may not continue at the University.

Q. Nursing Occasional Category

If you are applying to McMaster University to take degree course work in order to become academically eligible to apply to the B.Sc.N. program, you may apply to enrol in a maximum of 12 units of academic work per calendar year. You may take courses in any Faculty, subject to prerequisites and enrolment limits. Normally, applicants to the Nursing Occasional Category must meet the same eligibility criteria as Mature Student applicants. For details see the heading Mature Students (Part-Time Admission) in this section of the Calendar.

Once you have achieved academic eligibility for the B.Sc.N. program, you must apply to that program and participate in the regular admission process.

R. Enrichment Program for Secondary School Students

If you are an outstanding secondary school student and wish to enrol in a university-level course while completing Grade 12 U and M courses in your final year of study, you may apply for the Enrichment Program. For more information contact the Office of the Registrar.

S. Letter of Permission - For Credit At Another University

If you are a student attending another university, you may apply to take McMaster courses for credit at your own institution. Please note, not all courses are available for credit outside McMaster and some are subject to enrolment limits.

You must initially apply through the OUAC and send your Letter of Permission directly to McMaster. Subsequent requests to take courses on a Letter of Permission do not require an application. An updated Letter of Permission from your home institution is required for each new session.

T. Listener

If you are still uncertain about degree courses, you may register as a listener in a degree course at a reduced rate, but not for credit. You attend all classes, but do not complete any of the essays, tests and other formal requirements. You do not receive a grade for courses that you attend. Some students have eased their way into degree study with this option, subsequently enrolling in further courses for credit. Please note not all courses are available to Listeners.
APPLICATION PROCEDURES

1. Determine the appropriate application form to use when applying for admission. (See categories below.)
2. Determine application deadline. (See Deadlines on following page.)
3. Refer to the Admission Requirements and specific Faculty sections of this Calendar for further information.

Applicants currently residing outside of Canada who are not Canadian citizens and are not currently registered in an Ontario secondary school (in Ontario or abroad) in a daytime program of study should use the 105F form.

You may apply on-line at http://compass.ouac.on.ca or may obtain the OUAC 105D or 105F form from any Ontario university Admissions Office or from the Ontario Universities’ Application Centre, 170 Research Lane, Guelph, Ontario, Canada, N1G 5E2, and follow the instructions therein.

Note: You must provide McMaster with official transcripts of marks and/or certificates from all secondary and post-secondary institutions you have attended.

If you are currently attending secondary school, please see your guidance counsellor to obtain a transcript. If you have previously attended secondary school in another province, you may need to obtain the transcript of secondary school marks from the Ministry or Department of Education in that province.

+ If you are a graduate of a McMaster degree program and wish to become a Continuing student, you do not need to apply for admission, but need to submit a registration form.

Use the Application for Admission to Ontario Colleges if:
- You are interested in applying to McMaster’s Nursing (B.Sc.N.) program at the Mohawk College or Conestoga College sites. For application information contact Ontario College Application Services (OCAS) at http://www.ocas.on.ca or (519) 763-4725.

- Reinstatement: You are a former McMaster student who was previously ineligible to continue studies at McMaster University.
- Providing you have not attended another university nor received a college diploma since last registered at McMaster.

Please obtain the Reinstatement Request Form from the Office of the Registrar, Gilmour Hall, Room 108, McMaster University, Hamilton, Ontario, L8S 4L8. See application deadlines as listed in this section of the Calendar. The Nursing deadline is February 15 for September entry.

Use the McMaster University Part-time Degree Application to apply to McMaster on a part-time basis if:
- You are currently registered at another university or college and wish to transfer to McMaster.
- You have not been previously registered at McMaster and wish to pursue an undergraduate degree.
- You have completed a degree at another university and wish to attend McMaster to pursue a second undergraduate degree or to take courses as a Continuing student.
- You are currently registered at another university and wish to attend McMaster to take courses on a Letter of Permission for credit at that university.

Obtain the Part-time Degree Application from the Office of the Registrar, Gilmour Hall, Room 108, McMaster University, Hamilton, Ontario, L8S 4L8. You will be provided with more information on application procedures at that time.
Use the McMaster University Post-Degree Studies Application:

- You wish to register as a post-degree student.
- Obtain the Post-Degree Application from the Graduate Studies Office, Togo Salmon Hall, Room 111, McMaster University, Hamilton, Ontario, L8S 4M2 and use it to apply to the appropriate academic department(s).

**Note:** Your admission and registration must be approved by the School of Graduate Studies for each session in which you wish to take courses. If you are a graduate from a university other than McMaster, you must provide McMaster with official transcripts of marks from all post-secondary institutions you have attended.

### DEADLINES

A complete application includes: an application form, relevant transcripts, and all other documentation stipulated in the Admission Requirements and specific Faculty sections of this Calendar, in letters from the appropriate Faculty and/or in letters from the Office of the Registrar.

Since the language of instruction at McMaster is English, we would prefer all documentation to be in the English Language. However, documentation in Canada's other official language, French, will be accepted.

All Level I programs have enrollment limits and may become full prior to published deadlines. The University reserves the right not to accept applications submitted after a program is filled. You are advised to submit your application well in advance of the deadlines given below.

All documentation submitted in support of your application for admission becomes the property of the University and is not returnable.

If you are not accepted, or you fail to enrol following acceptance, your documentation will be destroyed at the end of the admissions cycle. If you reapply, you must submit any new academic information in addition to the documentation submitted previously.

### Academic Counselling for Those Offered Admission

If you are offered full-time admission to Level I, you will be asked to confirm that you have accepted the offer of admission and will attend the University.

Your admission package will include a Registration Kit with information about the University, academic counselling and registration procedures.

Your Faculty may also arrange a visit to the University so you may meet with a Faculty advisor to set up your program. Although attendance at the summer counselling and registration sessions is not compulsory, you are strongly advised to participate. If you cannot attend one of these sessions, counselling will be provided at September registration.

If you are offered admission above Level I, you may arrange for academic counselling with the Office of the Associate Dean of the Faculty offering the program, or the Office of the Director of the program.

GENERAL ACADEMIC REGULATIONS

STUDENT ACADEMIC RESPONSIBILITY

In its commitment to helping students achieve their academic goals, McMaster University makes available numerous tools and resources, including the Undergraduate Calendar, degree audits and academic advisors. However, students must assume certain responsibilities. They include:

• meeting admission requirements for a program
• applying to that program by the stated deadline
• selecting courses that meet the program requirements
• completing courses in an order that meets pre-requisite requirements
• becoming familiar with and respect Sessional Dates (see Sessional Dates section of this Calendar), the general academic regulations (see General Academic Regulations section of this Calendar) and the Faculty/program/school specific regulations as found in the appropriate section of this Calendar

Students who do not follow these guidelines may experience academic consequences such as cancellation of registration in courses, completion of courses that are not counted towards their degree, or delayed graduation.

In addition, students are expected to:

• become familiar with and respect the Senate Policy Statements (see Senate Policy Statements section of this Calendar)
• pay, within the prescribed deadline, undergraduate fees
• be aware that changes to course load and program may affect eligibility for government financial aid (e.g. OSP and out of province loan programs), University financial aid (e.g. bursaries and work programs) and scholarships
• consult with the Centre for Student Development in a timely manner to make the necessary accommodations for special needs.

ACADEMIC REGULATIONS

The regulations which follow are the general regulations of the University. You should read both these general regulations and your Faculty regulations, which may be more specific. They appear in the Faculty sections of this Calendar.

Since the Academic Regulations are continually reviewed, we reserve the right to change the regulations in this section of the Calendar. This University also reserves the right to cancel the academic privileges of a student at any time should the student’s scholastic record or conduct warrant so doing.

In the event there is a conflict between the program regulations and the general regulations in this chapter, the program regulations take precedence.

Faculties are authorized to use discretion in special situations by taking into account past practice, the spirit of the regulations, and extraordinary circumstances. Students who believe their situations warrant special consideration should consult the appropriate Office of the Associate Dean.

The Academic Regulations listed below are effective as of September 1993. These regulations apply to all undergraduate students admitted or readmitted to the University from September 1993 onward.

1. UNIVERSITY REGULATIONS

Residence Requirements

While most students will complete all their undergraduate work at McMaster University, the minimum requirements set out below apply to students who take part of their work at other institutions.

In order to obtain any four- or five-level, first undergraduate degree, you must complete at least two of the levels (approximately 60 units of work) beyond Level I, including the final level, at McMaster.

To obtain a three-level, first undergraduate degree, you may satisfy the residence requirements either:

1. by completing the final level and at least one other level (a minimum of approximately 60 units of work) at McMaster University;

or

2. by completing the final level (approximately 30 units of work) at McMaster University, including at least 18 units of program-specific courses.

The work used to satisfy the residence requirements must be completed at McMaster University; work taken at another university on a Letter of Permission will not count toward the minimum residence requirements.

All the work for a second bachelor’s degree must be completed at McMaster University.

Registration

The purpose of registration is to officially record your program and courses. Information on how to register will be sent to eligible students. You are responsible for ensuring that your registration information is complete, and that your course selections meet the requirements of your degree. Counselling is available to assist you in your course selection.

■ Admission to Programs: Admission to and transfer between programs must be approved by the Office of the Associate Dean of your Faculty.

■ Selection of Courses: Before you select the courses you wish to take, please read the requirements for your program in the appropriate Faculty sections of this Calendar. You are responsible for ensuring that your course selection meets the requirements of your degree. If you fail to meet the program requirements, you will not be eligible to graduate.

Select the courses required for your program; then select your electives. Ensure that you have completed the courses which are listed as prerequisites, have completed or chosen courses that are listed as corequisites and that permissions have been obtained, if required. If you do not have the course requisites, you will not be able to take the course selected.

■ Changes to Registration: The last day for adding or dropping courses is approximately one week after classes begin for each term. (Please see the tables in the Sessional Dates section for the relevant dates for each term of the academic year.) After the above-mentioned period, you may cancel courses until the last day to withdraw without failure by default. Canceled courses will be shown on your transcript with the notation CANCELLED. After this date, you will remain registered in courses whether or not you attend classes. Your transcript will show a grade of F for any course not successfully completed.

You are responsible for ensuring that your course selection meets the requirements of your degree. You should review your personal degree audit on the working day following each time you drop or add courses, and contact a student advisor in the Office of the Associate Dean of your Faculty if you have questions. Changes to your course load may also affect your fees and your eligibility for scholarships and financial aid such as OSAP.

■ Limit on Level I Courses: In most Faculties, you may not obtain credit in more than 42 units of Level I courses in a three- or four-level program, or more than 48 units in a four-level program.

■ Eligibility for Awards: (See Section 6 in this section and Undergraduate Academic Awards section for more information.)

■ Overload Work: If you wish to take more than the normal number of units prescribed for a Level, you may do so only with the permission of the Office of the Associate Dean of your Faculty. Normally, a Sessional Average of at least 7.0 in the immediately preceding review period will be required if an overload is to be permitted. Additional academic fees will be assessed for overload work. (See Financial Information section.)

■ Load in Spring/Summer Session: If you wish to take more than 12 units in the Spring/Summer Session, or more than six units in either term of that Session, you may do so only with the permission of the Office of the Associate Dean of your Faculty.
GENERAL ACADEMIC REGULATIONS

Repetition of Courses: Students may repeat courses that have been failed if, for which credit has been obtained a number of times, with the exception of the students in the Faculty of Business who may only repeat courses which they have failed. The grades for all attempts appear on the transcript and enter into the computation of the Cumulative Average. However, only one successful attempt will enter into the computation of credit earned towards your degree.

Auditing Courses: If you do not wish to have credit for a course, you may, with the approval of the Chair of the Department and the Office of the Associate Dean, audit the course. You must satisfy the prerequisites for the course, but will not complete assignments or write the final examinations. You will not be permitted to register for credit in the course after the registration deadline for the session has passed.

Letters of Permission: If you are in good academic standing at McMaster and you wish to attend another university to take courses for credit towards a McMaster degree, you must obtain permission ahead of time. To do this you must seek a Letter of Permission from the Office of the Associate Dean. Please take note of any conditions that might apply, including the requirement of a grade of at least C- for transfer credit. You should note that the grades obtained in courses taken at another university will not be included in the Cumulative Average. Full-time students taking courses on a Letter of Permission must continue to carry a full load at McMaster during the Fall/Winter session if they wish to be considered for Undergraduate Award or Academic Awards; i.e., courses taken on a Letter of Permission do not count toward your load for purposes of academic awards.

Withdrawal from the University: If you wish to withdraw from the University, you must consult the appropriate Office of the Associate Dean. Your student identity card must be surrendered to the Office of the Associate Dean. Your course record will be handled as outlined above in Changes to Registration.

Transfer of Credit between Faculties: Transfer of credit between Faculties is handled by the Office of the Associate Dean to which you wish to transfer. It is possible that full credit may not be given at the time of transfer between Faculties and additional courses may need to be taken.

Calculation of Cumulative Average and Reinstatement After Poor Academic Performance: Effective September 1997, if you are reinstalled at the University, your Cumulative Average will be reset to 0.0 on zero units, although you may (at Faculty discretion) receive credit for prior work. If you are reinstated, you are in academic probation. You must complete a minimum of 60 units of work after reinstatement to be eligible for Graduation With Distinction or other recognition based on the Cumulative Average.

International Study

If you wish to engage in international study, you may do so either by participating in one of the formal exchange programs that exist between McMaster and a number of universities in other countries; by participating in one of the programs available through specific Faculties; or by independent study abroad.

Formal exchange programs are those in which McMaster has an agreement with another institution, involving a temporary exchange of students. As an exchange student, you register and pay your tuition fees, and supplementary fees at McMaster. No tuition is paid at the foreign institution. If you are enrolled in a formal exchange program, you can obtain further information and an application form from the Student Exchanges Officer, Gilmour Hall, Room 104. Applications are normally due mid-January for exchanges expected to begin the following September. Admission is by selection. A registration checklist is available to assist you in making all necessary arrangements.

Students must recognize and accept the fact that, in many countries of the world, especially the newly-emerging nations, change may be the only constant. There are no guarantees that certain courses will be offered or that housing will be as one might expect. Spending time on an exchange program or an independent study abroad program offers an opportunity to develop one's adaptability and resourcefulness in the face of new situations.

McMaster University cannot be held accountable for unforeseen changes in the host country.

For information about programs and universities, please contact the Student Exchanges Officer, Gilmour Hall, Room 104.

2. ACADEMIC STANDING AND PROGRAM REQUIREMENTS

Academic Standing

Academic standing is reviewed in May and August each year for students who
1. have attempted at least 18 units of work since the last review; or
2. may be eligible to graduate at the next Convocation; or
3. were admitted under the part-time mature student provision and have attempted the first 12 units of work.

In the review of academic standing, three sets of decisions are made:
1. whether a student may graduate;
2. whether a student may continue at the University; and
3. whether a student may continue in a program.

Minimum Requirements to Continue at the University

All students must maintain a CA of at least 3.5 at each review to continue at the University. Under certain circumstances, as described below, students may be allowed to continue on academic probation for one reviewing period with a CA of 3.0 to 3.4. If your CA is less than 3.0, you may not continue at the University.

Level I Registration and Academic Standing Requirements

When you are admitted to McMaster University for the first degree, you will register in one of the following Level I programs: Arts and Science I, Business I, Engineering I, Health Sciences I, Humanities I, Kinesiology I, Mathematics and Statistics I, Medical Radiation Sciences I, Midwifery I, Music I, Science I, Nursing I, or Social Sciences I. If you enter the University without Advanced Standing being granted, you must attempt a full load of Level I work before proceeding to the work of higher levels.

If you are studying part-time, the Office of the Associate Dean has the discretion to permit you to take some of the work in the higher levels prior to having attempted the full load of Level I. Decisions will be made on an individual basis, according to the special circumstances that apply in the particular case.

At any review during Level I before you complete the Level I work, as in the case of a part-time student, you must attain a CA of at least 3.5 to continue at the University in good standing. If you attain a CA of 3.0 to 3.4 you may remain at the University for one reviewing period, but will be placed on academic probation. You may be on academic probation only once during your University career. If your CA is less than 3.0 you may not continue at the University.

At the review when you complete the Level I work, if you attain a CA of at least 3.0 and have not previously been on academic probation, but fail to meet the admission requirements of any program, you may continue at the University for one additional reviewing period on academic probation. You will be registered in your original Faculty, and will be classified as a Level I irregular student if your work may only qualify you to be considered for admission to a program in another Faculty. If, at the end of the next reviewing period, you again do not qualify for admission to a program, you may not continue at the University. If your CA is less than 3.0 you may not continue at the University.

Students in Arts & Science I should refer to the Arts & Science Programme regulations listed below.

Health Sciences I, Nursing I and Midwifery I students should refer to the program regulations listed in the Faculty of Health Sciences section in this Calendar.
Minimum Requirements for Entering and Continuing in a Program Beyond Level I

Admission to the programs beyond Level I is based on performance in Level I. You must meet both the minimum requirements to continue at the University, as described above, and program-specific requirements of each Faculty, as described in this Calendar.

> ARTS & SCIENCE PROGRAMME

**B. Arts Sc. (Honours) and B. Arts Sc. Programmes:** You must have a CA of at least 6.0 to continue in the program. If your CA is from 5.5 to 5.9, you may remain in the program, but will be placed on program probation for one reviewing period. You may be on program probation only once.

If your CA is 5.5 to 5.4, you must transfer to another program for which you qualify, or register in the Art & Science Programme as an irregular student for one reviewing period. During that period you cannot take Arts & Science Programme courses. At the end of that period, you may apply for readmission to the Arts & Science Programme. If your CA is less than 5.0, you will be placed on academic probation.

You may continue in the program for one reviewing period as an irregular student but cannot take Arts & Science Programme courses. The purpose of this period is to prepare yourself for a program outside the Arts & Science Programme. You may be on academic probation only once. (Potential graduands may not continue at the University.)

If your CA is less than 3.0, you may not continue at the University.

> SCHOOL OF BUSINESS

**Business I:** For specific admission requirements to Commerce II see Program Notes under the heading Programs in the School of Business section of this Calendar. If you are not admitted to Commerce II at the end of Business I, you have the following options available to you:

If your CA is 3.5 or greater, although you may not continue into a Commerce program either now or in the future, you are still in good standing at the University. You may continue at the University in a program outside the School of Business or as an irregular student in Business. To continue in a program outside the School of Business, you must apply for admission to that program through the Office of the Associate Dean appropriate for that program. You should also consult that office for more details.

If you are not admitted to another Faculty you may register in the School of Business as an irregular student for one reviewing period. During that period you cannot take Commerce courses and you will not be eligible for consideration for admittance to Commerce II or readmission to Business I. The purpose of your registration as an irregular student is to make yourself eligible for admission to a program outside the School of Business.

If you have a CA of 3.0 to 3.4, you will be on academic probation and may continue at the University for one reviewing period as an irregular student in the School of Business but will not be permitted to take any Commerce courses. At the end of your probation period you will not be eligible for consideration for Commerce II or readmission to Business I. The purpose of the probation period is to make yourself eligible for a program outside the School of Business.

If you have a CA of less than 3.0 at the end of Business I, you may not continue at the University either on a full-time or part-time basis.

**Commerce II:** Upon satisfactory completion of Commerce II, qualified students may continue in one of the following programs:

- **Honours B.Com. Program:** You must have a CA of at least 6.0 to enter the Honours B.Com. program in Level III or IV or to continue in the Honours B.Com. program. Once admitted, if your CA is 5.5 to 5.9, you may continue in the Honours B.Com. program, but will be placed on program probation. You may be on program probation for only one reviewing period (as specified in the Glossary section of this Calendar). If your CA is 3.5 to 5.4, you may transfer to a Business Program. If your CA is less than 3.0, you may not continue at the University. Regardless of your CA, if you receive more than six units of failure (in required or elective course work) after entry to Level II Commerce, you will not be permitted to continue in a program in the School of Business.

- **B.Com. Program:** You must have a CA of at least 4.0 to continue in the B.Com. program. If your CA is 3.5 to 3.9, you are permitted to continue in the B.Com. program on program probation for one reviewing period (as specified in the Glossary section of this Calendar). Reinstatement

If you are ineligible to continue at the university (i.e. the result of session on your last grade report was May Not Continue at University) and you wish to apply for reinstatement, please contact the Office of the Registrar. Your application will be required to submit the following information along with your application:

1. A summary of the relevant circumstances surrounding your academic situation during the last session attended.
2. Reasons for reinstatement at this time.
3. Reasons for selection of courses/program indicated.
4. Activities since last registered at the University, including all academic work.

Some Faculties may require a supplementary application form or letters of reference. Consult the appropriate Faculty section in this Calendar. Reinstatement is not guaranteed.

If at any review after reinstatement your Cumulative Average falls below 3.5, you will be required to withdraw from the University for a period of at least 12 months.

Transfer Between Programs

If you wish to transfer from one program to another, you should discuss the possibility with the appropriate Office of the Associate Dean to which you wish to transfer. It is possible that full credit may not be given at the time of transfer between Faculties and additional courses may need to be taken.

Minors

If you are enrolled in a four- or five-level program (with the exception of the Midwifery Education and the Medical Radiation Sciences programs which are three-level programs offered over a four-year period), you are eligible to obtain a Minor in another subject area, provided that the subject area is not integral to the requirements of your degree program. You should check the calendar requirements statement for your program in the case of Science programs, or check with your Faculty in the case of other programs, for subject areas that are excluded from consideration as a Minor in your program.

If you wish to receive a Minor, you should check the information under the heading Minor in the appropriate department's listing. McMaster also offers Interdisciplinary Minors in Archaeology and Jewish Studies. (See Interdisciplinary Minors and Thematic Areas section.) You will be responsible for ensuring that you register in the required Minor courses. Normally, you must complete a minimum of 24 units in the Minor subject. No more than six of these units can be at Level I, unless otherwise stated within the specific requirements of the minor. At least 15 units must be completed at McMaster.

In the final year of your program, when you file your Graduation Information Card, you must indicate your desire to receive a Minor in the chosen subject. The Faculty Reviewing Committee will verify that the requirements have been met. If you are successful, your transcript will contain a designation for Minor in that area. See Sessional Dates section for deadlines.

You may apply for only one Minor. Minors cannot be revoked once approved. (See Note 4 under Second Bachelor's Degree Programs.)

Second Bachelor's Degree Programs

For admission to a second undergraduate degree program you must hold a first undergraduate degree whether it be a three-level, four-level or five-level degree. The minimum admission requirements and program of study for the second degree depend on the subject areas of the two degrees.

Honours Degree following a Three-Level Degree in the Same Subject: For entry, a Cumulative Average of at least 6.0 in the first degree program is required. If admitted, you must take at least 30 units beyond the first degree, including all Honours requirements specified for the program. In some Faculties, this includes a minimum number of units of work in the discipline.

B.A. or B.Sc. in Another Subject: For entry, you must meet the admission requirements for the program. If admitted, you must complete at least 30 units beyond the first degree, including all program requirements. In some Faculties, this includes a minimum number of units of work in the discipline.

B.Mus; Honours B.A. or B.Sc. in Another Subject: For entry, you must meet the admission requirements for the program and have a Cumulative Average of at least 6.0. If admitted, you must complete at least 60 units beyond the first degree, including all Honours requirements specified for the program.

B.Eng.: For entry, you must meet the admission requirements for the program. If admitted, you must complete at least 60 units beyond the first degree including all program requirements. (Admission to a second B.Eng. degree is not possible if your first degree is in Engineering.)

B.H.Sc. (Honours): A Cumulative Average of at least 7.0 (minimum overall average of B+) will be required for admission. Previous university undergraduate studies must involve a significant component of work in subject areas unrelated to the B.H.Sc (Honours) Program. Certain subject combinations may not be permitted. If admitted you must complete at least 80 units beyond the first degree including all Honours requirements specified for the program.

B.Kin. Major: The B.Kin. Major Program is being phased out. Currently registered second degree students must complete at least 60 units beyond the first degree including all program requirements. Eligibility to transfer to the Honours B.Kin. program or the Honours Kinesiology (B.Sc.) program as a Second Degree is determined upon completion of 30 units of work.

NOTES

1. All work for the second degree must be completed at McMaster University.
2. Some additional regulations are applied by the Faculty of Science involving cognate disciplines. e.g. Mathematics and Statistics. These are described in the Faculty of Science section of this Calendar.
3. A second degree is not available in all subject areas. See individual Faculty regulations for further information.
4. Minors will not be revoked to permit later registration in a three-level second degree in the same subject. Students may return for a second degree in a subject in which they have obtained a Minor, but only at the Honours level. (See Minors above.)
5. Extra courses taken while you are registered in a first degree program, or courses completed as a Continuing Student, may, with the approval of the Faculty, be applied to the second degree program.
6. You must meet the same standards for continuation and graduation as are applied to students registered in a first degree program.
7. Credit from the first two degrees cannot be applied to a third undergraduate degree. To obtain a third undergraduate degree you must take the complete program. i.e. approximately 90 units for a three-level degree and approximately 120 units for a four-level degree.
Deans’ Honour List

Each year outstanding students with a minimum average of 9.5 on at least 30 units (usually their Sessional Average) are named to the Deans’ Honour List. Students will be assessed at the reviewing period (either after the Fall/Winter or Summer session) when a minimum of 30 units has been completed since the previous Deans’ Honour List review. At each review the assessment will be based on all units completed since the previous Deans’ Honour List review.

Provost’s Honour Roll

Each year outstanding students with a 12.0 average on at least 30 units (usually their Sessional Average) are named to the Provost’s Honour Roll. Students will always be assessed at the same time and using the same average calculation as applied to the Deans’ Honour List assessment. (See Deans’ Honour List section above.)

3. PETITIONS FOR RELIEF FOR MISSED TERM WORK AND FOR DEFERRED EXAMINATIONS

The University wishes to assist students with legitimate difficulties. It also has the responsibility to ensure that degree, program and course requirements are met in a manner that is equitable to all students. Students may petition the office of the Associate Dean of their Faculty (Faculty office) for special consideration when there are compelling medical, personal or family reasons to justify an exception to University regulations. Supporting documentation will be required but will not ensure approval of the petition. The authority to grant petitions lies with the Faculty office and is discretionary. It is imperative that students make every effort to meet the originally-scheduled course requirements and it is a student’s responsibility to write examinations as scheduled.

Procedure 1: Petitions for Relief for Missed Term Work

1. A student may submit a Petition for Special Consideration through the Faculty office for relief from the academic consequences of missed term work based on compelling medical, personal or family reasons before or immediately after the work is missed, normally within five working days.
2. If the reason is medical, the approved McMaster University Medical Form must be used. The student must be seen by a doctor at the earliest possible date, normally on or before the date of the missed work and the doctor must verify the duration of the illness. Relief will not be available for minor illnesses.
3. If the reason is non-medical, appropriate documentation with verifiable origin covering the relevant dates must be submitted, normally within five working days.
4. In deciding whether or not to grant a petition, factors such as the following may be taken into account: the adequacy of the supporting documentation including the timing in relation to the due date of the missed work and the degree of the student’s incapacitation.
5. After the third Petition for Special Consideration a student will be asked to meet with the Associate Dean (or delegate).
6. The University reserves the right to require students to obtain medical documentation from the Campus Health Centre.
7. It is the student’s responsibility to check with the Faculty office for a decision on the petition.
8. If the petition is granted, the Faculty office will notify the instructor(s) recommending relief.
9. The student must contact the Instructor promptly to discuss the appropriate relief.
10. It is the prerogative of the instructor of the course to determine the appropriate relief for missed term work in his/her course.

Procedure 2: Petitions for Deferred Examinations

1. Once a student has completed an examination, no special consideration will be granted. A student who misses an examination or is unable to complete an examination may submit a Petition for Special Consideration requesting a deferral of the examination to the Faculty office, normally within five working days of the missed examination. The petition must be based on compelling medical, personal or family reasons.
2. See steps 1. - 6. in Petitions for Relief for Missed Term Work above.
3. It is the student’s responsibility to check with the Faculty office for a decision on the petition for a deferred examination.
4. If the deferred examination is granted, the student will be informed officially by means of the notation DEF which will appear against the relevant course on the student’s academic record (available on MUGSI) and on the student’s grade report.
5. Deferred examinations are written during the next official University examination period. Default of the deferred examination will result in a failure for that examination except in the case of exceptional circumstances (see Petitions for Missed Deferred Examinations below).

Procedure 3: Petitions for Missed Deferred Examinations

1. A student who cannot write a deferred examination on the scheduled date may submit a Petition for Special Consideration to the Faculty office. The petition must be based on compelling medical, personal or family reasons.
2. A committee of Associate Deans or delegates will consider petitions from students registered in any undergraduate program. The steps in this procedure will be consistent with those used to consider a student’s eligibility for a deferred examination.

Appeals of Petitions for Special Consideration (Procedures 1-3 above)

In accordance with the Student Appeal Procedures, decisions made on Petitions for Special Consideration are final and cannot be appealed except if a student feels his/her human rights have been violated, in which case there is an appeal to the Senate Board for Student Appeals.

4. EXAMINATIONS

The Office of the Registrar schedules and conducts most final examinations and December mid-year examinations for full-year Level I courses. See the Sessional Dates section in this Calendar. Examinations organized by the Office of the Registrar during these dates may be scheduled in the morning, afternoon, or evening, Monday through Saturday.

Other instructor-scheduled tests and examinations may be held throughout each session but may not be scheduled during the last five days of the terms of the Fall/Winter session, or between the last day of classes for the term and the first day of the examination schedule, except as approved by the Undergraduate Council. Assignments worth more than ten percent of a final course grade cannot be assigned during this ban period, and take-home examinations worth more than ten percent of a final course grade cannot be due during the ban period. Tests that are exempt from the ban must:

- be a part of a process of continuous or periodic assessment through the term; and
- be held in the normally scheduled class or lab slot; and
- be worth no more than ten percent of the final course grade.

See the Sessional Dates section of this Calendar.
Examinations Conducted by the Office of the Registrar

- McMaster student photo identification cards are required at all examinations. If you arrive at an examination without a proper I.D. card you will be required to have a substitute card made before being seated. There is a fee for this service. No additional time is given to compensate for examination time missed.
- You may only use books, papers or instruments during an examination if they are specifically prescribed on the examination paper.
- You may leave an examination only after the first 45 minutes have elapsed.
- If you become ill during an examination, you may be excused by a presider.
- If you miss or leave an examination for medical reasons you must submit a Petition for Special Consideration form with supporting documentation of illness, personal or family reasons, to the Office of the Associate Dean (Studies) of your Faculty.
- If you are late for an examination, report immediately to the presider in your examination location or to the Examinations Section of the Office of the Registrar.
- If you miss or leave an examination for any other reason, report immediately to the Examinations Section of the Office of the Registrar. You will be advised whether you can write your examination before the end of the examination schedule, or whether you must apply for special consideration by submitting documentation to the Office of the Associate Dean of your Faculty.
- Special examination arrangements may be made upon application to the Examinations Section of the Office of the Registrar in some circumstances, such as:
  - a conflict with religious obligations
  - a conflict between two Registrar-scheduled examinations
  - a schedule with three examinations in one calendar day or three consecutive examinations

Application must be made at least 10 working days before the scheduled examination date and acceptable documentation must be supplied. Failure to meet the stated deadline may result in the denial of special arrangements.

- Students with disabilities are required to inform the Centre for Student Development of accommodation needs for examinations on or before the last date for withdrawal from a course without failure by default. (See the Sessional Dates section of this Calendar.) This allows sufficient time to verify and arrange appropriate accommodation. Failure to meet the stated deadline may result in the denial of special accommodation. See Academic Facilities, Student Services and Organizations—Centre for Student Development section of this Calendar.

- Examinations are not rescheduled for purposes of travel. You must arrange to be available for the entire range of examination dates as listed in the Sessional Dates section.

Deferred Examinations

The decision to grant you a deferred examination will be reported on your grade report. You must confirm your intent to write by submitting an application to the Examinations Section of the Office of the Registrar.

In the case of examinations written at an off-campus location, any fees incurred are the responsibility of the student. This includes the fee to courier the written examinations back to the Examinations Section of the Office of the Registrar.

Examination and confirmation deadline dates appear in the Sessional Dates section of this Calendar.

For further information, please see Petitions for Deferred Examinations in this section of the Calendar.

5. GRADING SYSTEM

The method for determining your final grade will be given in the course outline. Unless otherwise specified in a course outline, course results determined on a percentage scale will be converted to an official letter grade, as indicated in the equivalent percentage scale which follows. The results of all courses attempted will appear on your transcript as letter grades.

- Before submitting a failing grade, your instructor reassesses whatever examples of your work are available.
- To satisfy prerequisite requirements, a grade of at least D- is required, unless otherwise stated.
- You retain credit for all courses with grades of D- or better, except in those programs for which a higher grade is specified in the program regulations

Since September 1982, the grading scale has been:

<table>

6. UNDERGRADUATE ACADEMIC AWARDS

To qualify for In-Course Awards, you must be registered as a full-time student during the Fall/Winter session. A Sessional Average will be computed to determine your eligibility for these awards. Terms and conditions of awards for full-time and part-time studies are defined in the Undergraduate Academic Awards section.
7. GRADUATION

Graduation With Distinction standing may be awarded if a minimum CA of 9.5 is achieved in a degree program.

The following Cumulative Averages are required to graduate:

- B.A. — 3.5
- B.A. (Honours) — 5.0
- B.A./B.S.W. and B.S.W. — 6.0
- B.Arts Sc. and B.Arts Sc. (Honours) — 5.0
- B.Com. — 4.0

- B.Tech. — 3.5

Please see the graduation regulations for individual Health Sciences programs in the Faculty of Health Sciences section.

If, at the time of graduation, you fail to meet the requirements for an Honours degree, you may seek to transfer to another program.

If you are registered in Level III of an Honours program and wish to transfer to a three-level degree program to be eligible for graduation at the next Convocation, you must apply to the appropriate Office of the Associate Dean by March 1 for Spring Convocation, and by September 1 for Fall Convocation. If permission is granted, you must go to the Office of the Registrar and complete a Graduation Information Card.

During the session in which you expect to complete your graduation requirements, you must file a Graduation Information Card in the Office of the Registrar by mid-February for Spring Convocation and by mid-July for Fall Convocation. Deadline dates appear in the Sessional Dates section of this Calendar.

If you wish to apply to receive a Minor in addition to your major program of studies, you must indicate this on your Graduation Information Card.

You must take the degree at the Convocation immediately following the completion of the appropriate degree work.

Supporting documentation relevant to your admission to, and performance at, the University will normally be eliminated seven years after the end of your enrolment at the University (regardless of whether you graduate).

Notification of Disclosure of Personal Information to Statistics Canada

Statistics Canada is the national statistical agency. As such, Statistics Canada carries out hundreds of surveys each year on a wide range of matters, including education.

In order to carry out such studies, Statistics Canada asks all colleges and universities to provide data on students and graduates. Institutions collect and provide to Statistics Canada student identification information (student's name, student ID number, Social Insurance Number), student contact information (address and telephone number), student demographic characteristics, enrolment information, previous education and labour force activity.

The Federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used only for statistical purposes, and the confidentiality provisions of the Statistics Act prevent the information being released in any way that would identify a student.

Students who do not wish to have their information used are able to ask Statistics Canada to remove their identification and contact information from the national database. For further information, please see Statistics Canada's web site at: http://www.statcan.ca or write to the Postsecondary Section, Centre for Education Statistics, 17th Floor, R.H. Coats Building, Tunney's Pasture, Ottawa, K1A 0T6.
The University has defined its expectations of students in both the academic and non-academic life of the University community, and developed procedures to ensure that all members of the community receive equitable treatment. An electronic version of the following policies is available at the following address: http://www.mcmaster.ca/policy.

The policies consist of:
- Academic Integrity Policy
- Student Appeal Procedures
- Student Code of Conduct
- Alcohol Policy and Residence Community Alcohol Policy
- Sexual Harassment Policy
- Anti-Discrimination Policy
- Rights and Responsibilities of Undergraduate Students During Work Stoppages That Substantially Disrupt Academic Activities
- Welcome Week Regulations
- General Regulations for McMaster University Libraries
- Policy for Academic Accommodation of Undergraduate Students with Disabilities
- Senate Resolution on Course Outlines
- Policy on Undergraduate Student Access to Final Examinations
- Guidelines on Access to Information and Protection of Privacy (including Security of Student Data)
- Petition for Relief for Missed Term Work and for Deferred Examinations (See also Section 3 in the General Academic Regulations on Student Calendar)

The following provides a summary of the major policies which pertain to students. Complete versions of the policies may be obtained from the University Secretariat, Room 210, Gilmour Hall.

**Academic Integrity and Academic Dishonesty**

The Academic Integrity Policy explains the expectations the University has of its students. Some Departments and instructors have also developed more specific rules and regulations designed to maintain scholarly integrity. It is the responsibility of each instructor to make students aware of these expectations.

The main purpose of a university is to encourage and facilitate the pursuit of knowledge and scholarship. The attainment of this purpose requires the individual integrity of all members of the University community, including all graduate and undergraduate students. Scholars at McMaster demonstrate integrity in many ways, including the following:

- Scholars practice intellectual honesty in the process of acquiring and extending knowledge. They do this by improving scholarly competence, and by exercising critical thinking and self-discipline.
- Scholars show respect for and courtesy to others in free discussions on academic topics and recognize the right to free inquiry and opinion.
- Scholars adhere to ethical requirements in their research.
- Scholars acknowledge fully the work of others by providing appropriate references in papers, essays and the like and declaring the contributions of co-workers. Scholars do not take credit that is not earned.
- Scholars strive to ensure that others are not put at a disadvantage in their pursuit of knowledge. They do not withhold material that should rightly be available to all.

The University states unequivocally that it demands scholarly integrity from all its members. Academic dishonesty, in whatever form, is ultimately destructive of the values of the University; furthermore, it is unfair and discouraging to those students who pursue their studies honestly.

Academic dishonesty is not qualitatively different from other types of dishonesty. It consists of misrepresentation by deception or by other fraudulent means. In an academic setting, this may include any number of forms such as:

- Copying or the use of unauthorized aids in tests, examinations, and laboratory reports.
- Plagiarism, i.e., the submission of work that is not one's own or for which previous credit has been obtained, unless the previously submitted work was presented as such to the instructor of the second course and was deemed acceptable for credit by the instructor of that course.
- Aiding and abetting another student's dishonesty.
- Giving false information for the purposes of gaining admission or credit,
- Giving false information for the purposes of obtaining deferred examinations or extension of deadlines, and
- Forging or falsifying McMaster University documents.

For a complete definition and examples, please refer to the Academic Integrity Policy, Appendix 3.

Allegations of academic dishonesty will be handled according to the procedures described in the Academic Integrity Policy. Penalties may be imposed on students who have been found guilty of academic dishonesty. Examples of penalties include a mark of zero on an assignment, or an assignment, zero for the course with a final grade in the course or a normal grade in one or more of the courses.

**Student Appeal Procedures**

The University has a responsibility to provide fair and equitable procedures for the lodging and hearing of student complaints arising from University regulations, policies and actions that affect them directly. The procedures described in the Student Appeal Procedures are intended to provide a mechanism to remedy injustices and may culminate in a hearing before the Senate Board for Student Appeals.

However, students are strongly encouraged to pursue any complaint or grievance through informal channels, before following the formal procedures. Experience has shown that many complaints can be resolved satisfactorily through informal communication.

Students should seek remedies for their grievances as promptly as possible, and must do so within six months of the end of the academic year in which the grievance has occurred. The end of the academic year is August 31.

Decisions on admission or readmission to the University may not be appealed, except under the conditions described in the next paragraph. However, applicants may ask for a review of a decision on admission or readmission or on the granting of transfer credits. To initiate such a review, the applicant must write to the Registrar within one week of receiving the original decision and state the grounds for seeking the review.

Applicants who have been refused admission to a degree program may appeal the decision, using the procedures described in the Student Appeal Procedures. If the following two conditions have been met:

1. The applicant withdrew voluntarily from the University.
2. The applicant alleges error or injustice on grounds other than academic judgment.

**Student Code of Conduct**

McMaster University is a community dedicated to furthering learning, intellectual inquiry, and personal and professional development. Membership in the community implies acceptance of the principle of mutual respect for the rights of others and a readiness to support actively an environment conducive to intellectual growth, both for individuals and for the whole University.

The Student Code of Conduct contains regulations which outline the limits of conduct considered to be consonant with the goals and the well-being of the University community, and defines the procedures to be followed in cases of violation of the accepted standards.

**Alcohol Policy and Residence Community Alcohol Policy**

The intention of the University Alcohol Policy is to promote attitudes towards alcohol use that are consistent with an atmosphere of civility, and to discourage alcohol-related behaviour on campus which is abusive to oneself or to others. Students are accountable for their own decisions regarding alcohol use; they are also responsible for knowing, understanding, and complying with applicable University policies and provincial laws related to alcohol.

The University Policy describes general and minimal requirements for the use of alcoholic beverages on campus. More specific guidelines concerning alcohol use are available from other offices on campus such as the Housing Office (for residence hall events), and the Vice-President (Administration) for other events including faculty/staff events.
Statement on Human Rights

McMaster University wishes to ensure the full and fair implementation of the principles of the Ontario Human Rights Code which state:

Every person has the right to equal treatment with respect to services, goods and facilities, without discrimination because of race, ancestry, place of origin, colour, ethnic origin, citizenship, creed, sex, sexual orientation, age, marital status, family status or handicap.

The University Senate has approved Policies on Sexual Harassment and on Anti-Discrimination which outline the procedure to be followed in the event that a student has a complaint regarding an alleged violation of human rights.

Sexual Harassment Policy

The University recognizes its legal and moral responsibility to protect all of its members from sexual harassment and to take action if such harassment does occur. To these ends it has developed a policy on, and procedures for, dealing with complaints of sexual harassment, including a range of disciplinary measures up to and including dismissal. Copies of the Policy and Procedures on Sexual Harassment may be obtained from the Senate Secretariat, Gilmour Hall, Room 210.

Anti-Discrimination Policy

McMaster University affirms the right of every member of its constituencies to live, study and work in an environment that is free from discrimination and harassment. Discrimination and harassment are incompatible with standards of professional ethics and with behaviour appropriate to an institution of higher learning.

The intention of this policy and its procedures is to prevent discrimination and harassment from taking place, and where necessary, to act upon complaints of such behaviour promptly, fairly, judiciously and with due regard to confidentiality for all parties concerned. Copies of the Anti-Discrimination Policy may be obtained from the Senate Secretariat, Gilmour Hall, Room 210.

Policy on Rights and Responsibilities of Undergraduate Students During Work Stoppages That Substantially Disrupt Academic Activities

The University recognizes that a work stoppage at the University that substantially disrupts academic activities may have a significant impact on the ability of students to carry out their studies. To this end, it has developed a policy that recognizes the need to treat students fairly and equitably and, at the same time, to protect the academic integrity of the University’s courses and programs.

Student Records

The University has developed operating procedures which are designed to protect the confidentiality of undergraduate student records.

The following have been defined as public information: student name, sex, degrees earned and when, undergraduate awards earned and when, and whether a student is full-time or part-time. Additional information may be used by the various offices and officials of the University where a need to know has been established. Information about applicants for admission who do not gain admission will be kept for a limited period only. A separate admission file is maintained for those admitted to the MD, Midwifery and Nursing programs.

While a student may have access to his or her file, documents received from a third party in confidence are not normally placed in the student’s file. But, in those cases where they have been, they will not be disclosed.

The operating procedures also define the circumstances under which information may be disclosed to: judicial and law enforcement agencies, the Ontario Universities’ Application Centre, Statistics Canada, agencies charged with the recovery of funds provided under OSAP or CSL, and secondary schools.

Transcripts are issued only with the consent of the student. Addresses will not be released except under provisions noted above.
**FINANCIAL INFORMATION**

Upon receiving official acceptance from the Registrar’s Office and upon submission of registration, you are responsible for the payment of all fees as defined in this Calendar. Payment of academic fees does not imply your acceptance to the University or approval of your registration. Academic requirements have to be fulfilled before your registration is completed. If you are a new student, you may not forward academic fees to Financial Services until you have received your Letter of Acceptance. You should not send residence fees unless you have received notification of acceptance.

You are responsible for the fees for each academic session. No fee credits can be transferred from one academic session to another.

It is the policy of the University not to accept registrations until all previous accounts are paid in full. Any payments received are, therefore, first applied to previous debts and any balances to the most recent debts.

The following fees and regulations were in effect at the time of publication of this Calendar. The University reserves the right to amend the fees and regulations at any time.

### UNDERGRADUATE FEES

If you are a full-time student, fees cover your portion of the tuition cost, registration, library, diplomas, campus health services, student organizations, and athletics, and are payable by all students.

No caution deposits are required, but students will be assessed for any unwarranted loss or breakage. The University reserves the right to assess other supplementary fees or charges in some courses or programs to recover — in part or in full — the cost of providing course materials, accommodation and transportation for field trips, and the costs of breakages.

Fees charged by the University are approved annually by the Board of Governors for the academic year beginning September 1.

Tuition fees include a base per unit fee plus mandatory non-tuition related supplementary fees.

Student Health Services Fees
The supplementary student health services fee of $47.06 supports the on-campus clinic facilities, which provide the services of doctors and nurses. The McMaster Students Union Health Plan Premium fee of $45.00 includes reimbursement of expenses resulting from an accident incurred during the academic year, where such expenses are not recoverable under the Ontario Health Insurance Plan. These expenses may include X-ray, ambulance, dental treatment, prescribed drugs, wheelchairs or similar appliances. Reimbursement is not made for accident expenses to dental plates, crowns, fillings, glass frames, lenses or similar items. Accidents should be reported to Campus Health Centre within 10 days.

Prescribed drugs, excluding contraceptives, may be claimed through this plan. For details concerning dollar amounts allowable, contact the McMaster Students Union Office.

NOTE: Students who can prove comparable coverage may opt out of the McMaster Students Union Health Plan by filling out a form at the McMaster Students Union Information Centre (The Compass, Main Floor, McMaster University Student Centre) before the end of September.

Co-op Fees
Co-op students attending the full academic term (September-April) should add an $1,000.00 Co-op Fee to the regular 30 unit Science fee. Co-op students attending one academic term should pay half the 30 unit Science fee plus a $500.00 Co-op Fee.

Listeners
You are classified as a Listener if you wish to attend classes, but are not seeking academic credit. You may be admitted at one-half of the standard fee upon application to the Centre for Continuing Education.

Listeners withdrawing from a course may do so without penalty up to five working days after the first meeting. After that and before the second class, an administrative fee of $30.00 will be withheld. There is no refund after the second class.

Students may register as Listeners in some degree or certificate courses. A Listener is not seeking credit and may be admitted at one-half of the standard fee upon application to the Centre for Continuing Education.

This category excludes currently registered students, who may audit a course. See General Academic Regulations section in this Calendar for details.

Persons Aged 65+
Subject to meeting admission and prerequisite requirements, if you will be aged 65 or over during the academic session for which you are registering, you may register without payment of tuition and supplementary fees.

EXPENSES

Costs Other Than Fees

For Students in Clinical Courses

You must buy uniforms, shoes and uniform accessories, for clinical practice.

If you are a Nursing student, your uniform and accessories are ordered under the direction of the School of Nursing. The approximate cost is $100.00. Level I Nursing students are also required to purchase a stethoscope at approximately $100.00.

Registration Examinations

Graduates of the B.Sc.N. program can expect to pay fees (approximately $265.00 in 2004) to write the comprehensive registration examinations administered by the College of Nurses of Ontario.

Insurance of Personal Property on University Premises

The University cannot assume any responsibility for the personal property of any employees, faculty members, or students, nor does the University carry any insurance that would cover their personal property.

In most cases, personal fire insurance policies provide an automatic 10% extension covering property away from home. You should inspect your insurance policies to be certain that this is the case.

Death and Dismemberment Insurance

The University considers that the purchase of insurance coverage for death and dismemberment is the individual responsibility of its students.

There are various insurance plans available, and although the University does not specifically endorse any one of these plans, it has no objection to explanatory brochures and literature being posted on bulletin boards or distributed in appropriate places.

If you are involved in laboratory or field work, you are particularly encouraged to investigate such coverage.

For information on student awards and financial aid, please refer to Undergraduate Academic Awards and Student Financial Aid sections of this Calendar.

ACADEMIC REGULATIONS

STUDENT ACADEMIC RESPONSIBILITY

You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations section of this Calendar.

The Arts & Science Programme is governed by the General Academic Regulations of the University (see the General Academic Regulations section in this Calendar) and the regulations described below.
INTERNATIONAL/CROSS-CULTURAL/LANGUAGE MENU

In its revised programs, the School of Business is stressing the importance of breadth of knowledge. Students are required to take courses in a variety of business disciplines, thus giving them a sound understanding of business functions and their relationships. They also obtain exposure to international and cross-cultural issues. This will provide them with the knowledge needed for the world of global organizations. Prior to graduation, students are required to successfully complete two courses from an International/Cross-Cultural/Language menu. NOTE: Students who participate in an official McMaster University exchange are required to successfully complete one course from an International/Cross-Cultural/Language menu prior to graduation. Students must satisfy the normal prerequisites for the courses listed on the menu.

Students follow the menu requirements of the Calendar in force when they enter Business I, however, when a later Calendar expands the menu options, students may choose from those additional courses as well. The menu for 2004-2005 is as follows:

All Anthropology courses except ANTHROP 1A03 if completed as part of the Business I requirements.

All courses in the Faculty of Humanities open to Commerce students, with the exception of all Multimedia courses and English courses other than those listed below.

All Indigenous Studies courses

FULL-TIME/PART-TIME STUDIES

Students can take Business I and the Commerce programs on a full-time or part-time basis. Progression to the next level is at the end of the successful completion of the 30 units of work that pertain to the lower level. It should be noted that only a few Commerce courses are offered in the evenings or in the summer sessions.

CONTINUING STUDENTS

Graduates of McMaster's Commerce programs or one of the Engineering and Management programs may take, as part-time students, Level III and IV Commerce courses (not previously taken, to a maximum of 18 units), excluding COMMERCE 4AG3*, 4AH3*, 4AI3*, with the permission of the Academic Programs Office. Such permission will be given only if normal prerequisites...
are satisfied and if space permits after meeting the requirements of in-course students. Registrations will be approved after classes start. (See **Continuing Students in the Admission Requirements section of the Calendar**.)

*These courses are available as ACC 500, ACC 501, ACC 502, through the School of Business, subject to sufficient enrolments and availability of qualified instructors. For details concerning these courses, please see the McMaster University Spring/Summer Timetable at the following url: http://www.mcmaster.ca/parttime/

Other than those graduates specified above, Commerce courses are not open to Continuing Students.

**SECOND UNDERGRADUATE DEGREE**

A student with an undergraduate degree will not be admitted or readmitted to either of the Commerce programs. Such a student may wish to apply for admission to the M.B.A. program.

**CREDIT TOWARDS PROFESSIONAL DESIGNATIONS**

Educational requirements toward a variety of professional designations can be met in varying degrees within the Commerce programs and the Engineering and Management program. The professional accounting designations C.A., C.M.A. and C.G.A. are awarded by the Institute of Chartered Accountants of Canada, the Society of Management Accountants of Ontario and the Certified General Accountants Association of Ontario, respectively, while the designation C.H.R.P. is awarded by the Human Resources Professionals Association of Ontario.

Further information for meeting educational requirements for professional designations are available to students in all Commerce and Engineering and Management programs. Additional course work may be taken while in the program. Further units of credit may also be taken after graduation (see **Continuing Students** above). Information concerning credit towards these professional designations can be obtained from the Academic Programs Office in the School of Business.

**MINOR**

A minor is an option available to a student enrolled in a four- or five-level program. A minor consists of at least 18 units of Level I, II or IV courses beyond the designated Level I course(s) that meet the requirements set out in the program description of that minor. A student is responsible for ensuring that the courses taken fulfill these requirements. Those who have completed the necessary courses may apply for recognition of that minor when they graduate. If recognition is granted for a minor, a notation to that effect will be recorded on the student's transcript. For further information, please refer to **Minors in the General Academic Regulations** section of this Calendar.

**CHANGE OF PROGRAM**

A student may transfer between Commerce programs prior to entering Level IV, provided that, after consultation with the Academic Programs Office of the School of Business, it has been determined that the academic requirements of the new program have been met, and an acceptable revised Program of study can be established. This revised Program of study must be approved by the Academic Programs Office.

Students in good standing in the Engineering and Management Program may transfer to a Commerce Program with the permission of the Academic Programs Office. The conditions for eligibility for entrance to the Commerce Programs are the same as those students registered in the School of Business.

**WORKLOAD**

In Business I, a full-time student must complete a 30-unit load in each Fall/Winter session. Advance credit and credit earned during the Spring/Summer session may not be used to reduce this load requirement. Such reductions will be applied as late as possible in a student's Program. A part-time student in Business I is permitted to take a maximum of 18 units in any Fall/Winter session.

Students who wish to take more courses than recommended for a single Level of their program may do so only if their Sessional Average on completion of the previous Fall/Winter session is at least 7.0. Students registered in the final Level of their program are permitted to overload by up to six additional units in order to become eligible to graduate.

**DEFERRED EXAMINATIONS**

See the heading **Deferred Examinations under Examinations in the General Academic Regulations** section of the Calendar for application procedures.

Students who are in a precarious position with respect to achieving the minimum C.A. or otherwise meeting the Commerce Program requirements for continuation in the Program will not necessarily be permitted to undertake further work before clearing deferred examinations.

**REPEATED COURSES**

Any failed course must be repeated if it is a required course for the Program, or must be repeated or replaced if it is not required. The grades for both the failed course and its repetition or replacement, as appropriate, will be included in the calculation of a student's CA. Voluntary repetitions of non-Commerce courses in which passing grades have been previously attained are designated as Extra courses. (See the Glossary section of this Calendar.)

**LEVEL I COURSES**

Students are not permitted to take more than 48 units of Level I courses in their Program.

**LEVEL OF REGISTRATION**

A student is required to register in the lowest level for which more than six units of work is incomplete. Work of the next higher level may be undertaken only when necessary to fill a Program load. Courses must be taken in the sequence specified by the School of Business.

**READMISSION**

A student in Level II, III or IV of a Commerce Program, who becomes ineligible to continue in the School of Business, may apply for readmission to the Commerce Program in a subsequent calendar year up to a maximum of five years following the year in which the student becomes ineligible to continue. **Readmission is not guaranteed.**

Application for readmission must be made in writing to the Undergraduate Admissions Office at the end of the semester in which the student last attended. This application should explain why the applicant would expect to succeed in the Program if readmitted. Forms for this purpose may be obtained from the Academic Programs Office in the M.G. DeGroote Building, Room 104.

A student who has been readmitted after becoming ineligible to continue in a Commerce Program must repeat all the courses of the level at which he or she became ineligible to continue unless specific course exemptions or credits are granted. The earliest possible session for readmission is the session starting in September of the year following the year in which the student became ineligible to continue.
EXCHANGE PROGRAMS

There are a number of official exchange Programs offered to undergraduate students registered in the School of Business. The countries involved are: Denmark, England, France, Germany, Japan, Norway, Mexico and Singapore. Official exchange Programs offer students the most inexpensive means of studying abroad as students participating in these exchanges avoid the foreign student fees by paying fees to McMaster. All students must be in good standing with a Cumulative Average of at least 6.0 to be eligible to participate in an exchange. In most cases, students who participate in exchange Programs go abroad for Level III of their Program. Information available from Prof. M. Mak, Director, International Exchange Programs, in the M.G. DeGroote Building, Room 228. Additional information may be found under International Study in the General Academic Regulations section of this Calendar. Information concerning the Canadian Scholarships Exchange Program (CANEX) can be found in the Academic Facilities, Student Services and Organizations section of this Calendar under the heading Student Exchanges. Acceptance to the Ontario and University-wide Exchange Programs is by recommendation. Application forms can be obtained from:

Engineering is a profession concerned with the creation of new and improved systems, processes and products to serve human needs. The central focus of engineering is design, an art entailing the exercise of ingenuity, imagination, knowledge, skill, discipline and judgment based on experience. The practice of professional engineering requires a mastery of engineering methodology together with a sensitivity to the physical potential of materials, to the logic of mathematics, to the constraints of human, physical and financial resources, to the minimization of risk, and to the protection of the public and the environment.

For information concerning the Bachelor of Technology program, please see the Program for B. Tech. Degree section of this Calendar.

Four-year programs are offered leading to the Bachelor of Engineering Degree in the following fields of specialization:
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Electrical and Biomedical Engineering
- Engineering Physics
- Materials Engineering
- Mechanical Engineering
- Photonics Engineering
- Software Engineering

A five-year program, leading to the Bachelor of Engineering and Society Degree, is offered in:
- Chemical Engineering and Society
- Civil Engineering and Society
- Computer Engineering and Society
- Engineering Physics and Society
- Electrical Engineering and Society
- Materials Engineering and Society
- Mechanical Engineering and Society
- Photonics Engineering and Society
- Software Engineering and Society

In addition, in conjunction with the School of Business, five-year programs leading to the Bachelor of Engineering and Management degree are offered in:
- Chemical Engineering and Management
- Civil Engineering and Management
- Computer Engineering and Management
- Electrical Engineering and Management
- Engineering Physics and Management
- Materials Engineering and Management
- Mechanical Engineering and Management
- Photonics Engineering and Management
- Software Engineering and Management

A five-year program leading to the Bachelor of Engineering and Biosciences is offered in:
- Chemical Engineering and Bioengineering

All programs have limitations on enrolment. Students are admitted to the program following successful completion of Level I. Admission procedures and criteria can be obtained from the Office of the Associate Dean of Engineering.

McMaster baccalaureate degree programs in Engineering are accredited by the Canadian Engineering Accreditation Board (CEAB) of the Canadian Council of Professional Engineers, except the Chemical Engineering and Bioengineering, Electrical and Biomedical Engineering, Photonics Engineering, Photonics Engineering and Management and Photonics Engineering and Society programs which will be examined for the first time at the next accreditation. Provincial Engineering Associations accept the accreditation as a recommendation for admission to the qualifications Professional Engineer. The B.Eng., B.Eng.Biosciences, B.Eng.Mgmt. and B.Eng.Society programs are honours degree programs.

At McMaster, Engineering students take a common Level I program comprising Mathematics, Materials, Physics, Chemistry, Engineering Design, introduction to Professional Engineering, Computation and complementary studies electives. The specialized programs are entered at Level II. Students interested in the Engineering and Management programs must take ECON 1B03 as one of their electives in Level I. Students interested in one of the Engineering and Society programs are advised to choose the six units complementary studies in Level I to be consistent with their chosen focus of the program.

Programs offered by the Faculty of Engineering include four types of engineering degrees, which are governed by qualifications as follows:

- Bachelor of Engineering (B. Eng.)
- Bachelor of Engineering and Society

Complementary Studies Electives are broadening courses with subject matter that deals with central issues, methodologies and thought processes of the humanities and social sciences.

In addition to ENGR 4A03, or equivalent, and 2B03 or 4B03, complementary studies electives are required in all B.Eng. programs. Of these, three units must be selected from courses that are designated as being above Level I (http://www.eng.mcmaster.ca/electives/electvs2.htm).

The Associate Dean of Engineering must authorize each student's complementary studies elective course. An approved list is published each spring and is available from the Associate Dean's office (http://www.eng.mcmaster.ca/electives/electvs.htm). Engineering students should refer to the Degrees and Programs section of this Calendar to determine which Level I Complementary Studies electives are possible (http://www.eng.mcmaster.ca/electives/v1elec.htm).

Technical Electives are Engineering or Applied Science courses in subjects relevant to the particular B.Eng. program. A list is available in each Engineering Department office.

Commer Electives are required in Level V of Engineering and Management programs.

Engineering and Society Focus Electives are courses offered by various departments throughout the University. These courses are selected in consultation with the Director of the Engineering and Society program, such that they form a proper sequence of the focus electives.

ENGINEERING CO-OP PROGRAM

Undergraduate students in the Faculty of Engineering can enroll in a Co-op or in a non-Co-op version of each program. Students enrolled in the former will be required to complete 12 months of industrial/practical experience prior to graduation. The 12 months experience may be acquired through a combination of three four-month experience terms, including UROP - Undergraduate Research Opportunities Program and the Co-op Summer Experience as well as a through a Co-op Internship Experience. Students may enter the Co-op version of their program at any time up to the beginning of Term 2 of their next to last year of undergraduate studies.

As well as completing the academic requirements as specified in this Calendar, students in a Co-op program must complete the following courses prior to graduation:
- ENGINEER 1E00, 2E00, 3E00 and 4E00, or
- ENGINEER 1E00, 2E00 and 4E00, or
- ENGINEER 1E00 and 4E00

Engineering Co-op Fees

It is anticipated that an annual Engineering Co-op fee will be charged for students registered in an Engineering Co-op Program. Each work term: ENGINEER 2E00, 3E00, 4E00, 4E100 and 4E00 will also be assigned a corresponding Co-op fee.
EXCHANGE PROGRAMS

Formal exchange programs with a number of universities in other countries are available for B.Eng. students wishing to attend a foreign university and receive credit at McMaster. For further information please see International Study in the General Academic Regulations section of this Calendar. For information on the Canadian Scholars Exchange Program (CANEX), please refer to the Academic Facilities, Student Services and Organizations section of this Calendar under the heading Student Exchanges.

ACADEMIC REGULATIONS

FOR B.ENG. PROGRAMS

STUDENT ACADEMIC RESPONSIBILITY

You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations section of this Calendar.

Students enrolled in Engineering programs, in addition to meeting the General Academic Regulations of the University, shall be subject to the following Faculty Regulations.

ENGINEERING I

To be eligible for Level II a student must successfully complete all Level I courses with an overall Cumulative Average (CA) of 4.0 or greater. To help students who may have had academic difficulty during the year, the Faculty of Engineering has a remedial studies plan (called the M-Opportunity) that provides the opportunity to repeat failed courses in second term and/or in the summer. The results of these M-Opportunity courses are used to calculate a new CA (failed courses are still counted in the CA).

A student in Engineering I whose Cumulative Average (CA) is less than 4.0 can no longer continue in Engineering.

SEQUENCE OF COURSES

Courses must be taken in the sequence specified in the Calendar for the program. Students must register for all outstanding work of one level before attempting work for a higher level.

REPEATED COURSES

All failed courses must be repeated if they are required courses for the Engineering program or may be replaced if the courses are not explicitly required.

LEVEL OF REGISTRATION

A student is required to register in the lowest level for which more than six units of work is incomplete. Work of a higher level may be undertaken only with the permission of the Associate Dean of Engineering.

FALL/WINTER SESSION WORKLOAD

The Faculty of Engineering has set a minimum Fall/Winter session workload of 37 units for Engineering I students. The workload for courses available to Level I students must be approved by the appropriate Department Chair and the Associate Dean of Engineering. In order to qualify for most scholarships students must register in the full load of work prescribed by program and level. No more than 21 units in one term will be approved.

REINSTATEMENT TO ENGINEERING

A student who is ineligible to continue in the Faculty of Engineering or who May not continue at the university may normally not apply for reinstatement for the full academic year. Exceptions may be made when there are extenuating circumstances which are supported by documentation.

Students seeking reinstatement must complete the Reinstatement Request Form available at the Office of the Registrar or the Office of the Associate Dean of Engineering. The completed form and the $50 fee must be submitted to the Office of the Registrar by June 30. The form must be accompanied by a written explanation of the reason for the student's previous unsatisfactory academic performance, reasons for reinstatement at this time (including documentation of what has been done to correct previous problems), reasons why the student would expect to succeed in the desired program if reinstated (i.e., what was the previous problem and what has been done to correct it), activities since last registered at McMaster including all academic work. Two letters of reference are also required. Reinstatement is not guaranteed.

A student who is reinstated after being ineligible to continue at a given level must repeat all the courses of that level, unless specific course exemptions are granted explicitly in the letter of reinstatement. Students who are reinstated will be placed on program probation, and calculation of their cumulative average will begin anew. If at any review after reinstatement the student's Cumulative Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

PROGRAM CHANGES

All program changes must be made through the Office of the Associate Dean of Engineering.

PROGRAMS FOR THE B.ENG., B.ENG.BIO SCIENCES, B.ENG.MGT., AND B.ENG. SOCIETY DEGREES

Admission to Level II Engineering Programs

Admission to Level II Engineering programs requires completion of Engineering I with a minimum CA of 4.0. All programs have limited enrolment; should there be more applicants than the limiting number in any program, admission to that program will be based on a full load using the Level I CA. Admission to a Level II program for students registered in a reduced load will be by selection and/or an interview.

In addition, admission to a B.Eng.Mgt. program requires the completion of ECON 1B03 with a minimum grade of 5.0; an interview may also be required.

Students admitted to a B.Eng. Society program are required to submit a statement indicating the educational objectives for the focus elective.

Students seeking admission to the Engineering and Management program or the Engineering and Society program must first be admitted to the relevant department. Thereafter, they will be considered for admission to either of these two programs.

PROGRAM FOR THE B.TECH. DEGREE

The Bachelor of Technology Degree Program in Manufacturing Engineering Technology is offered jointly by Mohawk College of Applied Arts and Technology and McMaster University. The objectives of the program are to upgrade the knowledge and skills of existing technologists/technical specialists and to allow them to perform with a broad technical and academic background along with solid hands-on experience. The program is designed to complement and enhance the student's background in basic engineering sciences, mathematics and advanced manufacturing technologies. An attempt has been made to structure the curriculum in concert with examinations typically assigned by Canadian professional engineering licensing bodies. Individuals seeking licensure in Mechanical Engineering may apply directly to the respective provincial (or territorial) professional engineering association. The number of examinations required for professional engineering licensing may be reduced.

ACADEMIC REGULATIONS

Students enrolled in a program for the B.Tech. degree, in addition to meeting the General Academic Regulations of the University, shall be subject to the following regulations.

MINIMUM REQUIREMENTS TO CONTINUE IN THE PROGRAM

All students must maintain a CA of at least 3.5 at each academic review to continue at the University. Students may be allowed to continue on academic probation for one reviewing period with a CA of 3.0 to 3.4. If your CA is less than 3.0, you may not continue at the University.

REINSTATEMENT

A student who is ineligible to continue may apply for reinstatement to the program. Application for reinstatement must be made in writing to the Committee of Instruction and should include a recommendation from the current employer. Reinstatement is not guaranteed.

In certain programs, a faculty member is selected for each student in the September of entry to a degree program and provides each student with advice on evaluations, elective and other educational needs throughout the program. In the MD program, the advisor is also responsible for the collation of all evaluations and completion of the final transcript. Changes in advisors may be entertained as each student becomes acquainted with Faculty well enough to choose his or her own advisor. The academic advisory role for B.Sc.N. students is fulfilled by the Coordinator of Studies (Nursing). Students are also encouraged to consult individual faculty members regarding career planning.

TRANSPORTATION
Students are responsible for expenses involved in transporting themselves to community agencies, making home visits, or in connection with clinical study.

LICENSE TO PRACTICE
All graduates who wish to engage in clinical practice in any of medicine, midwifery, nursing, occupational therapy and physiotherapy are subject to any qualifying examinations and other requirements by the licensing bodies for each of these professions. In addition, students must be in good standing with their professional designations. Students must be licensed to practice in a health care setting (with signing of University legal waiver). Courses must be applicable to job responsibilities. Applications must be submitted to the CBS Office (HSC 2E12) by July for September courses and by November for January and April courses. POST-PROFESSIONAL HEALTH SCIENCES EDUCATION PROGRAMS

CHILD LIFE STUDIES FULL-TIME DIPLOMA PROGRAM
This is an eight-month applied professional program in the Faculty of Health Sciences, focusing on the development of knowledge and skills for individuals working with infants, children, youth and families in a health care setting and community based programs.

The learning objectives are:
1. To examine and review the growth and development of infants, children and youth, incorporating communication, play, expression of feelings, discovery and mastery of the environment, behaviour management, and parent/child relationships, and to examine the child life role in assessment, intervention, prevention, advocacy and documentation in situations critical to the child's development, at times of acute and chronic illness and potentially traumatic or life-changing events.

Coursework involves small group learning, case studies and self-directed learning. Two eight-week internship placements in children's hospitals and community settings are a requirement of this program.

A related university degree is required with an overall B average. Relevant experience is strongly recommended. Admission is based on the number of places available and on the experience of applicants. Those without environmental health experience will also be considered.

Applications, a Transcript Assessment Fee, original transcripts and a letter of interest must be submitted by the end of June for the study period starting in September. Applications can be obtained by contacting the McMaster Institute of Environment and Health at (905) 525-9140, ext 27844. Applicants will be notified of admission decisions in July. Further information is available on our website (http://www.mcmaster.ca/mieh).

DIPLOMA PROGRAM IN OCCUPATIONAL HEALTH AND SAFETY
The Program in Occupational Health and Environmental Medicine offers a diploma program designed to provide basic instruction in the principles of occupational health and safety. Students can enrol in the program on a full-time or a part-time basis. The full-time program starts in September catering to those who wish to complete the course in three months. The part-time program is designed for students within commuting distance from Hamilton wishing to continue their normal employment while enrolled in the program. The part-time program also begins in September and continues through to the end of April, one day per week, but includes two extended periods of full-time study each lasting two weeks.

While special consideration will be given to those already in the occupational health field, interested individuals without such experience may also be considered. Physicians, nurses, hygienists, related professionals and others are invited to apply. A relevant university degree or equivalent is generally required.

Applications must be submitted by March 31 each year for the course beginning in September. Applications can be obtained by contacting the Program in Occupational Health and Environmental Medicine at (905) 525-9140, ext. 22333 or emailing Jean Bodnar at bodnarj@mcmaster.ca. Further information can be obtained on our website (http://www.fhs.mcmaster.ca/pohem).

Program Overview

This program, first offered in September 2000, is an innovative interdisciplinary program in which students take responsibility for their learning and in which there is recognition that both the knowledge and skill sets developed by students are integral parts of preparing for either further study or entry into the workforce.

The principles of independent learning and an emphasis on both content and process are central to the provision of education within the Faculty of Health Sciences, and are reflected in this program. In addition, this program reflects the established tradition within the Faculty of understanding health from biological, behavioural and population-based perspectives. The program will draw on individuals from within the Faculty of Health Sciences and the larger university community to provide students with exposure to basic and applied researchers as well as health care practitioners, enabling students to learn about and experience the study of health from these various perspectives. The program will utilize both a small group, inquiry-based format as well as traditional lecture, lab, and tutorial based teaching formats to provide students with a solid knowledge base in health related sciences as well as the skills necessary to critically evaluate and synthesize health related information.

The program is designed to emphasize flexibility, recognizing that students may use this program to prepare for a variety of post graduate options including graduate work in medical sciences, professional schools and entry into the workforce. Beyond the first year students may select to focus on one perspective of health and develop relative expertise in this area, while other students may find that their needs are better met by pursuing a broader based program of study through their senior years.

The program begins in Level I and leads to the degree Bachelor of Health Sciences (Honours) upon successful completion of Level IV. The early levels of the program offer opportunity for specialization through electives and through individual study or thesis courses.

Registration in Level I of the program is limited to approximately 160 students, with expansion to 180 students at Level II.

PROGRAM GOALS

The overall goal of the program is to educate students in such a way that upon graduation students have a firm foundation in the health sciences, and the skills necessary to learn and adapt in subsequent educational or occupational environments.

> KNOWLEDGE

To acquire a broad knowledge base that reflects the Faculty's commitment to studying health from biological, behavioural and population-based perspectives. This should include an understanding of the structure, function and behaviour of the human body, the environmental determinants of health and the ways that these factors interact to result in disease or illness.

> SKILLS

To acquire and apply the following skills as a student and member of society:
1. Self-directed learning skills: The ability to identify gaps in one's own knowledge that prevent solving a problem, to formulate a plan that uses appropriate educational resources, and to obtain and synthesize the information needed to solve that problem.
2. Critical thinking skills: The ability to evaluate the merit of information obtained in various ways and to present information in a way that shows evidence of a critical, reflective approach to information and problems.
3. Synthesizing skills: The ability to understand that most problems can be analyzed from a number of perspectives, to identify these perspectives and to formulate solutions that are comprehensive and adequate reflections of various levels of analysis.
4. Communication skills: The ability to communicate an issue in oral and written form, both effectively and concisely.

> PERSONAL QUALITIES

Individuals who successfully complete this program should be prepared to accept responsibility for a life-long process of learning and personal and professional growth. They should respect the various approaches to the study of health, and the beliefs and values associated with these studies, and should be open to new ways of learning and understanding. They should understand that health care is a collaborative process and be capable of working collegially with others, while being prepared to contribute to the well-being of those around them.

Admission Procedures and Requirements

The following are the requirements for admission in the academic year 2003-2004. Please note that the admission policy may be reviewed annually and the admission requirements may be changed in future years. As places in this program are limited, the admission process is competitive. Possession of the minimum requirements does not guarantee admission to the program.

Application to the B.H.Sc. (Honours) Program of the Faculty of Health Sciences implies acceptance of the admission policies, procedures and methods by which applicants are chosen.

a) Semester schools: all final Grade 12 U and/or M courses from first semester or prior years, and second semester midterm grades for Grade 12 U and/or M courses.
b) Non-semester schools: second term grades for full-year Grade 12 U and/or M courses.

Offers based on interim and/or midterm grades will be conditional upon maintaining satisfactory performance on final grades. Supplementary Applications are to be submitted electronically via the web at: http://www.fhs.mcmaster.ca/bhsc/html/supp_form.html. A review of the mandatory Supplementary Application is a very important component of the admission selection process. Applicants who do not complete the supplementary application are not considered for admission.

Requirements
The following are the minimum Grade 12 U and/or M requirements under the Ontario Secondary School curriculum:

1. English U;
2. Biology U;
3. Chemistry U;
4. Advanced Functions and Introductory Calculus U;
5. One U or M course from Social Sciences (Geography, History, Law, Psychology, Sociology) or Humanities (Art, Drama, English, French, Music, other languages);
6. One additional U or M course in any other subject area to total six courses.

Note: Courses in technological education, science or mathematics are not acceptable as the Social Sciences or Humanities course requirement.

Applicants with Qualifications Equivalent to Ontario Secondary School
Applicants from other provinces and countries must achieve the equivalent to the qualifications listed in the Grade 12 U or M course requirements in their secondary school graduation year with the exception of out-of-province students in jurisdictions that do not offer the equivalent of Grade 12 Advanced Functions and Introductory Calculus U (or OAC Calculus). If this course is unavailable, a course equivalent to Grade 12 Mathematics of Data Management U (or OAC Finite Mathematics) is acceptable.

Transfer Applicants
Transfer and second degree applicants will be admitted to the B.H.Sc. (Honours) Program from other programs at McMaster and from other post-secondary institutions. The process will be competitive and will be based on the student’s academic qualifications and a Supplementary Application. Enrolment is limited. Students interested in being considered for admission to Level II of the B.H.Sc. (Honours) Program must have completed the equivalent of six units of university Level I Biology and six units of university Level I Chemistry. A cumulative average of at least 7.0 (minimum overall average of B-) will be required for admission. Students who are accepted into Level II of the program may be required to complete a university Level I Inquiry Course offered within the B.H.Sc. (Honours) Program, after admission to the program.
academic regulations

student academic responsibility

you are responsible for adhering to the statement on student academic responsibility found in the general academic regulations section of this calendar.

in addition to the regulations in the general academic regulations section of this calendar, the following program regulations apply.

minor

a minor is an option available to a student enrolled in a four- or five-level program. a minor consists of a minimum of 24 units in the minor subject. no more than six of these units can be at level 1, unless otherwise stated in the specific requirements of the minor. a student is responsible for registering for courses to be applied towards a minor using elective units only. in the case of cross-listed courses, students must ensure that they register in the appropriate subject for the minor designation. those who have the necessary requirements may apply for recognition of that minor when they graduate. if recognition for a minor is granted, this recognition will be recorded on the student’s transcript. minors cannot be revoked once approved. students may return for a second degree in the subject in which they have obtained a minor, but only at the honours level. for further information please refer to minors in the general academic regulations section in this calendar.

continuation in the program

students must have a ca of 6.0 to continue in the program. if a ca of 5.5 to 5.9 is obtained, a student may remain in the program but will be placed on program probation for one reviewing period. a student may be on program probation only once.

if a ca of 3.5 to 5.4 is obtained, a student must transfer to another program for which he/she qualifies, or register in the b.h.sc. (honours) program as an irregular student for one reviewing period. during that period a student cannot take b.h.sc. (honours) program courses. at the end of that period a student may apply for re-admission to the b.h.sc. (honours) program.

if a ca of 3.0 to 3.4 is obtained, a student will be placed on academic probation. a student may continue in the program for one reviewing period as an irregular student but cannot take b.h.sc. (honours) program courses. the purpose of this period is to prepare a student for a program outside the b.h.sc. (honours) program. a student may be on academic probation only once.

if a ca of less than 3.0 is obtained, a student may not continue at the university.

workload

students who wish to take more courses than recommended for a single level of their program may do so if their ca on completion of the previous session is at least 7.0. students registered in the final level of the program are permitted to overload by up to six additional units in order to become eligible to graduate.

letters of permission

students enrolled in the b.h.sc. (honours) program may apply to the office of the assistant dean to take courses at another university on a letter of permission. request for letter of permission forms are available from the bhs website at http://www.fhs.mcmaster.ca/bhs/pdf_files/permission_form.pdf. students must achieve a grade of at least c- to receive credit.

students are responsible to forward the transcript from the other university directly to the assistant dean (hsc-tj11). if a grade of c- or better is attained, the transcript designation reads "com" indicating complete, or "nc" indicating not complete if less than a c- grade is attained.

courses taken at another university cannot be used to satisfy the university’s minimum residence requirements, will not be included in the calculation of the cumulative or sessional averages, and therefore cannot be used to raise standing. students may take up to six units of courses towards a minor on a letter of permission.

students must be in good standing to be eligible to take courses on a letter of permission.

level of registration

a student with six or more units incomplete at any level may proceed to the next level of the program only with the permission of the b.h.sc. (honours) program office.

reinstatement to the b.h.sc. (honours) program

a student who may not continue at the university may apply for reinstatement. students seeking reinstatement should complete the reinstatement request form available at the office of the registrar (gilmour hall, room 106) and the b.h.sc. (honours) program office. the completed form and the $50.00 fee must be submitted to the office of the registrar by july 15 for september entry and november 30 for january entry.

the form should explain the reasons for the student’s inadequate performance, corroborated by two letters of support, and should also include relevant documentary evidence such as, for example, a physician’s letter documenting an illness that may have impacted upon the student’s prior academic performance. reinstatement cases will be carefully screened and the evidence considered will include the student’s academic performance before and following admission to McMaster, as well as the nature of the reasons cited in the letter, the letters of support and the accompanying documentation. reinstatement is not guaranteed.

if students are reinstated to the university, their cumulative average will be re-set to 0.0 on zero units, although students may, at the discretion of the faculty, retain credit for prior work. following reinstatement, students will be on academic probation and must complete a minimum of 60 units of work after reinstatement to be eligible for graduation with distinction or other recognition based on the cumulative average. if at any review after reinstatement the student’s cumulative average falls below 3.5, the student will be required to withdraw from the university for a period of at least 12 months.

registration and course changes

it is the responsibility of the student to ensure that the program of work undertaken meets the requirements for the degree. it is highly recommended that you review your personal degree audit via mugsi on the working day following each time you drop or add courses and seek academic counselling from the b.h.sc. (honours) program office if you have any questions. dates for final registration and course changes appear in the sessional dates section of this calendar and are enforced.

spring counselling

academic counselling is available throughout the year from the b.h.sc. (honours) program office. it is recommended that the students make an appointment with an advisor from this office during the march counselling period. level i students must indicate their intention to continue in the b.h.sc. (honours) program at that time.

graduation

a ca of 5.0 is required for graduation.

students who successfully complete level iii of the program may apply for permission from the b.h.sc. (honours) program office to graduate with a three-level b.h.sc. degree. please refer to the general academic regulations section in this calendar for additional information related to graduation.

the school of medicine, established in 1965, offers major programs in undergraduate, postgraduate and graduate medical education. the clinical programs use not only the teaching hospital and ambulatory care and research facilities at the McMaster university medical centre division of hamilton health sciences, but also the clinical teaching units at several of the major hamilton hospitals and community health-care centres.

the undergraduate medical program for the md degree was initiated in 1968, graduating its first students in may 1972. at present, 188 students are admitted to the program each year.
The academic program operates on an 11 months-a-year basis and students qualify for the MD degree at the end of the third academic year. The curriculum has been designed to involve medical students in a broad range of human health problems throughout their education and to prepare them for effective working relationships with patients, colleagues and society.

Postgraduate training programs currently include: Anesthesia, Community Medicine, Critical Care, Emergency Medicine, Family Medicine, Internal Medicine (and subspecialties), Laboratory Medicine (and subspecialties), Obstetrics and Gynecology, Pediatrics (and subspecialties), Psychiatry, Radiology, and Surgery (and subspecialties).

More details on these postgraduate programs are available from the Postgraduate Medical Education Office.

The Northwestern Ontario Medical Program (NOMP) has been developed in cooperation with the Northern Academic Health Science Network (NAHSN) and physicians in towns in Northwestern Ontario. Clinical training opportunities exist in community hospitals throughout Central West Ontario. Excellent clinical experience in these settings is part of both the undergraduate and postgraduate medical programs.

Graduate programs leading to the M.Sc. and Ph.D. degrees are offered in Biochemistry and in Medical Sciences. An M.H.Sc. (Health Care Practice) program is interprofessional in nature and is for experienced health professionals who wish advanced preparation as clinicians.

The Undergraduate Medical Program {7880}

The three-year program in Medicine uses a problem-based approach to learning which would apply throughout the physician's career. The components have been organized in sequential units with early exposure to patients and case management.

GENERAL OBJECTIVES

The goal of the Undergraduate Medical Program is to provide students with a general professional education as physicians. The program enables students to build on previous education and experience, using available learning resources and opportunities. The components that will be achieved by graduates will qualify them to proceed to further postgraduate training. While most graduates will be involved directly with the care of individual patients, it is expected that some will choose careers concerned with the health of populations and the development of new knowledge.

The overriding objective to be achieved is the demonstrated ability to identify, analyze and manage clinical problems in order to provide effective, efficient and humane patient care.

The enabling objectives of knowledge, skills and professional behaviour comprise the following:

KNOWLEDGE

To acquire and put into practice concepts and information required to understand and manage health-care problems. The study of the student's learning function will be guided by an analysis of the determinants of health and illness. A spectrum of factors will be considered in both the external and internal environments of individuals when deciding on preventive, therapeutic, rehabilitative and supportive management.

SKILLS

To acquire and use the following skills:

1. Information Management Skills: The application of certain rules of evidence to clinical, investigational and published data in order to determine their validity and applicability.

2. Professional Skills: The ability to acquire, interpret, synthesize and record clinical information in managing the health problems of patients, considering their physical, social and emotional function. Included is the use of the clinical reasoning process.

3. Self-Directed Learning Skills: The ability to identify areas of deficiency in one's own performance, find appropriate educational resources, evaluate personal learning progress and use new knowledge and skills in the care of patients.

PROFESSIONAL BEHAVIOUR

To recognize, develop and maintain the professional behaviour required for a career as a health professional. Acquiring the authority to interact with the lives of patients carries with it the obligation to act responsibly:

1. toward oneself: to recognize and acknowledge personal assets, emotional reactions and limitations in one's own knowledge, skills and attitudes, to build on one's assets and to overcome areas of limitation;

2. toward patients and their families: to be able, under appropriate supervision, to take responsibility for the assessment and care of patients and their families;

3. toward colleagues: to contribute to productive communication and cooperation among colleagues engaged in learning, research or health care;

4. toward the community: to contribute to the maintenance and improvement of the health of the general population.

LEARNING METHODS

To achieve the objectives of the Undergraduate Medical Program, students are introduced to patients within the first unit of the curriculum. In this way, students understand the relevance of what they are learning, maintain a high degree of motivation and begin to understand the importance of responsible professional attitudes.

The students are presented with a series of health-care problems, requiring for their solution the understanding of underlying biological, population and behavioral principles, the appropriate collection of data and the critical appraisal of evidence. In each problem area, the student may select the most appropriate issues to ensure the understanding and application of fundamental concepts. This flexibility provides an opportunity for early consideration of individual interests and goals. The faculty function as learning resources or guides. Learning by a process of inquiry is stressed.

The central focus of the program is the tutorial. The class is divided into small groups, each with a tutor. In the tutorial session students develop a series of learning objectives from each health-care problem and negotiate how they will approach their learning tasks. They then acquire the knowledge and skills to meet the objectives of the unit in which they are working. They also learn to work as a team, helping and learning from peers. The study habits and sense of responsibility to self and others provides a basis for lifelong working and learning habits. Attendance is mandatory.

Students admitted to the Undergraduate Medical Program have the responsibility and privilege of taking an active role in the planning and evaluation of the education program. Through representation on most policy-making and implementing committees, students can influence decisions in such areas as education, philosophy, faculty recruitment and curriculum design. It is expected that all students will participate in the continuing reappraisal and improvement of the program. Such participation is a hallmark of the Program.

STUDENT EVALUATION METHODS

The evaluation format has been designed to complement learning in the Undergraduate Medical Program. Evaluation methods have been developed to measure how well the student achieves the stated educational objectives in the various units of the program. Continual evaluation of the student occurs within the tutorial setting with input from their peers, faculty preceptors and the tutor. Continual evaluation is done by the tutor and the student's performance is reviewed by the supervisor. The student is responsible for the final summary statement of student learning progress. The tutor prepares a written summary of the student's performance in the tutorials and all associated activities during that unit. A copy of the evaluation summary is given to the student and to the student advisor while the original is kept in the student's evaluation file.

In addition to the tutorial-based evaluation, the accumulation of medical knowledge is assessed at regular intervals by means of the Personal Progress Index. This is a multiple-choice format. Results are given to the students for self-evaluation and, in summary form, to the student advisor. The Personal Progress Index is in addition to, and does not replace, tutorial- and performance-based evaluation. The Program monitors student progress, and responds to students showing persistently poor progress.

The acquisition of clinical and professional skills is evaluated by clinical skills preceptors in each unit. The clerkship, and additionally by Objective Structured Clinical Evaluations (OSCE's) which are run on an annual basis.

The Evaluation Committee, a subcommittee of the Medical Education Committee, has the responsibility of working with the Medical Program to assist with the development and implementation of valid and reliable evaluation methods to provide timely and helpful information to assist students and faculty in assessing progress and performance. Continuation in the Program is subject to satisfactory performance.
The curriculum of the Undergraduate Medical Program comprises six units and an elective program. There is less of a division between the pre-clinical components and the clinical components of the MD Program than in more traditional schools. Patient contact and clinical skills development start in Unit 1 and increase throughout the program. The scientific background for understanding patients' problems, while more extensively studied in earlier units, continues to be applied as it is relevant to the care of patients in clinical situations.

**PROGRAM OUTLINE FOR UNIT 1**

The 12-week Unit 1 provides an opportunity for students to become familiar with teaching hospitals in the Hamilton area for Clerkship rotations. It is anticipated that further rotations will be developed in rural, under-serviced and remote areas. The elective experience can be spent in various activities utilizing local, regional or distant resources.

**PROGRAM OUTLINE FOR UNIT 6**

This unit will offer opportunities for students to integrate, consolidate and reflect on their learning to develop and to prepare for their future roles as resident and practicing physician. The unit will focus on professionalism; stressing autonomy with accountability, critical thinking and self-direction. Content will include complex issues such as population health, health services and technological assessment of standard and novel diagnostic, therapeutic and evaluative procedures. Learning opportunities will be provided through case- and problem-based learning access to multi-disciplinary resources and personal learning plans developed with mentors. Evaluation will include formative and summative measures such as learning contracts, reflective papers and observation. Students will be given the opportunity to focus on a portion of their learning objectives according to individual career objectives.

**ELECTIVES**

Elective studies form an integral part of the Curriculum Plan. There may be considerable overlap of self-directed learning, since students must define goals for electives which are appropriate for their own learning objectives. These objectives represent specific areas of educational need or interest. The responsibility for planning electives rests with each student in collaboration with the student advisor.

The three types of electives in the Undergraduate Medical Program are:

1. Block Electives: These are blocks of curriculum time dedicated to full-time elective activities. Their satisfactory completion is a mandatory component of the Undergraduate Medical Program. Block Electives occur after Unit 3 (eight weeks), after Unit 4 (four weeks), during the Clerkship (eight weeks).
2. Horizontal Electives: These are electives taken in conjunction with other parts of the curriculum. Horizontal electives are entirely voluntary, not being required for completion of the program, but are used to explore or review a specific area of knowledge or practice in more detail. It is particularly important that the student's advisor be involved in all decisions concerning the selection and carrying out of horizontal electives.
3. Placement Electives: There are arrangements in place for a small number of students from each class to devote longer periods of time (from six to 12 months) to the pursuit of special academic experiences. The intent is to encourage students to explore special frontier areas of medicine and health care. Examples include: research training and experience; community health projects; international health opportunities. These experiences could occur following Unit 4 or during the first half of Unit 5. Some experiences may potentially have partial funding (e.g. by student research fellowships).

**REGULATIONS FOR LICENCE TO PRACTISE**

A degree in medicine does not in itself confer the right to practise medicine in any part of Canada. To acquire this right, university graduates in medicine must hold a certificate of the College of Physicians and Surgeons of the province in which they wish to practise. Students in Ontario medical schools are not required to register as students with the College of Physicians and Surgeons of Ontario. Students intending to practise outside Ontario are urged to consult the licensing body of that province regarding registration. Licensing requirements vary somewhat among the provinces. The current Ontario requirements for issuance of a Certificate of Registration Authorizing Independent Practice are:

1. Certification by the Royal College of Physicians and Surgeons of Canada or the College of Family Physicians of Canada;
2. Parts I and II of the Medical Council of Canada Qualifying Examination;
3. Canadian Citizenship or Landed Immigrant Status.

In general, students are expected to obtain a certificate from either the College of Family Physicians of Canada or from the Royal College of Physicians and Surgeons of Canada in order to be licensed in the province of Ontario.
CANADIAN RESIDENT MATCHING SERVICE (CaRMS)
The Matching Service is a clearing-house designed to help final year Canadian medical students obtain the post-MD program of their choice, and to help program directors obtain the students of their choice. It provides an orderly method for students to decide where to train and for program directors to decide which applicants they wish to enrol. For both students and directors, it removes the factors that generate unfair pressures and premature decisions.

Further information is available from Cathy Oudshoorn, MD Program Administrator, (905) 525-9140, ext. 22141.

BASIC CARDIAC LIFE SUPPORT TRAINING
All students are required to have obtained a current certificate in Basic Cardiac Life Support (Adult and Child CPR) prior to registration in the medical program. Courses are readily available in most communities. Information will be sent to successful applicants prior to registration.

Specific questions can be directed to Cathy Oudshoorn, MD Program Administrator, (905) 525-9140, ext. 22141.

IMMUNIZATION
The Ontario Public Hospitals Act requires that all persons working in a hospital setting meet certain criteria regarding surveillance for infectious diseases. In order for the requirement of the legislation to be met, students must attend the Student Health Services for Basic Immunizations. In addition, students must attend the Student Health Services to receive Pre-Clinical Training in Disease Screening through the Student Health Services. More information will be sent to successful applicants prior to registration.

Specific questions can be directed to Cathy Oudshoorn, MD Program Administrator, (905) 525-9140, ext. 22141.

Admission Policy for the Medical Program
The official admission policy and deadlines for the Undergraduate Medical Program for late August 2005 shall be as published in the 2005 Ontario Medical School Information Booklet. This booklet is available through:
Ontario Medical School Application Service (OMSAS)
170 Research Lane,
Guelph, Ontario, N1G 5E2
(519) 823-1940
http://www.ouac.on.ca/omsas/
email: omsas@ouac.on.ca

Please note that the admission policy is reviewed annually, and the admission requirements from the previous year may not apply. Because of the nature of the selection procedures, deadlines are strictly enforced. All application documentation must be provided by the specified deadlines. Applicants must follow the instructions precisely. All applicants should be aware that the Admissions Office is committed to the protection of personal information. Use of personal information is strictly limited to the appropriate handling of applications, record-keeping for those admitted to the program, and research intended to further the efficacy of Medical Education Program procedures. The University reserves the right to change the admission requirements at any time without notice.

ADMISSION AND REGISTRATION
Registration in the Undergraduate Medical program implies acceptance by the student of the objectives of the program, and the methods which evaluate progress toward the achievement of those objectives. The following describes the regulations governing admission and registration in the Undergraduate Medical Program. The application deadline is October 1, 2004. The deadline is STRICTLY ENFORCED.

ADMISSION POLICY AND PROCEDURE
The intention of the McMaster Undergraduate Medical Program is to prepare students to become physicians who have the capacity and flexibility to select any area in the broad field of medicine. The applicant is selected with this goal in mind. Faculty, medical students and members of the community are normally involved in the admissions process.

Application to the medical program implies acceptance by the applicant of the admission policies and procedures, and the methods by which candidates are chosen for the program.

Applications received in the Fall of 2004 are for the academic year commencing late August 2005. Applicants who will not be ready or able to begin studies at that time may withdraw their applications without prejudice. Application fees cannot be refunded.

Applications must be submitted by October 1, 2004, 4:30 p.m. EDT. Several hundred applicants will be invited for interviews in Hamilton in March or April. From this group a class of 138 is selected.

All applicants are notified in writing, by McMaster University, of the results of their application. These letters are mailed to applicants no later than the last business day in May, 2005.

FALSIFICATION OF ADMISSION INFORMATION
Applicants should understand that where it is discovered that any application information is false or misleading, or has been concealed or withheld, the application will be deemed to be invalid. This will result in its immediate rejection. If the applicant has already been admitted and registered as a student, withdrawal from the University may be required. The MD Admissions Committee will normally not allow the applicant to realign to any of the Medical Program for seven (7) years.

ACADEMIC ELIGIBILITY REQUIREMENTS
Applicants must report on the Academic Record Form of the OMSAS application all grades received in the degree credit courses in which they have ever registered. Failure to report courses, programs or grades on the Academic Record Form will result in the disqualification of the application. All grades are converted by the applicant on the Academic Record Form to a 4.0 scale according to the OMSAS Undergraduate Grading System Conversion Table. (The Conversion Table is provided with the OMSAS Application.)

All applicants must fulfill the requirements described below in both a) and b).

a) By June 2005, applicants must have completed a minimum of three years of undergraduate work. Only degree credit courses taken at an accredited university will be considered. The applicant must be able to demonstrate a high level of academic achievement consistently over that extended period of time. A minimum of 15 full-courses, or 30 half-courses (three years) of Undergraduate university work from a recognized university is required. Two of the three years must be above the year 1 level. A year is the full block of work specified for a year or level of the program as indicated on the university transcript and in the appropriate university calendar. If requested, applicants must provide evidence that this requirement has been met.

An applicant who has completed a diploma at a CEGEP must have completed by June 2005, at least two additional full academic years of degree credit work at an accredited university. Of these years must be a full academic year of courses above Level I.

Applicants who have completed the requirements for a baccalaureate degree in less than three years by October 1, 2004 are also eligible.

b) By October 1, 2004, applicants must have achieved an overall simple average of at least 3.0 on the OMSAS 4.0 scale. While an overall simple average of at least 3.0 on the OMSAS 4.0 scale meets the minimal criterion for consideration for admission, prospective applicants should be aware that given the rapidly rising level of competition for a limited number of positions, a significantly higher GPA would provide the applicant with a better chance of admission. Due to changes from year to year in the level of competitiveness, an exact figure in this regard cannot be provided.

c) Marks on supplementary courses will be included in the grade point average calculation.

d) Graduate experience of applicants will be considered in the admission process. Graduate work will not be considered unless it is complete and the degree has been conferred by the application deadline, October 1st, 2004. Individual grades received for course work taken as part of a graduate degree will not be included in the calculation of the grade point average.

ABORIGINAL APPLICANTS
Applicants who wish to be considered under the Aboriginal (Indian, Inuit or Matis, as recognized in the Constitution Act, 1982) application process will also be required to provide a letter of recommendation from their First Nation, Band Council, Tribal Council, Treaty, community or organizational affiliation.

Aboriginal applicants will also be required to complete the Undergraduate MD Program application package as provided by the Ontario Medical School Application Service (OMSAS).
Applicants must meet the same minimum academic criteria for admission as set out for the general pool of candidates and have an overall GPA of at least 3.0 as calculated on the OMSAS 4.0 scale.

**GEOGRAPHICAL CONSIDERATION**

The geographical status of the applicant is determined from the Autobiographical Sketch. Applicants may be asked to provide evidence of geographical status. In selecting applicants for interview, the bona fide place of residence will be based upon: the province of Ontario; the rest of Canada; and other countries. To qualify for Ontario status, an applicant must be a Canadian citizen or permanent resident by October 1, 2004, and have resided for at least three years in the province of Ontario. Applicants who first language is not English must satisfy by October 1, 2004, at least one of the following conditions:

1. provide evidence that a score of at least 580 on the paper based TOEFL or 237 on the computer based test; or the equivalent on other recognized tests has been achieved (McMaster University code is #0936); or
2. have attended an education institution, where instruction was in English, for at least three years; or
3. have resided for at least four years in an English-speaking country.

**INTERVIEWS**

Several hundred applicants will be invited to Hamilton for an interview. Because the interviews involve many other people, applicants must attend on the date and time specified. Applicants are responsible for their own travel expenses. Applicants can avail themselves of tours available during their interview day. The interview process itself is composed of a series of ten-minute encounters over a two-hour period.

**SELECTION**

All the information resulting from the process described above, as well as the Confidential Assessments from referees, may be reviewed and used in the final selection. Applicants will be notified in writing by McMaster University of the results of their application. These letters are mailed to applicants no later than the last business day in May 2005. Anyone accepting an offer of admission must provide, within two weeks of acceptance, a cheque in the amount of $1,100 (Canadian), non-refundable, which will subsequently be applied towards tuition.

**APPLICATION FOR DEFERRED REGISTRATION**

Deferred registration may be granted only under exceptional circumstances. Deferred registration applications may be requested only by those candidates offered a place in the class on the last working day in May and who have accepted that offer. The request for deferral must be submitted within two weeks of the offer of admission.

**SPECIAL APPLICANTS**

The Special Applicant Pool is on hold this admission cycle.

**INTERNATIONAL APPLICANT POOL**

The International Applicant Pool is on hold this admissions cycle. Interested International applicants may still apply through the regular pool.

**ADVANCED STANDING/TRANSFER**

The structure of the McMaster Program requires that all students begin in Unit 1. There is no provision for advanced standing or transfer into the program.

**UNSUCCESSFUL APPLICANTS**

Applications from one year are not held over to another year. If an unsuccessful applicant wishes to reapply, a new application package, including supporting documentation must be submitted, using the OMSAS Application, the OMSAS Information Booklet, and the McMaster Autobiographical Submission for the new admission selection cycle.

**RETENTION OF DOCUMENTS**

All documentation submitted in support of an application for admission becomes the property of the University and is not returnable. If an applicant is not accepted, or fails to enroll following acceptance, the identifiable documentation will be destroyed at the end of the admissions cycle in keeping with university policy.
Financial Information

Financial difficulties are among the most frequent problems experienced by students in undergraduate medical schools. At McMaster, these are intensified by the lack of opportunity for summer employment.

In this situation, it is incumbent on students admitted to the MD Program to clarify immediately their personal financial situation and to secure or identify sufficient support to meet their financial obligations over the subsequent three years. The Undergraduate MD Program cannot assume this responsibility.

In 2003-2004, the academic fees (tuition and student supplementary fees) for a student in the McMaster Undergraduate Medical Program were:

In addition, the cost of books and diagnostic equipment for a Year I student was approximately $2,994. It is strongly recommended that students purchase the full complement of medical equipment necessary for clinical skills. Equipment lists and special prices will be offered to medical students within the first few months of medical school. Students are also responsible for their transportation costs related to clinical study.

Financial assistance is available to Ontario residents from the federal and provincial governments through the Ontario Student Assistance Program (OSAP). To be eligible a student must be a Canadian Citizen or permanent resident of Canada and fulfill certain requirements for residency in Ontario. Students who are legal residents of other provinces need to check with their respective provincial financial aid programs about eligibility for support prior to acceptance. In addition, the following sources of funding are available to undergraduate medical students:

**Bursaries**

There is an extensive bursary program which has been developed by the Faculty of Health Sciences and the central University administration. These awards are intended to assist Canadian citizens and demonstrate financial need. All bursaries are distributed during the late fall of each year. Bursaries are intended to offset provincial financial assistance and cannot supplement the full cost of medical education.

The following list of bursaries is available to Undergraduate Medical Students who are Canadian citizens. The following bursaries have been generously donated to assist medical students in financial need:

- Adraches (Archie) Yian Moughalian Memorial Bursary
- Andrew Talalla Memorial Bursary
- Burlington Medical Society Bursary
- Daniel Giannini Bursary
- Dr. Gail Henning Memorial Bursary
- J.W. Harry Butcher Estate Bursary
- Daniel and Natalie Strub Bursary
- Medical Student Opportunity Trust Bursary
- Ontario Medical Student Bursary Fund
- Ragonetti Family Bursary
- Ripley Estate Bursaries
- Ronald Pye Bursary
- Ruth Tomlinson Memorial Bursaries
- Scotiabank McMaster Medical Scholarship
- Scotiabank Breast Cancer Scholarship
- William A. Vanderburgh Estate Bursaries

There are many other bursaries provided through the central campus bursary program, which will be disbursed to students in the fall each year. Information about each award, criteria and amounts will be provided to all medical students each fall. For further information about bursaries, please contact Cathy Oudshoorn, (905) 525-9140, ext. 22141.

**Academic Awards**

The Undergraduate Medical Program has in the past indicated its preparedness to recognize students who distinguish themselves and the University by virtue of their scholarship and their contribution to the university community. At the same time, the School has indicated that the terms of reference for such awards should neither compromise the spirit of cooperative scholarship which characterizes its MD Program nor replace its priority of concern for financial assistance awards.

A small but growing number of estates and agencies have donated funds to the University and the Undergraduate Medical Program for purposes of recognizing scholastic merit among medical students. In order to meet the requirements of these awards within the spirit of cooperative scholarship, these funds are available to support individual students in their pursuit of specific elective projects or activities.

Students are required to submit an application through the MD Program Office, outlining the nature of their work and the need for funds. For further information, contact Cathy Oudshoorn, (905) 525-9140, ext. 22141.

**Abbott Memorial Scholarship Loan Fund**

This fund was established by the Federation of Medical Women of Canada. Small loans are available to any female medical student or first-year resident. In special cases, a loan up to $1,000 may be made to a student for recognized postgraduate training. Loans are payable within five years of date of issue, after which time interest will be charged at a rate of 5% compounded annually.

Information regarding these loans may be obtained from Key Moffat, Executive Coordinator, Federation of Medical Women of Canada, Box 8244, Ottawa, Ontario, K1G 3H7.

**Medical Officer Training Plan**

The Department of National Defence administers a program for medical students known as the Canadian Forces Medical Officer Training Plan. Under this plan, students may be subsidized (tuition, plus pay) throughout their undergraduate medical studies and residency. To qualify for enrollment a student must be acceptable without condition in a program in medicine in a Canadian university or in an accredited Residency Program.

Further information on this program and on the career opportunities in medicine in the Canadian Armed Forces may be obtained from local Canadian Forces Recruiting Centres. In Hamilton, the Recruiting Centre is at 100 Main Street East. Telephone (905) 572-4000.

**Loan Funds**

The Undergraduate Medical Program administers a small loan program to assist medical students with demonstrable need. Unfortunately, these funds are limited and cannot be relied on to meet a major portion of any student's financial obligations. **Program Overview**

The Midwifery Education Program at McMaster University leads to a Bachelor of Health Sciences (B.H.Sc.) in Midwifery. The program reflects the philosophy of midwifery in Ontario. Midwifery is potentially one of the most important components of women's health care in Ontario. Midwives' expertise in the care of normal pregnancy and childbirth arises from their understanding of childbearing as a social, cultural and biological process and from their ability to competently exercise clinical skills and decision-making. Midwives' education, practice and professional practice is framed around professional practice. The educational program is an integral part of the evolution of the profession of midwifery in Ontario and Canada. The program helps create future leaders and teachers. It assures practice and teaching as a continuum so that learning environments become available across Ontario. Midwives, as primary health care providers, should have well-developed interpersonal skills.
They must be competent in areas of health education, counselling and interprofessional collaboration. Applicants to the program will be assessed for their ability to exhibit and further develop these important personal/professional qualities. Midwives provide care and advice to women during pregnancy, labour and the postpartum period; conduct deliveries and provide care for newborn babies. The Midwifery Education Program is a collaborative venture shared by McMaster, Ryerson and Laurentian Universities.

Curriculum
The four year program which spans nine terms, includes courses from basic sciences, social sciences, health sciences, women's studies and electives, in addition to clinical courses. A variety of course formats include distance learning through teleconferencing and print-based self-study courses. Teaching methods include lecture format, small group tutorials, self-directed activities and practical learning experiences.

INTENSIVES
Intensives provide the opportunity for the students to group together for several days for workshops/clinical skills sessions. All intensives are held at McMaster University and generally last one week. In Level IV, the intensive session includes students from all three institutions, intensives are part of the curriculum and therefore, attendance is mandatory.

CLINICAL COURSES
Clinical courses consist of a clinical placement and concurrent problem-based weekly tutorials. Students are assigned to a midwifery practice for an extended period of time to ensure continuity of care to expectant mothers and supervision from a clinical preceptor. Throughout the program, students will be placed in more than one midwifery practice and will gain clinical experience in a hospital setting and with an obstetrician. Efforts are made to assist students in being assigned to the clinical practice of their choice, however, due to limited placements, students may have to relocate or travel for clinical placements. Travel and living expenses are the responsibility of the student.

Selection Procedure

The Midwifery Education Program has a limited number of places. The admission requirements stated are minimum requirements. Preference will be given to applicants with the best qualifications. The actual standing required for admission may be higher than the minimum levels stated. The program has a two step selection procedure:
1. Assessment of academic eligibility.
2. Personal interview.

Offers of admission will be made following the interview process. Offers based on interim grades will be conditional upon maintaining satisfactory performance on final grades.

UNSUCCESSFUL APPLICANTS
Applications are not held over from one year to another. If an unsuccessful applicant wishes to reapply to the Midwifery Education Program, a new application, including transcripts and supplementary materials must be submitted.

APPLICATION FOR DEFERRED REGISTRATION
Deferred registrations are not normally granted in the Midwifery Education Program. Under exceptional circumstances, applications for deferral will be reviewed by the Admissions Committee for those candidates offered a place in the program. The application of deferral must be submitted in writing no later than August 1 of the year for which deferral is requested. If granted, registration may be deferred for one year only.

APPLICATION DEADLINE
Submission of completed application forms to the Ontario Universities’ Application Centre and the application to the program with all supporting documents/transcripts must be received by the University no later than February 1 of the year in which registration is expected.

Financial Information
In 2003-2004 the tuition fees for a student in the Midwifery Education Program were $4,234.48 for an eight month academic term. Supplementary fees are estimated at $200.00 per year.

Financial assistance is available from the federal and provincial governments through the Ontario Student Assistance Program (OSAP). Students intending to apply for OSAP may begin their application process to OSAP once they are notified about receiving an interview. The final status of your application can be confirmed with OSAP at a later date.

Additional costs include books, supplies, and other learning resources estimated at $500.00-$1000.00.

Students should expect to cover their own travel and accommodation costs during the program. The program strongly suggests that students join both the College of Midwives Subscriber Status and the Association of Ontario Midwives as a student member.

In 1942, McMaster University began its first program in Nursing, a cooperative effort between the University and the Hamilton General Hospital. Since the establishment of McMaster University’s School of Nursing in 1946, students have received a Bachelor of Science in Nursing degree upon graduation. The program has functioned completely under the supervision of the University, while enjoying the full cooperation of community hospitals and agencies in the operation of its clinical courses. In July 1974, the Schools of Nursing and Medicine became the Faculty of Health Sciences.

In 1982, the Post Diploma Stream of the B.Sc.N. Program was introduced. This second category of admission was created to provide Diploma Registered Nurses with the opportunity to work towards a B.Sc.N. degree.

McMaster University is one of ten Ontario universities collaborating with the Council of Ontario University Programs in Nursing to offer a Primary Health Care Nurse Practitioner Program. The program commenced in September 1995 and enables Nursing diploma prepared students to obtain a B.Sc.N. degree and a Nurse Practitioner Certificate. Those students who hold a Nursing Baccalaurate receive the Nurse Practitioner certificate upon completion of the program.

In 1994, the first Ph.D. candidates entered the Clinical Health Sciences (Nursing) graduate program which is offered by the School of Graduate Studies through the Faculty of Health Sciences. M.Sc. candidates entered in the fall term of 1995. All enquiries about the Nursing graduate program should be directed to the Graduate Programs Office, HSC-3N10, (905) 525-9140, ext. 22983. Information Sessions for high school students are hosted by the Student Liaison Office during the school year. For more details about these sessions or to register for a visit, please call the Office at (905) 525-9140. Applicants not applying directly from high school who require an application package should call (905) 525-9140, ext. 22232.

The provincial legislation on entry to practice requires all new graduates for a baccalaureate degree in Nursing. In response, McMaster University, Mohawk College and Conestoga College have formed an educational consortium to offer the McMaster Nursing degree through the McMaster/Mohawk/Conestoga Collaborative B.Sc.N. Program. Students wishing to register in the B.Sc.N. program at McMaster should pay particular attention to the information which immediately follows this introduction. Those students who wish to register in the B.Sc.N. program at either Mohawk or Conestoga College should refer to the Collaborative B.Sc.N. (D) Stream references throughout the School of Nursing section of the Calendar. Students are also advised to consult the Chair of the Collaborative program at either Mohawk or Conestoga College for additional information.

The B.Sc.N. Program

The B.Sc.N. Program promotes the development of nursing as a caring, client-centred, scientific and humanistic profession. With an emphasis on problembased, small group, self-directed learning, the program provides a general baccalaureate education in nursing for the preparation of professional nurses who will practice in a variety of health-care settings. Central to our mission is the preparation of nurses who will work to enhance the quality of health of individuals, families, communities and society. In fulfilling its mission, the B.Sc.N. Program promotes skills in its graduates to prepare them for life-long, self-directed learning, critical thinking, advocacy and collective action.

As students progress in the B.Sc.N. Program, they will find an increasing emphasis on interpersonal and communication skills, independent learning, and leadership qualities. Applicants should evaluate their own potential for developing abilities to interact with others and to assume leadership roles. Learning is a process of inquiry, a skill to develop as a life-long activity in an environment conducive to openness and sharing among faculty and students. Emphasis on small group tutorials and self-directed learning promotes the development of self-evaluation skills and critical thinking abilities. Extensive multimedia, laboratory and library resources support a belief in the importance of independent study. Students apply concepts from Nursing and related disciplines to their experiences in classroom and clinical settings. (Opportunities exist for international and out-of-town clinical practice experiences.)

Evaluation by self, peers and faculty is part of an ongoing assessment process of the achievement of clinical, course, and program objectives.

GOALS

Graduates of the McMaster University B.Sc.N. Program will be prepared to provide, facilitate and promote professional practice in a variety of health care contexts and with diverse clients (individual, family, group, communities, populations) who have stable and unstable outcomes and multi-factorial influences (internal and external) on their health status within an ethic of professional caring. Admission Policy and Procedure

ADMISSION POLICY
Application to the B.Sc.N. Program in the Faculty of Health Sciences implies acceptance of admission policies, procedures and the methods by which applicants are chosen for the program. As places in the B.Sc.N. Program are limited, admission is by selection. Possession of the published minimum requirements does not guarantee admission.

There are four streams of study leading to the completion of the B.Sc.N. degree. The Basic (A) Stream and Collaborative B.Sc.N. (D) Stream require four years of study, and are available to those applying directly from an Ontario secondary school with Grade 12 U or M courses; to those who have qualifications equivalent to Grade 12 U or M courses; and to applicants with other qualifications. The Basic (B) Stream requires 24 months of full-time study to complete their B.Sc.N./N.P. degree, while degree-prepared nurses require 12 months on a full-time basis or up to 36 months on a part-time basis to complete the Nurse Practitioner Certificate.

The requirements and application deadlines vary depending on the applicant's background. An applicant supplying documentation or evidence which, at the time or subsequently, is found to be falsified will be withdrawn from consideration. Any student admitted to the program having submitted false documentation will be withdrawn.

Detailed medical information, including a record of completion of required immunizations, will be required upon acceptance. Evidence of CPR certification (BCLS) will also be required.

The School of Nursing is committed to equality of opportunity. Disability is not grounds for exclusion from the School. Every attempt will be made to remove barriers and create accommodation provided any accommodation maintains the same academic and clinical standards for all students and does not require significant program change. Applicants should refer to the School of Nursing Admissions Procedure and Guidelines for Applicants with Disability available from the School of Nursing Admissions Office (905) 525-9140, ext. 22232 and consult the Centre for Student Development (905) 525-7070, ext. 24026 or TTY (905) 521-6709.

Applications are not held over from one year to another. An unsuccessful applicant may reapply to the B.Sc.N. Program by submitting a new application, including supporting documentation.

APPLICATION FOR DEFERRED REGISTRATION
Deferred registration is granted only under exceptional circumstances to those candidates who have been admitted and have accepted the offer. Registration may be deferred for one year only. The request for deferral, outlining the reasons for the request, must be postmarked no later than July 31 of the year for which deferral is requested.

Curriculum for the B.Sc.N. Program

BASIC (A) STREAM
(6390)
The Faculty has planned the curriculum so that the study of nursing, the physiological, psychological and social sciences, and the humanities are interrelated and span the entire program. In Level I, the amount of nursing experience is relatively small; the major proportion of study is in the behavioural and natural sciences. The nursing component increases progressively through Levels II, III, and IV, as the study of natural sciences is completed. Normally, because of timetable constraints, courses must be taken in the level indicated in the curriculum.

ELECTIVES
Thirty units of electives are to be selected from disciplines of the student's choice, of which a minimum of 12 units are to be chosen from courses designated as Level II or above. For some courses, the amount of duplication of required content will preclude their being used for elective credit in the B.Sc.N. Program.

REGISTRATION TO PRACTICE NURSING
On receiving the B.Sc.N. degree after successful completion of the (A) Stream of the B.Sc.N. Program, graduates are eligible to write the RN Licensing Examinations which are administered by the College of Nurses of Ontario. Application to write the RN Licensing Examinations is made through the Faculty of Health Sciences.

DIPLOMA RN (B) STREAM
(6391)
The program of study for Diploma Registered Nurses is integrated with existing course offerings. The practice of nursing in diverse clinical settings, both acute and chronic, is integrated with existing academic terms. The curriculum is designed to build on the existing knowledge and skills of the students, to prevent duplication of learning experiences and to prepare the students to function in an expanded role in community and institutional settings.

The curriculum is planned for five academic terms if taken on a full-time basis. If taken on a part-time basis, students are normally allowed six years after the first Nursing course to complete the program requirements.
ELECTIVES
Twenty-four units of electives are to be selected from disciplines of the student's choice of which a minimum of 12 units are to be chosen from courses designated as Level II or above. For some courses, the amount of duplication of required content will preclude their being used for elective credit in the B.Sc.N. Program.

ONTARIO PRIMARY HEALTH CARE NURSE PRACTITIONER PROGRAM (C) STREAM
AND NURSE PRACTITIONER CERTIFICATE STREAM
This program has been developed by a provincial consortium of ten Ontario universities offering one standardized curriculum since 1995.

The program prepares students with a nursing diploma or a nursing baccalaureate with relevant experience to provide individuals, families and communities with the five basic components of comprehensive primary health care services (promotion, prevention, cure, rehabilitation and support) within an extended scope of nursing.

Computer skills and Internet access are mandatory. Distance education modalities are employed in all courses in the Nurse Practitioner (C) Stream and Nurse Practitioner Certificate Stream. Tutorial sessions are held on site at the University. Field experience is required for several courses.

Full-time B.Sc.N./N.P. students attend classes for 24 consecutive months. Full-time certification N.P. students attend classes for 12 consecutive months. Once N.P. core courses are started, the five courses must be completed within three calendar years.

This program affirms the McMaster curriculum model of student-centred, problem-based or problem-focused teaching and learning; respect for the adult learner; a curriculum cognizant of and responsive to evolving nursing practice, a commitment to interprofessional approaches and a commitment to a strong scientific component. Students enrolled in the program will be actively linked with one of the provincial tertiary paediatric haematology-oncology sites and maintain their clinical practice at that institution. The courses themselves will emphasize the existing literature and practice modalities in paediatric haematology-oncology and incorporate these into some of the present post-diploma baccalaureate courses.

PROGRAMS AND DEGREES

A. Level I Programs

HUMANITIES

PROGRAM NOTES

1. A full-course load for Humanities I is 30 units. (The final digit in course numbers indicates the unit weight of a course. A 6-unit course is taught from September to April and a 3-unit course is a half-year course which may be taught either from September to December or January to April.) Admission to a Level II program normally requires completion of six units of the relevant subject. In order to be considered for admission to a Level II program, students should consult the admission statements for the Level II programs when selecting their Level I courses.

2. The Faculty offers INQUIRY 1H03. Inquiry in the Humanities. Humanities I students may choose this course as an elective. For a course description see Inquiry or Humanities in the Course Listings section of this Calendar.

3. Humanities I students are permitted to take up to 12 units of work in any single subject.

4. Students with an OAC (or Grade 12 U course) in Greek or Latin will register for six units of Level I Greek or Latin in lieu of the corresponding 1Z03 and 1ZZ3 courses.

5. Humanities I students are restricted to taking no more than 12 units of introductory language courses.

6. ART 1F06: Entrance to any Honours Art Program requires the permission of the School of the Arts as these programs and courses have limited enrolments. Students who wish to enrol in ART 1F06 must first complete a portfolio interview. Portfolio interviews occur between January and April each year. Acceptance into ART 1F06 will be guaranteed for entrants into ART 1F06. (Late applicants will only be interviewed if space availability permits.) The portfolio should contain work in different media that represent the applicant’s creative abilities and interests. Aptitude in art, academic ability and demonstrated commitment to the discipline are considered in the selection process. In exceptional circumstances, where distance does not allow for an interview, portfolios may be submitted in the form of colour slides or photographs. Acceptance into ART 1F06 will be confirmed by written confirmation from the School of the Arts. School of the Arts verification and a Letter of Acceptance from the University guarantee a space in the program as long as the student meets the minimum academic requirements as outlined under School of the Arts programs in this section of the Calendar. Applicants for this course should use the MHA OAC code.

7. Students wishing to take Music courses other than MUSIC 1A03 or 1A06 must make arrangements with the School of the Arts for qualifying tests.

**REQUIREMENTS:**
Students admitted to Humanities I (0700) must complete 30 units as follows:
- 12 units from Course List 1 (should include six units in each of two subjects listed above)
- 18 units Electives, which may include courses from Course Lists 1 and 2

**MUSIC I**

**REQUIREMENTS**
Students admitted to Music I (0370) must complete 33 units of work as follows:
- 21 units MUSIC 1CC3, 1D03, 1E06, 1G03, 1Y03, 1Y13
- 12 units Electives

### 8. Degree Programs

Upon successful completion of Humanities I, a student may be admitted to a program of study leading toward a Bachelor of Arts degree. (Completion of Music I may lead to a Bachelor of Music or Bachelor of Arts degree.) There are three ways to complete a Bachelor's degree in the Faculty of Humanities:

#### SINGLE HONOURS PROGRAM
This involves three years of study, beyond Level I, concentrated in the work of a single discipline (e.g., History). After three years of Music study beyond Music I, students receive a B.Mus. degree.

#### COMBINED HONOURS PROGRAM
This involves three years of study, beyond Level I, concentrated in the work of two disciplines (e.g., English and Comparative Literature). In fact, a student can combine study in any two Humanities disciplines, or one Humanities discipline and a subject from another Faculty where appropriate (e.g., History and Political Science) or one Humanities discipline (e.g., Multimedia) with Japanese Studies.

#### MINOR
A minor is an option available to a student enrolled in a four-level program. A minor consists of at least 18 units of Level II, III, or IV courses beyond the designated Level I course(s), using elective units only, that meet the requirements set out in the program description. A student is responsible for ensuring that the courses taken meet these requirements. When registering for courses to be applied towards a minor, in the case of cross-listed courses, students must ensure that they register in the appropriate subject for the minor designation. Those who have the necessary requirements may apply for recognition of that minor when they graduate. If recognition for a minor is granted, this recognition will be recorded on the student’s transcript. Minors cannot be revoked once approved. Students may return for a second degree in the subject in which they have obtained a minor, but only at the Honours level. For further information please refer to **Minors** in the General Academic Regulations section of this Calendar.

#### B.A. PROGRAM
This involves two years of study, beyond Level I, concentrated in the work of a single discipline.

The content and the requirements of single Honours, Combined Honours and other B.A. programs are found after the Academic Regulations below.

There are a number of Humanities courses which may be taken as electives without prerequisites. Individual course descriptions, by Department, are given under the section entitled Course Listings.

Not only are students from other Faculties able to take individual courses which have no prerequisites, but they are also able to transfer into any of the degree programs offered by the Faculty of Humanities. For the majority of programs in the Faculty, admission may be gained after the successful completion of any Level I program at the university, providing this includes the necessary program requisites as outlined in the admission statement for each Humanities program as described under Programs for the B.A., B.A. (Honours) and B.Mus. Degrees.

### SECOND LANGUAGE PROFICIENCY

Students embarking on Humanities programs should be aware that most graduate schools require, for admission, proficiency in at least one, and frequently two, languages other than English. In this Faculty, proficiency in at least one language other than English is regarded as an essential tool for students interested in Comparative Literature and Linguistics. Generally, proficiency in more than one language is a hallmark of most highly-qualified Humanities graduates seeking the widest range of post-graduation academic and employment opportunities.

For students wishing to acquire a reading knowledge of French, a summer course, FRENCH 4R06 French 4R06, is offered in May-June. This course is intended to prepare current and incoming graduate students for the French proficiency test administered by some departments. Certain graduate programs recognize a passing mark in this course as fulfillment of the second language requirement.

### PART-TIME STUDY

Students wishing to enter any program offered by the Faculty of Humanities and pursue a program on a part-time basis should consult the appropriate Departmental Counselor(s) before making their plans.

### C. Concurrent Certificate in Applied Business Management

#### HUMAN RESOURCES MANAGEMENT SPECIALIZATION

The Concurrent Certificate in Applied Business Management is a joint initiative between McMaster University and Mohawk College. It provides eligible McMaster students with the opportunity to complete an Honours degree and a Post-Diploma College Certificate in four years of full-time study. For admission and program requirements see the Certificate and Diploma Programs Section of this Calendar, under the heading Concurrent Certificate in Applied Business Management - Human Resources Management Specialization.

### ACADEMIC REGULATIONS

#### STUDENT ACADEMIC RESPONSIBILITY

You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations section of this Calendar.

Students enrolled in Humanities programs, in addition to meeting the general Academic Regulations of the University, shall be subject to the following Faculty Regulations and Policies.

#### SPRING COUNSELLING AND ADMISSION TO LEVEL II PROGRAMS

The dates for the Spring Counselling period may vary somewhat from year to year; however, the specific dates and information will be posted on campus, outlined in the campus newspaper and will be announced in some classes. It is the student's responsibility to participate in these activities. During the Spring Counselling Period:

1. **In February**, a Majors Fair is held by departments in the Faculty of Humanities to discuss undergraduate programs, course offerings, career opportunities, etc.

2. **In March**, copies of the Undergraduate Calendar for the next year are distributed by the Office of the Registrar to students. Individual degree audits are available to students through MUGS.

3. **By April 30**, students seeking admission to a Level II program for the following Fall/Winter session, especially for a limited enrollment program such as Multimedia, must complete an application for admission to Level II in the Office of the Dean of the Faculty of Humanities in Chester New Hall, Room 112 or through MUGS. The application allows students to rank four program choices, and students will be notified of their eligibility for these choices on their grade reports in June.

#### TRANSFER TO THE FACULTY OF HUMANITIES

Students from other Faculties are able to transfer to degree programs offered by the Faculty of Humanities provided that they have obtained a Cumulative Average of at least 3.5 and have completed the necessary requirements for admission to a program.
FACULTY OF HUMANITIES

RESTATEMENT TO THE FACULTY OF HUMANITIES

A student who may not continue at the University may apply for reinstatement; however, reinstatement is not automatic or guaranteed. Students seeking reinstatement must complete the Reinstatement Request Form available at the Office of the Registrar (Gilmour Hall, Room 108) and the Faculty of Humanities (Ches­ter New Hall, Room 112). The completed form and the $50.00 fee must be submitted to the Office of the Registrar no later than 3:30 for September entry and by November 15 for January entry.

The form should explain the reasons for the student’s inadequate performance, corroborated by two Letters of Reference from qualified professionals or employers, and should include relevant documentary evidence, for example a letter from a physician outlining any medical condition that has affected the student’s performance or final grades. Reinstatement cases will be carefully screened and the evidence considered will include the student’s academic performance before and after admission to McMaster, as well as the nature of the reasons cited in the application letter, the Letters of Reference, and the accompanying documentation.

If students are reinstated at the University, their Cumulative Average will be re-set to 0.0 on zero units, although students may (at Faculty discretion) retain credit for prior work. Following reinstatement, students will be on academic probation and must complete a minimum of 60 units of work after reinstatement to be eligible for Graduation with Distinction or other recognition based on the Cumulative Average.

If at any review after reinstatement the student’s Cumulative Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

COURSE SELECTION AND COURSE CHANGES

Students are responsible for ensuring that their course selection meets the requirements of the degree program in which they are registered, that prerequisites have been met, and that the appropriate permission(s) has been obtained, if required. They should review their personal degree audit each time they cancel or add courses, and contact an Academic Advisor in the Office of the Dean of the Faculty of Humanities if they have questions, particularly if the degree audit shows unused courses. Students should also be aware that changes to their course load may affect their fees and their eligibility for scholarships and financial aid such as OSAP.

OVERLOAD

Students who wish to take more courses than recommended for a single Level of their program may do so only if their Cumulative Average is at least 7.0. A student with outstanding deferred examinations or incomplete term-work will not be permitted to overload. Students registered in the final Level of their program are permitted to overload by up to six additional units in order to become eligible to graduate.

SUMMER SCHOOL

Students who have been granted deferred examination or term-work privileges for courses taken in the preceding Winter session must secure the advance permission of the Office of the Dean of the Faculty of Humanities before registering in Spring Summer courses. A decision will be made based upon the academic record of the student and the amount of work outstanding.

LETTER OF PERMISSION

Students in good academic standing, who wish to attend another university to take courses for credit toward a McMaster degree, must first request a Letter of Permission from the Office of the Dean of the Faculty of Humanities. The letter of permission can be cancelled if a student is placed on academic probation, program probation, or required to withdraw from the University. Students should take note of any conditions on the Letter of Permission that might apply, including the requirement of a grade of at least C- for transfer credit. Courses taken at another university cannot be used to satisfy the University’s minimum residence requirement, will not be included in the calculation of the averages at McMaster, and therefore cannot be used to raise standing. The transcript designation will read COM, indicating Complete, when a C- or better is attained. It is the student’s responsibility to ensure that an official transcript from the host university is sent to the Office of the Dean of the Faculty of Humanities to earn transfer credit for work taken.

SUMMER IMMERSION PROGRAMS IN FRENCH

Students must obtain approval from the Office of the Dean of the Faculty of Humanities prior to participating in any language immersion program.

The government-sponsored summer language bursary program offers students the opportunity to take French courses at a large number of accredited institutions. Students wishing to attend another university in order to participate in a language immersion program must: (a) petition the Office of the Dean of the Faculty of Humanities, (b) submit detailed course descriptions for assessment, and (c) obtain a Letter of Permission.

Students registered in a program in French may take a maximum of six units of credit in this manner as elective work only. Students not registered in a program in French may take up to 12 units of credit.

Eligibility for Study Abroad

Students registered in any Honours or Combined Honours program in the Faculty of Humanities may apply to replace all or part of the work of their third year with an acceptable program of study taken at a university or equivalent institution approved by the Faculty of Humanities.

Honours Communication Studies

Students wishing to enter this program must complete an application for admission to Level II in mid-March in order to be considered for admission.

Students who registered in this program prior to September 2004 should contact a student advisor in the office of the associate dean, faculty of humanities, to discuss their individual program requirements.

ADMISSION

Completion of any Level I program and a Cumulative Average of at least 6.0 including an average of at least 7.0 in CMST 1A03 and 1B03. In their Level I program, students should select courses carefully in order to meet the prerequisites for courses listed in specific Streams.

NOTES

Communication Studies is an academic discipline which encompasses many fields of inquiry. Graduates of this program will have an advanced knowledge of the nature, function and evolution of communication, and will develop both practical and theoretical skills necessary to pursue careers in the field of communications.

1. Students in this program must complete two of the following Streams:

- The Language and Social Life (formerly Discourse) Stream involves the study and discovery of patterns in human language and society. Focus is placed on the art and science of persuasion, linguistic methods and the importance of language in political and social life.

- The Cultural Studies Stream focuses on the critical analysis of popular culture through film, the visual arts and a variety of other forms. Unique to the Communication approach to Cultural Studies is a focus on empirical analysis as well as the social, political and cognitive significance of popular cultures.

- The Performance Studies Stream examines artistic and everyday performances. These performances range from theatre, concerts and performance art to story telling, ceremonies and public protests. Students will examine and analyze performances and their meanings and effects with particular emphasis on the relationships between these performances and their consequences with a particular emphasis on the role of actions in social communication.

- The Mass Communication Stream focuses on the organization and functioning of information media such as television, radio, the Internet and the press as major institutions and sources of knowledge and understanding about society.

2. It is strongly recommended that students in the Language and Social Life Stream take LINGUIST 1A03 and 1B03 in Level I or Level II in order to take upper level linguistics courses.

3. Some courses are listed in more than one Stream. Students can receive credit in only one stream for such courses.

4. It is recommended that students, especially those in the Language and Social Life Stream, take six units of a language other than English.

The Faculty of Science also offers an Honours B.Sc. Kinesiology Degree. Please refer to the Faculty of Social Sciences, Programs and Degrees, Level I Programs section of this Calendar, for Kinesiology Level I requirements for admission to Honours Kinesiology (B.Sc.).

LEVEL I PROGRAM NOTES

1. INQUIRY 1SC3 may be taken as an elective. The Faculty of Science emphasizes inquiry courses. INQUIRY 1SC3 offers preparation for these courses.
2. It is possible to complete Science I and Mathematics and Statistics I through evening/summer studies. Students wishing this option should consult the Office of the Registrar for timetable information.
3. SCIENCE 1A00 is a one-hour mandatory Health and Safety course which must be completed by all Science students.
4. SCIENCE 1B00 is a web-based interactive university survival course for Science students.

For Students Registered in Science I:

5. Courses must be selected carefully to meet the admission requirements for entry to Level II of a specific program. (See Faculty of Science Program Listings in this section of the Calendar for Level II program admission requirements.) Pre-registration counselling is strongly advised. Please contact Level I Advisor of the Associate Dean (Science Studies) Office.
6. Up to six units of electives may be taken from any courses offered by any faculty provided the prerequisites have been met and provided the course is open to students in the Faculty of Science.

For Students Registered in Mathematics and Statistics I:
7. Students may also be admitted to the Honours B.Sc. Computer Science programs upon successful completion of Mathematics and Statistics I, with the inclusion of COMP SCI 1MC3, 1MD3. Six additional units from Science I Course List must be completed before entry to Level IV of any Computer Science Program. It is strongly advised that these six units be completed before entry to Level II. (CHEM 1A03 and PHYSICS 1B03 are the recommended additional six units.)
8. Up to 18 units of electives may be taken from any courses offered by any faculty provided the prerequisites have been met and provided the course is open to students in the Faculty of Science.

For Students Registered in Medical Radiation Sciences I:
9. As places in the Medical Radiation Sciences program are limited, admission is by selection, and possession of published minimum requirements does not guarantee admission.
10. The University reserves the right to grant admission to a limited number of students, and to refuse readmission to any student whose academic performance or general conduct has been unsatisfactory, or who has withdrawn from the program for a period in excess of one academic year.
11. If Grade 12 Physics U (or OAC Physics) has not been completed with a grade of at least 60%, PHYSICS 1P03 must be completed in Term I.

SCIENCE I COURSE LIST
Each course consists of three units and is completed in one term, i.e., from September to December (Term 1) or from January to April (Term 2). Some courses are offered again in the Spring/Summer Session (May to August).

STUDENT EXCHANGES

Exchange Programs Within Canada
McMaster University participates in the Canadian Scholars Exchange Program (CANEX) which includes ten universities.

International Study for Honours Level III
There are two ways to undertake international studies during Level III of an Honours program: via a Formal Exchange Program or a Third Year Study Elsewhere program.

McMaster University has formal student exchanges with universities in 26 countries abroad.

Third Year Study Elsewhere is available at universities with which McMaster University does not have a Formal Exchange Agreement.

Students registered in any Honours program in the Faculty of Science are encouraged to apply to study the whole Level III elsewhere.

To be eligible to take part in this program, students are expected to complete Level II with a Cumulative Average of at least 7.0. Students must pay all associated travel, study and living expenses. For students in need of financial assistance, OSAP (Ontario Student Assistance Program) grants, loans and bursaries may be available.

Students interested in these opportunities should begin discussions with the Associate Dean of Science about one year before they plan to enrol elsewhere.

Students must propose and submit an academic program to the Department for approval. Academic approval must be completed by the end of February for registration in the following Fall/Winter session.

Students must maintain links through correspondence with their departments at McMaster University while they are engaged in study elsewhere. All credit for work completed may only be confirmed after departments have reviewed the students' academic achievement following their return and registration in their final year of study. The maximum credit available in this way is normally 30 units for the full year of study, equivalent to Level III. In certain cases, students may be recommended for the Deans' Honour List on the basis of work undertaken in the program.

For information on the Canadian Scholars Exchange Program (CANEX), and other exchange programs, please refer to the Academic Facilities, Student Services and Organizations section of this Calendar under the heading Student Exchanges.

MINORS

Within the Faculty of Science, minors are available to students registered in an honors program only. In addition to the University's regulations governing the designation of a Minor, all Departments in the Faculty of Science require the inclusion of at least six units of Level III or IV courses to complete a Minor in a Science subject.

Depending on the student's program, there may be certain minors which are excluded. Please see the Program Notes for individual programs in this section of the Calendar.

Please see Minors in the General Academic Regulations section in this Calendar for further information.

Minors offered by the Faculty of Science include:

- Astronomy
- Biochemistry
- Biology
- Chemistry
- Computer Science
- Earth Science
- Environmental Science
- Geographical Information Systems (GIS)
- Materials Properties
- Materials Processing
- Mathematics and Statistics
- Physics
- Psychology

A minor in Geology is no longer offered. However, students who are currently working towards a minor in Geology may complete this minor according to the requirements as outlined in the 2000-2001 Undergraduate Calendar.
THREE-LEVEL B.S.C. PROGRAMS

Three-level B.Sc. programs provide a science education which is less demanding than the Honours programs. Three-level B.Sc. programs are offered in Geoscience, Life Science, Mathematical Science, and Physical Science.

Students are advised to seek counselling to ensure that their course selections are appropriate. Students who identify a subject area of emphasis should seek counselling from the corresponding department.

The program requirements for B.Sc. programs are listed under the heading Three-Level B.Sc. Programs in this section.

COURSES

SCIENCE CAPSTONE COURSES

As the capstone of a building or the keystone of an arch, a Science Capstone course is designed to provide the student with an opportunity to bring all the acquired academic skills and knowledge together in a meaningful way. It may take the form of a thesis, a senior project or an Inquiry course. Capstone courses are restricted to students in an Honours program that specifically requires the completion of such courses.

Normally, no more than six units of Science Capstone may be taken unless permission for a nine unit Senior Project or Thesis is obtained. Please refer to specific programs for their Capstone Course Lists.

FIELD COURSES

Field courses are offered through the Department of Biology and the School of Geography and Geology. Some of these courses are taken outside the Fall/Winter session, during the spring or summer.

Students who enrol in field courses must pay both:
- a fee to the department to cover travel expenses, room and board, and
- the associated tuition fee to McMaster at Fall registration.

Although students initially register for field courses through the appropriate departmental offices, it is their responsibility to include field courses on their registration forms for the appropriate Fall/Winter session.

Detailed information regarding field courses and deadlines for registration may be obtained from the individual departmental offices.

LIMITED ENROLMENT COURSES

There are two types of limited enrolment courses:

1. Limited enrolment courses requiring permission:
   - These courses have a prerequisite stated as: Permission of the instructor, department, coordinator, chair, etc.
   - During the March Counselling period and before March 31st, it is the student's responsibility to apply to the corresponding departmental office for permission for courses in which they wish to register for the following Fall/Winter session.

If a limited enrolment course is an absolute requirement for a program, students in that program have a guaranteed place in the course. This will be noted in the course prerequisites.

2. Limited enrolment courses not requiring permission:
   - These courses do not have a prerequisite stated as: Permission of the instructor, department, coordinator, chair, etc. Registration in these courses is handled on a first-come, first-served basis.

ACADEMIC REGULATIONS AND ADMINISTRATIVE INFORMATION

SPECIFIC TO THE FACULTY OF SCIENCE

STUDENT ACADEMIC RESPONSIBILITY

You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations section of this Calendar.

Students enrolled in Science programs, in addition to meeting the General Academic Regulations of the University, shall be subject to additional Faculty Regulations.

MUGSI

McMaster University General Student Information, MUGSI, is an on-line system that, among other options, enables students to track their academic progress. The Degree Audit, available on MUGSI, gives a listing of courses completed or in progress for the program and is continually updated as courses are added and successfully completed.

GENERAL ACADEMIC COUNSELLING

Counselling is available throughout the year from the Office of the Associate Dean of Science and the academic departments in the Faculty of Science. It is highly recommended that all students in the Faculty of Science make a counselling appointment with their student advisor in the Office of the Associate Dean of Science and also with their Departmental Undergraduate Advisor.

MARCH COUNSELLING

The dates for the March Counselling period may vary somewhat from year to year. The dates and information will be posted on campus, on the Web, outlined in the campus newspaper, and will be announced during classes. It is the student's responsibility to participate in March Counselling activities.

APPLICATION TO LEVEL II PROGRAMS

All Level I students who wish to be reviewed for admission to a Level II program must make application to the Faculty of Science for the following Fall/Winter session. All Level II programs may continue in the Faculty of Science, or apply to transfer to another Faculty. Students who are not successful in transferring to another Faculty may repeat or upgrade any of the previous Level I courses but are advised to take only twelve units of additional Level I courses. Only forty-two units of Level I courses may be used as credit towards a three-level program.

ACADEMIC REQUIREMENTS FOR ADMISSION TO PROGRAMS

The admission criteria for the three-level B.Sc. programs, in each of Geoscience, Life Science, Mathematical Science and Physical Science, are listed under the heading Three-Level B.Sc. Programs in this section of the Calendar. Level I students must complete the required courses with the stated grades and a Cumulative Average of at least 3.5.
The admission criteria for the Honours Programs are listed under the Department offering the program in this section of the calendar. Level I students must complete the required courses with the stated grades and a Cumulative Average of at least 6.0 is required for most Honours programs.

Students beyond Level I who wish to transfer to a Science Program must apply to transfer. Please refer to Transfers in this section of the Calendar.

LIMITED ENROLMENT PROGRAMS

Admission is limited for the following programs:

- Honours Biochemistry (Molecular Biology Specialization)
- Honours Biochemistry (Biotechnology and Genetic Engineering Specialization)
- Honours Biochemistry (Computational and Physical Biochemistry Specialization)
- Honours Biology and Psychology
- Honours Molecular Biology
- Honours Kinesiology
- Medical Radiation Sciences

All of these programs except Medical Radiation Sciences and Honours Kinesiology require a thesis or project in Level IV. Resource limitations in providing a thesis or project supervisor for each student dictate that the number of students admitted must be limited. Admission to the program is by selection based on academic achievement.

For further information please see Application to Level II Programs in this section of the Calendar.

CONTINUATION IN HONOURS B.SC. AND B.SC. PROGRAMS

For information regarding requirements for continuing in Faculty of Science programs, please see the General Academic Regulations section in this Calendar.

REINSTATEMENT TO THE FACULTY OF SCIENCE

See Reinstatement in the General Academic Regulations section in this Calendar.

READMISSION TO THE FACULTY OF SCIENCE

See Readmission in the Application Requirements section of this Calendar.

DEADLINES

The Faculty of Science will not consider applications for admission, admission to a second degree or continuing studies, registration, deleting, cancelling, or adding of courses after the deadlines stated in this Calendar under Sessional Dates and Application Procedures sections, unless documentation showing good cause is submitted to the Associate Dean of Science.

COURSE SELECTION

It is the responsibility of the student to ensure that the selection of courses meets the degree requirements for the program in which the student is registered and that the stated prerequisite requirements have been met. Students in the Faculty of Science must have completed or be registered in the courses required for Level I before they may register for courses beyond Level I.

Students registered in the final year of a three level B.Sc. program must register for all courses required for completion of the degree unless registering for fewer units than required to complete the degree.

LEVEL III, IV REQUIREMENTS

Students in Honours programs are required to take a minimum of 36 units of Level III, IV work (some programs may require more). Please see the program descriptions in this section of the Calendar for specific courses.

COURSE CHANGES

Students are responsible for ensuring that their course selection meets the requirements of their program. All course changes are subject to the deadline dates for adding, cancelling and withdrawing established by the University. (See Sessional Dates section of this Calendar.)

Beyond the September deadline date, first term three unit courses may be cancelled up to the November deadline. Students who cancel a three unit first term course may not overload in second term. Beyond the January deadline date, second term courses may not be replaced. Students who cancel a full year course by the January deadline date may add a three unit second term course.

ADDITIONAL ENROLMENT COURSE OR A COURSE REQUIRING PERMISSION/WAIVER

Permission/waiver must be obtained and entered onto the data base before a student completes the on-line registration or changes to the registration.

WORKLOAD

All programs in the Faculty of Science may be taken by full-time and part-time students, with the exception of the Honours Co-op programs. Students enrolled in Co-op programs must maintain a full academic load during the study terms of their program.

Students must maintain a full academic load during the Fall/Winter session to be eligible for scholarships available to full-time students.

Students are expected to avoid timetable conflicts among their courses, and students on a full academic load should ensure the number of courses is balanced in each term.

Students who wish to take more courses than recommended for a single level of their program may do so if their Cumulative Average on completion of the previous Fall/Winter session is at least 7.0. Students registered in the final level of their program and permitted to enroll for up to six additional units in order to become eligible to graduate.

LETTER OF PERMISSION

All students enrolled in science programs, with the exception of students registered in second degree programs, may apply to the Office of the Associate Dean of Science to take courses at another university on Letter of Permission. Students must achieve a grade of at least C- for transfer credit. The transcript designation reads COM, indicating complete, when a grade of C- or better is attained, or NC, indicating not complete, when a grade of less than C- is attained.

Required courses given by the department offering the program may not be taken elsewhere unless departmental approval is given. Courses required by the program but not given by the department offering the program may be taken elsewhere. For example, for a student registered in a Biology program, all Biology courses must be taken at McMaster, however, the required Chemistry course may be taken elsewhere. Electives may be taken elsewhere.

Courses taken at another university cannot be used to satisfy the university's minimum residence requirements, will not be included in the calculation of the Cumulative or Sessional Averages, and therefore cannot be used to raise standing. Students may take up to six units of courses towards a Minor on Letter of Permission. Students must be in good standing to be eligible to take courses on a Letter of Permission.

TRANSFERS

Students in Level II or III may be permitted to transfer between Faculty of Science programs on the recommendation of the Department concerned and with the approval of the Associate Dean of Science. Students in other Faculties may apply to transfer to a program in the Faculty of Science.

Students are eligible to apply for transfer from a B.Sc. program to a related Honours Program or between Honours programs provided that they have:

1. attained a Cumulative Average of at least 6.0,
2. completed the courses required for admission to the program
3. completed a reasonable number of Science courses with appropriate grades relevant to the program.

Permission to transfer to a program is subject to any exceptions or special restrictions outlined in the Admissions statement or the Program Notes for that program.

Note: The minimum Cumulative Average required to transfer to an Honours program in the Faculty of Science is 6.0. Students entering Level III of a three-level B.Sc. program should note that if they have completed 60 units with a Cumulative Average of 5.5, they must attain a Sessional Average of at least 7.0 on 30 units of course work to raise their Cumulative Average to 6.0. Students registered in the final year of a three-level B.Sc. Program must register for all courses required for completion of the program unless registering for fewer units than required to complete the program. A student may only be reviewed for transfer to an Honours Program two times: on completion of Level II and on completion of Level III.
TRANSFER PROCEDURES

Students in Levels II or III who wish to transfer to another program in the Faculty of Science for the following Fall/Winter session must complete an Application to Transfer to Another Program during the March Counselling period. This form must be completed and returned to the Office of the Associate Dean of Science by the end of March. Students will be notified of the results of their applications on their grade reports in early June. Program transfers are not normally permitted during the Fall/Winter academic session. Students who did not apply to transfer in March, may submit an application to transfer up to the deadline date for transfers of August 15th.

GRADUATION

From Honours B.Sc. and B.Sc. Programs

To graduate from a program, students must meet the course requirements stated in the Calendar in force when they enter that program, with the exception that a later Calendar may explicitly modify such requirements.

The requirements for graduation from these programs are described under the heading Graduation in the General Academic Regulations section in this Calendar.

Transferring to Graduate with a Three-Level B.Sc. Degree from an Honours B.Sc. Program

Students who successfully complete the first three Levels of any Honours B.Sc. degree may request permission from the Associate Dean of Science Office for transfer to graduate with a three-level B.Sc. Science degree.

SECOND BACHELOR'S DEGREE PROGRAMS

In addition to the regulations in the General Academic Regulations section in this Calendar, the following Faculty regulations apply:

For many of the four-level Honours degrees in science, a Cumulative Average of at least 7.0 (overall average of B) will be required for admission. For three-level degrees, a Cumulative Average of at least 5.0 (overall average of C) will be required for admission. Students will be admitted to Second Degree studies only if their studies involve a significant additional component of work in the subject of concentration of a program. Certain subject combinations are not permitted for Second Degrees. Courses for the Second Degree may not be completed on a Letter of Permission. Advanced credit is not given; however, if deemed appropriate, exemptions may be given. Students interested in applying for a Second Degree program should consult the Office of the Associate Dean of Science for further details.

Honours Arts & Science and Biochemistry (B.Arts.Sc; See Arts & Science Programme)

Honours Biochemistry

NOTES

1. The Honours Biochemistry program has been restructured to consist of four options: a core and three specializations. In the core, this program has a specified set of basic requirements, but otherwise allows a wide choice of other courses (including those from outside the Faculty of Science). The opportunity is therefore available for interdisciplinary studies possibly leading to a Minor in another subject. Alternatively, students may wish to select one of the specializations which are strongly recommended for students intending to pursue graduate studies. The options currently available are:

- Biochemistry (Core)
- Molecular Biology Specialization
- Biotechnology and Genetic Engineering Specialization
- Computational and Physical Biochemistry Specialization

Admission to the specializations is limited. Selection is based on academic achievement but requires, as a minimum, completion of the Science I requirements listed below for all Honours Biochemistry students.

2. Transfer between options is possible at any time, subject to satisfying the specific option requirements and enrolment limits. Registration in a specialization will be noted on the student's transcript.

3. Students in the Molecular Biology Specialization and in the Biotechnology and Genetic Engineering Specialization are normally required to take a course involving a research project or a thesis. Enrolment in any of these courses is limited and admission is dependent on academic performance. Students who fail to achieve the minimum C average required in the required course may request special permission from the department to remain in the specialization or transfer to the core option.

4. Students may apply for admission to Honours Biochemistry Co-op regardless of their option.

ADMISSION

Completion of the Science I requirements, including:

- 6 units: MATH 1A03, STATS 1CC3
- 6 units: BIOLOGY 1A03, 1AA3
- 6 units: CHEM 1A03, 1AA3
- 3 units: PHYSICS 1B03
- 3 units: from Science I Course List
- 6 units: Level I electives

2 courses: SCIENCE 1A00, 1B00

While STATS 1CC3 is strongly recommended, students will also be considered for admission if they have completed MATH 1AA3 instead of STATS 1CC3. Students with other backgrounds such as Health Sciences I may also be admissible and are encouraged to contact the Chair of the Department of Biochemistry. Students wishing to take CHEM 2PA3 and 2PB3 in Level II must complete MATH 1AA3.

MINIMUM AVERAGES/GRADES:

A Cumulative Average of 6.0 and a grade of C+ in each of four of BIOLOGY 1A03, 1AA3, CHEM 1A03, 1AA3, and MATH 1A03.

NOTES

1. There are Level II (and III) prerequisites for many Level III (and IV) courses. The prerequisites should be considered when choosing Level II and III courses.

2. Although required by Level III in the Core option, completion of CHEM 2N03 in Level II is recommended.

3. Students planning to apply for admission to a Biochemistry Co-op program must take both BIOLOGY 2B03 and CHEM 2C03 in Level II.

4. A minor in Biology or Chemistry is not permitted in the Honours Biochemistry program.

5. Students are reminded that biochemical laboratory experience is highly valuable in many careers. The laboratory course BIOCHEM 3L03 which is required for all Honours Biochemistry students may not, by itself, be sufficient for many purposes. Consequently, students who are not taking a research project or thesis course should consider BIOCHEM 4L03.

6. Students who wish to enrol in the Computational and Physical Biochemistry Specialization in Level II, must complete MATH 1AA3, 1B03 and PHYSICS 1B03 or 1BB3 by the end of Level II. PHYSICS 2A03 and 2C03 must be completed by the end of Level III.

Honours Biology
The Honours Biology program has been restructured to consist of three options: a core and two specializations. At the end of Level I, students enter the core option with a wide choice of courses, including courses in other disciplines, or may register for a specialization which reflects the department's research strengths. All options are suitable for students wishing to pursue graduate studies in Biology. The options currently available are:
- Biology (Core)
- Biodiversity Specialization
- Genetics Specialization

Students may apply to transfer between options, subject to satisfying the requirements for that option or by permission of the Chair of Biology. Students who do not meet all the requirements of a specialization will be transferred to the core option unless they obtain special permission from the Chair of Biology to remain in the specialization. Registration in a specialization will be noted on the student's transcript.
ADMISSION
Completion of Science I requirements, including:
3 units MATH 1A03
3 units from MATH 1B03, STATS 1CC3 (See Note 2 below under Notes for All Honours Biology Programs.)
6 units BIOLOGY 1A03, 1AA3
6 units CHEM 1A03, 1AA3
3 units PHYSICS 1B03
3 units from Science I Course List
6 units Level I electives
2 courses SCIENCE 1A00, 1B00

Students with other backgrounds such as Health Sciences may be admitted and are encouraged to contact the Chair of the Department of Biology.

MINIMUM AVERAGES/GRADES:
A Cumulative Average of 6.0 and an average of 6.0 in Biology 1A03, 1AA3, and a grade of C+ in each of three of CHEM 1A03, 1AA3, MATH 1A03, PHYSICS 1B03, STATS 1CC3.

NOTES FOR ALL HONOURS BIOLOGY PROGRAMS:
1. Because the majority of Level II courses are prerequisites and corequisites for other courses, students are encouraged to complete all their required Level II courses while registered in Level II. However, students may defer one or two of these courses until Level III or IV.
2. Students interested in registering in more statistics courses are encouraged to complete STATS 2MA3 in addition to STATS 1CC3. Those students wishing to include more mathematical statistics may replace STATS 1CC3, 2MA3 with STATS 2D03, 2MB3. In this case, students are advised to register in MATH 1B03 in Level I.
3. Admission to Honours Biology and Pharmacology (Co-op) requires completion of CHEM 2OA3 and 2OB3. Students are strongly recommended to register in BIOLOGY 2A03 while registered in Level II.
4. Students considering graduate studies in Biology are recommended to complete additional Biology 4C09 or 4F06.

MEDICAL RADIATION SCIENCES

NOTES
1. This program is offered jointly in partnership by Mohawk College of Applied Arts and Technology and McMaster University. Students pursue two qualifications simultaneously, and graduate the Mohawk Advanced Diploma and the McMaster Bachelor of Science in Medical Radiation Sciences.

2. The overall program comprises ten semesters within four academic years. Three full semesters are spent in clinical placement.

3. At the end of Level I, each student will be streamed into one of two available specializations, Radiography or Ultrasonography. Students may indicate their option preference; however, since enrollment is limited by number of available clinical placements, students may be streamed into a specialization that is not of their choosing.

4. All students are required to attend full-time clinical practice at a minimum of two different clinical agencies that may be located across Ontario. These agencies have contracted in advance with Mohawk College to provide specific experiences and resources during the normal clinical semester schedule; therefore, placements are not available at any other agencies or other times. The College, in accordance with established policy, will determine allocation of student to these clinical facilities. The final assignment of learning settings is constrained by the availability of site resources. Students may be required to attend clinical practice in a setting that is not of their choosing.

5. Basic Cardiac Life Support Training: All Level II students are required to have obtained a current certificate in Basic Cardiac Life Support - Level C prior to commencing their first clinical practicum.

6. Immunization and Health Screening: The Ontario Public Health Act requires that all persons working or on educational placement in a hospital setting meet criteria regarding surveillance for infectious diseases. All Level II students will be required to provide evidence of compliance with completion of mandatory immunization requirements as well as completing pre-clinical disease screening. Further information will be sent to successful applicants.

7. The University reserves the right to require the withdrawal of a student should his or her conduct be warranted. The Medical Radiation Sciences program reserves the right, at any point during the term, to remove a student from a clinical placement or laboratory setting if the student exhibits unsafe clinical practice or behavior that places clients or others at risk.

8. Graduates who wish to engage in clinical practice in ultrasonography or radiography are subject to any qualifying examinations and other requirements by the certifying and/or licensing bodies for each of these professions.

NOTES
1. This program consists of five options: a core and four Specializations. The core of this program consists of a specific set of basic requirements but otherwise allows a wide choice of other courses (including those from outside the Faculty of Science). The opportunity is therefore available for interdisciplinary studies possibly leading to a Minor in another subject. Alternatively, students may wish to follow one of several specializations which are more appropriate for graduate studies in Physics or Astronomy. The options currently available are:
   • Physics (Core) (formerly Interdisciplinary)
   • Astrophysics Specialization
   • Biophysics Specialization
   • Computation and Theory Specialization
   • Experimental Specialization
2. Students will be registered in the Physics (Core) (formerly Interdisciplinary) until they elect otherwise. Transfer between options is possible at any time, subject to satisfying the requirements for that option. Registration in a specific specialization will be noted on the student's transcript.
3. Admission toHonours Physics Co-op is in Level III and possible from any of these options.
4. The Physics Department considers the Astrophysics, Biophysics, Computation and Theory or Experimental Specializations to be more appropriate for graduate studies in Physics.
5. A minor in Astronomy or Mathematics or Mathematics and Statistics is not permitted in the Honours Physics program.

6. For the Biophysics Specialization, PHYSICS 4S03 may count towards the nine units from Levels III, IV Astronomy, Mathematics, Physics required in Level IV of the core.
7. Students wishing to take Level III, IV Biology courses must complete the prerequisites required for these courses. Most require at least one of BIOLOGY 2B03, 2C03.

   - Evolution and Social Behaviour Specialization

   Students who choose not to specialize will remain in the Honours Psychology (Core) program.

2. Registration in a specialization will be noted on the student's transcript.

ADMISION

Completion of the Science I requirements, including:
6 units MATH 1A03, STATS 1CC3 (See Note 5 below)
3 units from BIOLOGY 1A03, 1AA3

KINESIOL 3E03 (Neural Control of Human Movement) may be taken as a substitute for three units of Level III Psychology. KINESIOL 4P03 (The Brain and Human Movement) may be taken as a substitute for three units of Level IV Psychology.

4. MATH 1B03 (Linear Algebra I) is strongly recommended for students intending to pursue graduate work in Psychology. One of MATH 1J03 (Mathematical Computing), COMP SCI 1MC3 (Computer Science I) or COMP SCI 1SA3 (Computing Fundamentals) is highly recommended for students in the Behavioural Neuroscience and Cognition and Perception Specializations, and for students intending to pursue graduate work in Psychology.

5. Students wishing to have more mathematical statistics may replace STATS 1CC3 and PSYCH 2RR3 with STATS 2D03 and 2MB3. In this case, students are advised to take MATH 1B03 in Level I and consult with a departmental advisor.

B. Degree Programs

HONOURS PROGRAMS (HONOURS BACHELOR OF ARTS AND HONOURS BACHELOR OF KINESIOLOGY)

Honours Bachelor of Arts programs and the Honours Bachelor of Kinesiology degree program consist of a total of 120 units of work normally completed over four years. Honours programs provide a concentration in the particular field, as well as an extended time of study, and are normally a requirement for those who contemplate proceeding to graduate studies. Kinesiology students who successfully complete all requirements of the first three levels of an Honours Kinesiology degree may request permission of the Office of the Associate Dean of Social Sciences for transfer to graduate studies at the Master's level. Students enrolled in an Honours program in the Faculty of Social Sciences, with the exception of Honours Psychology, in addition to meeting the University requirements for an Honours degree (see the General Academic Regulations section in this Calendar) must also fulfill the following breadth and skills requirements prescribed by the Faculty:

• six units from the Faculty of Humanities and/or the Department of Religious Studies. (Students enrolled in Religious Studies programs are required to complete six units from the Faculty of Humanities)
• research methods/statistics as prescribed by the Department(s)
• a course in critical thinking (HUMAN 2C03)

Eligibility for Honours Kinesiology: Admission to Level II of the Honours Kinesiology program requires completion of Kinesiology I with a Cumulative Average of at least 6.0 including an average of at least 6.0 in KINESIOL 1A06, 1E03, 1H03. Kinesiology students who fail to meet these minimum requirements but have a C.A. of at least 3.5 may register in Level II Kinesiology (General) and will be given the opportunity to complete the Level II Honours Kinesiology program requirements in an attempt to qualify for Honours Kinesiology at their next review. Such students are strongly encouraged to seek academic counselling prior to registration.

Honours Bachelor of Arts (Specialist Option): Economics, offers an Honours (Specialist Option) program which involves greater concentration of work in Economics.
Combined Honours Bachelor of Arts Programs: Subject to possible timetable restrictions, and provided that the student meets the requirements for entry into each of the relevant Honours programs, a student may combine work in any two departments and be graduated with a Combined Honours degree. These combinations are available within the Faculty, with programs in the Faculty of Humanities, and with the Arts and Science Programme. All Combined Honours programs must be approved by both Departments concerned as well as by the Office of the Associate Dean(s). Students will normally complete approximately 36 units of work beyond Level I in each component of the program (normally 12 units per level in each subject). The Honours B.Kin. degree is not available in combination with another subject.

Minor: A minor is an option available to students enrolled in a four- or five-level program. Normally students must complete a minimum of 24 units in the minor subject. With approval, up to six units taken to satisfy program requirements may also be used toward the requirements of a minor. Students are responsible for ensuring that the courses taken meet the requirements for a minor. Students who have the necessary requirements may apply for recognition of that minor when they graduate. If granted, this recognition will be recorded on the student’s transcript. For further information see Minors in the General Academic Regulations section of this calendar.

Combined B.A./B.S.W.: The School of Social Work offers a Combined B.A./B.S.W. program of studies leading to a B.A. and a B.S.W. degree. (See program description in this section.)

The B.S.W. degree may be attained separately as a subsequent degree by those students who have already received one or more undergraduate degrees.

Bachelor of Kinesiology (Major): The Department of Kinesiology is phasing out its program of studies leading to the B.Kin. Major Program. The (Honours) program description in this section.) The B.Kin. Major Program consists of a total of 120 units of work, normally completed over four years. The last entry into Level III of the program for qualified students is September 2004.

Bachelor of Arts Programs: B.A. programs consist of a total of 90 units of work, normally completed over three years.

Three-level Combined Bachelor’s degree programs are available in Indigenous Studies and Another Subject. The other subject may be from the Faculty of Social Sciences or the Faculty of Humanities. These programs may also be combined with the B.S.W. at a four-level program.

Internship Options: Internships allow students to explore careers, to develop employability skills and to make important contacts for job searches after graduation. The Faculty of Social Sciences offers both part-time and full-time, non-credit, paid work opportunities of 4, 8, or 12 months duration. Part-time and summer internships are open to all students and provide valuable workplace experience without extending their degree. Full-time internships of 8 months or more, require registration in an Honours program and there is a nominal administrative fee. Only those students who have successfully completed all of their Level 1 program requirements and SOC SCI 2E01 may apply for posted opportunities. Internships must be undertaken before a student has completed all requirements for the degree. A brief notation describing the internship is placed on the student’s transcript upon receipt of a job report from the student and a performance evaluation by the employer.

Further details of internship options may be obtained from:

PART-TIME STUDIES

Subject to limitations of course offerings, a student may pursue on a part-time basis any program in the Faculty of Social Sciences, except for the Kinesiology programs.

ACADEMIC REGULATIONS

STUDENT ACADEMIC RESPONSIBILITY

You are responsible for adhering to the statement on student academic responsibility found in the General Academic Regulations section of this Calendar.

Students enrolled in a program in the Faculty of Social Sciences, in addition to meeting the Academic Regulations of the University, shall be subject to the following regulations of the Faculty of Social Sciences.

ADMISSION TO LEVEL II PROGRAMS

Any student seeking admission to a Level II program in the Faculty of Social Sciences, with the exception of Combined B.A./B.S.W. programs, for the following Fall/Winter session must submit an Application for Admission to Level II through MUGSI by April 30. The application allows students to rank four program choices. Students will be notified of their eligibility for the Level II programs to which they have applied on their grade report in June.

TRANSFER TO THE FACULTY OF SOCIAL SCIENCES

Students from other Faculties are able to transfer to degree programs offered by the Faculty of Social Sciences provided they have obtained a Cumulative Average of at least 3.5 and have completed the necessary admission requirements.

Students who do not meet these requirements must consult with the Office of the Associate Dean. Requests for transfer will be considered at the same time as applications for reinstatement (see below).

TRANSFER/APPLICATION TO KINESIOLOGY

Any student seeking transfer/admission to Kinesiology I for the following Fall/Winter session must submit an Application for Admission through MUGSI by April 30. The application allows students to rank four program choices. Students will be notified of their eligibility for transfer to Kinesiology I on their grade reports in June.

A limited number of exceptionally qualified students are admitted each year. To be considered, applicants must have an average of at least 8.0 (B) on a minimum of 24 units of university work taken on a full-time basis. McMaster students interested in transferring may contact the Undergraduate Administrative Assistant (Kinesiology) or the Office of the Associate Dean, Social Sciences. Students transferring from another university should see the Admission Requirements and Application Procedures section of this Calendar.

REINSTATEMENT

A student who may not continue at the University may apply for reinstatement. Application for reinstatement must be made to the Office of the Registrar using the Reinstatement Request Form by the deadline for the Sessional Dates section of this Calendar. Reinstatement forms will be carefully reviewed and the evidence considered will include the student’s academic performance before and after admission to McMaster, a letter of explanation supported by two letters of reference and other appropriate documentation.

Reinstatement is not automatic or guaranteed. Decisions are normally made after June 30 for September entry. Effective September 1997, the Cumulative Average for students who are reinstated is reset to 0.0 on zero units. Credit is retained for courses in which passing grades have been achieved. NOTE: If at a review after reinstatement the Cumulative Average falls below 3.5, the student will be required to withdraw from the University for a period of at least 12 months.

Former Kinesiology students will be considered for reinstatement to Kinesiology upon completion of a minimum of 24 units of university work taken on a full-time basis in a non-Kinesiology program with a minimum average of 7.0 (B). Application forms are available from the Office of the Associate Dean or the Department of Kinesiology. The application deadline is April 30 for September entry. Reinstatement is not guaranteed.
DEADLINES
The Faculty of Social Sciences will not consider applications for admission, admission to a second degree or continuing studies, registration, or dropping and adding of courses after the deadlines stated in this Calendar under Sessional Dates and Application Procedures, unless written documentation is provided showing good cause, as determined by the Faculty.

HUMANITIES/RELIGIOUS STUDIES REQUIREMENT
Students registered in the Faculty of Social Sciences except for those in B.Kin., B.A., Honours Psychology and those completing a B.A. with a B.S.W., are required to complete six units of courses chosen from the Faculty of Humanities and/or the Department of Religious Studies.

Students enrolled in Religious Studies programs are required to complete six units from the Faculty of Humanities.

Students in the B.A. Psychology programs should note the additional Humanities or Science requirements.

ACADEMIC ADVISING
The aim of academic advising is to help students tailor a program of studies to fit their interests. Advising also involves reviewing these interests from time to time to accommodate changing plans, needs and academic performance.

Advising is available throughout the year from the Office of the Associate Dean of Social Sciences and the departments or academic units in the Faculty of Social Sciences. It is highly recommended that students consult with a Departmental Undergraduate Advisor during March in conjunction with the distribution of the new Undergraduate Calendar.

AWARDS
For conditions and terms of awards for full-time and part-time students, please refer to the Undergraduate Academic Awards section of this Calendar.

OVERLOAD
Normally students may not register in more than 30 units during the Summer/Winter Session (36 units for students in a B.A./B.S.W. program). In the following circumstances an overload of up to six units may be taken:

1. If a student has a Sessional Average of at least 7.0 in the immediately preceding review period.

2. If the student is registered in the final level of his/her program.

Students wishing to register in more than 12 units during the Spring/Summer Session, or more than six units in either term of that Session may do so only with the permission of the Office the Associate Dean, Social Sciences.

WITHDRAWAL
Students who wish to withdraw from the University are required to advise the Office of the Associate Dean in writing. Students must surrender their McMaster Identification Cards to the Office of the Associate Dean to ensure the processing of any fee refunds. Students who fail to withdraw formally from any course(s) by the stated deadlines will remain registered whether or not they attend classes and will be assigned a grade.

LETTER OF PERMISSION
Students in good academic standing who wish to attend another university to take courses for credit toward a McMaster degree must first request a Letter of Permission from the Office of the Associate Dean. Students should take note of any conditions on the Letter of Permission that may apply, including the requirement of a grade of at least C- for transfer credit. Courses taken at another university cannot be used to satisfy the university's minimum residence requirements, will not be included in the calculation of the McMaster average, and therefore cannot be used to raise standing. The transcript designations will read COM, indicating complete, when a grade of C- or better is attained.

STUDENT EXCHANGE PROGRAMS
McMaster University has agreements with institutions in Canada and abroad including, Australia, France, and the United Kingdom to provide students the opportunity to participate in an exchange program for one year or a term. Exchanges allow students to gain a varied perspective on their course of study and enhance their professional and personal goals. In addition, exchange programs offer students the most inexpensive means of studying abroad as students participating in these exchanges avoid the foreign student fees by paying fees to McMaster.

All students must have completed at least one year of continuous study and be in good standing to be eligible to participate in an exchange. In most cases, students who participate in exchange programs go abroad for the third level of an Honours program.

Students interested in any exchange program must discuss their plans with their department and with the Office of the Associate Dean if they intend to transfer credit to their McMaster degree program. Such discussions should begin about one year before they plan to enrol elsewhere.

For further information please see International Study in the General Academic Regulations section in this Calendar. Information concerning Canadian Scholars Exchange Program (CANEX), can be found in the Academic Facilities, Student Services & Organizations section of this Calendar under the heading Student Exchanges.

Acceptance to the Ontario and University-wide Exchange Programs is by recommendation. Application forms can be obtained from:

Enrolment in the Combined B.A./B.S.W. program is limited. Students who intend to apply for the combined B.A. and B.S.W. program must follow the application instructions as found on the School of Social Work website: [http://www.sosci.mcmaster.ca/socwork/ugrprog/](http://www.sosci.mcmaster.ca/socwork/ugrprog/). Students who are unable to access this website must consult the School of Social Work prior to the application deadline.

All applications for admission to the School of Social Work are considered annually and must be made directly to the School well before March 1 for the Fall/Winter term. Aboriginal students (includes First Nations and Métis) may select an alternate application process. Those who wish to do so should consult the School of Social Work for details.

Applicants transferring from other universities (see Two-Tier Applications below) must also apply through the Ontario Universities' Application Centre (OUAC) and are required to meet the introductory Psychology, Sociology and Social Work prerequisites.

Students admitted to the Combined program who have completed B.A. work beyond Level I normally will require three years after admission to complete the program.

**TWO-TIER APPLICATIONS**

If you are transferring from a university other than McMaster, or a college, you must complete two application forms as follows:

1. **General Application (December)**
   
   If you wish to study full-time, obtain a 105D application form from the Admissions Office of any Ontario university. Complete the form showing both your interest in the B.A./B.S.W. program, and the subject you wish to take for the B.A. component. The form should be returned to OUAC, with the appropriate fee.

   If you wish to study part-time, complete a McMaster University Application form which can be obtained from OUAC or directly...

Graduation: To complete the B.A. (equivalent to the McMaster courses PSYCH 1A03 and 1A06, SOCIOI 1A06, SOC WORK 1A06) normally with an average of at least 6.0 or its equivalent, and evidence of personal suitability which may be evaluated by one or a combination of written statements, interviews, or tests.

An applicant is required to complete the prerequisite undergraduate degree work by April of the year in which application is made. Aboriginal students (includes First Nations and Métis) may select an alternate application process. Those who wish to do so should consult the School of Social Work for details.

Enrolment in the B.S.W. program is limited. Students who intend to apply to the B.S.W. program must follow the application instructions as found on the School of Social Work web-site: http://www.socsci.mcmaster.ca/socwork/ugrdprog/admissions_app_instructions.cfm. Students who are unable to access this web-site must contact the School of Social Work.

All applications for admission to the School of Social Work are considered annually and must be made directly to the School well before March 1 for the Fall/Winter term.

TWO-TIER APPLICATIONS

Individuals interested in the B.S.W. program must complete two application forms as follows:

1. General Application (December 1)

If you wish to study full-time, you must obtain either a 105D application form from the Admissions Office of any Ontario university or, if you are a McMaster graduate, obtain the McMaster Returning Student Application form from the Office of the Registrar, Gilmour Hall, Room 108. You must return the completed form to the appropriate office (either the Ontario Universities’ Application Centre (OUAC) or to the Office of the Registrar, McMaster University) with the appropriate fee.

If you wish to study part-time, you must obtain either a McMaster University Part-time Application form or, if you are a McMaster graduate, a McMaster Returning Student Application form from the Office of the Registrar, Gilmour Hall, Room 108. You must return the completed form to the appropriate office (either the Ontario Universities’ Application Centre or the Office of the Registrar, McMaster University) with the appropriate fee.

In order to allow adequate time for the processing of the General Application, applicants are advised to submit their applications by December 1.

2. Supplementary Application (March 1)

Students must follow the application Instructions as found on the School of Social Work web-site: http://www.socsci.mcmaster.ca/socwork/ugrdprog/admissions_app_instructions.cfm. Students who are unable to access this web-site must contact the School of Social Work prior to March 1. This form is used to decide when applicants are able to write an admissions test, which is scheduled for two dates in March of each year, both on site and at alternative testing centres outside Hamilton.

Adequate time is needed to make these arrangements and to complete the admissions process. Therefore, it is impossible to consider applicants whose Supplementary Application arrives after the March 1 deadline. Questions or concerns may be directed to the School of Social Work.

PART-TIME DEGREE STUDIES

The University offers a broad range of educational opportunities if you wish to take degree studies on a part-time basis. In addition to the daytime offerings in the Fall/Winter, there is a wide selection of evening classes available in the Fall/Winter and Spring/Summer sessions. There is a limited number of daytime classes scheduled for the Spring/Summer session.

If you take degree courses, you will associate with one of the undergraduate faculties (Business, Health Sciences, Humanities, Science or Social Sciences). By doing so, you will have the opportunity to consult with the academic counsellors of your Faculty, and with the departments whose courses are of interest to you. If your interests change, it is often possible to transfer to another department or Faculty.

The courses which you take in the early stages of your education will form the basis for choosing your program of study. The courses which you take in the early stages of your education will form the basis for choosing your program of study. The programs of study which are available entirely through evening and summer courses are indicated on the Degrees by Program chart, in the Degrees, Programs and Courses section of this Calendar. You should also familiarize yourself with the requirements and information found in the following sections: Admission Requirements, General Academic Regulations and Sessional Dates, as well as the program descriptions found in the specific Faculty sections.

ADMISSION

Before you register for any degree course or program, you must apply for admission.

- If you have already completed some university, community college, or other post-secondary education, you will be required to submit official transcripts of this work in order to be considered for admission and possible credit towards your McMaster program.
- If you satisfy the University’s normal admission requirements for full-time study, you may choose to register for part-time study in most programs.
- If you do not satisfy these requirements, you may be admitted as a Mature Student and given the opportunity to show that you can deal successfully with university work. Initially, you may take only one course at a time.

See the Admission Requirements section in this Calendar for details concerning all avenues of admission to degree study.

AVAILABILITY OF COURSES

Although both daytime and evening courses are open to all students, as a part-time student, you may have other responsibilities which restrict you to the courses offered in the evenings, winter and summer. If you can arrange to take day courses in the Fall/Winter session, the options are greatly enlarged.

Normally, publications for part-time students are made available in March for the Spring/Summer session and in June for the Fall/Winter session.

**Notes:**

1. Courses for Levels I, II, III and IV Medical Radiation Sciences, Radiography or Ultrasonography specialization are available only to students registered in the Medical Radiation Sciences program.
2. A satisfactory Police Records Check may be required for clinical placements. All costs associated with this procedure are the re-
   sponsibility of the student.
3. Students are responsible for arranging their own travel to and from 
   accommodations in learning settings external to the University and for covering any costs incurred. All students enrolled in the Medical 
   Radiation Sciences program are expected to be able to travel to any 
   learning setting in Ontario. The final assignment of learning settings for 
   any clinical practicum course is constrained by the availability of
the requested setting and resources. Students may, therefore, be required to complete a clinical practicum course in a learning setting that is not of their choosing.

4. All Level II Medical Radiation Science courses will be first offered in 2005-2006. All Level III courses will be first offered in 2006-2007 and Level IV courses will commence in 2007-2008.

Note:
The School of Nursing has a large number of part-time faculty appointed from community health-care agencies. A complete list is available from the office of the Associate Dean of Health Sciences (Nursing).
School Notes:

1. Normally, registration in all courses above Level I will require satisfactory completion of the prerequisite Nursing courses with a grade of at least C+ in graded courses or a pass in clinical practice courses. (See Faculty of Health Sciences, School of Nursing, Academic Regulations section in this Calendar.)

2. Normally, Level I, II, III, and IV Nursing courses are available only to students registered in the B.Sc.N. Program.

3. A satisfactory Police Records Check may be required for some clinical placements. All costs associated with this procedure are the responsibility of the student.

4. Students are responsible for arranging their own travel to and from learning settings external to the University and for covering any costs incurred. All students who enrol in the B.Sc.N. Program are expected to travel to any learning setting in Hamilton and the surrounding area (McMaster and Mohawk) and Kitchener-Waterloo and surrounding area (Conestoga).

5. Students in any stream who register for a clinical lab course in Level III or above must also submit a Placement Preference form to the Placement Coordinator. The Student Placement Information System (SPIS) at www.fhs.mcmaster.ca/nursing/placements features detailed information about the selection of placement settings and the deadlines for submission of Placement Preferences. Students who fail to register for a placement before the published deadline but who register for the course at least two months prior to the date it is to commence will be assigned a placement setting without consideration of their preferences. Students who do not register two months in advance and who fail to meet the submission deadline will normally be required to defer their placement until the next term in which the course is offered.

The final assignment of learning settings for any course is constrained by the availability of the requested setting and faculty resources. Students may, therefore, be required to complete the practicum component of a course in a learning setting that is not of their choosing.

6. The Nursing Leadership/Management courses are open only to students registered in the Nursing Leadership/Management program, which was previously administered and is currently endorsed by the Canadian Nurses Association. Students in the B.Sc.N. (B) Stream may apply to the coordinator of the Nursing Leadership/Management program for permission to take these courses.

7. The Paediatric and Adult Oncology courses are open to nurses working in or who have an interest in paediatric or adult oncology respectively. A candidate must be currently registered as a nurse in a province or territory in Canada.

8. The Psychiatric-Mental Health courses are open to nurses working in or who have an interest in psychiatry and mental health. A candidate must be currently registered as a nurse in a province or territory in Canada.

Department Notes:
1. The Department of Political Science offers courses in Canadian Politics, Comparative Politics, Political Theory, International Politics and Research Methods.
2. Not every Political Science course listed in this Calendar is offered every year. Students should consult the Department after April 1st for the list of courses that will be offered in the following academic year.
3. All students are encouraged to seek advice from members of the Department in developing a program of study. All Honours students are strongly advised to discuss their program with an undergraduate advisor to ensure that it meets Departmental requirements.
4. POL SCI 2006 (previously 2F06) and 3N06 are required for students in Honours Political Science programs. These two courses are recommended for students in B.A. programs.
5. Students should be alerted to those Level II and III courses that are required to qualify for a number of Level IV courses. Students who wish to enter courses but who lack the necessary prerequisites must obtain the permission of the instructor.
6. Level III courses identified as Enrolment is limited have a limit of 50 students. Although priority is given to Political Science students, many Level III courses have spaces for other students.
7. Some Level III courses do not have course prerequisites. However, students without related Level II courses should contact one of the Department's undergraduate advisors or the course instructor to determine whether they have the appropriate academic background for any specific Level III course.
8. With the exception of POL SCI 4206, enrollment in all Level IV courses is limited. In courses cross-listed in the Graduate Calendar (POL SCI 4F05, 4G06, 4F06), the limit is 14 undergraduate students; in all others, the limit is 18. Admission to Level IV limited enrolment courses is by pre-registration preferential ballot.
All students seeking registration in Level IV courses for the Fall/Winter Session including part-time degree students, are urged to consult the Departmental Office (Kenneth Taylor Hall, Room 527) no later than May 1, regarding balloting for the following academic year. Permission from the Department will be required to complete registration in Level IV limited-enrolment courses.

The University Library System consists of Mills Memorial Library (Humanities and Social Sciences), the Innis Library in Kenneth Taylor Hall, containing a collection of business materials, the H.G. Thode Library of Science and Engineering, and the Health Sciences Library in the Health Sciences Centre. An online catalogue covering the holdings of all libraries is available and stacks are open to all library users.

The collection in 2002 contained more than 1,911,000 volumes, over 3,800 electronic journals and 11,980 linear feet of archival material. Current periodical titles number about 12,000.

The McMaster University Libraries Gateway (http://library.mcmaster.ca) contains information on collections, hours and services in all the campus libraries; and is the access point to thousands of electronic resources provided by the libraries. An on-line tutorial, http://dot@mac is also available through the Gateway. Service is maintained at key Reference points in the various libraries and in-library instructional sessions are available.

Mills Library has several collections - Reference, Periodicals, Government Publications, Music, Maps, and Reserve, which is used mainly by Undergraduates.

The William Ready Division of Archives and Research Collections in Mills Library contains rare books, manuscripts and special book and archival collections, which afford many opportunities for original research. Of outstanding interest are the Bertrand Russell Archives, a massive collection of correspondence and manuscripts supported by books, journal articles, secondary literature, tapes, films and personal memorabilia.

The Eighteenth-Century Collection of British material numbers over 35,000 volumes and is the major Canadian collection in the field. Library fellowships in Eighteenth-Century Studies are offered annually. Among more modern materials are the papers of Vera Brittain, Anthony Burgess, Marian Engel, Robert Fulford, Farley Mowat, Peter Newman, Matt Cohen and many others.

Business interests are reflected in such files as the General Steel Wares Archives, the J.M. Pigott Archives, the Macmillan of Canada Archives, the Clarke Irwin Archives, and the McClelland and Stewart Archives. Canadian social and political interests are documented in papers from the Canadian Union of Students, the Canadian Youth Congress, the SUPA/CUCND papers and other related collections. There are holdings of the records of a number of labour unions, including USWA Local 1005, USWA, District 6, United Glass and Ceramic Workers (Canada), and the Hamilton and District Labour Council.

CIS provides computing services in support of both administrative and networking activities. CIS manages a campus-wide network which is linked to the Internet. MUGSI (McMaster Undergraduate Student Information) provides students access to their academic and personal data via the web. Students can register and change courses on the web using SOLAR (Student Online Academic Registration).

Student computing labs for academic use, equipped with a minimum of Pentium III 600s, are located in Burke Sciences Building, Rooms 240-245, John Hodgins Engineering Building, Room 234, Arthur Bourns Building, Room 166, Kenneth Taylor Hall, Rooms B111, B120 and B123 and the Health Sciences Library. All labs provide access to the Internet, popular word-processing and spreadsheet packages as well as various computing languages, statistical applications and specialized course software provided by instructors. Student consultants are available to assist customers in most of these computer labs. Assistance is also available at the Main CIS Office located in Arthur Bourns Building, Room 132.

Every undergraduate and graduate student can register for a CIS account that includes an email account, web proxy server account, Web CT account, fee for service modem pool account ($0.50 per hour for 56k) and a printing account ($0.10 per page for laser printing). All of the McMaster residences have network wiring allowing students to access the Internet from the convenience of their room. This service is included in the residence fee.

In addition to the facilities operated by CIS, there is computer equipment located in various departments to support specific academic programs.

CENTRE FOR LEADERSHIP IN LEARNING

General Sciences Building, Room 217, ext. 24540

Web Address
http://www.mcmaster.ca/cll

E-mail Address
cll@mcmaster.ca
The Centre for Leadership in Learning is a resource centre for people who teach at McMaster. Its main goals are:

1. To provide opportunities for faculty and graduate students to build teaching skills and, in particular, to develop skills in self-directed learning, inquiry and other innovative teaching models.
2. To assist faculty in investigating and using new technologies to enhance learning for our students.
3. To offer advice on policy and projects that support good teaching (e.g., award programs and the evaluation of teaching).
4. To assist individual faculty members and groups of faculty in conducting educational research to understand how students learn and what makes for effective teaching within a university environment.
5. To support and encourage innovation.
6. To assist and support the testing and evaluation of new learning models that build upon the inquiry approach and other innovative teaching models pioneered by McMaster University.
7. To share our knowledge of best teaching practices in higher education to improve the quality of education locally, nationally and internationally.
8. To enable the circulation of teaching and learning insights.

The Centre's activities include:

The Inquiry Project: The Centre assists and supports the development, evaluation, and dissemination of the McMaster Inquiry Project as part of its larger Program for Active Learning. The central goal is to incorporate the concept of student as active learner throughout the entire undergraduate experience.

Learning Innovation Grants: These grants will assist faculty to apply and evaluate a variety of innovative educational strategies and will support applied research into teaching and learning in higher education.

- The Centre invites applications for projects aimed at the improvement of teaching and learning at McMaster. Groups of individual instructors, teaching assistants, students or departments may apply. Applications for grants up to $1,000 may be submitted at any time. Applications for grants over $1,000 are solicited annually, usually in January, with a deadline of mid-February. Detailed criteria are available on request.
- A Special Grant for New Faculty of $10,000 to refine courses after the first three years.
- Five Departmental Grants of $25,000/year will be available to assist major departmental initiatives that take place over several years.

Learning Technologies: Characteristics of technology offer a new tool to promote learning and to complement active and self-directed learning. The Centre will be able to put you in contact with people who have expertise in technology and its use in education.

Activities for Teaching Assistants: The Centre plans and organizes T.A. Day, a campus-wide welcome and orientation program for teaching assistants. It also offers a series of mini-courses designed for graduate students who are about to apply for or take up their first position as a faculty member or a non-academic professional. The Centre also offers a credit course in teaching to help graduate students become familiar with the literature on university teaching and to develop some basic skills in the practical aspects of teaching.

Workshops, Seminars and Conferences: A wide variety of events are offered, conducted by McMaster faculty, visiting resource people and Centre staff. Generally, the topics are ones requested by instructors or departments and typically include subjects such as teaching large classes, self-directed learning, research on learning and teaching methods, lecturing, small group discussion, simulations and the use of technology in education.

Peer Consultation: The Centre has a group of faculty members who are trained to help other instructors collect information on how a course is going. The process is designed to give instructors feedback on a course, not to give advice on how to teach it. The ultimate goal is to improve the quality of student learning. All communications are confidential, and every peer consultant has experienced the process as a client as well as a consultant.

Refining a Course: This model of course consultation takes approximately 2.5 hours. The course instructor, the students in a particular course, and a third party come together early in the term with the intention of modifying one particular course. Since the instructor has final responsibility, he or she initiates the process and sets the boundaries for what can be modified.

Library Resources: The Centre Library is a collection of over 6,000 books, articles and journals on university teaching and learning. It is an excellent way to find ideas for improving and promoting active learning. You can visit the Centre Library in the General Sciences Building, Room 217 between the hours of 9:00 a.m. and 5:00 p.m. Alternatively, you can use keywords to search much of our library from our book site.

Centre Home Page: A selection of teaching tips and other information about the Centre are available at the following website: http://www.mcmaster.ca/cll.

Even if accommodation or assistance is not immediately required, students are encouraged to maintain contact with the Centre in case a need for assistance should arise at a later date.

The Centre assists students with issues concerning the accessibility of campus facilities, the provision of special equipment and alternative media formats and other issues. It provides support for students with chronic medical and mental health disabilities and students who are deaf or hard of hearing. It also offers counselling, advice, support and workshops to help students meet their educational objectives.

English as a Second Language (ESL) Support @ Mac

If their native language is not English, students may wish to use one or more of the following services: daytime courses in Listening/Speaking and Reading/Writing for Academic Excellence; evening conversation classes in English; Speakeasy (one-on-one conversation) and the Conversation Circle (group-based); Opening Doors: Preparation for Employment; or The Writing Clinic

All classes are non-credit and free to all McMaster students. For more information on any of the ESL programs, please visit our website at http://csd.mcmaster.ca/ESL.htm, contact the Centre, or contact the ESL coordinators at csd@epl.mcmaster.ca.

The Department of Athletics and Recreation provides a wide variety of opportunities for students involved in high performance athletic competition, intramural and club competition as well as recreation, fitness and instructional and outdoor recreation programs. A diverse program of recreational activities is available for those who wish to keep fit, compete in active pursuits at their own level, and enjoy sports and active living opportunities of their choice. Access to the various facilities on campus is open to all McMaster students.

The facilities include a 50-metre pool, an outdoor 400-metre track, eight tennis courts, several gyms, dance studio and a fitness centre, covering 7,700 square feet, known as The Pulse. It features computerized cardiovascular equipment, circuit training, aerobic floor and a comprehensive strength training area. An additional aerobics floor of 2454 square feet in the Activity Centre completes the Pulse programming.

The Department of Athletics and Recreation ALTITUDE program utilizes our newest facility, the 50-foot Alpine Tower and Team Development Course. The first of its kind in Canada, it includes 32 climbing routes, rope ladders, swinging logs, a giant swing and low ropes elements.

Many different club activities are available, along with instructional assistance. Off-campus field trips in canoeing, rock climbing, horseback riding, hiking and many other opportunities are offered.

A highly developed intramural program is a very popular outlet for student activity. Intramurals run from early fall until late spring and provide students with a competitive environment that still fosters social interaction.

The varsity program at McMaster fields 27 teams competing at the provincial (OUA) and national (CIS) level. There are also two inter-university club teams competing at various levels. Highly skilled coaches help McMaster athletes achieve their potential while competing against other universities in Ontario and across Canada. The outstanding efforts of McMaster's student-athletes and the social involvement of student supporters are focal points of student life on campus. Varsity events are a major source of school spirit for competitors and spectators alike. The Department of Athletics and Recreation takes pride in the quality programs and services provided to the McMaster Community, and urges all members of the Community to take advantage of its facilities and programs.

Following convocation, all graduates of McMaster University automatically become members of the McMaster Alumni Association (MAA) and join our over 100,000 alumni living in over 125 countries. The Association’s mission statement addresses a number of goals: support of McMaster University, involvement of alumni, recognition of alumni achievements, alumni services and benefits, alumni communication, and involvement of current students.

Our alumni branch program creates connections in geographic areas like Brantford, Vancouver, Ottawa, Toronto and Hong Kong. Branches also connect alumni to their faculty or department through groups like the Nursing Alumni Branch and Michael G. DeGroote School of Business Alumni Association. Still other branches create connections among Mac grads who share a common interest or affinity, like the MSU Alumni Branch or Athletics Alumni Association.

The MAA also offers programs in the greater Hamilton community. The McMaster Alumni Connection (MAC) Luncheon Series brings high profile speakers to downtown Hamilton to talk with McMaster alumni and friends, and the Albert Lager Event Series expands your educational relationship with Mac into a lifelong affair by providing fun and unique opportunities to enjoy lectures, trips and seminars. Alumni Weekend occurs every year in June and is the largest single alumni event. It incorporates class reunions and other events like the Alumni Gallery Induction Ceremony designed to attract alumni to the McMaster campus.

The Association also gives its members the chance to obtain unique or discounted products or services through its Services and Benefits portfolio. Alumni can experience fantastic trips, order CDs and DVDs on-line, obtain unique McMaster merchandise, use their McMaster MasterCard to help benefit the Association, receive high-quality home and auto insurance at group rates, or investigate the other services offered through the MAA.

The McMaster Alumni Association also acts as your advocate, with representatives on the University Senate and Board of Governors. The University Senate, acting on behalf of generous benefactors and donors to the University, bestows academic awards on entering, in-course and graduating students to encourage and recognize high levels of scholarship. In recognizing such scholastic achievement, the University requires all recipients of academic awards to fulfill a set of general conditions, in addition to meeting the particular terms attached to individual academic awards. The general conditions and terms have been established to ensure equity in competition and a high academic standing. Any interpretation of the conditions attached to academic awards is solely the prerogative of the Undergraduate Council.

TERMINOLOGY

An explanation of the terminology used to describe Academic Awards is provided in the sections of the Calendar described below. Please refer to the Glossary section of this Calendar for definitions of Continuing Students, Cumulative Average (CA), Level, Post-Degree Students, Review, and Reviews Period.

Baccalaureate Degrees are those listed in the Degrees and Programs section of this calendar. The abbreviations of which start with the letter B, such as B.A., B.Com.

Failures are determined by reviewing period, not by session. They include failures in Extra courses.

Full-time Student for academic purposes is an undergraduate student who is registered in at least 24 units in the Fall/Winter session, including Extra Courses.

Graduation Awards are granted to eligible students on the completion of their graduating session.

In-Course Awards are granted to eligible students, based on academic achievement in other than their graduating session.

Part-time Studies Awards are referred to under Category C. To be eligible for these awards, students must have been registered in at least 50% of all units attempted at McMaster, while fulfilling the University's definition of a part-time student as described in the Glossary section of this Calendar.

Session, for scholarship purposes, refers to the Fall/Winter session. The Fall/Winter session is the period from September to April as defined in the Sessional Dates section of this Calendar.

Sessional Average (SA) is a weighted average based on the grades attained in a session. Overload courses and Extra courses are included in the Sessional Average.

Reviewing Period for scholarship purposes normally refers to work completed during the Fall/Winter session. Please refer to the Glossary section of this Calendar.

GENERAL CONDITIONS FOR ACADEMIC AWARDS

1. The University Academic Awards listed below are provided exclusively for students entering, registered in, or graduating from baccalaureate degree programs at McMaster University. Continuing Students, Post-degree Students, and students registered in the McMaster Medical program are not eligible for these awards.

2. To ensure a wide distribution of the limited number of awards, there are restrictions on the number of awards that a student may receive. An eligible student may be granted:
   a) travel scholarships and awards such as books and medals; and
   b) awards continued from a previous year (including entrance scholarships), except as provided by the particular terms of an award; and
   c) either one award greater than or equal to the value of a Senate Scholarship ($800 in 2003-2004) and one award of less than the value of a Senate Scholarship, or two awards of less than the value of a Senate Scholarship.

3. The monetary benefits of travel scholarships, awards won by graduating students, and awards such as books and medals will be disbursed directly to the student.

4. The monetary benefits of other awards will be disbursed only if the recipient is registered in a baccalaureate degree program, or a specific program when explicitly required by terms of award, at McMaster University in the next Fall/Winter session after the award was earned and will be allocated in the following manner:
   a) the monetary benefits of award(s) will be credited to the student's academic fees account up to the value of the academic fees for the level and program in which the student is registered.
   b) the monetary benefits of award(s) which exceed the value of academic fees for the level and program in which the student is registered will be credited to one or more of the student's other University accounts (e.g., residence and/or bookstore, etc.).

Amounts in excess of the student's monetary obligation to the University will be disbursed directly to the student in November or December.

5. Awards credited to the student's academic fees account are not refundable in cash under any circumstances.

6. Awards credited to the student's academic fees account may be used only to defray academic fees for baccalaureate degree courses taken during the Fall/Winter session in which the account is credited with the awards. Students wishing to defer the benefits of an award to a later session should apply to the Office of Student Financial Aid & Scholarships. Approval of applications is not automatic, and deferrals are not normally granted for more than one calendar year.

7. Students holding four-year, full-fees scholarships who choose to accelerate their program and to complete their degree earlier than normal by completing Spring/Summer session courses and who wish to employ the benefits of their award to defray the academic fees for such courses should apply to the Office of Student Financial Aid & Scholarships. Approval of applications is not automatic.

8. The University reserves the right not to grant an award in the absence of a suitable candidate, and to limit the number of awards where there are too few suitable candidates. The University reserves the right to withdraw, or amend the terms of, any award, and to suspend granting of an award or to adjust the stated value of an award in years in which insufficient investment income is available due to fluctuations in investment markets.

9. Appeals on the basis of exceptional circumstances must be submitted in writing to the Office of Student Financial Aid & Scholarships on or before November 1, 2004. No appeal will be considered after that date. To submit an appeal, students must provide a covering letter outlining the situation and include relevant documentation which might include a letter of support from the Associate Dean/Director of the program and medical documentation if appropriate. The appeal must be submitted to the Undergraduate Council Awards Committee c/o the Awards Officer in Gilmour Hall, Room 120.

10. The particular terms for University Academic Awards are listed in TERMS OF AWARDS.

INDEX OF AWARDS (page 367)

To find a specific award, use the Index of Awards.
Awards for Entering Students (A)
1. These awards are provided exclusively for those qualifying for admission to Level I of a first baccalaureate degree in the Fall/Winter session as full-time students.
2. Students who have registered at any post-secondary institution at any time after graduation from high school will not be considered for an entrance award.
3. Canadian students are eligible for any entrance award regardless of where they complete their secondary school education. Any other student completing the final year of secondary school in Canada is also eligible, including CEGEP and IB students entering Level I. International students studying outside Canada are not eligible for any entrance awards administered by the Office of Student Financial Aid & Scholarships.
4. To be considered for an entrance award, students must obtain at least a first-class average in the secondary school credits required for University admission to their program of study and must apply for admission to the University not more than two years after completion of their secondary school studies.
5. Faculty or program average for entrance awards is calculated using the prerequisites for program of study plus the next best Grades 12 U or M (or OAC) courses to a total of six final grades. Courses completed after June 30, 2004 will not be used to calculate the final average for scholarship purposes. Bonus points for students in the International Baccalaureate program are included in the calculation of final admission average for scholarship purposes.
6. Registration in, or transfer to, another program of study at any time may result in forfeiture of the award. Students are advised to consult with the Office of Student Financial Aid & Scholarships and their Faculty Advisor prior to making any changes to their program of study or course load.
7. Students who withdraw or drop below 24 units on or before December 31, 2004, will lose their entrance scholarship.
8. Recipients of entrance awards that are renewable must obtain at least a 9.5 on a minimum of 24 units in the Fall/Winter session in Level I and register in the next Fall/Winter session in order to receive the second installment of the award.
9. Recipients may retain an entrance award which provides for awards beyond Level II while registered in a first baccalaureate degree program and until graduation or for four years (five years if registered in a five-level program), whichever is less. In order to retain such awards, students must complete 24 units during each successive Fall/Winter session at the University and must maintain a Sessional Average of at least 9.5 and obtain no failures.
10. In addition to meeting the General Conditions, entrance award recipients will begin their studies in the next Fall/Winter session. Students wishing to defer the benefits of an award to a later session should apply to the Office of the Registrar (Admissions) for deferral of both admission and scholarship. Approval of applications is not automatic, and deferments are not normally granted for more than one calendar year. The value of any scholarship will be the amount awarded in the original year of offer.

Awards for Full-Time, In-Course Students (B)
These awards are based on competition across the University or within a Faculty or program.

2. In addition to meeting the General Conditions, a student must remain registered as a full-time student during the Fall/Winter session immediately prior to the May review and obtain a Sessional Average of 8.0 and no failures.
3. For students who remain full-time in the Fall/Winter session, a Sessional Average will be computed, which is the weighted average of the grades in all courses taken during that session. The Sessional Average will be used to determine academic standing for the awards listed below, unless otherwise stated in the terms of a particular award.
4. The Sessional Average will be used to break any tie in the competition for awards which are based on another criterion.
